In § 71.171 (40 F.R. 354), the Atlanta, Ga., (Fulton County Airport) control zone is amended as follows:

"... Atlanta, Ga., (Fulton County Airport) Within a 5-mile radius of Fulton County Airport ... is deleted and ... Atlanta, Ga., (Charley Brown County Airport) Within a 5-mile radius of Charley Brown County Airport ... is substituted therefor.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on September 4, 1975.

LONNIE D. PARRISH,  
Acting Director, Southern Region.

[Airspace Docket No. 75-SW-41]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Alteration of Control Zone

• The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the controlled airspace in the Oklahoma City, Okla. (Tinker AFB), terminal area.

On July 21, 1975, a notice of proposed rule making was published in the FEDERAL REGISTER (40 FR 30493) stating the Federal Aviation Administration proposed to alter the controlled airspace in the Oklahoma City, Okla. (Tinker AFB), terminal area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., December 4, 1975, as hereinafter set forth.

In § 71.171 (40 FR 354), the Oklahoma City, Okla. (Tinker AFB), control zone is amended to read:

OKLAHOMA CITY, OKLA. (TINKER AFB)

That airspace within a 5-mile radius of Tinker AFB (latitude 35°24'50" N., longitude 97°23'35" W.); within 2 miles each side of the Tinker AFB VOR 357° radial extending from the 5-mile radius zone to 8 miles north of the VOR; within 2 miles each side of the Tinker AFB TACAN 003° radial extending from the 5-mile radius zone to 9.5 miles north of the TACAN; and within 2 miles each side of the Tinker AFB VOR 187° radial extending from the 5-mile radius to 6 miles south of the VOR.

Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, Tex., on September 4, 1975.

ALBERT H. THURBURN,  
Acting Director, Southwest Region.

[Airspace Docket No. 75-SO-108]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Alteration of Control Zone and Transition Area

• The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Huntsville, Alabama, control zone and transition area.

The Huntsville control zone, described in § 71.171 (40 FR 354), contains an extension predicated on the Huntsville VOR 217° radial. This extension was required to provide controlled airspace protection for the VOR-B instrument approach procedure which has been cancelled. Therefore, it is necessary to delete the extension from the description. In addition, the official name of the Huntsville-Madison County Airport has been changed to Huntsville-Madison County Jetport-Carl T. Jones Field, and it is necessary to reflect this change in the description.

The Huntsville transition area is described in § 71.181 (40 FR 441). A new VOR RWY 36 instrument approach procedure has been developed for Pryor Field and an additional six square miles of transition area is required for protection of this procedure. Since these amendments are minor in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., December 4, 1975, as hereinafter set forth.

In § 71.171 (40 FR 354), the Huntsville, Ala., control zone is amended as follows:

"... Huntsville-Madison County Airport ... is deleted and " ... Huntsville-Madison County Jetport-Carl T. Jones ... is substituted therefor, and " ... within 2 miles each side of the Huntsville VOR 217° radial, extending from the 5-mile radius zone to 0.5 mile southwest of the VOR; ... " is deleted.

In § 71.181 (40 FR 441), the Huntsville, Ala., transition area is amended as follows:

"... longitude 86°56'45" W.) ... is deleted and " ... longitude 86°56'45" W.); within 3 miles each side of the Decatur VOR 197° radial, extending from the 8.5-mile radius area to 8.5 miles south of the VOR ... is substituted therefor.

This amendment is made under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on September 3, 1975.

LONNIE D. PARRISH,  
Acting Director, Southern Region.

[Airspace Docket No. 75-SW-40]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Alteration of Transition Area

• The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the transition area at Minden, La.

On July 21, 1975, a notice of proposed rule making was published in the FEDERAL REGISTER (40 FR 30494) stating the Federal Aviation Administration proposed to alter the transition area at Minden, La.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., December 4, 1975, as hereinafter set forth.

In § 71.181 (40 FR 441), the Minden, La., transition area is amended as follows:

MINDEN, LA.

That airspace extending upward from 700 feet above the surface within a 9-mile radius of Minden-Webster Airport (latitude 32°39'00" N., longitude 93°18'00" W.).

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, Tex., on September 4, 1975.

ALBERT H. THURBURN,  
Acting Director, Southwest Region.

[Airspace Docket No. 75-SO-78]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Alteration of Transition Area

On July 21, 1975, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (40 FR 30494), stating that the Federal Aviation Administration was considering an amendment to

Part 71 of the Federal Aviation Regulations that would alter the Manning, S.C., transition area.

Interested persons were afforded an opportunity to participate in the rule-making through the submission of comments. There were no comments received.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, December 4, 1975, as hereinafter set forth.

In § 71.181 (40 F.R. 441), the Manning, S.C., transition area is amended as follows:

"... within a 1.5-mile radius of the Goat Island County Airport (latitude 33°30'26" N., longitude 80°18'41" W.); ... " would be deleted and " ... within 3 miles each side of the 197° bearing from Manning, S.C., RBN (latitude 33°35'23" N., longitude 80°12'23" W.), extending from the 6.5-mile radius area to 8.5 miles south of the RBN; ... " would be substituted therefor.

This amendment is made under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on September 4, 1975.

LONNIE D. PARRISH,  
Acting Director, Southern Region.

[Airspace Docket No. 75-WE-10]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Alteration of Transition Area; Correction

On August 15, 1975, FR Doc. 75-21407 was published in the FEDERAL REGISTER (40 FR 34333) which amended Part 71 of the Federal Aviation Regulations by altering the transition area for San Diego, California. A review of the document revealed that a typographical error had been made in one coordinate of the description. Action is taken herein to correct this error.

Since this change is editorial in nature and imposes no additional burden on any person, notice and public procedure hereon are unnecessary.

In view of the foregoing, FR Doc. 75-21407 (40 FR 34333) is amended by correcting the description of the San Diego, California transition area in part as follows.

In the text correct "latitude 30°15'00" N." to read "latitude 33°15'00" N. ... " Effective date. The effective date as originally established is retained.

This amendment is issued under the authority of sec. 307(a) of the Federal Aviation Act of 1958, as amended, 49 U.S.C. 1348(a), and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Los Angeles, California, on September 4, 1975.

LYNN L. HINK,  
Acting Director, Western Region.

#### PART 97—STANDARD INSTRUMENT

3. Section 97.27 is amended by originating, amending, or cancelling the following NDR/ADE SIAPs, effective October 1, 1975:

gand to the meaning and application of §§ 1134.3 and 1134.4 of Title 49 of the Code of Federal Regulations said sec-

Division of Uniroyal, Inc., Bethany CT 06525, had filed a pesticide petition (FAP 6H5101) with the Environmental Pro-

## RULES AND REGULATIONS

[Airspace Docket No. 75-GL-46]

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS****Alteration of VOR Federal Airways**

On July 14, 1975, a Notice of Proposed Rule Making (NPRM) (40 FR 29554) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would realign V-285 to provide a more direct routing between Goshen, Ind., and Kalamazoo, Mich., and extend V-156 between South Bend, Ind., and Kalamazoo, Mich.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. No comments were received.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., December 4, 1975, as hereinafter set forth.

Section 71.123 (40 FR 307) is amended as follows:

1. In V-156 after "South Bend, Ind." to "Kalamazoo, Mich." is added.
2. In V-285 all between "Goshen, Ind.;" and "INT Kalamazoo 014;" is deleted and "INT of the Goshen 037" and the Kalamazoo, Mich., 191° radials; Kalamazoo;" is substituted therefor.

This amendment is made under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on September 5, 1975.

WILLIAM E. BROADWATER,  
Chief, Airspace and Air  
Traffic Rules Division.

[Airspace Docket No. 75-SO-51]

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS****Designation of Transition Area**

On May 19, 1975, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (40 FR 21740), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Covington, Tenn., transition area.

Interested persons were afforded an opportunity to participate in the rule-making through the submission of comments. There were no comments received.

Subsequent to publication of the notice, the proposed instrument approach procedure for the airport was changed from Runway 19 to Runway 1. It is necessary to alter the description to reflect this change. Since this amendment is minor

in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., December 4, 1975, as hereinafter set forth.

In § 71.181 (FR 441), the following transition area is added:

**COVINGTON, TENN.**

That airspace extending upwards from 700 feet above the surface within a 6.5-mile radius of Covington Municipal Airport (Lat. 36°35'15" N., Long. 89°35'15" W.); within 3 miles each side of the 194° bearing from Covington RBN (Lat. 35°35'22" N., Long. 89°35'14" W.), extending from the 6.5-mile radius area to 8.5 miles south of the RBN.

This amendment is made under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on September 3, 1975.

LONNIE D. PARRISH,  
Acting Director, Southern Region.

[FR Doc 75-24253 Filed 9-11-75; 8:45 am]

[Airspace Docket No. 75-SO-77]

**PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS****Designation of Transition Area**

On July 23, 1975, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (40 FR 30840), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Conway, S.C., transition area.

Interested persons were afforded an opportunity to participate in the rule-making through the submission of comments. There were no comments received.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., December 4, 1975, as hereinafter set forth.

In § 71.181 (40 FR 441), the following transition area is added:

**CONWAY, S.C.**

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Conway-Horry County Airport (Lat. 33°49'13" N., Long. 79°07'16" W.); within 3 miles each side of the 296° bearing from Horry RBN (Lat. 33°49'54" N., Long. 79°07'13" W.), extending from the 6.5-mile radius area to 8.5 miles northwest of the RBN; excluding the portion that coincides with the Myrtle Beach transition area.

This amendment is made under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on September 4, 1975.

LONNIE D. PARRISH,  
Acting Director, Southern Region.

[FR Doc 75-24254 Filed 9-11-75; 8:45 am]

[Docket No. 14969; Amdt. No. 985]

**PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES****Recent Changes and Additions**

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Information Center, AIS-230, 800 Independence Avenue SW., Washington, D.C. 20591, or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of \$150 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for \$30 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or canceling the following VOR-VOR/DME SIAPs, effective October 23, 1975.

[FR Doc 75-24242 Filed 9-11-75; 8:45 am]

**Title 49—Transportation****CHAPTER X—INTERSTATE COMMERCE COMMISSION****PART 1134—CONTROL OR CONSOLIDATION OF MOTOR CARRIERS OR THEIR PROPERTIES****Computation of Gross Operating Revenues and Deduction of Revenues**

Because we have experienced considerable interpretive difficulties with re-

gard to the meaning and application of §§ 1134.3 and 1134.4 of Title 49 of the Code of Federal Regulations, said sections are hereby amended, for purposes of clarification, as set forth below.

Considerable interpretive difficulties having arisen as to the meaning and application of the guidelines originally promulgated herein with respect to Section 5(10) of the Act, 49 U.S.C. § 5(10), the provisions of this Part are hereby amended, for clarification, as follows:

1. Under § 1134.3, *Computation of gross operating revenues of carriers involved in unifications*, change the introductory paragraph to read:

In unifications under the provisions of Section 5 of the Interstate Commerce Act, the aggregate gross operating revenues of carriers attributable to transportation from the use of their respective operating rights subject to Part II of the Act, as amended, shall be deemed to have exceeded \$300,000 for the period of 12 consecutive months, ending not more than 6 months preceding the date of the agreement of the parties covering the transaction, unless otherwise shown, under each of the following circumstances:

2. Under § 1134.4, *Deduction of revenues from sources other than regulated transportation*, change paragraph (a) to read:

(a) In determining whether a proposed transaction is not subject to the provisions of Section 5, Interstate Commerce Act, applicant motor carriers, and their affiliate motor carriers must select the same 12 month period and indicate the 12-month period selected as provided in § 1134.3 and disclose the gross revenues received by each such carrier during the critical period selected and the revenues derived from sources other than transportation subject to Part II of the Act, which later revenues may be deducted from the gross revenues for the purpose of determining jurisdiction.

These interpretive amendments are effective September 12, 1975.

By order of the Commission, dated September 5, 1975.

[SEAL] ROBERT L. OSWALD,  
Secretary.

**Title 21—Food and Drugs**

[FRL 429-5]

**CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE**

[FRL 429-5; FAP6H5101/R14]

**PART 123—TOLERANCES FOR PESTICIDES IN FOOD ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY****PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY****Daminozide**

On August 22, 1975, notice was given (40 FR 36798) that Uniroyal Chemical,

Division of Uniroyal, Inc., Bethany CT 06525, had filed a pesticide petition (FAP 6H5101) with the Environmental Protection Agency (EPA). This petition proposed that 21 CFR 123.410 be amended to establish a food additive tolerance for residues of the plant regulator succinic acid 2,2-dimethylhydrazide in tomato paste or catsup at 220 parts per million (ppm), resulting from application of the plant regulator to growing tomatoes. (The chemical name, "succinic acid 2,2-dimethylhydrazide" has been changed to butanedioic acid mono (2,2-dimethylhydrazide) and the name daminozide has been accepted as the common name for the chemical.) Uniroyal Chemical subsequently amended the petition by 1) increasing the proposed tolerance for residues in tomato paste or catsup from 220 to 320 ppm, 2) expressing the food product "tomato paste or catsup" as "concentrated tomato products", and 3) proposing to amend 21 CFR 561.360 to establish a feed additive tolerance for residues of daminozide in dried tomato pomace at 600 ppm. (A related document on daminozide and the establishment of pesticide tolerances also appears in today's FEDERAL REGISTER.)

The data submitted in the petition and other relevant material have been evaluated and it is concluded that the tolerances established by amending §§ 123.410 and 561.360 will protect the public health.

Any person adversely affected by these regulations may on or before October 14, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M St., SW, East Tower, Room 1019, Washington DC 20460. Such objections should be submitted in triplicate and specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on September 12, 1975, Part 123, § 123.410, and Part 561, § 561.360, are amended as follows.

Dated: September 5, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

(Sec. 409(c)(1), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(1)) transferred to the Administrator EPA in Reorganization Plan No. 3 (35 FR 15623))

(1) Section 123.410 is amended by 1) revising the section heading to correspond with the acceptable common name, "daminozide", 2) revising the regulation to include a tolerance for concentrated tomato products, and 3) editing the section to accommodate the above changes to read as follows.

§ 123.410 Daminozide.

Tolerances are established for residues of the plant regulator daminozide

## Title 23—Highways

## CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

## PART 470—HIGHWAY SYSTEMS, FEDERAL-AID HIGHWAY SYSTEMS

• Purpose: The purpose of this document is to implement statutes regarding realignment of the Federal-aid primary, secondary, and urban systems after June 30, 1976.

Section 103 (Federal-aid systems) of Title 23, United States Code, was substantially amended by the Federal-Aid Highway Act of 1973 (Pub. L. 93-87). This regulation sets forth policies and procedures for implementing major amendments regarding functional realignment of the Federal-aid primary, secondary, and urban systems after June 30, 1976, under the provisions of 23 U.S.C. 103(b)(2), 103(c)(2), and 103(d)(2). This regulation also continues policies and procedures after June 30, 1976, under the provisions of 23 U.S.C. 103(e)(1) and (e)(3) for the Interstate System and under 23 U.S.C. 103(f) for the modification or revision of all Federal-aid systems. Although the Interstate System is a part of the Federal-aid primary system, the Interstate System is exempt from the realignment provisions applicable to the non-Interstate Federal-aid primary routes.

The existing Federal-aid primary and secondary systems are continued until June 30, 1976, under the provisions of 23 U.S.C. 103(b)(1) and 103(c)(1). A regulation for continuing these provisions, the provisions for the Interstate System under 23 U.S.C. 103(e)(1) and 103(e)(3), and the provisions for modification or revision of all Federal-aid systems under 23 U.S.C. 103(f) was published as 23 CFR 470, Subpart A. After June 30, 1976, that regulation will be de-

leted from the Code of Federal Regulations; this regulation will then replace it.

The existing Federal-aid urban system is continued until June 30, 1976, under the provisions of 23 U.S.C. 103(d)(1). A regulation for continuing this provision was published as 23 CFR 473, Subpart A. After June 30, 1976, that regulation will be deleted from the Code of Federal Regulations; this regulation will replace it.

Section 470.4(a)(2) refers to 23 CFR Part 470, Subpart B. That regulation has not yet been published, but is in the process of rulemaking. See 39 FR 36350 (October 9, 1974).

The language of this regulation and additional instructional material regarding Federal-aid highway systems will be found in Volume 6, Chapter 4, Section 7, of the Federal-Aid Highway Program Manual.

The matters affected related to grants, benefits, or contracts within the purview of 5 U.S.C. 553(a)(2), therefore a general notice of proposed rulemaking is not required.

Issued on September 4, 1975.

L. P. LAMM,  
Acting Federal  
Highway Administrator.

Appendix C.	Federal-aid Urban System.

Authority: 23 U.S.C. 103(b)(2), 103(c)(2), 103(d)(2), 103(e)(1), 103(e)(3), 103(f), and 315; 49 CFR 1.48(b)(2) and (b)(35).

## § 470.1 Purpose.

This regulation sets forth policies and procedures relating to the designation of the National System of Interstate and Defense Highways, the Federal-aid primary system, the Federal-aid secondary system, and the Federal-aid urban system after June 30, 1976.

## § 470.2 Definitions.

(a) Except as otherwise provided herein, terms defined 23 U.S.C. 101(a) are used in this regulation as so defined.

(b) As used herein:

(1) "Urban area" means an urbanized area, or in the case of an urbanized area encompassing more than one State, that part of the urbanized area in each such State, or an urban place as designated by the Bureau of the Census having a population of 5,000 or more and not within any urbanized area, within boundaries to be fixed by responsible State and local officials in cooperation with each other. Such boundaries shall, as a minimum,

encompass the entire urban place designated by the Bureau of the Census.

(2) "Rural area" means all areas of a State not included in the boundaries of urban areas.

(3) "Public road" means any road under the jurisdiction of and maintained by a public authority and open to public travel.

(4) "Rural arterial routes" means those public roads that are functionally classified as a part of the rural principal arterial system or the rural minor arterial system as described in Volume 20, Appendix 12, Highway Planning Program Manual.

(5) "Rural major collector routes" means those public roads that are functionally classified as a part of the major collector subclassification of the rural collector system as described in Volume 20, Appendix 12, Highway Planning Program Manual.

(6) "Urban arterial routes" means those public roads that are functionally classified as a part of the urban principal arterial system or the urban minor arterial system as described in Volume 20, Appendix 12, Highway Planning Program Manual.

(7) "Urban collector routes" means those public roads that are functionally classified as a part of the urban collector system as described in Volume 20, Appendix 12, Highway Planning Program Manual.

(8) "Appropriate local officials" means: (i) in urbanized areas, principal elected officials of general purpose local governments acting through the Metropolitan Planning Organization designated by the Governor, or (ii) in rural areas and urban areas not within any urbanized area, principal elected officials of general purpose local governments.

(9) For purposes of the above definition, the term "Governor" includes the Mayor of the District of Columbia; and the term "Metropolitan Planning Organization" means that organization designated by the Governor as being responsible, together with the State, for carrying out the provisions of 23 U.S.C. 134, as required by 23 U.S.C. 104(f)(3), and capable of meeting the requirements of 49 U.S.C. 1602(a)(2) and (e)(1), 49 U.S.C. 1603(a), and 49 U.S.C. 1604(g)(1) and 1604(l). This organization is the forum for cooperative decisionmaking by principal elected officials of general purpose local governments.

(10) "Control area" as it pertains to the Interstate System, means a metropolitan area, city or industrial center, a topographic feature such as a major mountain pass, a favorable location for a major river crossing, a road hub which would result in material traffic increments on the Interstate route, a place on the boundary between two States agreed to by the States concerned, or other similar point of significance.

<sup>1</sup> The Highway Planning Program Manual is available for inspection and copying as prescribed in 49 CFR, Part 7, Appendix D.

## RULES AND REGULATIONS

## § 470.3 System classification.

(a) The National System of Interstate and Defense Highways shall consist of routes of highest importance to the Nation, which connect as direct as practicable the principal metropolitan areas, cities, and industrial centers, including important routes into, through, and around urban areas, serve the national defense and, to the greatest extent possible, connect at suitable border points with routes of continental importance in Canada and Mexico.

(b) The Federal-aid primary system shall consist of an adequate system of connected main roads important to interstate, statewide, and regional travel, consisting of rural arterial routes and their extensions into or through urban areas.

(c) The Federal-aid secondary system shall consist of rural major collector routes.

(d) The Federal-aid urban system shall consist of arterial routes and collector routes, exclusive of urban extensions of the Federal-aid primary system.

## § 470.4 General procedures.

(a) Area classification. (1) All areas of a State shall be classified as either rural or urban in accordance with the definitions in § 470.2(b)(1) and (2) of this regulation.

(2) Urban area boundaries shall be established in accordance with 23 CFR Part 470, Subpart B and with Volume 4, Chapter 6, Section 3 of the Federal-Aid Highway Program Manual.

(b) Functional classification. (1) The routes of the Federal-aid primary, secondary, and urban systems shall be designated on the basis of their anticipated functional usage.

(2) The State highway agency shall have the primary responsibility for initially developing and periodically updating a statewide highway functional classification to determine anticipated functional usage. The State shall cooperate with appropriate local officials, or appropriate Federal agency in the case of areas under Federal jurisdiction, in developing and updating the functional classification.

(3) The results of the functional classification shall be submitted to the Federal Highway Administration (FHWA) for approval and when approved shall serve as an official document for designation of Federal-aid systems. The State highway agency's submittal shall include highway maps showing the functional systems, statistics regarding the mileage extent of the functional systems, and a statement that the functional classification was developed in cooperation with appropriate local officials or appropriate Federal agency in the case of areas under Federal jurisdiction.

(c) Designation of Federal-aid systems. (1) The routes of the Interstate System to the greatest extent possible, shall be designated by the State highway agency or by joint action of the State

highway agencies where the routes involve State-line connections. Interstate routes may be designated in both rural and urban areas.

(2) The routes of the Federal-aid primary system shall be designated by each State acting through its State highway agency. Federal-aid primary routes may be designated in both rural and urban areas.

(3) The routes of the Federal-aid secondary system shall be designated by each State acting through its State highway agency and appropriate local officials in cooperation with each other. No Federal-aid secondary route shall be designated in urban areas.

(4) The routes of the Federal-aid urban system shall be designated by appropriate local officials with the concurrence of the State highway agencies. The Federal-aid urban systems shall be designated in each urbanized area and such other urban areas as the State highway agency may designate. No Federal-aid urban system route shall be designated in rural areas.

(5) In urbanized areas, the designation of Federal-aid routes shall be in accordance with the planning process required pursuant to the provisions of 23 U.S.C. 134(a).

(6) In areas under Federal jurisdiction, the designation of Federal-aid routes shall be coordinated with the appropriate Federal agency.

(7) The modification or revision of Federal-aid systems shall be carried out in accordance with the above provisions for the designation of Federal-aid systems.

(d) Extent of systems. (1) The Interstate System shall not exceed 42,500 miles under the statutory provisions of 23 U.S.C. 103(e)(1) and 103(e)(3).

(2) The Federal-aid primary, secondary, and urban systems do not have a statutory limit on designated mileage, but these systems are limited in extent to the functional arterial and collector routes prescribed in § 470.3(b), (c), and (d) of this regulation.

(e) Designation of partial systems. Although the State highway agencies and appropriate local officials are encouraged to designate all routes eligible for Federal-aid system designation in the approved statewide functional classification, all of the eligible functional routes need not be designated as a part of the Federal-aid systems. Where this is the case, the designation of eligible functional routes should adhere to the following principles:

(1) In each system, routes should be designated on the basis of a planned connected system as specified in § 470.4(f).

(2) System mileage should be distributed on a reasonable and fair basis within the geographic area the system is designed to serve.

(f) Integration of systems. All Federal-aid systems shall be properly inte-

<sup>2</sup> Although not included in this regulation, limited additions to the 42,500-mile Interstate System are permitted under the provisions of 23 U.S.C. 103(e)(2) and 139(a) and (b).

## RULES AND REGULATIONS

Federal-aid route. The route number shall not exceed four digits, but it may contain more than four digits.

(2) Proposals for the Federal-aid urban system shall include a Federal-aid system map or maps, as prescribed in

the Federal Highway Administration all official actions regarding the designation, modification, or revision of Federal-aid

## RULES AND REGULATIONS

## APPENDIX B.—Primary Federal-Aid System

[State: Alpha]

## RULES AND REGULATIONS

Federal-aid route. The route number shall not exceed four digits, but it may contain less than four digits.

(h) *Federal-aid system maps.* (1) All Federal-aid systems shall be delineated on county and urban areas maps.

(2) Each Federal-aid system shall be identified on the maps by different map symbol, and each Federal-aid route shall be identified by route number.

#### § 470.5 Specific systems procedures.

(a) *Interstate system.* (1) Proposals for system actions on the Interstate System shall include a route description as illustrated in Appendix A.

(2) Proposals shall include a Federal-aid system map or maps, as prescribed in § 470.4(h) with the control areas and the affected Interstate routes marked thereon.

(3) Proposals should include a statement justifying control areas, a statement indicating agreement with adjoining States on State-line connections, and a statement providing total route mileage classified by rural and urban.

(4) Existing documentation in effect on June 30, 1976, for the Interstate System will remain effective on and after July 1, 1976. Proposals for system actions on the Interstate System after June 30, 1976, will be in accordance with the provisions of this regulation.

(b) *Federal-aid primary system.* (1) Proposals for system actions on the Federal-aid primary system shall include a brief route description and related information as illustrated in Appendix B.

(2) Proposals shall include a Federal-aid system map or maps as prescribed in § 470.4(h).

(3) All routes on the Interstate System are a part of the Federal-aid primary system.

(c) *Federal-aid secondary system.* (1) Proposals for the Federal-aid secondary system shall include a brief route description and related information as illustrated in Appendix B.

(2) Proposals shall include a Federal-aid system map or maps as prescribed in § 470.4(h).

(d) *Federal-aid urban system.* (1) Proposals for the Federal-aid urban system shall include a table listing each route by number, name, termini, and related information as illustrated in Appendix C.

(2) Proposals for the Federal-aid urban system shall include a Federal-aid system map or maps, as prescribed in § 470.4(h) with the urban area boundaries delineated thereon.

#### § 470.6 Reclassifications, deletions, and reinstatements.

(a) The reclassification and redesignation of a Federal-aid highway route from one Federal-aid system to another Federal-aid system shall not relieve the State of its obligation to the Federal Government to maintain portions thereof constructed as Federal-aid projects or of any other obligation included in project agreements executed for Federal-aid projects on portions of that route. When controlled access Federal-aid primary routes are transferred to the Federal-aid secondary system, all access control features should be retained in force unless a request by the State to the contrary is approved by the FHWA.

(b) Federal Highway Administration approval of a deletion of a route from any Federal-aid system, without reclassification and redesignation to another Federal-aid system, shall relieve the State of its obligation to the Federal Government to maintain portions thereof constructed as Federal-aid projects with the exception of defense access-road projects constructed under the provisions of Volume 6, Chapter 9, Section 5 of the Federal-Aid Highway Program Manual. Such deletion shall also relieve the State of any other obligations included in project agreements executed for Federal-aid projects on portions of the deleted route.

(c) Requests for reinstatement of routes previously deleted from any Federal-aid system shall be approved by FHWA only when the State expressly agrees to resume its obligation for the maintenance of any portion of the route previously constructed as a Federal-aid project. Resumption of any other obligations included in project agreements executed for Federal-aid projects on the route being considered for reinstatement shall be mutually agreed to by the State and the FHWA.

(d) *Federal-aid urban system.* (1) Proposals for the Federal-aid urban system shall include a table listing each route by number, name, termini, and related information as illustrated in Appendix C.

(2) The State highway agencies shall have the responsibility for proposing to

the Federal Highway Administration all official actions regarding the designation, modification, or revision of Federal-aid highway systems.

(b) In justification of a proposed system action, the State highway agency shall include a statement that the proposed system action is in conformance with: (1) The system classification, general procedures, and specific procedures of this regulation; (2) the requirements for participation with appropriate local officials; and (3) in urbanized areas the planning process required pursuant to the provisions of 23 U.S.C. 134(a).

#### § 470.8 Approval authority.

(a) The Federal Highway Administrator will approve system actions involving the designation, modification, or revision of the Interstate System including control areas and route numbers.

(b) The Federal Highway Administration's Division Administrator will approve the statewide functional classification and system actions involving the designation, modification, and revision of the Federal-aid primary, secondary, and urban systems.

#### § 470.9 Realignment schedule.

The effective date for realignment of the Federal-aid primary, secondary, and urban systems shall be July 1, 1976.

*Effective date:* These regulations will become effective on July 1, 1976.

#### APPENDIX A Florida NATIONAL SYSTEM OF INTERSTATE AND DEFENSE HIGHWAYS

FAI route No.	Description
10	From the Florida-Alabama State line northwest of Pensacola via vicinity of Pensacola, Marianna, Tallahassee, and Lake City to FAI Route 95 in Jacksonville.
95	From Miami via vicinity of West Palm Beach, Daytona Beach, and Jacksonville to Florida-Georgia State line north of Jacksonville.
110	From FAI Route 10 north of Pensacola southerly into Pensacola.

NOTE.—Mileage data are not to be shown on this form.

[FR Doc. 75-24182 Filed 9-11-75; 8:45 am]

#### Title 24—Housing and Urban Development CHAPTER V—OFFICE OF ASSISTANT SECRETARY FOR COMMUNITY PLANNING AND DEVELOPMENT

[Docket No. R-75-292]

#### PART 570—COMMUNITY DEVELOPMENT BLOCK GRANTS Reallocated Funds

On June 9, 1975, the Department of Housing and Urban Development published in the FEDERAL REGISTER (40 FR 24692) the consolidated rules and regulations governing the administration and conduct of the community development block grant program under Title I of the Housing and Community Development Act of 1974.

Section 570.107 of the regulations establishes the general policies and rules

governing reallocation of community development block grant funds which are not applied for, or which are disapproved by the Secretary as part of the application review or program monitoring process. It further states that, "each fiscal year, HUD will publish the policies to be employed in the reallocation of funds for that year."

The purpose of this amendment to 24 CFR Part 570 is to establish specific rules and regulations for the administration of funds available for reallocation out of the appropriation for Fiscal Year 1975.

The majority of all applications, for entitlement and discretionary grants from Fiscal Year 1975 appropriations have been reviewed and either approved or disapproved as of the date of this rule-making. Of the total amount of \$2.2 billion allocated to entitlement applicants,

all but \$4,560,000 was applied for. Of that amount, \$4,532,000 was for metropolitan areas and \$28,000 was for nonmetropolitan areas. Of the total amount applied for, \$580,000 was disapproved, all in metropolitan areas. Therefore, as of June 30, 1975, \$5,112,000 was available for reallocation in metropolitan areas and \$28,000 was available for reallocation in nonmetropolitan areas. Any additional funds that become available for reallocation from the appropriation for Fiscal Year 1975 are likely to be small amounts.

Section 570.402(f) of the regulations presently provides that the policies and criteria governing general purpose funds for metropolitan and nonmetropolitan areas shall also apply to reallocated funds (except that metropolitan cities, urban counties and units shall also be eligible applicants for reallocated

## RULES AND REGULATIONS

funds). The most significant result of this amendment is to delete § 570.402(f) and to provide instead in a new § 570.409

government for basic grants or hold-harmless grants in metropolitan areas or nonmetropolitan areas which are not

available after meeting the urgent needs in that State, to other metropolitan areas in other States.

## RULES AND REGULATIONS

continue participation in the National Flood Insurance Program, the community must use the final flood elevations

rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

4128, and 24 CFR Part 1917 (Section 1917.10), hereby gives notice of his final determinations of flood elevations for the

funds). The most significant result of this amendment is to delete § 570.402(f) and to provide instead in a new § 570.409 that reallocated funds will be used to fund communities with urgent needs.

Congressional intent concerning the reallocation of funds is contained in the following statement in the Conference Report on the Housing and Community Development Act of 1974:

The conferees wish to make clear that reallocated funds would be available to communities with urgent needs, including those with entitlements as well as others with special needs arising from urban renewal closeout activities (H.R. Rep. No. 93-1279, at 132).

Section 570.401 establishes policies and criteria for making urgent needs grants. The three priorities for urgent needs funds are:

- (1) completion of urban renewal projects and neighborhood development programs;
- (2) units of general local government that participated in the planned variations demonstration under the model cities program which will suffer a significant decrease in the level of ongoing activities funded under the planned variations demonstration; and
- (3) completion of projects assisted under the water and sewer facilities grant program, the neighborhood facilities grant program, and the open-space land program.

Funds have previously been made available from the Fiscal Year 1975 appropriation for those planned variations communities which will suffer a significant decrease in the level of ongoing activities funded under the planned variations demonstration. Therefore, reallocated funds will be made available for urgent needs to complete urban renewal programs and water and sewer, neighborhood facilities, and open-space land projects.

Since Section 106(e) of the Housing and Community Development Act of 1974 specifically places a priority on "assuring maximum use of all available funds in the periods for which such funds were appropriated," publishing a notice of proposed rulemaking is impractical and contrary to the public interest. Therefore, this amendment shall become effective on the date of publication.

In connection with the environmental review of this amendment, a Finding of Inapplicability has been made under HUD Handbook 1390.1, 38 FR 19182. A copy of the Finding is available for inspection in the Office of the Rules Docket Clerk, Office of the General Counsel, Room 10245, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410.

#### § 570.402 [Amended]

Accordingly, in 24 CFR 570.402 paragraph (f) is hereby deleted and a new § 570.409 is hereby added and is set forth below in its entirety.

#### § 570.409 Reallocated funds.

(a) *General.* This section governs the reallocation of funds as required by the provisions of § 570.107. In accordance with § 570.107 (a) and (b), any amounts allocated to metropolitan cities, urban counties, or other units of general local

government for basic grants or hold-harmless grants in metropolitan areas or nonmetropolitan areas which are not applied for, or which are disapproved by the Secretary as part of the application review or program monitoring process, will be reallocated as set forth in subsection (f). As required by § 570.107(c), the following shall constitute the policies to be employed in the reallocation of funds appropriated for Fiscal Year 1975.

(b) *Timing of reallocation.* Any amounts appropriated for Fiscal Year 1975 which become available for reallocation as of August 15, 1975, will be reallocated no later than October 15, 1975.

(c) *Eligible applicants.* States and units of general local government, as defined in § 570.3(v), are eligible to apply for reallocated funds. For the purpose of this section, the second sentence in § 570.3(v) includes those entities described in § 570.403(b) (1), (2), and (3).

(d) *Criteria for selection.* Reallocated funds will be used to make grants to eligible applicants with urgent needs, including those with entitlements as well as others with special needs arising from urban renewal closeout activities. The term "urgent needs" as used in this section means those urgent needs described in § 570.401(b) (1) and (3). In selecting among applications, the Secretary will give priority first, where reallocated funds will be sufficient to complete a HUD-approved urban renewal project (including a neighborhood development program) within Fiscal Year 1976, a water and sewer project, a neighborhood facilities project, or an open-space land project, and second, where reallocated funds in conjunction with funds provided under § 570.401 will be sufficient to complete one of the above-mentioned projects.

(e) *Application requirements.* (1) Applicants seeking grant assistance for the completion of ongoing urban renewal projects shall submit the analysis called for in § 570.401(b) (1). Applicants seeking grant assistance for the completion of a water and sewer, neighborhood facility, or open-space land project shall submit documentation which indicates how the applicant meets the criteria of § 570.401(b) (3). Communities considering applying for reallocated funds are urged to contact the appropriate HUD Area Office for more specific instructions regarding submission requirements.

(2) In selecting among applicants, the Secretary will consider all analyses and applications submitted for urgent needs funds under § 570.401 as of August 15, 1975. Final applications shall be submitted only when requested by the Secretary.

(f) *Priorities for reallocation of funds.*

(1) *Metropolitan areas.* Any amounts which become available for reallocation from appropriations for Fiscal Year 1975, will be reallocated in accordance with the following priorities: (i) to the same metropolitan area; (ii) if reallocated funds are available after meeting the urgent needs in that metropolitan area, to other metropolitan areas in the same State; and (iii) if reallocated funds are

available after meeting the urgent needs in that State, to other metropolitan areas in other States.

(2) *Nonmetropolitan areas.* Any amounts which become available for reallocation from appropriations for Fiscal Year 1975, will be reallocated in accordance with the following priorities:

(i) To the nonmetropolitan area in the same State; and (ii) if reallocated funds are available after meeting the urgent needs in that State, to the nonmetropolitan areas in other States.

(3) *Additional considerations.* In determining to which metropolitan area or areas funds shall be reallocated under paragraphs (1)(ii) and (iii), and to which State or States funds shall be reallocated under paragraph (2)(ii), the Secretary shall give priority consideration to the metropolitan areas or States where the greatest unmet urgent needs exist.

(Title I of the Housing and Community Development Act of 1974 (Public Law 93-383); and sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535 (d)).

*Effective date.* This amendment shall be effective on September 12, 1975.

DAVID O. MEEKER, JR.,  
FAIA, AIP, Assistant Secretary  
for Community Planning and  
Development.

#### CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FI-584]

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

##### Final Flood Elevation Determinations for Orleans Parish, La.

On May 29, 1975, at 40 FR 23278-23279, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Orleans Parish, Louisiana. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of April 14, 1975, and amend the Flood Insurance Rate Map which was in effect prior to that date.

The final flood elevation determinations are in accordance with section 206 of the Flood Disaster Protection Act of 1973 (P.L. 93-234) and the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90-448) 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 225203A and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to

continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Orleans Parish Flood Insurance Rate Map make it impractical to publish in this notice all of the base flood elevation changes.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: August 26, 1975.

J. ROBERT HUNTER,  
Acting Federal Insurance  
Administrator.

[Docket No. FI-583]

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

##### Final Flood Elevation Determinations for St. Bernard Parish, La.

On May 29, 1975, at 40 FR 23279, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in St. Bernard Parish, Louisiana. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of February 6, 1975, and amend the Flood Insurance Rate Map which was in effect prior to that date.

The final flood elevation determinations are in accordance with section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448) 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 225204A and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium

rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the St. Bernard Parish Flood Insurance Rate Map make it impractical to publish in this notice all of the base flood elevation changes.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: August 26, 1975.

[Docket No. FI-536]

#### PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

##### Final Flood Elevations for the City of Coffeyville, Montgomery County, Kans.

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-

4128, and 24 CFR Part 1917 (Section 1917.10), hereby gives notice of his final determinations of flood elevations for the City of Coffeyville under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated his statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, Coffeyville, Kansas 67337.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation (feet above mean sea level)	Width from shoreline or bank of stream (facing downstream) to 100-yr flood boundary (feet)	
			Right	Left
Verdigris River	U.S. 166 and 169	722	0	(1)
Sycamore Creek	Overtown Drive	740	50	550
	1st St.	738	300	100
	4th St.	735	150	200
	8th St.	728	200	150
	U.S. 169	725	100	200

<sup>1</sup> To corporate limits.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: August 15, 1975.

J. ROBERT HUNTER,  
Acting Federal Insurance  
Administrator.

#### Title 26—Internal Revenue

##### CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 7375]

#### PART 31—EMPLOYMENT TAXES; APPLICABLE ON AND AFTER JANUARY 1, 1955

##### Payments of Moving Expenses

By a notice of proposed rule making appearing in the FEDERAL REGISTER for April 16, 1975 (40 FR 17028), amend-

ments to the Employment Tax Regulations (26 CFR Part 31) under sections 3121(a) and 3306(b) of the Internal Revenue Code of 1954, relating to moving expenses, were proposed to conform the Employment Tax Regulations to changes made to the Code by section 4 (b), (c), and (d) of the Act of October 13, 1964 (Pub. L. 88-650, 78 Stat. 1077).

Section 4(b) of the Act of October 13, 1964, added new paragraph (11) to section 3121(a) of the Code to provide that certain moving expenses paid to or on behalf of an employee shall not be deemed to be "wages" for purposes of the Federal Insurance Contributions Act. Thus, such payments are not subject to the social security taxes and the employer need not withhold the tax on employees or pay the tax on employers.

Section 4(c) amended section 3306(b) to add new paragraph (9) to section 3306(b) of the Code to provide that certain moving expenses paid to or on behalf of an employee shall not be deemed to be "wages" for purposes of the Federal Unemployment Tax Act. Thus, such pay-

ments are not subject to the Federal unemployment tax.

*Adoption of amendments to the regulations.* On April 16, 1975, a notice of pro-

ductory portion of paragraph (j). These revised provisions read as follows:

#### § 31.3306(b)(9)-1 Moving expenses.

(a) The term "wages" does not include compensation paid on or after Novem-

ance Date". In most cases the schedule includes incremental steps toward compliance, with interim dates for achieving

ments are not subject to the Federal unemployment tax.

Both of these provisions are applicable only if at the time of payment the employer has reason to believe that the employee is or will be entitled to a deduction for such amount under section 217 (relating to moving expenses). These changes are effective with respect to remuneration paid on or after November 1, 1964.

**Adoption of amendments to the regulations.** On April 16, 1975, a notice of proposed rule making was published in the FEDERAL REGISTER (40 FR 17028) to conform the Employment Tax Regulations to changes made to the Code by section 4 (b), (c), and (d) of the Act of October 13, 1964 (Pub. L. 88-650, 78 Stat. 1077) relating to moving expenses. After consideration of all such relevant matter as was presented by interested persons regarding the proposed rules, the amendments of the Employment Tax Regulations (26 CFR Part 31) as proposed are hereby adopted by this document.

(Section 7805 of the Internal Revenue Code of 1954 (68A Stat. 97; 26 U.S.C. 7805).)

Donald C. Alexander,  
Commissioner of Internal Revenue.

Approved: September 8, 1975.

Charles M. Walker,  
Assistant Secretary of the  
Treasury.

By notice of proposed rule making appearing in the FEDERAL REGISTER for April 16, 1975 (40 FR 17028), amendments to the Employment Tax Regulations (26 CFR Part 31) under sections 3121(a) and 3306(b) of the Internal Revenue Code of 1954, relating to moving expenses, were proposed to conform the Employment Tax Regulations to changes made to the Code by section 4 (b), (c), and (d) of the Act of October 13, 1964 (Pub. L. 88-650, 78 Stat. 1077).

Section 4(b) of the Act of October 13, 1964, added new paragraph (11) to section 3121(a) of the Code to provide that certain moving expenses paid to or on behalf of an employee shall not be deemed to be "wages" for purposes of the Federal Insurance Contributions Act. Thus, such payments are not subject to the social security taxes and the employer need not withhold the tax on employees or pay the tax on employers.

Section 4(c) amended section 3306(b) to add new paragraph (9) to section 3306(b) of the Code to provide that certain moving expenses paid to or on behalf of an employee shall not be deemed to be "wages" for purposes of the Federal Unemployment Tax Act. Thus, such payments are not subject to the Federal unemployment tax.

Both of these provisions are applicable only if at the time of payment the employer has reason to believe that the employee is or will be entitled to a deduction for such amount under section 217 (relating to moving expenses). These changes are effective with respect to remuneration paid on or after November 1, 1964.

**Adoption of amendments to the regulations.** On April 16, 1975, a notice of proposed rule making was published in the FEDERAL REGISTER (40 FR 17028) to conform the Employment Tax Regulations to changes made to the Code by section 4 (b), (c), and (d) of the Act of October 13, 1964 (Pub. L. 88-650, 78 Stat. 1077) relating to moving expenses. After consideration of all such relevant matter as was presented by interested persons regarding the proposed rules, the amendments of the Employment Tax Regulations (26 CFR Part 31) as proposed are hereby adopted by this document.

PARAGRAPH 1. Section 31.3121(a) (11) is revised to read as follows:

§ 31.3121(a)(11) Statutory provisions: definitions; wages; moving expenses.

Sec. 3121. Definitions.—(a) *Wages.* For purposes of this chapter, the term "wages" means all remuneration for employment, including the cash value of all remuneration paid in any medium other than cash; except that such term shall not include—

(11) Remuneration paid to or on behalf of an employee if (and to the extent that) at the time of the payment of such remuneration it is reasonable to believe that a corresponding deduction is allowable under section 217.

[Sec. 3121(a) (11) as added by sec. 4(b), Pub. Law 88-650 (78 Stat. 1077); as amended by sec. 313(c) (3), Social Security Amendments 1965 (79 Stat. 383); sec. 504(a), Social Security Amendments 1967 (81 Stat. 934).]

PAR. 2. Section 31.3121(a) (11)-1 which was previously reserved is added to read as follows:

§ 31.3121(a)(11)-1 Moving expenses.

(a) The term "wages" does not include remuneration paid on or after November 1, 1964, to or on behalf of an employee, either as an advance or a reimbursement, specifically for moving expenses incurred or expected to be incurred, if (and to the extent that) at the time of payment it is reasonable to believe that a corresponding deduction is or will be allowable to the employee under section 217. The reasonable belief contemplated by the statute may be based upon any evidence reasonably sufficient to induce such belief, even though such evidence may be insufficient upon closer examination by the district director or the courts finally to establish that a deduction is allowable under section 217. The reasonable belief shall be based upon the application of section 217 and the regulations thereunder in Part 1 of this chapter (Income Tax Regulations). When used in this section, the term "moving expenses" has the same meaning as when used in section 217 and the regulations thereunder.

(b) Except as otherwise provided in paragraph (a) of this section, or in a numbered paragraph of section 3121(a), amounts paid to or on behalf of an employee for moving expenses are wages for purposes of section 3121(a).

PAR. 3. Section 31.3306(b)-1 is amended by revising subparagraph (1) of paragraph (a), paragraph (b), and the intro-

ductory portion of paragraph (j). These revised provisions read as follows:

§ 31.3306(b)-1 Wages.

(a) *Applicable law and regulations.*—(1) *Remuneration paid after 1954.* Whether remuneration paid after 1954 for employment performed after 1938 constitutes wages is determined under section 3306(b). Accordingly, only remuneration paid after 1954 for employment performed after 1938 is covered by this section of the regulations and by the sections relating to the statutory exclusions from wages (§§ 31.3306(b) (1)-1 to 31.3306(b) (10)-1).

(b) The term "wages" means all remuneration for employment unless specifically excepted under section 3306(b) (see §§ 31.3306(b) (1)-1 to 31.3306(b) (10)-1, inclusive) or paragraph (j) of this section.

(j) In addition to the exclusions specified in §§ 31.3306(b) (1)-1 to 31.3306(b) (10)-1, inclusive, the following types of payments are excluded from wages:

PAR. 4. Section 31.3306(b) (8) is amended by revising the statutory material and by adding a historical note. These added and revised provisions read as follows:

§ 31.3306(b) (8) Statutory provisions: definitions; wages; payments to employees for non-work periods.

Sec. 3306. Definitions. . . .  
(b) *Wages.* For purposes of this chapter, the term "wages" means all remuneration for employment, including the cash value of all remuneration paid in any medium other than cash; except that such term shall not include—

(8) Any payment (other than vacation or sick pay) made to an employee after the month in which he attains the age of 65, if he did not work for the employer in the period for which such payment is made;

[Sec. 3306(b) (8) as amended by sec. 4(c), Act of Oct. 13, 1964 (P.L. 88-650, 78 Stat. 1077); sec. 504(b), Social Security Amendments 1967 (P.L. 90-248, 81 Stat. 935).]

PAR. 5. The following new sections are added immediately following § 31.3306(b) (8)-1:

§ 31.3306(b) (9) Statutory provisions: definitions; wages; moving expenses.

Sec. 3306. Definitions.—(b) *Wages.* For purposes of this chapter, the term "wages" means all remuneration for employment including the cash value of all remuneration paid in any medium other than cash; except that such term shall not include—

(9) Remuneration paid to or on behalf of any employee if (and to the extent that) at the time of the payment of such remuneration it is reasonable to believe that a corresponding deduction is allowable under § 217; or

[Sec. 3306(b) (9) as added by section (4) (b), Act of Oct. 13, 1964 (Pub. L. 88-650, 78 Stat. 1077); as amended by sec. 504(b), Social Security Amendments 1967 (Pub. L. 90-248, 81 Stat. 935).]

§ 31.3306(b) (9)-1 Moving expenses.

(a) The term "wages" does not include remuneration paid on or after November 1, 1964, to or on behalf of an employee, either as an advance or a reimbursement, specifically for moving expenses incurred or expected to be incurred, if (and to the extent that) at the time of payment it is reasonable to believe that a corresponding deduction is or will be allowable to the employee under section 217. The reasonable belief contemplated by the statute may be based upon any evidence reasonably sufficient to induce such belief, even though such evidence may be insufficient upon closer examination by the district director or the courts finally to establish that a deduction is allowable under section 217. The reasonable belief shall be based upon the application of section 217 and the regulations thereunder in Part 1 of this chapter (Income Tax Regulations). When used in this section, the term "moving expenses" has the same meaning as when used in section 217 and the regulations thereunder.

(b) Except as otherwise provided in paragraph (a) of this section, or in a numbered paragraph of section 3306(b), amounts paid to or on behalf of an employee for moving expenses are wages for purposes of section 3306(b).

[FR Doc. 75-24344 Filed 9-11-75; 8:45 am]

#### Title 40—Protection of Environment

##### CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 416-7]

#### PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

##### Georgia: Approval of Compliance Schedules

Section 110 of the Clean Air Act and the implementing regulations of 40 CFR Part 51 require each State to submit a plan which provides for the attainment and maintenance of the national ambient air quality standards throughout its territory. Each such plan is to contain legally enforceable compliance schedules setting forth the dates by which all sources must be in compliance with any applicable requirements of the plan.

Pursuant to this provision, and in addition to earlier submittals, the State of Georgia held hearings on December 30, 1974, for compliance schedules on a number of sources. Some of these supersede schedules submitted earlier. They were submitted to EPA for approval on January 23, 1975 and proposed for public comment on June 27, 1975 (40 FR 27248). Each of the proposed compliance schedules identified below establishes a date by which an individual air pollution source must attain compliance with an emission limitation of the State implementation plan. This date is indicated under the heading "Final Compliance Date".

In most cases the schedule includes incremental steps toward compliance, with interim dates for achieving these steps. While the table below does not list these dates, the actual schedules do. The notation "Immediately" under the heading "Effective Date" means that the schedule will become Federally enforceable immediately upon its approval by the Administrator.

Copies of the schedules were made available for public inspection at the EPA Air Programs Office, the State Air Quality Control Section, and the EPA Freedom of Information Center, and public comment on them was sought.

One comment was received. The Georgia Air Quality Control Section pointed out that the four schedules for Babcock and Wilcox Company, Augusta, had been heard but not issued, and requested that they not be made Federally enforceable at this time. Thus, they have been struck from the listing which appears below.

An evaluation of any schedule may be obtained by consulting personnel of the Agency's Region IV Air Programs Branch in Atlanta (404/526-3043).

The Administrator has determined that all schedules given here satisfy the requirements of 40 CFR Part 51 pertaining to plan revisions and compliance schedules, and that their approval will not hinder the attainment and maintenance of the National Ambient Air Quality standards. Accordingly, they are hereby approved.

This action is effective immediately. The Administrator finds that good cause exists for making this approval action immediately effective since these schedules are already in effect under State law in Georgia, and the Agency's action imposes no additional regulatory burden on the affected facilities.

(Sec. 110(a), Clean Air Act (42 U.S.C. 1857c-5(a)))

Dated: September 4, 1975.

JOHN QUARLES,  
Acting Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations is amended as follows:

##### Subpart L—Georgia

§ 52.570 [Amended]

1. Section 52.570(c) is amended by inserting in paragraph (c) (4) in proper chronological order the date January 23, 1975.

2. In § 52.576 paragraph (a) is amended by inserting new lines as follows:

§ 52.576 Compliance schedules.

(a) The compliance schedules for the sources identified below are approved as meeting the requirements of § 51.6 and § 51.15 of this chapter. All regulations cited are air pollution control regulations of the State.

Source	Location	Regulation involved	Date of adoption	Effective	Final compliance date

## RULES AND REGULATIONS

[FRL 416-8]

**PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS**  
**Mississippi: Approval of Compliance Schedules**

Section 110 of the Clean Air Act, as amended, and the implementing regulations of 40 CFR Part 51 require each State to submit a plan which provides for the attainment and maintenance of the national ambient air quality standards throughout the State. Each such plan is to contain legally enforceable compliance schedules setting forth the dates by which all sources must be in compliance with any applicable requirements of the plan.

On January 20, 1975, pursuant to 40 CFR 51.6 the State of Mississippi submitted for the Environmental Protection Agency's approval revisions to the compliance schedule portion of the plan. The compliance schedules submitted by Mississippi were reviewed by the Agency to verify adherence to the requirements of 40 CFR Part 51 pertaining to public hearings, plan revisions, and compliance schedules as well as consistency with the control strategies of the Mississippi implementation plan. The schedules which met these criteria were published in the *FEDERAL REGISTER* as proposed rulemaking on May 6, 1975 (40 FR 19656). Copies were made available for public inspection at the Agency's Region IV office in Atlanta, and at the office of the Mississippi Air and Water Pollution Control Commission in Jackson; all interested parties were invited to submit written comments on the proposed compliance schedules.

No comments were received from the general public or from the affected sources, and the schedules printed below are identical to those offered for comment in the proposed notice, except that a few minor typographical errors have been corrected.

Each of the schedules given in the table below establishes a date by which an individual air pollution source must attain compliance with the emission limitations of the State Implementation plan. This date is indicated in the succeeding table under the heading "Final Compliance Date". In many cases the schedule includes incremental steps toward compliance, with specific dates set for achieving those steps. While the table below does not list these interim dates, the actual compliance schedules do. The entry "Immediately" under the heading

"Effective Date" means that the schedule becomes Federally enforceable immediately upon its approval by the Administrator. Copies of the schedules and the Mississippi plan are available for public inspection at the following locations:

Air and Hazardous Materials Division, Environmental Protection Agency, 1421 Peachtree Street, N.E., Atlanta, Georgia 30309.

Division of Air Pollution Control, Mississippi Air & Water Pollution Control Commission, Robert E. Lee Building, Jackson, Mississippi 39205.

Freedom of Information Center, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

An evaluation of any of the schedules can be obtained by consulting the staff of the Agency's Region IV Air Programs Office at the Atlanta address given above.

The Administrator has determined that all the schedules given here satisfy the requirements of 40 CFR Part 51 pertaining to plan revisions and compliance schedules, and that their approval will not hinder the attainment and maintenance of the national ambient air quality standards. Accordingly, they are hereby approved.

This action is effective immediately. The Administrator finds that good cause exists for making this approval action immediately effective since these schedules are already in effect under State law in Mississippi and the Agency's action imposes no additional regulatory burden on affected facilities.

(Sec. 110(a), Clean Air Act (42 U.S.C. 1857c-5(a)))

Dated: September 4, 1975.

JOHN QUARLES,  
 Acting Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

**Subpart Z—Mississippi**

**§ 52.1270 [Amended]**

1. In § 52.1270, paragraph (c) (2) is amended by inserting in proper chronological order the date January 20, 1975.

2. Section 52.1274 is amended by inserting additional lines in the table of paragraph (a) as follows:

**§ 52.1274 Compliance schedules.**

**PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS**  
**Kentucky: Approval of Compliance Schedules; Correction**

In FR document FRL 389-2 appearing at page 29540 of the issue of July 14, 1975, the first clause of action number 2 is corrected to read as follows:

"2. Section 52.927 is amended by inserting new lines in the tables of paragraph (c) as follows:"

Dated: September 3, 1975.

JACK E. RAVAN,  
 Regional Administrator,  
 Region IV.

[FR Doc.75-24223 Filed 9-11-75;8:45 am]

[FRL 429-6; PP3F1408, R52]

**PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES**

**Daminozide**

On July 17, 1973, notice was given (38 FR 19071) that Uniroyal Chemical, Division of Uniroyal, Inc., Bethany CT 06525, had filed a pesticide petition (PP 3F1408) with the Environmental Protection Agency (EPA). This petition proposed that 40 CFR 180.246 be amended to establish tolerances for residues of the plant regulator succinic acid 2,2-dimethylhydrazide in or on the raw agricultural commodities tomatoes at 40 parts per million (ppm) and cranberries and pears at 20 ppm. [The chemical

name, "succinic acid 2,2-dimethylhydrazide" has been changed to butanedioic acid mono (2,2-dimethylhydrazide) and the name daminozide has been accepted as the common name for the chemical.] Uniroyal Chemical subsequently amended the petition by withdrawing the proposed tolerance for residues in or on cranberries. (A related document on daminozide and the establishment of food additive tolerances also appears in today's FEDERAL REGISTER.)<sup>1</sup>

The data submitted in the petition and other relevant material have been evaluated. The plant regulator is considered useful for the purpose for which the tolerances are sought. The established tolerances are adequate to cover residues in eggs, meat, milk, and poultry resulting from both the proposed use as well as the established uses and § 180.6 (a) (2) applies. Therefore, it is concluded that the tolerance established by amending § 180.246 will protect the public health.

Any person adversely affected by these regulations may on or before October 14, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M St., SW, East Tower, Room 1019, Washington DC 20460. Such objections should be submitted in triplicate and specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on September 12, 1975, Part 180, Subpart C, § 180.246, is amended as set forth below.

Dated: September 5, 1975.

EDWIN L. JOHNSON,  
 Deputy Assistant Administrator  
 for Pesticide Programs.

(Sec. 408(d)(2), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)).)

Section 180.246 is amended by adding the new paragraph "40 parts per million \* \* \*" after the paragraph "50 parts per million \* \* \*" to include a tolerance for tomatoes and by revising the paragraph "20 parts per million \* \* \*" to include pears as follows:

§ 180.246 Daminozide: tolerances for residues.

40 parts per million in or on tomatoes.

20 parts per million in or on brussels sprouts, peanut hay, and pears.

[FR Doc.75-24226 Filed 9-11-75;8:45 am]

## RULES AND REGULATIONS

## Title 41—Public Contracts and Property Management

## CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

[FPMR Amendment F-24]

## PART 101-35—TELECOMMUNICATIONS GSA Implementation of OTP Circular 13

Sections 101-35.103 and 101-35.203 are amended to implement Office of Telecommunications Policy (OTP) Circular No. 13, Federal Use of Telecommunications Service, dated June 21, 1974, concerning Government procurement of telecommunications facilities and services.

1.) Section 101-35.103(d) is revised to read as follows:

## § 101-35.103 Policy.

(d) Place maximum reliance on commercial sources for telecommunications services in accordance with the Office of Telecommunications Policy (OTP) Circular No. 13, Federal Use of Telecommunications Service, dated June 21, 1974.

2.) Section 101-35.203 is amended by the addition of the following note.

## § 101-35.203 Justification of major changes and new installations.

(g) . . . . .

Note.—In addition to the information requested by this section, agencies submitting system facility or service proposals that fall within the guidelines established by OTP Circular No. 13 shall indicate that the OTP policy has been satisfied.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This regulation is effective September 12, 1975.

Dated: August 29, 1975.

ARTHUR F. SAMPSON,  
Administrator of General Services.  
[FR Doc. 75-24290 Filed 9-11-75; 8:45 am]

[FPMR Amendment G-33]

## PART 101-38—MOTOR EQUIPMENT MANAGEMENT

## Revised Motor Equipment Management Policy

This regulation revises the policy dealing with motor equipment management to (1) provide for the availability of certain Standard forms for reporting motor vehicle accidents, (2) accommodate new and changed organizational titles and symbols, and (3) reflect nonsubstantive editorial adjustments.

## §§ 101-38.101-101-38.101-5 [Removed]

The table of contents for Part 101-38 is amended to delete §§ 101-38.101-1 through 101-38.101-5 and to include new and revised entries as follows:

## Subpart 101-38.3—Official U.S. Government Tags

• Subpart 101-38.3—Reporting Motor Vehicle Accidents

101-38.800 Scope of subpart.

101-38.801 Applicability.

101-38.802 Accident reporting forms and their use.

## Subpart 101-38.0—Definition of Terms

1.) Sections 101-38.001-1, 101-38.001-9, 101-38.001-10, 101-38.001-13, 101-38.001-14, and the introductory text of § 101-38.001-2 are revised as follows:

## § 101-38.001-1 Acquired for official purposes.

"Acquired for official purposes" means motor vehicles located in the United States, its territories, or possessions (a) gained and held or (b) rented or leased from private or commercial sources for a period exceeding 3 successive months by a Federal agency or the District of Columbia. This definition shall not be construed as the authority for the use of motor vehicles under (b) for a period of 3 months or less in any manner other than for official purposes.

## § 101-38.001-2 Commercial design motor vehicles.

"Commercial design motor vehicles" means motor vehicles procurable from regular production lines and available for civil agency use. Commercial design motor vehicles are further classified as "transport design" and "special design" motor vehicles.

## § 101-38.001-9 Trip rental.

"Trip rental" means rental of a vehicle by an employee of a Federal agency from an interagency motor pool or a commercial firm for a period of less than 3 months.

## § 101-38.001-10 Reportable vehicles.

"Reportable vehicles" means all automobiles, station wagons, ambulances, buses, carryalls, trucks, and truck tractors. Excluded are "military design motor vehicles" (defined in § 101-38.001-3), trailers, fire trucks, and other equipment detailed in the instructions for Standard Form 82, Agency Report of Motor Vehicle Data, (see § 101-38.4901.)

## § 101-38.001-13 Domestic fleet.

"Domestic fleet" means all reportable motor vehicles held by an agency in the United States, its territories, or possessions.

## § 101-38.001-14 Foreign fleet.

"Foreign fleet" means all reportable motor vehicles held by an agency for use in areas other than the United States, its territories, or possessions.

## Subpart 101-38.1—Reporting Motor Vehicle Data

2. Sections 101-38.100-1, 101-38.100-2, and 101-38.102-1 are revised as follows:

## § 101-38.100-1 Standard Form 82, Agency Report of Motor Vehicle Data.

Standard Form 82 (illustrated at § 101-38.4901) is used by Federal agencies to submit vehicle inventory, cost, and operating data to GSA. That data is used by GSA to compile the "Federal Motor Vehicle Fleet Report." (Interagency Report Control Number 1102-GSA-AN has been assigned to Standard Form 82.)

## § 101-38.100-2 Federal Motor Vehicle Fleet Report.

This report is the summarization of the motor vehicle data reported to GSA by Federal agencies on Standard Form 82. It is used to evaluate and analyze operations and management of the Federal fleet. GSA supplies copies of this report to Federal agencies and to other organizations as requested.

## § 101-38.102-1 Reporting period and submission.

Each Federal agency, as holding agency, using agency, or both, shall submit Standard Form 82 in duplicate to GSA not later than 75 days after the end of the fiscal year.

## Subpart 101-38.2—Registration and Inspection

3. Sections 101-38.201-1, 101-38.201-2, and 101-38.202 are revised as follows:

## § 101-38.201-1 Registration.

(a) All motor vehicles acquired for official purposes and regularly based or housed in the District of Columbia shall be registered in the District of Columbia, Department of Highways and Traffic, in accordance with section 40-102 (b) (2) of the District of Columbia Code. Each motor vehicle shall be reregistered during February of each year. Special forms for registering motor vehicles are available from the Department of Highways and Traffic.

(b) The District of Columbia Code requires that application for registration of title be accompanied by a certificate of origin, bill of sale, or other document attesting Government ownership. If such documents have been lost, destroyed, or are otherwise unavailable, GSA Form 1020, The United States Government Certificate of Ownership of a Motor Vehicle (illustrated at § 101-38.4902), certified by GSA, will be accepted by the District of Columbia in lieu of the missing documents. The holding agency may obtain GSA Form 1020 from the General Services Administration (FZM), Washington, DC 20406, upon furnishing adequate proof of Government ownership.

## § 101-38.201-2 Inspection.

Each registered motor vehicle shall be inspected annually in accordance with section 40-204 of the District of Columbia Code and applicable regulations issued thereunder. Those motor vehicles that pass inspection will be provided a current Approval Inspection Sticker by the Department of Highways and Traffic.

§ 101-38.202 Registration and inspection outside the District of Columbia. Motor vehicles acquired for official purposes and regularly housed outside the District of Columbia need not be registered in the States, territories, or possessions in which they are primarily used, except that motor vehicles exempted under Subpart 101-38.6 shall be registered and inspected in accordance with the laws of the State, territory, or possession involved.

4.) The caption of Subpart 101-38.3 is revised as follows:

## Subpart 101-38.3—Official U.S. Government Tags

5.) Sections 101-38.301, 101-38.302, 101-38.303-1, 101-38.304-1, 101-38.305-4, and § 101-38.303-2(a) (b) (c), (c) (2) and (4) are revised as follows:

## § 101-38.301 General requirements.

Official U.S. Government tags shall be used only on Government-owned or -leased motor vehicles.

## § 101-38.302 Records.

Each holding agency shall maintain a current record of all official U.S. Government tags in use on motor vehicles for which that agency is accountable. Such records shall specify the motor vehicle for which the tags are assigned and shall include complete information regarding all reassignments of tags and voided tag numbers.

## § 101-38.303-1 Procurement in the District of Columbia.

(a) Official U.S. Government tags will be issued without charge to Federal agencies by the District of Columbia Department of Highways and Traffic pursuant to the provisions of section 40-102 (b) (2) of the District of Columbia Code, at the time the motor vehicle is registered or reregistered as prescribed in § 101-38.201-1.

(b) Government-owned motor vehicles registered in the District of Columbia in accordance with § 101-38.201-1 and displaying official U.S. Government tags shall have the letter code designation prescribed in § 101-38.304-1 stenciled in the blank space beside the embossed numbers. The letter code designation shall be stenciled on the tag in such a manner that the size and color of the letters are the same as, or similar to, the embossed numbers.

## § 101-38.303-2 Procurement outside the District of Columbia.

(a) Federal agencies operating motor vehicles acquired for official purposes outside the District of Columbia, except those exempted under Subpart 101-38.6, shall procure official U.S. Government tags from the Superintendent of Industries, District of Columbia, Department of Corrections, Lorton, VA 22079.

(b) Tags will be fabricated from aluminum, treated against salt corrosion, and have a baked enamel surface. These tags have an estimated life expectancy of 5 years.

(c) When ordering tags, the following applies:

(1) . . . . .

(2) For obligating purposes, the ordering agency should consult the prices for vehicle identification tags listed in the Current Price List of Industrial Products and Services, issued by the Superintendent of Industries. Federal agencies may request that they be added to the mailing list to receive the price lists as issued by contacting the Superintendent of Industries, District of Columbia, Department of Corrections, Lorton, VA 22079.

(3) . . . . .

(4) Upon receipt of an appropriate billing document, each agency shall

## RULES AND REGULATIONS

make payment direct to the Superintendent of Industries, District of Columbia, Department of Corrections, Lorton, VA 22079.

## § 101-38.304-1 Code designations.

Official U.S. Government tags, except tags issued by the District of Columbia Department of Highways and Traffic pursuant to § 101-38.303-1, shall be numbered serially for each agency, beginning with 101, and shall be preceded by a letter code designating the agency having accountability for the motor vehicles as follows:

## § 101-38.305-4 U.S. Government tags issued by District of Columbia.

Official U.S. Government tags issued by the District of Columbia may be transferred, after approval by the Director of Highways and Traffic of the District of Columbia, only to another Government-owned or -leased motor vehicle of the same agency operating that vehicle in the District of Columbia. Damaged or mutilated tags finally removed from vehicles operating in the District of Columbia shall be delivered to the District of Columbia Department of Highways and Traffic for cancellation. Whenever motor vehicles regularly based or housed in the District of Columbia are transferred to operation in field areas, transferred to another agency, or removed from Government service, the official U.S. Government tags issued by the District of Columbia shall be removed and delivered to the District of Columbia Department of Highways and Traffic for cancellation.

## Subpart 101-38.4—Official Legend and Agency Identification

6. Section 101-38.402 and § 101-38.403 introductory text and (a) are revised as follows:

## § 101-38.402 Agency identification.

The full name of the department, establishment, corporation, or agency by which it is held; or a title descriptive of the service in which it is held if such a title readily identifies the department, establishment, corporation, or agency concerned shall be displayed conspicuously, as shown in § 101-38.4903, in letters of a color that is in definite contrast to the background color of the motor vehicle involved. The principal identifying word or words, or the full title of such agency identification shall be in letters not less than 1 inch high and not over 1½ inches high. Subsidiary words, or titles of subordinate units, if used, shall be in letters not less than ½ inch high and not over ¾ inch high. The identification should be applied through the use of decalcomanias (elastomeric pigmented film type). For examples of suggested possible arrangements, see § 101-38.4903.

## § 101-38.403 Display of legend and agency identification.

Except as provided in § 101-38.401(c) and Subpart 101-38.6, all Government-owned or -leased motor vehicles shall display the legends "For Official Use Only" and "U.S. Government," and immediately below the legends the agency identification located as follows:

(a) On passenger cars, station wagons, ambulances, buses, carryalls, fire trucks, trucks, and tractors; centered on both

front doors or in an appropriate position on the side if there are no doors.

#### Subpart 101-38.5—Exemptions from Use of Official U.S. Government Tags and Other Identification

7. Sections 101-38.602 (a) (b) (f) (h) (k) and (1) 101-38.603(a) (3), 101-38.605, and 101-38.607 are revised as follows:

#### § 101-38.602 Unlimited exemptions.

(a) *Energy Research and Development Administration.* Motor vehicles that the Energy Research and Development Administration designates for use in the conduct of investigative or law enforcement activities.

(b) *Department of Agriculture.* Motor vehicles that the Animal and Plant Health Inspection Service, Forest Service, Office of the Inspector General, and the Packers and Stockyards Administration use in the conduct of investigative or law enforcement activities. These vehicles include designated agency-held vehicles and vehicles obtained from the Interagency Motor Pool System.

(f) *Department of Justice.* All motor vehicles operated by the Drug Enforcement Administration, the Federal Bureau of Investigation, and the Border Patrol; and those vehicles operated in undercover law enforcement activities or investigative work by the Immigration and Naturalization Service, the Bureau of Prisons, and the U.S. Marshals Service.

(h) *Department of the Treasury.* All motor vehicles operated by the U.S. Secret Service; the Intelligence Division and the Internal Security Division of the Internal Revenue Service; the Bureau of Alcohol, Tobacco, and Firearms; and the Office of Investigation of the Bureau of Customs. These vehicles include designated agency-held vehicles and vehicles obtained from the Interagency Motor Pool System.

(k) *Nuclear Regulatory Commission.* Motor vehicles that the Nuclear Regulatory Commission designates for use in the conduct of investigative or law enforcement activities.

(1) *Department of Transportation.* All motor vehicles used for intelligence, investigative, or security purposes by the Office of Investigations and Security in the Office of the Secretary; the Intelligence and Security Division and field counterparts in the U.S. Coast Guard; the Office of Investigations and Security in the Federal Aviation Administration; and special agents in the Alaska Railroad. These vehicles include designated agency-held vehicles and vehicles obtained from the Interagency Motor Pool System.

#### § 101-38.603 Limited exemptions.

(a) . . . . .  
(3) *Federal Communications Commission.* Field Operations Bureau.

#### § 101-38.605 Additional exemptions.

Exemptions, in addition to those authorized in §§ 101-38.602 through 101-38.604, may be authorized by the head of the agency upon written certification that conspicuous identification will interfere with the purpose for which the motor vehicle is acquired and used. In each such case, the certification must state that the motor vehicle is acquired and used for the purpose of investigative, law enforcement, or intelligence duties involving security activities and that the identification of the motor vehicle would interfere with the discharge of such duties or endanger the security of individuals or the United States Government: *Provided*, That vehicles regularly used for common administrative purposes not directly connected with the performance of law enforcement, investigative, or intelligence duties involving security activities shall not because of such use be exempted. A conformed copy of each such certification, together with notice of cancellation thereof, if any, shall be submitted promptly to the General Services Administration (FZM), Washington, DC 20406.

#### § 101-38.607 Report of exempted motor vehicles.

Periodic reports of exempted motor vehicles under §§ 101-38.602 through 101-38.605 are not required; however, the head of each agency shall submit upon request a report in triplicate to the General Services Administration (FZM), Washington, DC 20406, showing the total number of motor vehicles exempted pursuant to Subpart 101-38.6.

#### Subpart 101-38.7—Transfer of Title to Government-Owned Motor Vehicles

8.) Section 101-38.701(d) is revised as follows:

#### § 101-38.701 Methods of transfer.

(d) Standard Form 97, The United States Government Certificate of Release of a Motor Vehicle, and Standard Form 97-A, Agency Record Copy of the United States Government Certificate of Release of a Motor Vehicle, are issued together in a unit set as Standard Form 97. Upon completion of the set, Standard Form 97 shall be furnished the purchaser or donee; one copy of Standard Form 97-A shall be furnished the holding agency; and one copy of Standard Form 97-A shall be furnished the contracting officer of the agency effecting sale or transfer of the motor vehicle.

9.) New Subpart 101-38.8 is added as follows:

#### Subpart 101-38.8—Reporting Motor Vehicle Accidents

#### § 101-38.800 Scope of subpart.

This subpart provides for the availability of certain Standard forms for use in reporting any accident involving a Government-held motor vehicle.

#### § 101-38.801 Applicability.

The provisions of this subpart are recommended to all executive agencies

holding motor vehicles that are located within the United States, its territories, or possessions.

#### § 101-38.802 Accident reporting forms and their use.

Standard forms for reporting accidents and processing claims under the Federal Tort Claims Act (28 U.S.C. 2671-2680) were developed by the Interdepartmental Tort Claims Committee, chaired by the Department of Justice, and by the Federal Safety Council, chaired by the Department of Labor (Executive Order 10194, December 19, 1950, 3 CFR). The Standard forms used for reporting motor vehicle accidents are as follows:

(a) Standard Form 91, Operator's Report of Motor Vehicle Accident (illustrated at § 101-39.4903), should be completed at the time and on the scene of an accident, insofar as possible, regardless of the extent of injury or damage. Standard Form 91 should be carried at all times in motor vehicles used for official Government business.

(b) Standard Form 91-A, Investigation Report of Motor Vehicle Accident, (illustrated at § 101-39.4905) should be completed by the person responsible for investigating an accident.

(c) Standard Form 94, Statement of Witness (illustrated at § 101-39.4904) should be completed by persons who have witnessed an accident. Standard Form 94 should be carried at all times in motor vehicles used for official Government business.

NOTE.—Standard Forms 91, 91-A, and 94 are exempt from reports control under FPMR 101-11.11.

#### Subpart 101-38.11—Storage of Government Motor Vehicles

10.) Sections 101-38.1101 and 101-38.1104 are revised as follows:

#### § 101-38.1101 Applicability.

This subpart is applicable to all Government-owned, -rented, and -leased motor vehicles of a holding agency located in the United States, its territories, or possessions.

#### § 101-38.1104 Procurement of parking.

Prior to the procurement of other than temporary parking accommodations in urban centers (see § 101-18.102), agencies shall determine the availability of Government-owned or -controlled parking space in accordance with the provisions of § 101-17.101-6.

#### Subpart 101-38.49—Forms and Reports

11.) Sections 101-38.4900(b) and 101-38.4903 are revised as follows:

#### § 101-38.4900 Scope of subpart.

(b) Standard forms illustrated in this § 101-38.4900, unless otherwise provided in the section prescribing the forms, may be obtained by submitting a requisition in FEDSTRIP/MILSTRIP format to the GSA regional office servicing the requisitioning activity.

[FPMR Amdt. H-93]

#### PART 101-43—UTILIZATION OF PERSONAL PROPERTY

#### PART 101-44—DONATION OF PERSONAL PROPERTY

#### Utilization and Disposal of Excess Personal Property

This regulation provides updated information concerning the utilization of excess personal property for emergency disaster relief, the transfer of excess personal property between Federal agencies, and the donation and sale of surplus naval material.

The table of contents for Part 101-43 is amended to show the following revised entry:

101-43.308 Assistance in emergency and major disaster relief.

#### Subpart 101-43.3—Utilization of Excess

1. Section 101-43.302(a) is revised to read as follows:

#### § 101-43.302 Agency responsibility.

(a) In order to obtain maximum utilization and minimize the procurement of new items, each executive agency shall be responsible for making excess property available and facilitating the transfer of the property to other Federal agencies, to its cost-reimbursement type contractors, and to the organizations specified in § 101-43.315. The transfer of excess property to a cost-reimbursement type contractor shall be made only by the agency administering the contract. Each executive agency shall, to the maximum practicable extent, fulfill its requirements for property, including those of its cost-reimbursement type contractors, by obtaining excess from other Federal agencies in lieu of initiating a new procurement. Agencies receiving or transferring excess personal property shall establish appropriate controls over the processing of transfer orders and

shall establish and maintain an adequate system of property accountability.

2. Section 101-43.308 is revised to read as follows:

#### § 101-43.308 Assistance in emergency and major disaster relief.

In accordance with instructions of the Administrator, Federal Disaster Assistance Administration, Department of Housing and Urban Development, or his designee, excess property shall be utilized in behalf of or loaned to State and local governments, with or without compensation therefor, pursuant to the Disaster Relief Act of 1974 (Public Law 93-288) and Executive Order 11795 of July 11, 1974, to provide assistance to State and local governments in alleviating suffering and damage resulting from any emergency or major disaster. Excess medicines, foods, and other consumable supplies may be distributed to State and local governments for these purposes. In the event such property has been reported to GSA pursuant to § 101-43.311, it shall be withdrawn by the holding agency pursuant to § 101-43.314.

3. Section 101-43.315-5(a), (a) (2) and (3), and (b) are revised to read as follows:

#### § 101-43.315-5 Procedure for effecting transfers.

(a) All transfers of excess personal property between Federal agencies shall be accomplished by use of Standard Form 122, Transfer Order Excess Personal Property (see § 101-43.4906), or any other transfer order form approved by GSA. Automated requisitions may be used for excess personal property transfers. However, Federal agencies using automated requisitions shall ensure that identifying codes are controlled and records maintained indicating the official authorized to approve property transfers. Each transferee agency shall forward the original and three copies of the transfer order to the appropriate GSA regional office for approval. (See § 101-43.4903.) Prior approval is not required when the property involved in the given transaction is:

(2) Nonreportable under § 101-43.311 and has not been reserved at the holding location for special screening by the appropriate GSA regional office, and its total acquisition cost does not exceed \$25,000; and

(3) The appropriate GSA regional office is furnished an information copy of each direct transfer order by the transferor agency within 10 workdays from receipt of the order.

(b) Transfer orders accomplished by the use of Standard Form 122 shall be completed as shown in § 101-43.4906-1. Transfer orders shall be executed by a Federal official, and will not be approved by GSA unless so executed. For wholly owned or mixed-ownership Government corporations, the Senate, the House of Representatives, the Architect of the Capitol and any activities under his direction, and the municipal government

of the District of Columbia, transfer orders shall be executed by a responsible official of these organizations. For non-Federal agencies for which GSA procures, transfer orders shall be executed by a responsible official of the sponsoring Federal agency. For contractors and grantees, transfer orders shall be executed by the Federal contracting officer or other responsible Federal official. For nonappropriated fund activities of Federal agencies, such as post exchange commissaries and veterans canteens, transfer orders shall be executed by the accountable official of the Federal agency. The transfer order shall state that the property will be entered on the property accountability records of the Federal agency and shall also state that the property will be used only for administration or operational use but not for resale.

#### Subpart 101-43.4—Utilization of Abandoned and Forfeited Personal Property

4. Section 101-43.402-6(a), (b) and (c) are revised to read as follows:

#### § 101-43.402-6 Transfer to other Federal agencies.

(a) Normally the transfer of forfeited or voluntarily abandoned personal property shall be accomplished by the submission of a Standard Form 122, Transfer Order Excess Personal Property (see § 101-43.4906), or any other transfer order form approved by GSA, to the Regional Administrator, General Services Administration, Region 3, Washington, D.C. 20407, for approval.

(b) Except for property which is subject to court action, the transfer order shall indicate the agency having custody of the property, the location of the property, the report or case number on which the property is listed, the property required, and the fair value, if applicable.

(c) Property subject to court action may be requested by submitting a transfer order or a letter setting forth the need for the property by the agency. If proceedings are being, or have been commenced for the forfeiture of the property by court decree, application will be made by GSA to the court, prior to entry of a decree, for an order requiring delivery of the property to an appropriate recipient for its official use.

5. The table of contents for Part 101-44 is amended to show the following revised entry:

101-44.103 Assistance in emergency and major disaster relief.

#### Subpart 101-44.1—General Provisions

6. Section 101-44.103 is revised to read as follows:

#### § 101-44.103 Assistance in emergency and major disaster relief.

Surplus equipment and supplies shall be donated to State governments to provide assistance in alleviating suffering and damage resulting from any emergency or major disaster, in accordance with the directions of the Federal

## RULES AND REGULATIONS

Disaster Assistance Administration, Department of Housing and Urban Development.

The areas described aggregate approximately 1,365.42 acres in Maricopa and

Pursuant to the foregoing notice, the Corporation received both oral and writ-

visions of sections 1006(b) (5), 1007(a) (5), and 1011 of the Act. Unless otherwise indicated, they shall apply to the GSA.

while carrying out legal assistance activities under the Act, shall engage in, or encourage others to engage in, any public

(b) A governmental agency, a legislative body, a committee, or a member thereof, requests personnel of any recipient

Disaster Assistance Administration, Department of Housing and Urban Development, pursuant to the Disaster Relief Act of 1974 (Public Law 93-288) and Executive Order 11795 of July 11, 1974.

7. Section 101-44.104-3 is revised to read as follows:

§ 101-44.104-3 Obsolete naval material.

Pursuant to 10 U.S.C. 7541, the Secretary of the Navy may give obsolete material not needed for naval purposes, and sell other material that may be spared at a price representing its fair value, to the Boy Scouts of America for the sea scouts, the Naval Sea Cadet Corps for the sea cadets, and to the Young Marines of the Marine Corps League for the young marines. The cost of transportation and delivery of material given or sold shall be charged to the Boy Scouts of America, to the Naval Sea Cadets, or to the Young Marines of the Marine Corps League, as appropriate.

(Sec. 205(c), 63 Stat. 390, 40 U.S.C. 486(c))

**Effective date.** This regulation is effective September 12, 1975.

**Dated:** August 29, 1975.

#### Title 43—Public Lands: Interior

### CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

#### APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5527 (A-6837)]

#### ARIZONA

#### Withdrawal for National Forest Recreation Area

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following national forest lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C. Ch. 2, but not from leasing under the mineral leasing laws, in aid of programs of the Department of Agriculture:

TONTO NATIONAL FOREST  
GILA AND SALT RIVER MERIDIAN  
LOST DUTCHMAN RECREATION SITE

T. 2 N., R. 8 E.,  
Sec. 36, those parts of lots 8, 11, and 12, not included in the area withdrawn by Public Land Order No. 4172 for State Highway No. 88 roadside zones; and, that portion of unpatented Mineral Survey 3886 in the W $\frac{1}{2}$ SE $\frac{1}{4}$ .  
T. 1 N., R. 9 E.,  
Sec. 6, lots 1 thru 7, S $\frac{1}{2}$ NE $\frac{1}{4}$ , SE $\frac{1}{4}$ NW $\frac{1}{4}$ , E $\frac{1}{2}$ SW $\frac{1}{4}$ , SE $\frac{1}{4}$ ;  
Sec. 7, lots 1 and 2, NE $\frac{1}{4}$ , E $\frac{1}{2}$ NW $\frac{1}{4}$ .  
T. 2 N., R. 9 E. (Unsurveyed),  
Sec. 31, that part of the S $\frac{1}{2}$  not included in the area withdrawn by Public Land Order No. 4172 for State Highway No. 88 roadside zones.

The areas described aggregate approximately 1,365.42 acres in Maricopa and Pinal Counties.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,  
Assistant Secretary of the Interior.

[Public Land Order 5528 (CA-2377)]

#### CALIFORNIA

#### Partial Revocation of Withdrawal of Public Lands Within the Toiyabe National Forest

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. The Executive Order of April 18, 1908, withdrawing lands in the Stanislaus National Forest (now Toiyabe National Forest), for administrative site purposes, is hereby revoked so far as it affects the following described land:

MOUNT DIABLO MERIDIAN  
T. 7 N., R. 21 E.,  
Sec. 4, NE $\frac{1}{4}$ SW $\frac{1}{4}$ .

The area described aggregates approximately 40 acres in Alpine County, California.

2. At 10 a.m. on October 14, 1975, the land shall be open to such forms of disposition as may be made of national forest lands.

JACK O. HORTON,  
Assistant Secretary of the Interior.

#### Title 45—Public Welfare

### CHAPTER XVI—LEGAL SERVICES CORPORATION

#### PART 1600—RESTRICTIONS ON CERTAIN ACTIVITIES

#### Picketing, Boycotts, Strikes, Illegal Activities; Legislative and Administrative Representation

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. §§ 2996-2996f ("the Act"). The Corporation's Board of Directors, which was confirmed by the Senate on July 9, 1975, held its first meeting on July 14, 1975. Section 1006(b) (5) of the Act requires the Corporation to issue certain rules and regulations within 90 days of its first Board meeting. Accordingly, on August 7, 1975, pursuant to sections 1006(b) (5), 1011 and 1008(e) of the Act, the Corporation noticed and published for comment proposed temporary rules and regulations. (40 FR 33293)

Pursuant to the foregoing notice, the Corporation received both oral and written comments from the public which were considered at meetings of the Committee on By-laws and Regulations held in Washington, D.C., on August 25 and September 8 and by the full Board of Directors on September 9, 1975.

Most of the oral comments and a portion of the written comments related to technical matters of drafting; many of the suggestions made by these commentators are reflected in the revised regulations issued herewith. One written comment suggested that the definition of "eligible client" contained in paragraph (d) of section 2 of the proposed regulations (now designated as 45 CFR § 1600.2 (d)) be refined and expanded. However, the current definition contained in paragraph (d) of section 2 is the same as that which is set forth in section 1002(3) of the Act. Moreover, the Corporation has determined that the instant regulations are not a proper vehicle for resolving the complex issue of eligibility within the meaning of section 1007(a) (2) of the Act. Finally, one commentator pointed out that the proposed regulations failed to comply with section 1006(b) (5) of the Act to the extent that provisions requiring enforcement by recipients with respect to the activities of their employees were omitted. This defect has been corrected in the revised regulations by including a new paragraph (b) of section 5 (now 45 CFR § 1600.5(b)) which requires recipients to establish and utilize procedures consistent with the notice and hearing requirements contained in section 1011 of the Act, for suspension or termination of employment of, or the application of other appropriate remedies to, any employee who violates section 3 or 4 of the revised regulations (45 CFR §§ 1600.3 and 1600.4).

The Board takes this opportunity to express its appreciation for the helpful suggestions which have been furnished and which provided a basis for the revised temporary rules and regulations issued herewith.

Pursuant to section 1008(e) of the Act, the Corporation hereby issues the following temporary rules and regulations to become effective on October 14, 1975. These regulations here issued are temporary. Final rules and regulations will be proposed by notice and publication by the Corporation as soon as practicable.

Part 1600 is added as follows:

Sec.  
1600.1 Purpose and scope.  
1600.2 Definitions.  
1600.3 Picketing, boycotts, strikes, illegal activities.  
1600.4 Legislative and administrative representation.  
1600.5 Enforcement.

AUTHORITY: Secs. 1006(b) (5), 1011, 1008 (e), Pub. L. 93-355, 88 Stat. 378, 382, 388, 387 (42 U.S.C. 2996e(b) (5), 2996f, 2996g)

#### § 1600.1 Purpose and scope.

The purpose of these temporary regulations is to implement and enforce provisions of sections 1006(b) (5), 1007(a) (5), and 1011 of the Act. Unless otherwise indicated, they shall apply to the Corporation, its employees, its recipients, and the employees of its recipients. Nothing contained herein shall affect the applicability as of October 14, 1975, of the other provisions of the Act, including the rights, duties and restrictions contained therein, to the Corporation, its directors, officers and employees, and to the recipients, and the employees and staff attorneys of the recipients.

visions of sections 1006(b) (5), 1007(a) (5), and 1011 of the Act. Unless otherwise indicated, they shall apply to the Corporation, its employees, its recipients, and the employees of its recipients. Nothing contained herein shall affect the applicability as of October 14, 1975, of the other provisions of the Act, including the rights, duties and restrictions contained therein, to the Corporation, its directors, officers and employees, and to the recipients, and the employees and staff attorneys of the recipients.

#### § 1600.2 Definitions.

As used in this Part, the term—

(a) "Act" means the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. §§ 2996-2996f;

(b) "Board" means the Board of Directors of the Legal Services Corporation;

(c) "Corporation" means the Legal Services Corporation established under the Act;

(d) "Eligible client" means any person financially unable to afford legal assistance;

(e) "Legal assistance" means the provision of any legal services consistent with the purposes and provisions of the Act;

(f) "Recipient" means any grantee, contractee, or recipient of financial assistance described in clause (A) of section 1006(a) (1) of the Act; and

(g) "Staff attorney" means an attorney who receives more than one-half of his annual professional income from a recipient organized solely for the provision of legal assistance to eligible clients under the Act.

#### § 1600.3 Picketing, boycotts, strikes, illegal activities.

(a) No employee of the Corporation or of any recipient (except as permitted by law in connection with such employee's own employment situation),

while carrying out legal assistance activities under the Act, shall engage in, or encourage others to engage in, any public demonstration or picketing, boycott, or strike.

(b) No such employee shall, at any time, engage in, or encourage others to engage in, any of the following activities:

(1) Any rioting or civil disturbance;

(2) Any activity which is in violation of an outstanding injunction of any court of competent jurisdiction;

(3) Any other illegal activity; or

(4) Any intentional identification of the Corporation or any recipient with any political activity prohibited by section 1007(a) (6) of the Act.

(c) Nothing in this section shall be interpreted to mean that the prohibition against "encouraging" precludes legal advice and representation for an eligible client with respect to such client's legal rights and responsibilities.

#### § 1600.4 Legislative and administrative representation.

No funds made available to recipients by the Corporation shall be used at any time, directly or indirectly, to influence the issuance, amendment, or revocation of any executive order or similar promulgation by any Federal, State, or local agency, or to undertake to influence the passage or defeat of any legislation by the Congress of the United States, or by any State or local legislative bodies, except where—

(a) Representation by an attorney as an attorney for any eligible client is necessary to the provision of legal advice and representation with respect to such client's legal rights and responsibilities (which shall not be construed to permit a recipient or an attorney to solicit a client for the purpose of making such representation possible, or to solicit a group with respect to matters of general concern to a broad class of persons as distinguished from acting on behalf of any particular client); or

(b) A governmental agency, a legislative body, a committee, or a member thereof requests personnel of any recipient to make representations thereto.

#### § 1600.5 Enforcement.

(a) The Corporation shall have authority, in accordance with procedures set forth at § 1067.1-4(b) of this title (relating to suspension) or §§ 1067.1-5 through 1067.1-11 of this title (relating to termination):

(1) To suspend or terminate the employment of any employee of the Corporation who violates the provisions of § 1600.3 of this title; and

(2) To suspend or terminate financial assistance to any recipient which fails to prohibit activities proscribed by the Act or by §§ 1600.3 and 1600.4 of this title;

Provided that, (1) no suspension of employment or financial assistance shall be continued for longer than 30 days unless the recipient or employee of the Corporation is provided notice and an opportunity for a hearing in accordance with the procedures set forth in §§ 1067.1-5 through 1067.1-11 of this title; and (ii) the term "OEO" in the above-referenced regulations shall mean the Corporation and the term "responsible OEO official" shall mean the President of the Corporation, or, if no President is in office, the Chairman of the Board, or his designee.

(b) Recipients shall establish and utilize procedures, consistent with the notice and hearing requirements contained in section 1011 of the Act, for suspension or termination of employment of, or the application of other appropriate remedies to, any employee who violates §§ 1600.3 or 1600.4 of this title.

**Effective date.** This part becomes effective on October 14, 1975.

DAVID S. TATEL,  
Counsel to the Corporation.  
[FR Doc. 75-24490 Filed 9-11-75; 8:45 am]

## proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

### DEPARTMENT OF THE INTERIOR

#### National Park Service

#### [ 36 CFR Part 7 ]

### GATEWAY NATIONAL RECREATION AREA Off-road Vehicle Use

Notice is hereby given that pursuant to the authority contained in 36 CFR § 2.6 and 36 CFR § 4.19(b) the Superintendent proposes to permit limited off-road vehicle use in a portion of the Breezy Point Unit of Gateway National Recreation Area.

The purpose of this notice is to provide public notification of intent to allow restricted off-road vehicle use for the sole purpose of transporting fishermen and fishing gear to the general vicinity of the tip of Breezy Point in Queens County, New York.

Alternative actions to those proposed have been considered and are discussed in an environmental assessment which is available in the office of the Superintendent. This assessment discusses past and present uses of the area and the effects of the proposed designation on wildlife and vegetative resources of the area. Initial evaluations indicate that the proposed designation is not a major Federal action significantly affecting the environment and does not require the preparation of a complete environmental impact statement. Based on public reaction to this notice and the environmental assessment a final determination of the need for preparation of an environmental impact statement will be made prior to putting the notice into effect.

Surf fishing in areas open to the general public is considered by the National Park Service to be an appropriate use of the Breezy Point tip. The degree of that use, and the manner in which it is conducted must be compatible with other uses of the same area. Included in the statute which established the Recreation Area is:

The Secretary (of the Interior) shall permit hunting, fishing, shell fishing, trapping, and the taking of specimens on the lands and waters under his jurisdiction within the Gateway National Recreation Area in accordance with the applicable laws of the United States and the laws of the States of New York and New Jersey and political subdivisions thereof, except that the Secretary may designate zones where and establish periods when these activities may not be permitted for reasons of public safety, administration, fish or wildlife management, or public use and enjoyment. (85 Stat. 1309)

This action is proposed to permit the enjoyment of a legitimate use, and concurrently protect the natural environ-

ment of the Breezy Point dune-marsh ecosystem.

Under this proposal, the use of 4-wheel drive and other off-road vehicles would be allowed to a parking area near the Breezy Point tip. The use of such vehicles shall be for the sole purpose of transporting fishermen and their gear to and from the tip, within a prescribed restricted driving lane and within a designated parking area. The designated driving lane and parking area will be marked both on-site and on a map available at the Superintendent's office.

If, upon the completion of the period for public comment, a decision is made to allow off-road vehicle use in the Breezy Point area, consideration will then be given to the promulgation of a regulation, under Part 7 of Title 36, Code of Federal Regulations, requiring an operator of an off-road vehicle to possess a permit issued by the Superintendent. The purpose of such a regulation would be to control the type and amount of vehicular use in this designated area. If and when such a regulation is proposed, interested persons will be given a period of 30 days in which to comment on it, pursuant to a notice of proposed rulemaking.

Public comment on this proposed designation is considered to be in the best interests of all users of Gateway National Recreation Area. Additionally, 36 CFR § 4.19(b) requires that a period for public comment be provided before a final decision on the proposed designation is made. Accordingly, interested persons may submit written comments, suggestions or objection regarding the proposed designation to the Superintendent, Gateway National Recreation Area, Floyd Bennett Field, Brooklyn, New York 11234, on or before October 14, 1975.

IMOGENE LACOVEY,  
Acting Associate Director,  
National Park Service.

### DEPARTMENT OF AGRICULTURE

#### Commodity Credit Corporation

#### [ 7 CFR 1430 ]

### PURCHASES AND OTHER OPERATIONS, DAIRY PRODUCTS

#### Price Support Program for Milk; Proposed Rule Making

Notice is hereby given that the Secretary of Agriculture, under authority of section 201(c) of the Agricultural Act of 1949, as amended (63 Stat. 1051, as amended; 15 U.S.C. 1446), and sections 4 and 5 of the Commodity Credit Corporation Act, as amended (62 Stat.

1070, as amended; 15 U.S.C. 714b and 714c), is considering the terms and conditions of the price support program for milk, for a semiannual review of the milk price support situation for the 1975-76 marketing year which began on April 1, 1975, including the general level of prices to producers for milk and the prices for and terms of purchase by CCC of butter, nonfat dry milk and Cheddar cheese. Section 201(c) of the Agricultural Act of 1949, as amended, provides as follows: "The price of milk shall be supported at such level not in excess of 90 per centum nor less than 75 per centum of the parity price therefor as the Secretary determines necessary in order to assure an adequate supply of pure and wholesome milk to meet current needs, reflect changes in the cost of production, and assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs. . . . Such price support shall be provided through purchases of milk and the products of milk."

Consideration will be given to any data, views, and recommendations which are submitted in writing to the Director, Commodity Operations Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20250. In order to be sure of consideration, all submissions must be received by the Director not later than September 29, 1975. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Director during regular business hours (8:15 a.m.-4:45 p.m.).

(7 CFR 1.27(b)).

Signed at Washington, D.C. on September 10, 1975.

KENNETH E. FRICK,  
Executive Vice President,  
Commodity Credit Corporation.

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the transition area at Olney, Illinois.

#### [ 14 CFR Part 71 ]

[Airspace Docket No. 75-GL-58]

### PROPOSED RULES

### National Highway Traffic Safety Administration

#### [ 49 CFR Part 583 ]

[Docket No. 75-25; Notice No. 1]

### COST INFORMATION REPORTING

#### Proposed Rulemaking

The purpose of this notice is to propose a new regulation, 49 CFR Part 583, *Cost Information Reporting*, that would require manufacturers of motor vehicles and motor vehicle equipment to submit specified cost data when opposing action of the National Highway Traffic Safety Administration (NHTSA) on the ground of increased cost.

Section 103 of the National Traffic and Motor Vehicle Safety Act of 1966, as amended ("the Act"), 15 U.S.C. 1392, authorizes the establishment of Federal motor vehicle safety standards for motor vehicles and motor vehicle equipment. The Act requires that these standards be practicable and that consideration be given to whether any proposed standard is reasonable and appropriate for the particular type of motor vehicle or motor vehicle equipment for which it is prescribed. On October 27, 1974, the Motor Vehicle and Schoolbus Safety Amendments of 1974, amending the Act, were signed into law (Pub. L. 93-492, 88 Stat. 1470). Section 113 of the Act as so amended provides that whenever any manufacturer opposes a requirement contained in a Federal motor vehicle safety standard, or any other action of the NHTSA under the Act, on the ground of increased cost, the manufacturer shall submit cost information, in such detail as the NHTSA may by rule or order prescribe, as may be necessary to properly evaluate the manufacturer's statement. Section 113 further provides that the agency shall promptly prepare an evaluation of this cost information and make both the cost information and agency evaluation available to the public in such a manner as to protect from disclosure any trade secret or confidential matter. Notice of the availability of these materials is to be published in the FEDERAL REGISTER.

This proposed rule is intended to enable the NHTSA to make an informed judgment as to the validity of manufacturers' claims that actions of the agency, such as issuance of safety standards, are not practicable because of increased cost. The requirement that such claims set forth data in significant categories will provide a means by which manufacturers' cost studies may be compared with one another, and with comparable studies by the NHTSA.

Because motor vehicle safety standards share many common elements and comprise a major portion of NHTSA regulatory activity, the proposed regulation would require certain cost information to be submitted by a manufacturer opposing a requirement contained in a safety standard but not required to be submitted by a manufacturer opposing other actions of the NHTSA under the Act. For example, since a single safety standard frequently contains several performance

requirements, § 583.5(a) proposes that a manufacturer submit the required cost information data with respect to each requirement in a safety standard it opposes. This is necessary to provide a common basis for comparison and review. Similarly, § 583.5(g) proposes that manufacturers opposing a requirement contained in a safety standard submit rather detailed information regarding research, capital materials, tooling, weight increase, and test procedure.

Although the proposed requirements are substantially similar for claims opposing requirements of Federal motor vehicle safety standards and claims opposing other actions of the NHTSA, § 583(h) proposes the submission of less detailed information for claims opposing requirements not contained in a safety standard. However, information for both types of claims is generally required to be submitted in terms of "incremental cost." This is defined as the increased cost specifically attributable to the NHTSA action in question, adjusted so as to exclude increased cost attributable to general increases in the prices of materials, supplied products, utilities, services, real estate, taxes, credit, or the rate of pay of employees. The NHTSA believes that through this definition the cost increase traceable to the regulation in question may be identified and isolated from a cost increase occasioned by inflation, other regulatory requirements, or independent decisions of the manufacturer regarding management, marketing, or design.

Section 583.5(c) anticipates that in some cases it may be impossible to calculate one or more of the factors contributing to incremental cost with precision and an estimate will be necessary, based on such factors as previous costs of similar items or analyses of necessary processes. The estimated factor will prevent the manufacturer from providing an exact statement of incremental cost. It is proposed that in such a case the manufacturer identify any estimates and state a range within which the incremental cost may reasonably be expected to fall.

Meaningful evaluation of claims of increased cost requires consideration of the actual work required to comply. Consequently, §§ 583.5(g) and 583.5(h) propose that the manufacturer summarize its technique for compliance. Where a safety standard was opposed, the manufacturer would describe the requisite design, assembly and materials. Where more than one compliance technique is under consideration, it is proposed that the manufacturer describe each method. The proposal then would require the manufacturer to provide detailed cost data with respect to each of the compliance techniques under consideration. The proposal to require alternative cost information where a manufacturer is studying alternative compliance techniques follows the general approach of the NHTSA in setting performance, rather than design, standards.

In addition it is proposed in § 583.5(c) that the manufacturer indicate whether, and by what amount, stated costs will

### PROPOSED RULES

### Part 583—Cost Information Reporting

Sec. 583.5

decrease with the passage of time. The manufacturer would be required to report whether its cost information is based

facturer shall identify all estimated factors and state both its highest and lowest reasonable estimates of incremental cost.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon, Des Plaines, Illinois 60018. All communications received on or before October 14, 1975 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon, Des Plaines, Illinois 60018.

A new instrument approach procedure has been developed for the Olney-Noble Airport, Olney, Illinois. Controlled airspace is required to protect the procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (40 FR 441), the following transition area is amended to read:

#### OLNEY, ILLINOIS

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Olney-Noble Airport (latitude 38°43'20" N., longitude 88°10'25" W.), within 2 miles each side of the 223° bearing from the airport, extending from the 5-mile radius area to 3 miles southwest of the airport, and within 2 miles each side of the 344° radial of Semoville VORTAC, extending from the 5-mile radius area to 5.5 miles southeast of the airport.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

Issued in Des Plaines, Illinois, on August 25, 1975.

R. O. ZIEGLER,  
Acting Director,  
Great Lakes Region.

[FR Doc. 75-24262 Filed 9-11-75; 8:45 am]

#### [14 CFR Part 71]

[Airspace Docket No. 75-GL-60]

#### TRANSITION AREA

#### Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the transition area at Canton, Illinois.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon, Des Plaines, Illinois 60018. All communications received on or before October 14, 1975 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon, Des Plaines, Illinois 60018.

An additional instrument approach procedure has been developed for the Ingersoll Airport, Canton, Illinois. Therefore, additional controlled airspace is required to protect this procedure. A review of the controlled airspace in this area indicates a very irregular transition area boundary which is difficult for both pilots and air traffic controllers to define. Controlled airspace for four airports is designated in citations for Peoria and Pekin, Illinois. Combining these citations into one and making the boundary more regular should be advantageous.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (40 FR 441), the following transition area is deleted:

#### PEKIN, ILLINOIS

In § 71.181 (40 FR 441), the following transition area is amended to read:

#### PEORIA, ILLINOIS

That airspace extending upward from 700 feet above the surface bounded by a line beginning at latitude 40°54' N., longitude 89°59' W., to latitude 40°52' N., longitude 89°41' W., to latitude 40°42' N., longitude 89°34' W., to latitude 40°23' N., longitude 89°34' W., to latitude 40°26' N., longitude 90°07' W., to latitude 40°34' N., longitude 90°11' W., to latitude 40°47' N., longitude 90°08' W., to point of beginning.

These amendments are proposed under authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

Issued in Des Plaines, Illinois, on August 27, 1975.

H. W. POGGEMEYER,  
Acting Director,  
Great Lakes Region.

[FR Doc. 75-24263 Filed 9-11-75; 8:45 am]

#### [14 CFR Part 71]

[Airspace Docket No. 75-GL-68]

#### CONTROL ZONE AND TRANSITION AREA

#### Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to designate a control zone and a transition area at Lone Rock, Wisconsin.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. All communications received on or before October 14, 1975 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conference with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

An instrument approach procedure has been developed for the Tri-County Airport, Lone Rock, Wisconsin, and controlled airspace is required to protect the procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (40 FR 441), the following transition area is added:

#### LONE ROCK, WISCONSIN

That airspace extending upward from 700 feet above the surface within a 9-mile radius of the Tri-County Airport (latitude 43°12'36" N., longitude 90°11'06" W.).

In § 71.171 (40 FR 354), the following control zone is added:

#### LONE ROCK, WISCONSIN

Within a 5-mile radius of the Tri-County Airport (latitude 43°12'36" N., longitude 90°11'06" W.). This control zone shall be effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airmen's Information Manual.

These amendments are proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

FEDERAL REGISTER, VOL. 40, NO. 178—FRIDAY, SEPTEMBER 12, 1975

decrease with the passage of time. The manufacturer would be required to report whether its cost information is based on a design other than the least costly feasible method of meeting the opposed requirement and state the difference in cost between its method and the least costly method.

Under Sec. 113 of the Act, "cost" refers to both the manufacturer's cost and the cost to retail purchasers. Therefore it is proposed that the manufacturer estimate, in addition to the incremental cost of manufacture, the incremental cost to the consumer at retail.

The proposal provides that within 90 working days after the receipt of a cost information report, the NHTSA will complete a written evaluation. The report and the evaluation would be made available to the public after the deletion of matter submitted by the manufacturer which contained trade secrets or other confidential information. "Confidential information" would be defined as a trade secret or other information not generally known to competitors which, if known, would be competitively harmful. The determination as to what matter constitutes confidential information would rest with the NHTSA, but the manufacturer would be required to specify the matter which it claimed constituted a trade secret or was otherwise confidential at the time it submitted the cost information report.

In consideration of the foregoing, it is proposed that 49 CFR Part 583, *Cost Information Reporting*, be adopted as set forth below.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after the date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

*Comment closing date:* October 28, 1975.

*Proposed effective date:* 30 days after publication of the final rule.

(Sec. 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1407); Sec. 105, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1402); delegations of authority at 49 CFR 1.51 and 49 CFR 501.8)

Issued on September 8, 1975.

ROBERT L. CARTER,  
Associate Administrator,  
Motor Vehicle Programs.

#### Part 583—Cost Information Reporting

Sec.  
583.1 Scope.  
583.2 Purpose.  
583.3 Application.  
583.4 Definitions.  
583.5 Cost information reports.  
583.6 NHTSA evaluation and public availability.  
583.7 Confidential information.

AUTHORITY: Sec. 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1407); sec. 105, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1402); delegations of authority at 49 CFR 1.51 and 49 CFR 501.8.

#### § 583.1 Scope.

This part specifies procedures for the submission and handling of cost information required of a manufacturer that opposes, on the ground of increased cost, an action of the National Highway Traffic Safety Administration (NHTSA) under any provision of the National Traffic and Motor Vehicle Safety Act of 1966, as amended (the Act).

#### § 583.2 Purpose.

The purpose of this part is to enable the NHTSA to make an informed judgment as to the validity of claims by manufacturers that any proposed or established requirement contained in a Federal Motor Vehicle Safety Standard, or any other action of the NHTSA under the Act, is not practicable because of increased cost.

#### § 583.3 Application.

This part applies to all manufacturers of complete or incomplete motor vehicles, and all manufacturers of motor vehicle equipment.

#### § 583.4 Definitions.

"Confidential information" means a trade secret or information not generally known to competitors which, if known, would be competitively harmful.

"Incremental cost" means the increased cost specifically attributable to the NHTSA action in question, adjusted so as to exclude any general increase in the cost of materials, supplied products, utilities, services, real estate, taxes, credit, or the rate of pay of employees.

#### § 583.5 Cost information reports.

(a) Each manufacturer that opposes, on the ground of increased cost, any proposed or established requirement contained in a Federal motor vehicle safety standard, shall submit to the NHTSA, together with its expression of opposition, the information specified in paragraph (g) of this section with regard to each requirement it opposes.

(b) Each manufacturer that opposes, on the ground of increased cost, any proposed or established action of the NHTSA under the Act, other than proposal or establishment of a requirement contained in a Federal Motor Vehicle Safety Standard, shall submit to the NHTSA, together with its expression of opposition, the information specified in paragraph (h) of this section.

(c) If any factor contributing to the manufacturer's statement of incremental cost is not capable of exact calculation and must be estimated, the manu-

facturer shall identify all estimated factors and state both its highest and lowest reasonable estimates of incremental cost. If the cost statement is not, within the knowledge of the manufacturer, based on a design representing the least costly feasible method of meeting the opposed requirement, the manufacturer shall indicate the difference in cost between its method and the least costly method. If the manufacturer has reason to believe that the costs described will decrease with the passage of time, it shall provide its estimate of what the costs will be at the future time when they have stabilized.

(d) If the manufacturer finds that incremental cost per vehicle is not identical for every vehicle type and vehicle market class, it shall identify vehicle types or vehicle market classes in categories that are appropriate to show the cost differences, and state the incremental cost per vehicle for each category.

(e) Values of both actual and estimated costs shall be expressed in current U.S. dollars.

(f) If a manufacturer is unable to furnish any item of information required by paragraphs (g) or (h) of this section, it shall explain its inability to do so.

(g) The information required by paragraph (a) of this section shall identify the Federal motor vehicle safety standard requirement to which it relates and summarize the technique by which compliance with the opposed requirement is, or would be, achieved. If the manufacturer utilizes, or is considering utilization of, more than one technique to achieve compliance, it shall summarize each technique. With respect to each technique, the manufacturer shall provide the necessary changes in design, manufacturing processes, assembly processes and materials. With respect to each technique, the manufacturer shall provide the following information:

(1) *Manufacturer's total cost.* The manufacturer shall state the total annual incremental cost of production, including the annual production volume that the cost is based on.

(2) *Manufacturer's per vehicle cost.* If the requirement opposed is applicable to motor vehicles or motor vehicle equipment installed by the manufacturer in motor vehicles prior to the first sale of such motor vehicles, the manufacturer shall state the incremental cost per vehicle of, itemized by subsystem or component as appropriate, and provide an itemized schedule of amortization for, (i) research and development, (ii) capital and facilities, (iii) tooling, and (iv) material.

(3) *Manufacturer's per item cost.* If the requirement opposed is applicable to motor vehicle equipment, the manufacturer shall state the incremental cost of production per item of motor vehicle equipment of, and provide an itemized schedule of amortization for, (i) research and development, (ii) capital and facilities, (iii) tooling, and (iv) material.

(4) *Retail cost per vehicle.* If the requirement opposed is applicable to motor vehicles or motor vehicle equipment installed by the manufacturer in motor

FEDERAL REGISTER, VOL. 40, NO. 178—FRIDAY, SEPTEMBER 12, 1975

vehicles prior to the first sale of such motor vehicles, the manufacturer shall state the incremental cost of (1) manu-

(2) *Manufacturer's per vehicle cost.* If the action opposed is applicable to motor vehicles, motor vehicle equipment in-

Copies of the information submitted by Florida in connection with these two plan revisions may be examined by the

vehicles prior to the first sale of such motor vehicles, the manufacturer shall state the incremental cost of (1) manufacturer markup to dealer price, and (ii) dealer markup to list price.

(5) *Retail cost per item.* If the requirement opposed is applicable to motor vehicle equipment, the manufacturer shall state the incremental cost per item at retail.

(6) *Reserve for warranty cost.* The manufacturer shall state the incremental reserve for warranty cost per vehicle.

(7) *Assembly time cost.* The manufacturer shall state the incremental assembly time cost per vehicle.

(8) *Labor cost.* The manufacturer shall state the incremental labor cost per vehicle.

(9) *Weight increase.* The manufacturer shall state the direct increase in weight per vehicle, if any, itemized by subsystem or component as appropriate, specifically attributable to the proposed or established requirement, and the indirect incremental weight and cost of production (similarly itemized) due to such direct weight increase (for example, costlier tires, suspension system, or engine necessitated by the direct weight increase).

(10) *Lifetime operating cost per vehicle.* The manufacturer shall state the estimated lifetime incremental costs of (i) inspection labor, (ii) maintenance labor, (iii) parts replacement, and (iv) fuel consumption.

(11) *Test procedure.* The manufacturer shall describe its procedure for testing or otherwise assuring compliance with the opposed requirement and state the total annual incremental cost, the incremental cost per test and the incremental cost per vehicle of such procedure. If the manufacturer utilizes, or is considering utilization of, more than one such procedure, he shall describe each procedure and, with respect to each such procedure, supply the cost information referred to in the preceding sentence.

(12) *Leadtime.* If the manufacturer contends that one or more costs required to be stated by this paragraph could be reduced by delaying the effective date in the proposed or established standard, the manufacturer shall state the controlling leadtimes and provide information relating incremental cost to a later stated effective date.

(b) The report required by paragraph (b) of this section shall identify the action of the NHTSA to which it relates and summarize the technique by which compliance with the opposed requirement is, or would be, achieved. If the manufacturer utilizes, or is considering utilization of, more than one technique to achieve compliance, it shall summarize each technique. With respect to each technique, the manufacturer shall provide the following information:

(1) *Manufacturer's total cost.* The manufacturer shall state the total annual incremental cost of production, including the annual production volume the cost is based on.

(2) *Manufacturer's per vehicle cost.* If the action opposed is applicable to motor vehicles, motor vehicle equipment installed by the manufacturer in motor vehicles prior to the first sale of such motor vehicles, or manufacturers of motor vehicles, the manufacturer shall state the incremental cost of production per vehicle.

(3) *Manufacturer's per item cost.* If the action opposed is applicable to motor vehicle equipment or manufacturers of motor vehicle equipment, the manufacturer shall state the incremental cost of production per item of motor vehicle equipment.

(4) *Retail cost per vehicle.* If the action opposed is applicable to motor vehicles, motor vehicle equipment installed by the manufacturer in motor vehicles prior to the first sale of such motor vehicles, or manufacturers of motor vehicles, the manufacturer shall estimate the incremental cost per vehicle at retail.

(5) *Retail cost per item.* If the action opposed is applicable to motor vehicle equipment, or manufacturers of motor vehicle equipment, the manufacturer shall estimate the incremental cost per item at retail.

(6) *Labor cost.* The manufacturer shall state the cost of, and provide an itemized schedule of amortization for, land and capital assets acquired specifically to comply with the proposed or established action.

(7) *Leadtime.* If the manufacturer contends that one or more incremental costs required to be stated by this paragraph could be reduced by delaying the effective date of the proposed or established action, the manufacturer shall state the controlling leadtimes and provide information relating incremental cost to a later stated effective date.

§ 583.6 NHTSA evaluation and public availability.

Within 90 working days after the receipt of a cost information report submitted pursuant to § 583.5, the NHTSA will complete a written evaluation of such report. Subject to § 583.7, the cost information report and the completed NHTSA evaluation will be filed in the appropriate docket or other public file and be available for public inspection at the Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, SW., Washington, D.C. 20590.

§ 583.7 Confidential information.

Any manufacturer submitting a cost information report pursuant to § 583.5 that contains confidential information may request that the NHTSA withhold such information from public availability. Such a request shall be submitted together with the cost information report and specify what parts of the report are claimed to contain confidential information. If the Administrator determines that the claim is meritorious, he will delete the confidential information prior to placing the report in the public docket pursuant to § 583.6.

## ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 429-3]

### ARIZONA: APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Public Availability of Emission Data, Permit Procedures, and Definition of Major Sources under State Jurisdiction; State Regulations

The Regional Administrator hereby issues this notice setting forth Arizona revisions to the State Implementation Plan as proposed rulemaking, and advises the public that comments may be submitted on whether these revisions should be approved or disapproved as required by section 110 of the Clean Air Act. Only comments received within 30 days from the publication of this notice will be considered. The Regional Administrator's decision to approve or disapprove the revisions will be based on whether they meet the requirements of section 110(a) (2) (A)-(H) and EPA regulations in 40 CFR Part 51.

Pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the State of Arizona submitted to EPA an implementation plan for the attainment of National Ambient Air Quality Standards. On May 31, 1972 (37 FR 10842), the Administrator approved and disapproved each portion of the plan, depending on whether or not it satisfied the appropriate 40 CFR Part 51 requirement. Pertinent to this Federal Register notice, EPA approved the state's legal authority to require stationary sources to maintain records on emission data and to make such data available for public inspection. At the same time, the regulations and procedures implementing that legal authority were disapproved by EPA (except in Maricopa and Pima Counties). Because these provisions for source surveillance did not meet EPA requirements (§ 51.19), the Administrator promulgated substitute regulations to insure public availability of emission data (38 FR 12705). A second section of this disapproval addressed the lack of procedures for maintenance of data on emission reductions achieved as a result of transportation control measures. This particular deficiency was corrected with EPA's promulgation of § 52.140, a component of the Arizona transportation control plan (38 FR 33376, December 3, 1973).

The Natural Resources Defense Council (NRDC), in a case filed with the Ninth Circuit Court of Appeals (No. 72-2145), challenged the adequacy of Arizona's provisions for public availability of emission data as well as EPA's approval of the state's new source review authority. Recently, the Court ruled that the state's legal authority for public availability of emission data is adequate. As to new source review, the court ruled that Arizona's authority for new source review was inadequate and that EPA should insure that it be revised.

Regarding Arizona's regulations and procedures for recordkeeping and public

availability of data (Reg. 7-1-1.4 of the Arizona Rules and Regulations for Air Pollution Control), the state has acted to amend these to correct deficiencies noted by EPA in its initial disapprovals. These were submitted to EPA on March 29, 1973, and on September 27, 1974. If these amendments are approvable, EPA will revoke its promulgation of § 52.130 (c).

In addition to this proposed change, Arizona submitted to EPA for approval two other implementation plan revisions. First, Section 7-1-8 of the Arizona Rules and Regulations for Air Pollution Control are amended to revise the definition of major sources under original state jurisdiction and authority. Such major sources include facilities generating more than 75 tons of air contaminants per day, and as revised, would include all activities pertaining to the smelting of copper ore, and the refining of crude oil. Other areas under original state jurisdiction would include any air pollution generated by activities of state organizations, motor vehicle emissions, and any emissions from portable combustion engines which are capable of being operated, without major alteration, in more than one county. The regulations allow delegation of authority for such sources to local jurisdictions. Secondly, amendments to Section 7-1-11 clarify the statutory procedures relating to the filing and review of applications for installation permits, operating and conditional permits, and the specified permit fees.

All material relating to the proposed revisions will be available for public inspection at the Freedom of Information Center, EPA, 401 M Street SW., Washington, D.C. 20460, the Arizona State Department of Health Services, 1740 West Adams Street, Phoenix, Arizona and at EPA—Region IX, 100 California Street, San Francisco, California 94111. Interested persons may participate in this rulemaking by submitting written comments, preferably in triplicate, to the Regional Administrator, Environmental Protection Agency, Region IX, 100 California Street, San Francisco, California 94111. Relevant comments received on or before October 14, 1975 will be considered. Such comments received will be available during normal working hours at the Region IX office. Substantive responses to individual comments will not be provided; however, the final promulgation will include a general discussion of substantive issues raised during the public comment period.

(Authority: Sec. 110(a) of the Clean Air Act, as amended, 42 U.S.C. 1857c-5(a).)

Dated: August 29, 1975.

L. RUSSELL FREEMAN,  
Acting Regional Administrator,  
Environmental Protection Agency.

[40 CFR Part 52]

[FRL 429-2]

### FLORIDA: APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

#### Proposal of Plan Revisions

On March 27, 1975 (40 FR 13521), the Agency announced the receipt of a number of revisions which the State of Florida proposed to make in its implementation plan. At that time, only two of the revisions were described, those involving changes in the limits on sulfur dioxide emissions from sulfur recovery and sulfuric acid plants. The purpose of the present notice is to describe two more of the revisions submitted on February 12, 1975, and to solicit public comment on them. They are being announced separately because they deal with matters which the Agency does not normally regard as falling within the regulatory provisions of a State implementation plan.

Section 17-2.03, General Restrictions, of the Florida air pollution control regulations now provide at subsection (1) that:

If the latest reasonably available technology as may be applied to air pollutant sources results in or is expected to result in lower or improved air pollutant emissions, then the latest available technology as determined by the Department shall apply.

The first of the revisions which are the subject of this notice would expand and make more specific the foregoing provision of the Florida plan. As rewritten, subsection 17-2.03(1) specifies the bases upon which the State will determine "Latest Reasonably Available Control Technology" (LRACT). Determinations are to be formally made only after notice and public hearing, and shall be subject to periodic review and revision. LRACT will not have to be applied to an individual source which is in compliance with ambient air quality standards, applicable emission limiting regulations, any Air Quality Maintenance Plans in effect, and with the State's non-degradation requirements. Before requiring the use of LRACT, the State shall consider, in addition to the foregoing conditions, the social and economic impact of such a requirement, its effect on energy consumption and conservation, and any secondary pollution which might result.

The second revision involves the addition of a fourth category to revisions specifically provided for in the Florida plan's section on plan revisions. This addition is accomplished by the insertion of the following sentence:

The plan may also be revised from time to time consistent with the requirements applicable to implementation plans under Title 40, Code of Federal Regulations, Part 51, and Section 110 of the Clean Air Act Amendments of 1970, Public Law 91-604, 42 United States Code, Section 1857c-5.

Copies of the information submitted by Florida in connection with these two plan revisions may be examined by the public at the following locations:

Air Programs Branch, Air & Hazardous Materials Division, Region IV, Environmental Protection Agency, 1421 Peachtree Street NE., Atlanta, Ga. 30309.

Florida Department of Environmental Regulation, 2662 Executive Center Circle East, Montgomery Building, Tallahassee, Fla. 32301.

An evaluation of the proposed revisions may be obtained by consulting personnel of the Agency's Region IV Air Programs Branch at the Atlanta address given above, telephone 404/526-3043.

Interested parties are encouraged to participate in this rulemaking by submitting written comments on the proposed plan revisions. To be considered, such comments must be received on or before October 14, 1975, and should be addressed to the Agency's Region IV Air Programs Branch at the Atlanta address just mentioned. After weighing relevant comments and other available information in the light of requirements set forth in the Clean Air Act and in the Agency's implementing regulations (40 CFR Part 51), the Administrator will take action on the Florida proposals described in this notice.

(Section 110(a) of the Clean Air Act (42 U.S.C. 1857c-5(a)))

Dated: September 3, 1975.

JACK E. RAVAN,  
Regional Administrator,  
Region IV.

[Docket No. 19982 RM-2297]

### TELEVISION BROADCAST STATIONS

Table of Assignments; Arkansas; Further Notice of Proposed Rule Making and Order To Show Cause

In the matter of amendment of § 73.606(b), table of assignments, television broadcast stations (Mountain View, Arkansas).

1. The *Notice of Proposed Rule Making* in this proceeding (39 FR 11931) was issued in response to the petition of the Arkansas Educational Television Commission ("AETC") in which it proposed the assignment of Channel 6 to Mountain View, Arkansas. Comments in response to the *Notice* were filed by AETC and by the Association of Maximum Service Telecasters, Inc. ("AMST"), the Corporation for Public Broadcasting ("CPB"), and Mid America Television Company, licensee of Sedalia, Missouri, co-channel station KMOS-TV ("KMOS-TV"). Reply comments were filed by the same parties.

2. The *Notice* pointed out that while the proposed assignment met all the ap-

controlled offset operation the area would be further reduced to 1.470 square

costs necessitated by the offset changes, whatever the item.

Pursuant to § 1.87 of the Commission's Rules and Regulations, the above li-

of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former lead-

## FEDERAL HOME LOAN BANK BOARD

[No. 75-833]

2. The Notice pointed out that while the proposed assignment met all the applicable mileage separation requirements contained in the Rules, these separation distances were based upon the utilization of carrier offset operation. In this instance it would have been necessary to require a minimum of nine operating stations and one vacant assignment to change carrier offset designation. AETC submitted that the cost involved could be high, and it urged what it saw as a simpler and less expensive alternative, namely having its proposed station and KMOS-TV, Sedalia, Missouri, operate in a jointly controlled manner that would be more or less synchronous. This, it was asserted, would offer the same 17 dB improvement in the desired to undesired signal ratio that offset operation permitted. Additionally, AETC stated it would, if necessary, utilize a directional antenna at the proposed Mountain View station to minimize radiation in the direction of the Sedalia station. AETC said that no existing stations would be required to change carrier offset and KMOS-TV would receive protection equivalent to that obtained by the use of the conventional offset carrier arrangement. The Notice proposed to proceed along this line.

3. In the filings of KMOS-TV and AMST the premise of the Notice that synchronous operation of KMOS-TV and the proposed Mountain View station could offer the same 17 dB improvement in the desired to undesired signal ratio that offset operation would offer has been called into question. The March 1950 issue of *RCA Review* was cited, and in particular we were referred to the article's conclusion that, "offset operation has been shown to be superior in results and more economical to apply than television carrier synchronization." KMOS-TV also cited one of the findings of the Television Allocation Study Organization ("TASO") in its report to the Commission in which TASO indicated that the use of precise frequency control equipment at stations operating conventionally with offset carriers offers a 13 dB improvement in the desired to undesired signal ratio over synchronous operations and an 8 dB improvement over conventional offset operations. KMOS-TV asserted that if the Sedalia and Mountain View stations operated synchronously, with maximum facilities and nondirectional antenna, an area of 5,130 square miles would experience interference within the Grade B contour of each station. With conventional offset this area of interference would be reduced to 3,660 square miles within the Grade B contour of each station, and for precisely

<sup>1</sup> A system of arranging stations geographically so that interference to their reception is minimized. This is done through use of a triangular pattern in which one station operates with a zero offset and the other operate 10 kHz above or below the frequency of the first station.

<sup>2</sup> *Engineering Aspects of Television Allocations: Report of the Television Allocations Study Organization to the Federal Communications Commission; March 16, 1958.*

controlled offset operation the area would be further reduced to 1,470 square miles within the Grade B contour of each station. KMOS-TV acknowledged that the use of a directional antenna in addition to synchronous operation could provide protection equivalent to that obtainable from the use of precise offset carriers at both stations. The directional antenna, however, would restrict the Mountain View station's coverage to the north.

4. In addition to the engineering matters at issue, there has also been a dispute regarding the relative costs of following these approaches. Most recently, however, AETC in its reply comments stated that it would be willing to reimburse licensees of the affected stations for the amounts set forth in the AMST comments or other reasonable costs which are involved in effecting these channel offsets. Earlier it had asserted that the costs of these changes would be higher than the directionalization and synchronous operation, a proposition others disputed. Its present offer, it states, is based on the assumption that no new instrumentation is required. With this in mind, AETC indicates that should the Commission decide not to follow the synchronous operation proposed in the Notice, it requests that a *Further Notice of Proposed Rule Making* be released looking toward accomplishing the offset changes listed in the Notice so that the Mountain View assignment may be made.

5. Based on the additional information the Commission has obtained, it has become clear that synchronous operation, with or without directionalization, does not represent the best method of proceeding. Rather, we believe that carrier offset represents the approach worth considering, as it would involve less expense and provide more efficient service. Proceeding in this manner would retain the option for the Sedalia Channel 6 station and the proposed co-channel Mountain View station to employ precise offset operation in the future to attain expansion of each station's interference-free coverage area.

6. We further note that AETC has agreed to reimburse the nine affected stations for expenses incurred in modifying the carrier offsets, but only for the amounts set forth in the AMST comments "or for other reasonable costs, assuming no new instrumentation is involved." The Commission, on the other hand, expects AETC to make all reasonable reimbursements of expenses incurred by stations that are required to change frequency offsets as a result of this proceeding. AETC is requested to specifically comment upon its willingness to bear all reasonable reimbursement

<sup>3</sup> If no directionalization were employed, there would be more interference; if it were employed, then there would be loss of coverage to an area which otherwise would receive service. Thus, in this area, viewers would be unable to watch the Mountain View station because of its directional pattern or either station because of the mutual interference.

costs necessitated by the offset changes, whatever the item.

7. In addition to comments regarding these proposed changes, the comments of the Mexican Government will be requested on the required change in the carrier offset of Station XET-TV, Monterrey, Nuevo Leon (from 6 to 6+). AETC should indicate whether it stands ready to provide reimbursement for this station as well.

8. In view of the foregoing, and pursuant to authority found in sections 4(i), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b) (6) of the Commission's Rules and Regulations, IT IS PROPOSED TO AMEND § 73.606(b) of the Commission's Rules and Regulations, the Television Table of Assignments, as concerns Mountain View, Arkansas, as follows:

City and State	Channel No.	
	Present	Proposed
Mountain View, Ark.	6+	6+
Dodge City, Kans.	6+, 21-	6+, 21-
New Orleans, La.	4+, 6+, 8, 12, 20-, 26-, 32+, 38+	4+, 6, 8, 12, 20-, 26-, 32+, 38+
Greenwood, Miss.	6+, 23+	6+, 23+
Sedalia, Mo.	6+, 6+, 8-, 11-, 23-, 29-, 35-, 41+	6+, 6+, 8-, 11-, 23-, 29-, 35-, 41+
Tulsa, Okla.	3-, 6+, 10-, 16, 28-, 38+	3-, 6+, 10-, 16, 28-, 38+
Corpus Christi, Tex.	3-, 6+, 10-, 16, 28-, 38+	3-, 6+, 10-, 16, 28-, 38+
San Angelo, Tex.	3-, 6+, 10-, 16, 28-, 38+	3-, 6+, 10-, 16, 28-, 38+
Temple, Tex.	6, 46-	6+, 46-
Texarkana, Tex.	6+, 17-, 34-	6, 17-, 34-

9. Accordingly, IT IS ORDERED, that pursuant to Section 316 of the Communications Act of 1934, as amended, the following parties SHALL SHOW CAUSE why their licenses for operation on the below listed channels should not be modified to specify a change in the channel offset as listed below, if the Commission finds it in the public interest to assign Channel 6- to Mountain View, Arkansas. This Order is being made with the understanding that the permittee of Channel 6- at Mountain View, Arkansas, will pay reasonable reimbursement of expenses incurred in the change of channel offset for all affected parties.

Licensee and Location	Channel and Offset	
	Present	Modified
Southwest Kansas Television Co., Inc., Dodge City, Kans. (KTVC)	6+	6-

## FEDERAL HOME LOAN BANK BOARD

[No. 75-833]

[12 CFR Parts 561, 563, 564, 569a, and 571]

## PROPOSED AMENDMENTS RELATING TO CHECKING ACCOUNTS

SEPTEMBER 8, 1975.

The Federal Home Loan Bank Board, as operating head of the Federal Savings and Loan Insurance Corporation, considers it advisable to propose to amend Parts 561, 563, 564, 569, and 571 of the Rules and Regulations for Insurance of Accounts (12 CFR Parts 561, 563, 564, 569, and 571) for the purpose of permitting insured institutions to offer checking accounts when authorized to do so by statute, regulation, or otherwise, and to provide that such accounts are eligible for insurance by the Federal Savings and Loan Insurance Corporation. Federal savings and loan associations presently are not authorized to issue checking accounts, and State-chartered savings and loan associations generally are not permitted to issue such accounts. However, State law in Maine and Connecticut will authorize checking accounts to be offered by State savings and loan associations, beginning October 1, 1975, in Maine, and January 1, 1976, in Connecticut.

At present, the Board's Insurance Regulation § 563.6 prohibits insured institutions from issuing any demand securities or advertising or representing that holders of securities will be paid on demand. Present § 561.3 defines "insured account" in terms of savings accounts, and other regulatory provisions refer only to savings accounts. These restrictions are not required by statute: the National Housing Act, as amended (48 Stat. 1255, 12 U.S.C. 1725 et seq.), defines "insured account" at section 401(c) as a "share, certificate, or deposit account" approved by the Corporation, and section 403(a) of that Act empowers the Corporation to "insure the accounts" of Federal and State savings and loan institutions.

Therefore, in order that State-chartered insured institutions not be placed at a competitive disadvantage in relation to other thrift institutions in their area, in States which permit thrift institutions to offer checking accounts, the Board proposes to lift its previous restrictions on the issuance of such accounts. It is noted, however, that under the proposal insured institutions would be required under § 563.1 of the Insurance Regulations to obtain Corporation approval of the form of any such checking account prior to issuance. Furthermore, should such restriction be lifted, the Board intends to closely monitor the effects of checking accounts on the savings and loan industry and would impose operational and reserve restrictions relating to such accounts should they prove necessary.

Accordingly, the Board hereby proposes to amend the Insurance Regulations by adding a new § 561.11a, and amending §§ 561.3, 561.11, 561.15(f), 561.17(a), 561.24, 563.1, 563.6, 563.13(a)

Pursuant to § 1.87 of the Commission's Rules and Regulations, the above licensees may, not later than October 29, 1975, request that a hearing be held on the proposed modification. Pursuant to § 1.87(f), if the right to request a hearing is waived, the above licensees may, no later than 1975, file a written statement showing with particularity why their license should not be modified as proposed in this *Order to Show Cause*. In this case, the Commission may call on any of the licensees to furnish additional information, designate the matter for hearing, or issue without further proceedings an *Order* modifying the licensees as provided in the *Order to Show Cause*. If the right to request a hearing is waived and no written statement is filed by the date referred to above, the licensees will be deemed to consent to modification as proposed in the *Order to Show Cause* and a final *Order* will be issued by the Commission, if the channel changes mentioned above are found to be in the public interest.

10. IT IS DIRECTED, That the Secretary of the Commission SHALL SEND a copy of this *Order* by certified mail, return receipt requested, to (1) Southwest Kansas Television Co., Inc., licensee of Station KTVC(TV), Dodge City, Kansas; (2) Cosmos Broadcasting of Louisiana, Inc., licensee of Station WDSU-TV, New Orleans, Louisiana; (3) Mississippi Telecasting Co., Inc., licensee of Station WABG-TV, Greenwood, Mississippi; (4) Mid-America TV Co., licensee of Station KMOS-TV, Sedalia, Missouri; (5) Corinthian Television Corp., licensee of Station KOTV, Tulsa, Oklahoma; (6) Gulf Coast Broadcasting Co., licensee of Station KRIS-TV, Corpus Christi, Texas; (7) Channel 6 Inc., licensee of Station KCEM-TV, Temple, Texas; and (8) KCMC, Inc., licensee of Station KTAL-TV, Texarkana, Texas, the parties to whom the *Order to Show Cause* is directed.

11. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are set out below and are incorporated by reference herein.

12. Interested parties may file comments on or before October 29, 1975, and reply comments on or before November 17, 1975.

## FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] NEAL K. McNAUGHTEN,  
Acting Chief, Broadcast Bureau.

## APPENDIX IX

1. Pursuant to authority found in sections 4(i), 5(d) (1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b) (6) of the Commission's Rules, IT IS PROPOSED TO AMEND the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent

of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.419 of the Commission's Rules and Regulations, an original and fourteen copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

## Correction

In FR Doc. 75-22962 appearing at page 39901 in the issue for Friday, August 29, 1975, make the following changes:

1. On page 39905, first column, fifth line, the word which presently reads "analogized" should read "analogized".

2. On page 39906, first column, the penultimate line, the section reference which presently reads "§ 453.3(d)" should read "§ 453.4(d)".

(1) and (c) (4) and (5), 564.1 (a), (b), as liquid assets, as defined in paragraph and (c), 569a.1(c), 569a.4, 569a.5(d), (g) of § 523.10 of this chapter, or would shall promptly transmit such amendments to the Corporation for approval.

Anniversary: Percentage  
18 4.50  
4.75

(c) *Multiple accounts.* In the event an insured member holds more than one

such conservator, receiver, or custodian and any supervisory or regulatory authority to which the insured institution

(1) and (c) (4) and (5), 564.1 (a), (b), and (c), 569a.1(c), 569a.4, 569a.b(d), 569a.7, 569a.9, and 571.1(c) (3) thereof, to read as set forth below.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 320 First Street, NW, Washington, D.C. 20552, by September 29, 1975, as to whether this proposal should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address, unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.5 of the General Regulations of the Federal Home Loan Bank Board (12 CFR 505.5).

1. Amend Part 561 by revising §§ 561.3, 561.11, 561.15(f), 561.17(a), and 561.24 thereof, and adding a new § 561.11a thereto, to read as follows:

**§ 561.3 Insured account.**

An "insured account" is a savings account or checking account held by an insured member in an institution insured by the Corporation. Accounts which by the terms of the contract of the holder with the institution or by provisions of state law cannot be withdrawn or the value thereof paid to the holder until all of the liabilities, including other classes of share liabilities of the institution have been fully liquidated and paid upon the winding up of the institution are not insured, and are hereinafter referred to as "nonwithdrawable accounts". Subordinated debt securities and mortgage-backed bonds issued by an insured institution are deemed not to be "accounts", and such securities are not insured.

**§ 561.11 Savings accounts.**

The term "savings accounts" means withdrawable or repurchasable shares, investment certificates, deposits or other savings accounts held by insured members in an institution insured by the Corporation.

**§ 561.11a Checking accounts.**

The term "checking accounts" means non-interest-bearing demand deposits which are subject to check or to withdrawal or transfer on negotiable or transferable order to the association and which are permitted to be issued by statute, regulation, or otherwise.

**§ 561.15 Scheduled items.**

The term "scheduled items" means:

(f) Deposits in a bank, loans of Federal funds to a bank, or savings accounts or checking accounts in a savings and loan association, under the control or in the possession of an appropriate supervisory authority, and

**§ 561.17 Specified assets.**

(a) The term "specified assets" means the total assets of an insured institution less the institution's assets which qualify

as liquid assets, as defined in paragraph (g) of § 523.10 of this chapter, or would so qualify except for the maturity limitations contained in such paragraph or the pledged status of such assets, other obligations fully guaranteed as to principal and interest by the United States (including such obligations held subject to a repurchase agreement) and accrued interest thereon, obligations of, or participations or other instruments fully guaranteed as to principal and interest by, the Federal Home Loan Mortgage Corporation, Federal Home Loan Bank stock, prepaid Federal Savings and Loan Insurance Corporation premiums, loans secured by obligations referred to in paragraphs (g) (2) and (3) of § 523.10 of this chapter without regard to the maturities of such obligations, loans in process, loans on the security of the institution's checking and savings accounts, investments (other than in capital stock) in other institutions insured by the Federal Savings and Loan Insurance Corporation and in institutions insured by the Federal Deposit Insurance Corporation, and less 80 percent of the institution's actual investments in insured loans, guaranteed loans, loans which are secured by a first lien on low-rent housing, and guaranteed obligations.

**§ 561.24 Subordinated debt security.**

The term "subordinated debt security" means any unsecured note, debenture, or other debt security issued by an insured institution and subordinated on liquidation to all claims having the same priority as account holders or any higher priority.

2. Amend Part 563 by revising §§ 563.1, 563.6, and 563.13(a) (1), (c) (4) and (5) thereof to read as follows:

**§ 563.1 Forms of certificates and pass-books; submission of forms of investment contracts and bylaws; furnishing members with copy of charter and bylaws.**

At the time of the application for insurance, every applicant (except a Federal savings and loan association) shall submit to the Corporation for approval copies of all savings account, checking account, share, membership, stock and demand or time deposit certificates, pass-books, and other forms of investment contracts proposed to be issued by the applicant as an insured institution; it shall also submit for such approval its charter, constitution, and bylaws, and all amendments thereto, affecting its securities and investment contracts. No insured institution (except a Federal savings and loan association) shall issue any form of checking or savings accounts, share, stock, membership or deposit certificates, passbooks, or other investment contract which has not been submitted to the Corporation for approval. No insured institution shall issue any such form which has been disapproved in writing by the Corporation. Any insured institution which amends its charter, constitution, or bylaws affecting its securities or investment contracts

shall promptly transmit such amendments to the Corporation for approval. Except with the written approval of the Corporation, no insured institution may issue or have outstanding any class of insured account having preference, whether as to time or amount in the event of liquidation, over any other class of insured account; Provided, That where there may be a change from one type of account to another, a reasonable time, to be determined by the Corporation, may be allowed to effect such change. Each insured institution shall cause a true copy of its charter and bylaws and all amendments thereto to be available to members at all times in each office of the institution, and shall upon request deliver to any member a copy of such charter, constitution, bylaws, and amendments.

**§ 563.6 Demand securities.**

No insured institution may issue any demand securities or advertise or represent that it will pay holders of its securities on demand, except that this section does not apply to checking accounts as defined in § 561.11a of this subchapter.

**§ 563.13 Required amounts and maintenance of Federal insurance reserve and net worth.**

(a) Federal insurance reserve requirements. (1) Minimum required amounts. After the fiscal year in which a certificate of insurance is issued, each insured institution shall build up its Federal insurance reserve account so that, as of the close of business on the annual closing date following each anniversary of the date of insurance of accounts, such account shall be at least equal to the amount obtained by multiplying the percentage corresponding to such anniversary date, as set forth in the table below, by either (i) the amount of the institution's checking and savings account balances on such closing date, or (ii) the average of such account balances on such closing date and on one or more of the 4 immediately preceding annual closing dates, provided all such dates are consecutive. In any event, unless otherwise permitted in writing by the Corporation, each insured institution shall build up its Federal insurance reserve account so that, at any one annual closing date prior to the twenty-sixth anniversary of its insurance of accounts, such account shall be at least equal to 5 percent of the institution's checking and savings account balances on such closing date.

Anniversary:	Percentage
2	0.50
3	0.75
4	1.00

16	4.00
17	4.25

Anniversary:	Percentage
18	4.50
19	4.75
20 and thereafter	5.00

(c) Failure to meet or maintain Federal insurance reserve or net worth requirements. If any insured institution fails to meet or thereafter maintain the Federal insurance reserve requirements set forth in paragraph (a) of this section or the net worth requirements set forth in paragraph (b) of this section, the Corporation may, whether through enforcement proceedings (as provided in Parts 565 and 566 of this subchapter) or otherwise, require such institution to take any one or more of the following corrective actions:

(4) Limit the receipt of deposits to those made to existing accounts;

(5) Cease or limit the issuance of new accounts of any or all classes or categories, except in exchange for existing accounts; . . .

3. Amend Part 564 by revising § 564.1 thereof to read as follows:

**§ 564.1 Settlement of insurance upon default.**

(a) General. In the event of a default by an insured institution, the Corporation will promptly determine, from the account contracts and the books and records of the institution, or otherwise, the insured members thereof and the amount of the insured account or accounts of each such member. The Corporation will give to each insured member shown to be such on the books of the insured institution written notice of the time and place of payment of insurance by mail at the last known address as shown by the books of the insured institution. If an insured institution has outstanding at the time of default any account or accounts issued pursuant to § 545.1-5 of this chapter or issued pursuant to the approval granted by § 563.3-3 of this subchapter, the Corporation shall, promptly after default, publish (in a newspaper printed in the English language and of general circulation in the city, county, or locality in which the principal office of such insured institution is located) a notice to all account holders of such insured institution of the time and place of payment of insurance.

(b) Amount of insured account. The amount of an insured account is the amount which the insured member would have been entitled to withdraw as of the date of default, plus interest on any savings account accrued to such date or dividends prorated to such date at the announced or anticipated rate, without regard to whether such account is subject to any pledge. In the case of a savings account with a fixed or minimum term or a qualifying or notice period that has not expired as of such date, dividends or interest thereon shall be computed as if the account could have been withdrawn on such date without any penalty or reduction in rate of earnings.

(c) Multiple accounts. In the event an insured member holds more than one insured account in the same capacity, and the aggregate amount of such accounts (including checking accounts held in such capacity) exceeds the amount of insurance afforded thereon, the insurance coverage will be prorated among the member's interest in all accounts held in the same capacity on the basis of their withdrawable value as of the date of default. In the case of individual accounts the insurance proceeds shall be paid to the holder of the account, whether or not the beneficial owner. In the case of accounts which are owned jointly the insurance proceeds shall be paid to the owners jointly. In the case of trust estates the insurance proceeds shall be paid to the indicated trustee unless otherwise provided for in the trust instrument or under State law. In the case of corporations, partnerships and unincorporated associations, whether or not engaged in an independent activity, the insurance proceeds shall be paid to the indicated holder of the account. Where insurance payment is in the form of a transferred account, the same rules shall be applied.

4. Amend Part 569a by revising §§ 569a.1(c), 569a.4, 569a.6(d), 569a.7(a) (4) and (5), (b) and (d), and 569a.9 thereof to read as follows:

**§ 569a.1 Grounds for appointment of receiver.**

(c) That one or more of the holders of checking or savings accounts in such institution is unable to obtain a withdrawal of his account, in whole or in part;

the Board shall have exclusive power and jurisdiction to appoint the Corporation as sole Receiver for such institution. As used in this Part, the term "default" means an adjudication or other official determination of a court of competent jurisdiction or other public authority pursuant to which a conservator, receiver, or other legal custodian is appointed for an insured institution for the purpose of liquidation.

**§ 569a.4 Possession by Receiver.**

The Corporation shall take possession promptly of the insured institution for which it has been appointed Receiver by service of a certified copy of the Board's order of appointment upon the insured institution or upon the conservator, receiver, or custodian of such institution. "Service" as used in the preceding sentence is accomplished by leaving a certified copy of said order at the principal office of the insured institution or by handing a certified copy of said order to the conservator, receiver, or custodian of such insured institution or to the officer or employee of the insured institution or of the conservator, receiver, or custodian who shall be in the principal office of the institution and appears to be in charge of such office. The Receiver shall thereafter promptly notify in writing by certified mail the court or other public authority having jurisdiction over

such conservator, receiver, or custodian and any supervisory or regulatory authority to which the insured institution was theretofore subject of its possession of the insured institution. Immediately upon taking possession of any insured institution, the Corporation as Receiver shall forthwith take possession of and title to books, records, and assets of every description of such institution. The Corporation as Receiver, by operation of law and without any conveyance or other instrument, act or deed, shall succeed to (a) all the rights, titles, powers, and privileges of the insured institution, its members, holders of checking or savings accounts and nonwithdrawable accounts, its officers and directors or any of them, and (b) the titles to the books, records, and assets of every description of any conservator, receiver, or other legal custodian of such institution appointed under State law. Such members, holders of checking or savings accounts and nonwithdrawable accounts, officers or directors, or any of them, or any such conservator, receiver, or other legal custodian shall not thereafter have or exercise any such rights, power, or privileges or act in connection with any asset or property of any nature of the institution in receivership.

**§ 569a.6 Powers and duties as Receiver.**

(d) Investment of funds. The Receiver shall have the power to deposit the monies and funds of the receivership in any bank or banks insured by the Federal Deposit Insurance Corporation, in any insured institution within the State in which the institution in default is located which offers checking accounts, or in any Federal Home Loan Bank, and may invest such monies or funds in certificates of deposit in any bank or banks insured by the Federal Deposit Insurance Corporation or in savings accounts other than nonwithdrawable accounts, in an insured institution or institutions. The Receiver shall have power to invest any funds not currently needed for transacting the business of the receivership or for payment of liquidating dividends in Government obligations with a maturity of not more than 2 years. The Receiver shall have no power to make loans except loans to facilitate the sale of any real estate owned and except loans which it deems necessary to protect investments or the security for investments.

**§ 569a.7 Priority of claims.**

(a) . . . . .  
(4) All claims of holders of checking and savings accounts, and/or the Federal Savings and Loan Insurance Corporation to the extent it has paid insurance to holders of such accounts, which under the laws of the State in which the principal office of the institution in receivership is located are given a priority for liquidation purposes over other classes of such accounts; except that whenever under the laws of the State in which the principal office of the institution in receiver-

ceivership is located such claims are treated on a parity with general creditor obligations upon the liquidation of the

close a complete record of all accounts of such accountholders, or in a case where all such accountholders have not pre-

necessitate or have produced volume lending or lending at interest rates, or at interest rates plus fees, which materially

It is proposed to add Part 1602 as PART 1602—PROCEDURES FOR DISCLO-

the FOIA and these implementing regulations. All records not exempt from disclosure will be made available. The Cor-

(c) Certain types of staff manuals or instructions, such as instructions to auditors or inspection staff, or instructions covering certain phases of contract

ownership is located such claims are treated on a parity with general creditor obligations upon the liquidation of the institution, such claims will be treated as general creditor obligations under subparagraph (3) of this paragraph;

(5) All claims of holders of other accounts, and/or the Federal Savings and Loan Insurance Corporation to the extent it has paid insurance to the holders of such other accounts; and

(b) Creditor claims which have been subordinated in whole or in part to general creditor claims and/or claims of checking or savings accountholders shall be given the priority specified in the instruments establishing such claims. Where the instruments specify that such claims are subordinated to general creditor obligations and the claims of such accountholders upon liquidation of the institution, but are silent with respect to subordination to the postdefault interest rights of the general creditors and such accountholders, the payment of interest as set forth in paragraph (a) (6) of this section shall have priority over the principal amount of such subordinated creditor claims and any contractual interest thereon.

(d) In the case of a mutual institution, if a surplus remains after making distribution in full as set forth in paragraphs (a) and (b) of this section, such surplus shall be distributed to the checking and savings accountholders as of the date of default, in accordance with the terms, conditions and priorities specified in the instruments establishing their interests in the institution. If such instruments do not specify the terms, conditions and priorities for liquidation, the distribution of the surplus shall be pro rata.

#### § 569a.9 Claims of accountholders.

The Receiver shall prepare a list of accounts of checking and savings accountholders for use by the Corporation in settlement of claims for insurance under Part 564 of this subchapter. Upon such settlement, the Receiver shall furnish to each such accountholder a certificate as to the amount of such account which is not covered by insurance under said Part 564 and stating that the accountholder holds a claim against the receivership which is to be discharged to the extent permitted under this part. No such certificate shall be furnished by the Receiver unless the accountholder has first surrendered to the Receiver such evidence of the ownership of the account as he may have or, in case of loss of such evidence, the accountholder has agreed that the Receiver shall be entitled to the surrender of such evidence if it is thereafter recovered, but this requirement shall not be applicable in cases in which such evidence has been surrendered theretofore to the Corporation in connection with payment of insurance of the account. In a case where a Receiver has reason to believe that the records of the institution in receivership may not dis-

close a complete record of all accounts of such accountholders, or in a case where all such accountholders have not presented claims within 1 year from the date of appointment of the Receiver, the Receiver shall publish, in a newspaper printed in the English language and of general circulation in the city or county in which the principal office of such institution was located, a notice to all such accountholders to present their claims of ownership thereof on forms prescribed by the Receiver to such Receiver on or before a date specified in such notice, which date shall be 3 years after the date of default. Such notice shall be similarly published on dates approximately 1 month and 2 months after the date of such first publication. Such notice shall be similarly published on a date approximately 1 month prior to the date specified in such notice for presentation of claims of ownership. Claims of ownership not filed within the period stated in the notices shall be disallowed. Any part or all of a claim by such an accountholder which is filed within the period stated in the notices and which is disallowed by the Receiver may be allowed by the Board in its discretion upon good cause shown.

5. Amend Part 571 by revising § 571.1 (c), (c) (3), (e), and (e) (1) thereof to read as follows:

§ 571.1 Appraisal of real estate securing assets of insured institutions.

(c) Authority of Chief Examiner to obtain appraisals. The Board's Chief Examiner for the Federal Home Loan Bank district in which the home office of an insured institution is located is authorized to obtain, as a part of and in connection with an examination, appraisals of real estate securing such institution's loans and contracts when an examination discloses the following conditions or such conditions are otherwise known or found to exist:

(3) When a borrower agrees or otherwise obligates himself to pay, or does pay, fees or other consideration to a third party to induce an inflow of funds to savings accounts or checking accounts in the institution.

(e) Other bases for obtaining appraisals. It is not feasible to identify, or to state categorically or inflexibly, all of the other indications of the need to evaluate appraisal practices and policies. Many factors must be considered separately and in context in the light of the operations of each institution, and economic conditions as they exist. However, the following broad areas of operation by an insured institution will be of paramount supervisory concern and essential facts and information with respect to such matters will in large measure constitute the basis for determining whether or not appraisals should be made:

(1) Increase in funds for mortgage lending. The extent to which the institution's expense ratio and dividend rate

necessitate or have produced volume lending or lending at interest rates, or at interest rates plus fees, which materially exceed rates charged by responsible lenders in the area on prime real estate security—in order to provide sufficient revenue to pay expenses and dividends—are matters of much importance. In evaluating this aspect or area of an institution's operations consideration will be given not only to the dividend rate and expense ratio as compared to other comparable institutions in the same business area, but also to such matters as bonus (on top of a competitive dividend rate); inflow of funds to checking accounts and savings accounts from or through brokers; advertising of rate, rate increases, or other terms in a manner or by means which indicate pressure solicitation of accounts; extensive rate advertising in media outside the institution's normal business area; use of give-aways, directly or through brokers, and any solicitation practices generally recognized as being inconsistent with accepted standards in the conduct of responsible financial institutions. In order to evaluate the extent of any mortgage lending pressures to which the institution is subjecting itself, consideration may also need to be given to the use of borrowed money and to sales of loans for relending purposes.

(Sec. 402, 403, 48 Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1943-48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

#### LEGAL SERVICES CORPORATION [45 CFR Part 1602] FREEDOM OF INFORMATION ACT Procedures for Disclosure or Production of Information

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996f ("the Act"). Section 1005(g) of the Act, 42 U.S.C. § 2996d(g) provides that the Corporation shall be subject to the provisions of the Freedom of Information Act, 5 U.S.C. § 552.

Pursuant to Section 1008(e) of the Act, the Corporation hereby notices and publishes for comment the following proposed regulations. Public comment will be received by the Corporation at its temporary office, Room 413, 1725 K Street, NW., Washington, D.C. 20006, on or before October 11, 1975. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen at the above offices during business hours, Monday through Friday.

Final regulations will be issued by the Corporation after the Board of Directors has reviewed and considered public comment received pursuant to this notice.

It is proposed to add Part 1602 as follows:

#### PART 1602—PROCEDURES FOR DISCLOSURE OR PRODUCTION OF INFORMATION UNDER THE FREEDOM OF INFORMATION ACT

##### Subpart A—General

Sec. 1602.1 Purpose.  
1602.2 Definitions.  
1602.3 Policy.

##### Subpart B—Maintenance of Records

1602.4 Index of records.  
1602.5 Central records room.  
1602.6 Regional records rooms.

##### Subpart C—Procedure

1602.7 Use of records rooms.  
1602.8 Availability of records on request.  
1602.9 Invoking exemption to withhold a requested record.  
1602.10 Officials authorized to grant or deny request for records.  
1602.11 Denials.  
1602.12 Appeals of denials.  
1602.13 Fees.

AUTHORITY: Sec. 1005(g) of the Legal Services Corporation Act of 1974 (42 U.S.C. § 2996d(g)).

##### Subpart A—General

##### § 1602.1 Purpose.

These regulations provide information concerning the procedures by which records of the Legal Services Corporation may be made available pursuant to Section 1005(g) of the Legal Services Corporation Act, 42 U.S.C. § 2996d(g), and the Freedom of Information Act, as amended in 1974, 5 U.S.C. § 552.

##### § 1602.2 Definitions.

As used in this Part—

(a) "Act" means the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996f;

(b) "Corporation" means the Legal Services Corporation;

(c) "FOIA" means the Freedom of Information Act, as amended in 1974, 5 U.S.C. § 552;

(d) "President" means the President of the Legal Services Corporation;

(e) "records" means books, papers, maps, photographs, or other documentary materials, regardless of physical form or characteristics, made or received by the Corporation in connection with the transaction of the Corporation's business and preserved or appropriate for preservation by the Corporation as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Corporation or because of the informational value of data in them. The term does not include books, magazines or other materials acquired solely for library purposes and available through any officially designated library of the Corporation.

##### § 1602.3 Policy.

(a) It is and will be the policy of the Corporation to maximize the extent to which records concerning its operations, activities and business will be available to the public. Records will be withheld from the public only in accordance with

the FOIA and these implementing regulations. All records not exempt from disclosure will be made available. The Corporation will interpret exemptions restrictively, resolving doubts concerning the applicability or meaning of an exemption in favor of disclosure. Records which may be exempted from disclosure will generally be made available as a matter of discretion when disclosure is not prohibited by law and it does not appear adverse to legitimate public or personal interests.

(b) The Corporation will attempt to provide the fullest assistance to requesting parties, including information as to how and where the request may be submitted. The Corporation will provide the most timely possible action on requests for records.

##### Subpart B—Maintenance of Records

##### § 1602.4 Index of records.

The Corporation will maintain a current index identifying any matter within the scope of § 1602.5(b) (1)-(3) which has been issued, adopted, or promulgated by the Corporation, and other information published or made publicly available. The index will be maintained and made available for public inspection and copying at the Corporation's headquarters in Washington, D.C., and at each regional office. The Corporation will publish copies of each index or supplement thereto at least once each quarter and shall distribute such copies on request, at a cost not to exceed the direct cost of duplication.

##### § 1602.5 Central records room.

(a) The Corporation will maintain a central records room at its headquarters in Washington, D.C. This room will be supervised by a Records Officer, and will be open during regular business hours of the Corporation for the convenience of members of the public in inspecting and copying records made available pursuant to this Part. Certain records, as described in paragraph (b) of this section, will be regularly maintained in or in close proximity to the records room, to facilitate access thereto by any member of the public.

(b) Subject to the limitation state in paragraph (c) of this section, there will be available in the central records room the following:

(1) All final opinions, including concurring and dissenting opinions, and orders made in the adjudication of cases;

(2) Statements of policy and interpretations adopted by the Corporation;

(3) Administrative staff manuals and instructions to the staff which affect the public;

(4) To the extent feasible, guidelines, forms, published regulations, notices, program descriptions, and other records considered to be of general interest to members of the public in understanding activities of the Corporation or in dealing with the Corporation in connection with those activities;

(5) The current index required in § 1602.4.

(c) Certain types of staff manuals or instructions, such as instructions to auditors or inspection staff, or instructions covering certain phases of contract negotiation, which deal with the performance of functions that would automatically be rendered ineffective by general awareness of the Corporation's techniques or procedures, may be exempt from mandatory disclosure even though they affect or may affect the public. These records will not be maintained in the central records room.

(d) Certain records maintained in the records room or otherwise made available pursuant to this Part may be "edited" by the deletion of identifying details concerning individuals, to prevent a clearly unwarranted invasion of personal privacy. In such cases, the record shall have attached to it a full explanation of the deletion.

##### § 1602.6 Regional records rooms.

Each regional office shall have either a specially designated records room similar to the central records room described in § 1602.5 or, if that is not feasible, a designated area within the office, a principal function of which is to serve the public in accordance with this Part. The Corporation will endeavor to maintain and have readily available in its regional offices the records described in § 1602.5(b), and will designate a Records Officer in each regional office to receive and process requests submitted pursuant to this Part.

##### Subpart C—Procedure

##### § 1602.7 Use of records rooms.

(a) Any member of the public who wishes to inspect or copy records regularly maintained in a records room may secure access to these records by presenting himself or herself at the central records room or at a regional records room during business hours. No advance notice or appointment is required, although persons wishing to make extended use of regional office facilities should take account of the possible limitations in these facilities.

(b) The records rooms will also be available to any member of the public to inspect and copy records which are not regularly maintained in the records rooms. To obtain such records, a person should present his or her request identifying the records to the Records Officer. Because it will sometimes be impossible to produce these records or copies of them on short notice, a person who wishes to use records room facilities to inspect or copy such records is advised to arrange a time in advance, by telephone or letter request made to the Records Officer of the facility which he or she desires to use. Persons submitting requests by telephone will be advised by the Records Officer or another designated employee whether a written request would be advisable to aid in the identification and expeditious processing of the records sought. Persons submitting written requests should identify the records sought in the manner provided in subsection

1602.8(b) and should indicate whether they wish to use the records room facilities.

(4) All requests for records under this section shall be made in writing, with the envelope and the letter clearly

substantial interest in the determination of the request or among two or more components of the Corporation having

for the regulation or supervision of financial institutions;

(b) Whenever the Corporation makes a record available subject to the deletion of a portion of the record, such action

section, exceed the sum of \$6.50. Where the charges are calculated to exceed \$6.50, the fee shall be the difference be-

1602.8(b) and should indicate whether they wish to use the records room facilities on a specific date. The Records Officer will endeavor to advise the requesting party as promptly as possible if, for any reason, it may not be possible to make the records sought available on the date requested.

#### § 1602.8 Availability of records on request.

(a) In addition to the records made available through the records rooms, the Corporation will make such records available to any person in accordance with paragraphs (b) and (c) of this section, unless it is determined that such records should be withheld and are exempt from mandatory disclosure under the FOIA and § 1602.9 of these regulations.

(b) *Requests.* (1) A request will be acceptable if it identifies a record with sufficient particularity to enable officials of the Corporation to locate the record with a reasonable amount of effort. Requests seeking records within a reasonably specific category will be deemed to conform to the statutory requirement of a request which "reasonably describes" such records if professional employees of the Corporation who are familiar with the subject area of the request would be able, with a reasonable amount of effort, to determine which particular records are encompassed within the scope of the request, and to search for, locate, and collect the records without unduly burdening or materially interfering with operations because of the staff time consumed or the resulting disruption of files. If it is determined that a request does not reasonably describe the records sought as specified in this paragraph, the response denying the request on that ground shall specify the reasons why the request failed to meet the requirements of this paragraph and shall extend to the requester an opportunity to confer with Corporation personnel in order to attempt to reformulate the request in a manner which will meet the needs of the requester and the requirements of this paragraph.

(2) To facilitate the location of records by the Corporation, a requesting party should try to provide the following kinds of information: (i) The specific event or action, if known, to which the record refers; (ii) the unit or program of the Corporation which may be responsible for or may have produced the record; (iii) the date of the record or the date or period to which it refers or relates, if known; (iv) the type of record, such as an application, a grant, a contract, or a report; (v) personnel of the Corporation who may have prepared or have knowledge of the record; (vi) citations to newspapers or publications which are known to have referred to the record.

(3) The Corporation is not required to create a record to satisfy a request for information. When the information requested exists in the form of several records at several locations, the requesting party should be referred to those sources only if gathering the information would unduly burden or materially interfere with operations of the Corporation.

(4) All requests for records under this section shall be made in writing, with the envelope and the letter clearly marked: "FREEDOM OF INFORMATION REQUEST." All such requests shall be addressed to the Records Officer at the headquarters of the Corporation in Washington, D.C., or at any regional records office. Any request not marked and addressed as specified in this subparagraph will be so marked by Corporation personnel as soon as it is properly identified, and forwarded immediately to the Records Officer. A request improperly addressed will not be deemed to have been received for purposes of the time period set forth in paragraph (c) of this section until forwarding to the appropriate office has been effected, or until such forwarding would have been effected with the exercise of due diligence by Corporation personnel. On receipt of an improperly addressed request, the Records Officer shall notify the requesting party of the date on which the time period commenced to run.

(5) A person desiring to secure copies of records by mail should write to the Records Officer at the headquarters in Washington, D.C. The request should identify the records of which copies are sought and should indicate the number of copies desired. As indicated in § 1602.13, fees may be required in some cases, in which event they must be paid in advance. The requesting party will be advised of the estimated fee, if any, as promptly as possible. If a waiver of fees is requested, the grounds for such request should be included in the letter.

(c) The Records Officer, upon request for any records made in accordance with this Part, shall make an initial determination of whether to comply with or deny such request and dispatch such determination to the requesting party within ten days (excepting Saturdays, Sundays, and legal public holidays) after receipt of such request, except for unusual circumstances in which case the time limit may be extended for not more than ten working days by written notice to the requesting party setting forth the reasons for such extension and the date on which a determination is expected to be dispatched. In determining whether to issue a notice of extension of time for a response to a request beyond the ten-day period, Corporation officials shall consult with the Office of the General Counsel. As used herein, "unusual circumstances" are limited to the following, but only to the extent reasonably necessary to the proper processing of the particular request:

(1) The need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request;

(2) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(3) The need for consultation, which shall be conducted with all practicable speed, with another agency having a

substantial interest in the determination of the request or among two or more components of the Corporation having substantial subject matter interest therein.

(d) If no determination has been dispatched at the end of the ten-day period, or the last extension thereof, the requester may deem his request denied, and exercise a right of appeal in accordance with § 1602.12. When no determination can be dispatched within the applicable time limit, the Records Officer shall nevertheless continue to process the request; on expiration of the time limit, he shall inform the requesting party of the reason for the delay, of the date on which a determination may be expected to be dispatched, and of his right to treat the delay as a denial and to appeal to the President in accordance with § 1602.12; and he may ask the requesting party to forego appeal until a determination is made.

#### § 1602.9 Invoking exemptions to withhold a requested record.

(a) A requested record of the Corporation may be withheld from public disclosure only if one or more of the following categories exempted by the FOIA apply:

(1) Matter which is (i) specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy and (ii) is in fact properly classified pursuant to such Executive Order;

(2) Matter which is related solely to the internal personnel rules and practices of the Corporation;

(3) Matter which is specifically exempted from disclosure by statute;

(4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Inter-agency or inter-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the Corporation;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) Investigatory records compiled for law enforcement purposes, but only to the extent that the production of such records would (i) interfere with enforcement proceedings, (ii) deprive a person of a right of a fair trial or an impartial adjudication, (iii) constitute an unwarranted invasion of personal privacy, (iv) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (v) disclose investigative techniques and procedures, or (vi) endanger the life of physical safety or law enforcement personnel;

(8) Matter which is contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible

for the regulation or supervision of financial institutions;

(9) Geological and geophysical information and data, including maps, concerning wells.

(b) In the event that one or more of the above exemptions applies, any reasonably segregable portion of a record shall be provided to the requesting party after deletion of the portions which are exempt. In appropriate circumstances, subject to the discretion of Corporation officials, it may be possible to provide a requesting party with: (1) A summary of information in the exempt portion of a record or (2) an oral description of the exempt portion of a record. In determining whether any of the foregoing techniques should be employed or whether an exemption shall be waived, in accordance with this paragraph, Corporation officials shall consult with the Office of General Counsel. No requesting party shall have a right to insist that any or all of the foregoing techniques should be employed in order to satisfy a request.

(c) Records which may be exempted from disclosure pursuant to paragraph (a) of this section may be made available as a matter of discretion when disclosure is not prohibited by law, if it does not appear adverse to legitimate public or personal interests.

#### § 1602.10 Officials authorized to grant or deny requests for records.

The General Counsel shall furnish necessary advice to Corporation officials and staff as to their obligations under this Part and shall take such other actions as may be necessary or appropriate to assure a consistent and equitable application of the provisions of this Part by and within the Corporation. Other officials of the Corporation shall consult with the General Counsel before denying requests under this Part, or before granting requests for waiver or modified application of an exemption or for categories of documents which the General Counsel determines may present special or unusual problems. Subject to this authority, the General Counsel, the Records Officer, each Regional Director, and each Regional Records Officer are authorized to grant or deny requests under this Part.

#### § 1602.11 Denials.

(a) A denial of a written request for a record issued by an official of the Corporation shall be in writing and shall include the following:

(1) A reference to the applicable exemption or exemptions in § 1602.9(a) upon which the denial is based;

(2) An explanation of how the exemption applies to the requested records;

(3) A statement explaining why it is deemed unreasonable to provide segregable portions of the record after deleting the exempt portions;

(4) The name and title of the person or persons responsible for denying the request; and

(5) An explanation of the right to appeal the denial and of the procedures for submitting an appeal, including the address of the official to whom appeals should be submitted.

(b) Whenever the Corporation makes a record available subject to the deletion of a portion of the record, such action shall be deemed a denial of the record for purposes of paragraph (a) of this section.

(c) All denials shall be treated as opinions and shall be maintained and indexed accordingly, subject only to the necessity of deleting identifying details the release of which would constitute a clearly unwarranted invasion of personal privacy for a member of the public.

#### § 1602.12 Appeals of denials.

(a) Any person whose written request has been denied is entitled to appeal the denial within ninety days by writing to the President of the Corporation at the headquarters in Washington, D.C. The envelope and letter should be clearly marked: "FREEDOM OF INFORMATION APPEAL." An appeal need not be in any particular form, but should adequately identify the denial, if possible, by describing the requested record, by identifying the official who issued the denial, and by providing the date on which the denial was issued.

(b) No personal appearance, oral argument, or hearing will ordinarily be permitted on appeal of a denial. Upon request and a showing of special circumstances, however, this limitation may be waived and an informal conference may be arranged with the President, or the President's specifically designated representative, for this purpose.

(c) The decision of the President on an appeal shall be in writing and, in the event the denial is in whole or in part upheld, shall contain an explanation responsive to the arguments advanced by the requesting party, the matters described in § 1602.11(a)(1)-(5), and the provisions for judicial review of such decision under section 552(a)(4) of the FOIA. The decision shall be dispatched to the requesting party within twenty working days after receipt of the appeal, unless an additional period is justified pursuant to § 1602.8(c) and such period taken together with any earlier extension does not exceed ten days. The President's decision shall constitute the final action of the Corporation. All such decisions shall be treated as final opinions, under § 1602.5(b).

#### § 1602.13 Fees.

(a) Information provided routinely in the normal course of doing business will be provided at no charge.

(b) The Records Officer may waive or reduce fees where special circumstances, including but not limited to the benefit of the general public, warrant. The Records Officer shall waive fees where the requesting party is indigent unless the fees would exceed \$25 and may waive or reduce fees for the request of an indigent where the fees charged would exceed \$25. These provisions will be subject to appeal in the same manner as appeals from denial under § 1602.12.

(c) There shall be no fee charged for services rendered by the Corporation pursuant to this Part, unless the charges, as calculated in paragraph (e) of this

section, exceed the sum of \$6.50. Where the charges are calculated to exceed \$6.50, the fee shall be the difference between \$6.50 and the calculated charges.

(d) Ordinarily, no fee shall be levied where the records requested are not provided or made available. However, if the time expended in processing the request is substantial, and if the requesting party has been notified of the estimated cost pursuant to paragraph (f) of this section, and has been specifically advised that it cannot be determined in advance whether any records will be made available, fees may be charged.

(e) The schedule of charges for services regarding the production or disclosure of the Corporation's records is as follows:

(1) Search for records: \$1.50 per one-quarter hour.

(2) Computer Time:

Central Processing Unit—\$10.80 per minute.

Card Reader—0.60 per 1,000 cards.

Printer—0.60 per 333 cards.

Tape or Disk—0.60 per 100 lines; 0.75 per 1,000 number of reads or lines.

Minimum charge—\$1.50.

(3) Reproduction, duplication, or copying of records—\$0.10 per page.

(4) Reproduction, duplication or copying of microfilm:

Microfilm—\$0.75 per frame; Microfiche—\$1.45 per jacket.

(5) Certification of true copies: \$1.00 each.

(f) Where it is anticipated that the fees chargeable under this Part will amount to more than \$25, and the requester has not indicated in advance his willingness to pay fees as high as anticipated, the requester shall be notified of the amount of the anticipated fee or such portion thereof as can readily be estimated. In such cases, a request will not be deemed to have been received until the requester is notified of the anticipated cost and agrees to bear it. Such a notification shall be transmitted as soon as possible, but in any event within five working days, giving the best estimate then available. The notification shall offer the requester the opportunity to confer with appropriate representatives of the Corporation for the purpose of reformulating the request so as to meet his needs at a reduced cost.

(g) Where the anticipated fee chargeable under this Part exceeds \$25, an advance deposit of 25 percent of the anticipated fee may be required. Where a requester has previously failed to pay a required fee, an advance deposit of the full amount of the anticipated fee together with the fee then due and payable may be required.

(h) The Corporation reserves the right to limit the number of copies that will be provided of any document to any one requesting party, or to require that special arrangements for duplication be made in the case of bound volumes or other records representing unusual problems of handling or reproduction.

DAVID S. TATEL,  
Counsel to the Corporation.

## notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

### TREASURY DEPARTMENT

#### Customs Service

(T.D. 75-228)

#### WEMBLEY INDUSTRIES, INC.

##### Recordation of Trade Name

SEPTEMBER 5, 1975.

On July 14, 1975, there was published in the FEDERAL REGISTER (40 F.R. 29557) a notice of application for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name Wembley Industries, Inc. The notice advised that prior to final action on the application, filed pursuant to section 133.12, Customs Regulations (19 CFR 133.12), consideration would be given to relevant data, views, or arguments submitted in opposition to the recordation and received not later than 30 days from the date of publication of the notice. No responses were received in opposition to the application.

The name "Wembley Industries, Inc." is hereby recorded as the trade name of Wembley Industries, Inc., a corporation organized under the laws of the State of Louisiana, located at 966 South White Street, New Orleans, Louisiana 70125, when applied to neckties, bow ties, tie and sock sets, tie and handkerchief sets, and formal wear manufactured in the United States.

LEONARD LEHMAN,  
Assistant Commissioner,  
Regulations and Rulings.

#### Office of the Secretary

#### TEMPERED SHEET GLASS FROM JAPAN

##### Notice of Tentative Determination To Modify or Revoke Dumping Finding

A finding of dumping with respect to tempered sheet glass from Japan was published as Treasury Decision 71-247 in the FEDERAL REGISTER of September 25, 1971 (36 F.R. 19013).

After due investigation, it has been determined tentatively that the sole exporter, Asahi Glass Company, Ltd., is no longer selling, or likely to sell, tempered sheet glass to the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

The investigation indicated that with the exception of one sale for which dumping duties in a *de minimis* amount were found to accrue, all sales by Asahi Glass Company, Ltd., for a period of two years from the finding of dumping, have been made at not less than fair value, and written assurances have been given that future sales of tempered sheet glass to

the United States will not be made at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to revoke the finding of dumping with respect to tempered sheet glass from Japan.

In accordance with § 153.37, Customs Regulations (19 CFR 153.37), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, NW., Washington, D.C. 20229, in time to be received by his office not later than September 22, 1975. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than October 14, 1975.

This notice is published pursuant to section 153.41(c) of the Customs Regulations (19 CFR 153.41(c)).

DAVID R. MACDONALD,  
Assistant Secretary of the Treasury.  
AUGUST 27, 1975.

[FR Doc. 75-24298 Filed 9-11-75; 8:45 am]

#### DEBT MANAGEMENT ADVISORY COMMITTEES

##### Meetings and Determination

Notice is hereby given, pursuant to Section 10 of Public Law 92-463, that meetings will be held in Washington on October 8 and 9, 1975, of the following debt management advisory committees:

American Bankers Association Government Borrowing Committee  
Securities Industry Association Government Securities and Federal Agencies Committee

The agenda for the meetings provides for working sessions by the two committees, and reports to the Secretary of the Treasury and Treasury staff.

Pursuant to the authority placed in Heads of Departments by Section 10(d) of Public Law 92-463, and vested in me by Treasury Department Order 190, revised, I hereby determine that these meetings are concerned with information exempt from disclosure under Section 552(b) (4) of Title 5 of the United States Code, and that the public interest requires that such meetings be closed to the public.

My reasons for this determination are as follows. The Treasury Department re-

quires frank and full advice from representatives of the financial community prior to making its final decision on major financing operations. Historically, this advice has been offered by debt management advisory committees established by the several major segments of the financial community, which committees are utilized by this Department at meetings called by representatives of this office. When so utilized they are recognized to be advisory committees under Public Law 92-463. The advice provided consists of commercial and financial information given and received in confidence in order to avoid adverse effects of premature disclosure on the financial markets and the economy. As such these debt management advisory committee activities concern matters which fall within the exemption covered by Section 552(b) (4) of Title 5 of the United States Code for matters which are "trade secrets and commercial or financial information obtained from a person and privileged or confidential".

The Special Assistant to the Secretary (Debt Management) shall be responsible for maintaining records of the meetings of these committees and for providing annual reports setting forth a summary of their activities and such other matters as may be informative to the public consistent with the provisions of 5 U.S.C. 552(b) (4).

Dated: September 9, 1975.

[SEAL] EDWIN H. YEO, III,  
Under Secretary for  
Monetary Affairs.

#### Office of the Secretary ADVISORY GROUP ON ELECTRON DEVICES

##### Advisory Committee Meeting

Working Group A (Mainly Microwave Devices) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, 9th Floor, New York, NY 10014 on 8-9 October 1975.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The microwave area includes programs on developments and research related to microwave tubes, solid state microwave, electronic warfare devices, millimeter wave devices, and passive devices. The review will include classified program details and will result in advice or recommendations to government research and development agencies preliminary to decisions or actions, the preliminary disclosure of which would interfere with the orderly conduct of government.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically Subparagraphs (1) and (5) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,  
Director, Correspondence and  
Directives, OASD (Comptroller).

#### ADVISORY GROUP ON ELECTRON DEVICES

##### Advisory Committee Meeting

The DoD Advisory Group on Electron Devices (AGED) will meet in closed ses-

sion at 201 Varick Street, 9th Floor, New York, New York 10014 on 16 October 1975.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The AGED will review programs on microwave devices, night vision devices, lasers, infra red systems, and microelectronics. The review will include classified program details and will result in advice or recommendations to government research and development agencies preliminary to decisions or actions, the preliminary disclosure of which would interfere with the orderly conduct of government.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically Subparagraphs (1) and (5) thereof, and that accordingly this meeting will be closed to the public.

#### ADVISORY GROUP ON ELECTRON DEVICES

##### Advisory Committee Meeting

Working Group D (Mainly Laser Devices) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session at 333 Ravenswood Avenue, Menlo Park, California 94025, October 28-29, 1975.

The purpose of the Advisory Group is to provide the Director of Defense Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group D meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The laser area includes programs on developments and research related to low energy lasers for such applications as battlefield surveillance, target designation, ranging, communications, weapon guidance and data transmission. The review will include classified program details and will result in advice or recommendations to government research and development agencies preliminary to decisions or actions, the preliminary disclosure of which would

interfere with the orderly conduct of government.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in Section 552(b) of Title 5 of the United States Code, specifically Subparagraphs (1) and (5) thereof, and that accordingly this meeting will be closed to the public.

### DEPARTMENT OF THE INTERIOR

#### Bureau of Land Management

#### SOUTH ATLANTIC OUTER CONTINENTAL SHELF (TENTATIVE SALE #43)

##### Areas for Oil and Gas Leasing; Nominations and Comments

Pursuant to the authority prescribed in 43 CFR 3301.3 (1974), nominations are hereby requested for areas in the South Atlantic Outer Continental Shelf (OCS) for possible oil and gas leasing under the Outer Continental Shelf Lands Act (43 U.S.C. 1331-1343 (1970)). Nominations will be considered for any or all of the following mapped areas located offshore the States of North Carolina, South Carolina, Georgia, and Florida:

##### OCS OFFICIAL PROTRACTOR DIAGRAMS

1. NI 17-9 (Georgetown)—All.
2. NI 17-12 (James Island)—That portion landward of a line starting at the NE corner of Block 39 running South to the SE corner of Block 655 thence West to the NE corner of Block 686 thence South to the SE corner of Block 994.
3. NI 17-11 (Savannah)—All.
4. NH 17-3—That portion landward of a line starting at the NE corner of Block 25 running South to the SE corner of Block 597, thence West to the NE corner of Block 622, thence South to the SE corner of Block 974, thence West to the SW corner of Block 969.
5. NH 17-2 (Brunswick)—All.
6. NH 17-5 (Jacksonville)—All.
7. NH 17-8 (Daytona Beach)—All.
8. NH 17-11 (Orlando)—That portion landward of a line starting at the NE corner of Block 43 running South to SE corner of Block 527, thence West to the three mile limit.

These protraction diagrams may be purchased for \$2.00 each from the Manager, Gulf of Mexico Outer Continental Shelf Office, Bureau of Land Management, The Plaza Tower, Suite 3200, 1001 Howard Avenue, New Orleans, Louisiana 70113. All nominations must be described in accordance with the Outer Continental Shelf Official Protraction Diagrams prepared by the Bureau of Land Management, Department of the Interior and referred to above. Only whole blocks or properly described subdivisions thereof, not less than one quarter of a block, may be nominated. Although individual company nominations are considered to be privileged and confidential information, the names of persons or entities submitting nominations or comments will be of public record.

NOTICE OF APPLICATION PUBLISHED IN  
FEDERAL REGISTER MARCH 20, 1975 (40  
FR 12689).

#### Official Action:

Issued permit June 27, 1975: "Author-

Each permit is available for public inspection during normal business hours at the U.S. Fish and Wildlife Service's office

In addition to requesting nominations of tracts for possible oil and gas leasing within the specified areas, this notice also requests the identification of particular tracts recommended to be either specifically excluded from oil and gas leasing or leased only under special conditions because of conflicting values and environmental concerns. Particular geological, environmental, biological, archaeological, socio-economic or other information which might bear upon potential leasing and development of particular tracts is requested where available. Information on these subjects will be used in the preliminary selection of tracts which precedes any final selection by the Director pursuant to 43 CFR 3301.4. This information is requested from Federal, State and local governments; industry; universities; research institutes; environmental organizations; and members of the general public. Comments may be submitted on blocks or portions thereof, as required for nominations, or on all areas or portions thereof as described above. They should be directed to specific factual matters which bear upon the Department's decision whether to make a preliminary selection of particular tracts within these areas for further environmental analysis pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4347 (1970)), and possible leasing. Comments relating to general matters which would be applicable to oil and gas operations in any part of the OCS are not sought at this time.

Nominations and comments should be submitted not later than November 3, 1975, in envelopes labeled "Nominations of Tracts for Leasing on the Outer Continental Shelf—South Atlantic" or "Comments on Leasing on the Outer Continental Shelf—South Atlantic," as appropriate. They must be submitted to the Director, Bureau of Land Management, Attention: 720, Department of the Interior, Washington, D.C. 20240. Copies must be sent to the Conservation Manager, Geological Survey, Eastern Region, Suite 316 1825 K Street, NW, Washington, D.C. 20006 and the Manager, Gulf of Mexico Outer Continental Shelf Office, Bureau of Land Management, at his address cited above.

This call for nominations and comments does not in any way commit the Department to leasing in the South Atlantic. It is an information gathering component of the Department's leasing procedure.

Final selection of tracts for competitive bidding will be made only after compliance with established Departmental procedures and all requirements of the National Environmental Policy Act of 1969. Notice of any tracts finally selected for competitive bidding will be published in the Federal Register stating the conditions and terms for leasing and the

OPERATION AND MAINTENANCE PROGRAM FOR THE RIO GRANDE-VELARDE TO CABALLO DAM, RIO GRANDE AND MIDDLE RIO GRANDE PROJECTS, NEW MEXICO

Public Hearing on Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement for the Operation and Maintenance Program for the Rio Grande-Velarde to Caballo Dam, Rio Grande and Middle Rio Grande Projects, New Mexico. This statement (INT DES 75-49) was transmitted to the Council on Environmental Quality on August 27, 1975, and is available to the public.

The draft environmental statement deals with current and proposed operation and maintenance activities along the floodway of the Rio Grande from Velarde, New Mexico, to areas within the conservation pools of Elephant Butte and Caballo Reservoirs.

Public hearings will be held in the Convention Center, Truth or Consequences, New Mexico, on October 15, 1975, and the Picuris Room, Albuquerque Convention Center, Albuquerque, New Mexico, on October 16, 1975, to receive views and comments from interested organizations or individuals relating to the environmental impacts of this program. The hearings will commence at 2 p.m., m.d.t., and recess at 5 p.m. The hearings will reconvene at 7:30 p.m. and continue until all statements have been presented. Oral statements at the hearings will be limited to a period of 10 minutes per person. Speakers will not trade their time to obtain longer oral presentations; however, the person authorized to conduct the hearing may allow any speaker to provide additional oral comment after all other persons desiring to comment have been heard. Whenever possible, speakers will be scheduled according to the time preferences mentioned in their letter or telephone requests. Any scheduled speaker not present when called will lose his place in the scheduled order and his name will be called again after other scheduled speakers have been heard.

Organizations or individuals desiring to present statements at the hearings should contact the office of Regional Di-

rector James A. Bradley, Bureau of Reclamation, Herring Plaza, Box H-4377, Amarillo, Texas 79101, telephone (806) 376-2401, and announce their intention to participate. Requests to schedule oral presentations will be accepted until 4 p.m., c.d.t., October 10, 1975. Unscheduled presentations will be handled on a first-come-first-served basis following the scheduled presentations. Written comments from those unable to attend and from those wishing to supplement their oral presentations at the hearing should be received by the Regional Director by October 24, 1975, for inclusion in the hearing record.

Dated: September 9, 1975.

G. G. STAMM,  
Commissioner of Reclamation.

1. APPLICATION FOR (Indicate only one)

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED.

I propose to study the reproductive and social behavior of the American alligator.

# COOPERATIVE AGREEMENT FOR CONDUCTING FORESTRY RESEARCH

Contract No. 13-445: Entire—Reimbursable.

**STUDY TITLE:** Timber Wolf Population on the Chippewa National Forest.

**WORK UNIT NO. FS-NC-1951.**

THIS AGREEMENT, made and entered into this 24 day of March, one thousand nine hundred and seventy-five, by and between the Forest Service, United States Department of Agriculture, acting through the Director of the North Central Forest Experiment Station, hereinafter called the Forest Service, and the State of Minnesota Department of Natural Resources, Forest Wildlife Population and Research Group, Grand Rapids, Minnesota, hereinafter called the Department, witnesseth that:

WHEREAS, the parties hereto are mutually interested and desire to cooperate in conducting a certain study more particularly and fully described as follows:

1. To identify each pack, determine the size and territory occupied by the wolves, and identify critical areas such as rendezvous sites.

2. To study the wolf population structure.

3. To estimate the wolf population on the Chippewa National Forest.

WHEREAS, cooperation in the above research is authorized by law (16 U.S.C. 581, 581a-581c, 581i-1, 76 Stat. 579).

NOW, THEREFORE, the parties hereto agree as follows:

**A. THAT THE FOREST SERVICE SHALL:**

1. Consult with the Department in the preparation of mutually acceptable detailed plans for the study.

2. Make available equipment and services to facilitate conducting the study, as may be required by the Department and agreed to by the Forest Service.

3. Reimburse the Department for its direct costs for the items listed below, applicable to the work under this agreement, in addition to any other Forest Service contributions in the form of services and supplies, but not to exceed a total of \$15,000. Payments will be made upon receipt of itemized statements of expenditures from the Department as provided for herein.

a. Salaries and wages.  
b. Travel and subsistence necessary in conducting the research.  
c. Expendable equipment and supplies.  
d. Contractual services.

B. The Department agrees to:

1. Provide leadership and supervision essential to the satisfactory accomplishment of the study.

2. Render itemized statements of expenditures for the above project showing the amount of the direct cost to be reimbursed by the Forest Service, at quarterly intervals if desired by the Department but at least as of March 31 and June 30.

3. Employ and supervise personnel in the conduct of this study.

4. Arrange for interdepartmental assistance essential to the conduct of this study.

5. Consult with the Fish and Wildlife Service's Endangered Species Wildlife Research Biologist during the course of the study.

6. Conduct the studies herein described under the terms of this agreement and prepare a progress report at the end of each fiscal year and a final report or reports of the results at the termination of the study, June 30, 1977.

C. IT IS FURTHER AGREED BY BOTH PARTIES:

1. That neither party will publish any results without consulting the other. This is not to be construed as applying to popular publications of previously published technical matter. Publications may be joint or

independent as may be agreed upon, always giving due credit to the cooperation and recognizing within proper limits the rights of individuals doing the work. In the case of failure to agree as to manner of publication or interpretation of results, either party may publish data after due notice and submission of the proposed manuscripts to the other. In such instances, the party publishing the data will give due credit to the cooperation but assume full responsibility for any statements on which there is a difference of opinion.

2. That results of this study may be used for these in partial fulfillment of requirements for advanced degrees.

3. That equipment, materials, and property of any kind purchased wholly from funds provided by the Forest Service under the terms of this agreement and not consumed in the project shall be the property of the Forest Service and disposed of as directed thereby.

4. That this agreement may be terminated by either party by giving 60 days' notice to the other in writing.

5. That in the performance of the terms of this agreement or amendment thereof, no convict labor shall be used and the Department will comply with the provisions of the Contract Work Hours Standard Act of 1962 (40 U.S.C. 327-332) as to the employment of laborers and mechanics.

6. That the United States shall not be liable to the Department for any damage incident to the performance of work under this Agreement or amendment thereof.

7. That no Member of, or Delegate to, Congress or Resident Commissioner, shall be admitted to any share or part of this Agreement or to any benefit that may arise therefrom, but this provision shall not be construed to extend to this Agreement if made with a corporation for its general benefit.

8. That in the performance of the terms of this Agreement the Department agrees to comply with Title VI of the Civil Rights Act of 1964 (PL 88 352) and all requirements imposed by or pursuant to the Regulations of the U.S. Department of Agriculture (7 CFR Part 15) issued pursuant to that Act; as represented in the assurance of compliance executed, attached, and made a part of this Agreement.

**FOREST WILDLIFE POPULATION AND RESEARCH GROUP; JOB DESCRIPTION**

**TITLE:** Ecology of Forest Predators in Northern Minnesota

**JOB NO.:** Forest Wildlife Job No. 36 (Formerly Furbearer and Predator Job No. 16)

**JUSTIFICATION:**

The coyote is an important furbearer in Minnesota. Trappers annually take between 1,000 and 2,000 coyotes, representing between \$20,000 and \$40,000 in pelt values. An additional 1,000 coyotes are taken annually under the Directed Predator Control Program, representing payments averaging \$35,000 per year. Despite the presence of this \$80,000 wildlife resource, little information exists regarding the age ratios and productivity of Minnesota Coyotes. In addition to its economic value, the coyote has undetermined aesthetic values, and plays an important role as a scavenger and predator in the northern forested ecosystem.

Preliminary food habits data obtained earlier in this study (Chesness 1973-1975) indicate that coyotes feed mainly on small mammals during all seasons except winter, when the primary food is white-tailed deer. Although studies elsewhere (Ogle 1971, Ozoga and Harger 1966) have examined deer-coyote interactions in the northern forest ecosystem, the impact of coyote predation on deer in northern Minnesota is essentially unknown.

Interspecific strife between coyotes and timber wolves was suggested earlier in this study (Chesness 1974). Although this phenomenon has been observed elsewhere, the timber wolves' classification as an Endangered Species, and their apparent range expansion, adds further importance to information obtained regarding large predators in northern Minnesota.

**PROCEDURES:**

1. Coyote, fox, bobcat, and timber wolf (when possible) carcasses will be collected from various sources by project and Section of Wildlife field personnel. Information obtained from carcass examinations consist of physical condition, sex, age, weight, productivity, and physiological information as needs warrant.

2. Scats collected throughout the year at regular and irregular intervals will supplement stomach food habits information.

3. Coyotes, wolves, foxes, and bobcats will be live-trapped, tagged, and radio collared in northwestern Aitkin County. These animals will be located using aerial and ground telemetric techniques at frequent intervals to determine home range, daily and seasonal movements, extent of predation, hunting behavior, and inter- and intraspecific social behavior.

4. Appropriate measurements including body weights and standard measurements, and samples consisting of blood, feces, and a tooth for aging purposes will be obtained from all animals.

5. Predators will be tracked in snow when conditions permit to determine hunting and feeding behavior, and to supplement stomach and scat food habits data.

6. Information obtained from aerial observations, trap locations, and scent post activity (Roughton 1974) will be evaluated to establish indicators of predator population densities and trends in northern Minnesota.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before October 14, 1975 will be considered.

Dated: September 8, 1975.

C. R. BAVIN,  
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

Re: Permit to capture alligators for tagging.

Sec. 17.22

1) Species to be covered by permit: American alligator, *Alligator mississippiensis*. I intend to capture for purposes of tagging an unknown quantity of males and females of all ages. The animals will be released immediately after tagging.

2) The organisms to be covered by this permit are in the wild.

3) Animals will be trapped either in hand-held nooses, or in Murphy-Pendley alligator traps (whichever method is preferred by wildlife biologists in area in which work will take place). Neither method should result in any physical harm to the animals. They will be tagged with plastic strips around the neck or around the tail, and will small washers in either the toe webbing or in the axillary region. Both methods have been used extensively by wildlife biologists, and should not damage the animals tagged.

4) N.A.

5) N.A.—organisms will remain in the wild.

6) 1) N.A.

11) N.A.

111) N.A.

1v) N.A.

v) To date, no alligators captured for tagging by this applicant have died as a result of the tagging procedure.

7) Attachments: Grant proposal, letter from Okefenokee Wildlife Refuge, copies of permits from Georgia, North Carolina and South Carolina. The project is slated to begin on approximately August 1, 1975 and continue until July 31, 1977.

8) 1, II, and III are covered in the grant proposal.

1v) All animals will remain in the wild throughout the duration of the study. As stated previously, no alligators captured for tagging by this applicant have died as a result of the tagging procedure, however, any animal who may die as a result of capture, will be preserved and shipped to the Biology Department of New York University, for physiological and anatomical studies.

# ABSTRACT

I propose to study the reproductive and social behavior of the American alligator, *Alligator mississippiensis*, in its natural habitat. This will include quantification and analysis of behavioral patterns seen in courtship, copulation, nesting, hatching, mother-offspring interactions, and social encounters.

Previous studies on alligator behavior have been carried out only on captive individuals. As captive organisms are under stresses different from those in relatively undisturbed populations, and as these undisturbed areas are rapidly being eroded by incursions by man, a study of natural behavior in undisturbed environments would be valid at this time. It is an opportunity we may never have again.

I intend to capture and mark (with individually identifiable markers visible at a distance) as many individuals as possible, and to record the reproductive and social behavior of these animals on videotape.

The advantages of videotape over other forms of recording are:

1) Human observers need not be present at the time the behavior occurs, thus removing a potential source of disturbance to the animals;

2) Videotape can be played back instantly, so the observer knows exactly what has occurred and what to look for, without time being wasted for developing of film;

3) Low-light sensitive videotape cameras exist, needing no special tape, for recording in near-total darkness, when much of adult alligator behavior is expected to occur.

These tapes will be analyzed and different components of each behavioral sequence isolated.

These studies will be carried out in the less accessible areas of Okefenokee National Wildlife Refuge in Georgia. Additional areas will be investigated during the progress of the study.

Using data obtained in this study, I could carry out future studies in which, for example, males showing behavior likely to end in copulation are paired with receptive females, who have been courted only by non-copulating males.

# FACILITIES

I intend to carry out the bulk of the study on mating and nesting on the Okefenokee National Wildlife Refuge in Georgia. According to the Assistant Superintendent of the Okefenokee Refuge, the current alligator population of the area is approximately 12,000 individuals (1974 estimate: about 6,000, Sutton and Sutton, 1974). Nests are plentiful, and it is believed that nests located in less accessible regions of the marsh areas survive to hatching. Studying these nests will give information on nesting and maternal behavior, and also help the refuge staff compile data on nesting success in these regions.

Negotiations are under way for permission for use of this area for study. I currently expect that permission will be granted.

I am also considering the use of Black-beard Island National Wildlife Refuge for the study, but at this time do not know if I will be permitted to use the area.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE).

#### MARINE MAMMALS

##### Issuance of Permit

On June 27, 1975, a notice was published in the FEDERAL REGISTER (40 FR 27280-81) that an application had been filed with the Fish and Wildlife Service by Sea World, Inc., San Diego, California, for a permit to capture five California Sea Otters for scientific studies and public display.

Notice is hereby given that on September 4, 1975, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the Fish and Wildlife Service issued a permit to Sea World, San Diego, California, subject to certain conditions set forth therein. The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in Suite 670, 1612 K Street, NW., Washington, D.C.

Dated: September 8, 1975.

NOTE: Copy of permit filed with original document.

#### CASCADE HEAD SCENIC-RESEARCH AREA ADVISORY COUNCIL

##### Meeting

The Cascade Head Scenic-Research Area Advisory Council will meet at 9:00 a.m. on Saturday, October 11, 1975 at Salishan Lodge in Gleneden Beach, Oregon.

The purposes of this meeting are to review the subarea boundaries, to discuss the inventory and suitability analysis report, and to review management objectives for each subarea within the Scenic-Research Area. Draft alternatives are being prepared by the Planning Team for the Area and the Advisory Council will review these and recommend any modifications or additions to them.

The meeting will be open to the public. Persons who wish additional information concerning the meeting should contact Linda Penney, Hebo Ranger Station, Hebo, Oregon, phone 392-3161, ext. 33, or Edlu Allert, Sluslaw National Forest, at 545 SW Second Street, Corvallis, Oregon, phone 752-4211, ext. 510.

#### NOTICES

The Public may participate in the meeting by either submitting written comments to the Chairman or speak to the Council when recognized by the Chairman.

F. DALE ROBERTSON,  
Forest Supervisor,  
Pacific Northwest Region.

#### Packers and Stockyards Administration

[P. & S. D. Act No. 1001]

EUGENE T. KAMPA AND RICHARD M. THORSON

Order Extending Period of Suspension of Modifications of Rates and Charges

On August 13, 1975, an order was issued instituting the following proceeding under Title III of the Packers and Stockyards Act, 1921, as amended, 42 Stat. 159, as amended, (17 U.S.C. 181 et seq.):

Eugene T. Kampa and Richard M. Thorson, d/b/a Granite City Livestock Sales, Saint Cloud, Minnesota.

Such order, among other things, suspended and deferred the operation and use by the respondents of modifications of its current schedule of rates and charges to become effective August 11, 1975, for a period of thirty days beyond the time such modifications would otherwise go into effect.

Notice is hereby given that, since the hearing in this proceeding could not be concluded within such period of suspension, an order has been issued in the above proceeding suspending and deferring the operation and use of such modifications of the current schedule of rates and charges for a further period of thirty days beyond the date when such modifications would have otherwise become effective.

Done at Washington, D.C. September 9, 1975.

GLENN G. BIERMAN,  
Acting Administrator, Packers and  
Stockyards Administration.

##### National Oceanic and Atmospheric Administration

##### ATLANTIC TUNA FISHERIES

##### Bluefin Tuna Season Closure

On September 10, 1975, the Director, National Marine Fisheries Service, determined that the 1975 annual quota of 2,250 individual Atlantic bluefin tuna weighing in excess of 300 pounds each and taken by other than purse seining as established in 50 CFR 285.12(b)(1) will be reached on September 14, 1975. The quota includes individual tuna taken in a directed fishery, and those taken incidentally as prescribed in 50 CFR 285.13(d).

As authorized by 50 CFR 285.11, notice is hereby given that the 1975 season for

Atlantic bluefin tuna taken by other than purse seining, which weigh in excess of 300 pounds each, will terminate at 0001 hours, local time, in the regulatory area, September 15, 1975. This closure does not effect the incidental take as authorized by § 285.13(c).

The 1975 season for taking Atlantic bluefin tuna between 14 pounds and 115 pounds by purse seining was closed on August 13, 1975. The closure was effected by publication in the FEDERAL REGISTER, volume 40, Number 157, dated August 13, 1975.

Issued at Washington, D.C. and dated September 10, 1975.

ROBERT W. SCHONING,  
Director.

#### ADVISORY COMMITTEES

##### Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be open to the public to discuss administrative details or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available. Some of these meetings will be closed as indicated below in accordance with the provisions set forth in Sections 552(b)(4) and 552(b)(6) of Title 5, U.S. Code and Section 10(d) of P.L. 92-463 for the review, discussion and evaluation of individual research contract proposals as indicated. The proposals contain information of a proprietary or confidential nature, including detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 3A16, National Institutes of Health, Bethesda, Maryland 20014 (301/496-5708) will furnish summaries of the meetings and rosters of committee members upon request. Other information pertaining to the meeting can be obtained from the Executive Secretary indicated. Meetings are at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014 unless otherwise stated.

#### BOARD OF SCIENTIFIC COUNSELORS, NATIONAL CANCER INSTITUTE

##### Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the

Board of Scientific Counselors, National Cancer Institute, October 16 and 17, 1975, Building 37, Conference Room 4E08, National Institutes of Health. This meeting will be open to the public on October 16, 1975, from 9:00 a.m. to 5:00 p.m. to discuss the scientific research program of the Laboratory of Biochemistry, Division of Cancer Biology and Diagnosis. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Section 552(b)(6), Title 5, U.S. Code and Section 10(d) of P.L. 92-463, the meeting will be closed to the public on October 17, 1975, from 9:00 a.m. to adjournment for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Alan S. Rabson, Director, Division of Cancer Biology and Diagnosis, National Cancer Institute, Building 31, Room 3A03, National Institutes of Health, Bethesda, Maryland 20014 (301/496-4345) will furnish summaries of meetings, rosters of committee members, and substantive program information.

Dated: September 5, 1975.

SUZANNE L. FREMEAUX,  
Committee Management Officer,  
National Institutes of Health.

#### DIVISION OF CANCER CONTROL AND REHABILITATION

##### Meeting

Notice is hereby given of a workshop and state of the art conference on school health education programs as they relate to cancer control, Division of Cancer Control and Rehabilitation, National Cancer Institute, National Institutes of Health, to be held on October 12-14-15, 1975, at the Hilton Hotel, 1550 Court Place, Denver, Colorado 80202. Official participation is by invitation to school and higher education health education personnel and related health professionals and officials.

The meeting will be open to the public on October 12, 1975 from 5 p.m. to 9 p.m., and on October 13-14-15, 1975 from 9 a.m. to 5 p.m. The purposes of the meeting are to review, examine and exchange information on school health education programs throughout the nation with emphasis on such programs as they relate to cancer control; and to solicit suggestions for the development of school health education programs that

will enhance cancer control programs as they relate to the prevention, screening and early diagnosis of cancer.

Attendance by the public will be limited to space available. For additional information please contact: Dr. Carl A. Larson, Blair Building, Room 7A01, Division of Cancer Control and Rehabilitation, National Cancer Institute, National Institutes of Health, Bethesda, Maryland 20014, (301) 427-8095.

Dated: September 5, 1975.

#### HEART AND LUNG RESEARCH REVIEW COMMITTEE A

##### Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Heart and Lung Research Review Committee A, National Heart and Lung Institute, October 3-4, 1975, National Institutes of Health, Building 31, Conference Room 9. This meeting will be open to the public on October 3, 1975, from 8:30 AM to approximately 9:30 AM to discuss administrative details and to hear a report concerning the current status of the National Heart and Lung Institute. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552(b)(4), 552(b)(5) and 552(b)(6), Title 5, U.S. Code and Section 10(d) of P.L. 92-463, the meeting of the Heart and Lung Research Review Committee A will be closed to the public on October 3, 1975, from 9:30 AM until the adjournment on October 4, 1975, for the review, discussion and evaluation of individual initial pending, supplemental, and renewal grant applications. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications containing detailed research protocols, designs, and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mr. York E. Onnen, Chief, Public Inquiries and Reports Branch, NHLI, NIH, Building 31, Room 5A21, Bethesda, Maryland 20014, phone (301) 496-4236, will provide summaries of the meeting and rosters of the committee members. Dr. Arthur W. Merrick, Executive Secretary, NHLI, NIH, Westwood Building, Room 552, phone (301) 496-7915, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.837, 13.838, and 13.839 National Institutes of Health.)

# PRIVATE RESEARCH CENTERS ADVISORY COMMITTEE

## Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Private Research Centers Advisory Committee, Division of Research Resources, October 2, 1975, (evening session commencing at 8:00 p.m. at Ramada Inn (Caucus Room), 840 Wisconsin Avenue, Bethesda, Maryland 20014) and October 3, 1975, National Institutes of Health, Building 31, A Wing, Conference Room 4, Bethesda, Maryland 20014. This meeting will be open to the public from 9:00 a.m. to 10:00 a.m., October 3, 1975, for a presentation on activities of the Private Steering Committee. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552(b)(4), 552(b)(5) and 552(b)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92-463, the meeting will be closed to the public during the evening session on October 2, 1975, and on October 3, 1975, from 10:00 a.m. until adjournment for the review, discussion and evaluation of initial pending and renewal grant applications. The closed portion of the meeting involves solely the internal expression of views and judgments of committee members on individual grant applications containing detailed research protocols, designs and other technical information; financial data, such as salaries; and personal information concerning individuals associated with the applications.

Mr. James Augustine, Chief, Office of Science and Health Reports, Division of Research Resources, Building 31, Room 5B39, Bethesda, Maryland 20014, 301/496-5545, will provide summaries of the meeting and rosters of Committee members. Dr. Leo Whitehair, Executive Secretary, Private Research Centers Advisory Committee, Building 31, Room 5B30, Bethesda, Maryland 20014, 301/496-5451, will furnish substantive program information.

# PULMONARY DISEASES ADVISORY COMMITTEE

## Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Pulmonary Diseases Advisory Committee, National Heart and Lung Institute, October 25 and 26, 1975, in the Palm Room in the Sierra Tower, Disneyland Hotel, Anaheim, California.

The entire meeting will be open to the public on October 25 from 8:30 a.m. until 5:00 p.m. and from 8:30 a.m. until noon on October 26, 1975. The meeting will be devoted primarily to reports by working groups that will have met in advance to consider the Division's program relative to seven research areas: Structure and Function of the Lung, Chronic Bronchitis and Emphysema, Pediatric Pulmonary Diseases, Pulmonary Vascular Diseases, Fibrotic and Immunologic Diseases, Respiratory Failure and Prevention, Control and Education. Recommendations of the working groups will be discussed by the Committee as a whole, and plans will be made for Committee activities during the fiscal year. Attendance by the public will be limited to space available.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, National Heart and Lung Institute, Building 31, Room 5A21, National Institutes of Health, Bethesda, Maryland 20014, phone (301) 496-4236, will provide summaries of the meeting and rosters of the committee members. Dr. Malvina Schweizer, Executive Secretary of the Committee, Westwood Building, Room 6A18, National Institutes of Health, Bethesda, Maryland 20014, phone (301) 496-7208, will furnish substantive program information.

# VISION RESEARCH PROGRAM PLANNING SUBCOMMITTEE

## Meeting

Pursuant to Public Law 92-463 notice is hereby given of the meeting of the Vision Research Program Planning Subcommittee of the National Advisory Eye Council, National Eye Institute, on October 1 and 2, 1975, National Institutes of Health, Building 31, Conference Room #4, Bethesda, Maryland.

The entire meeting will be open, from 7:00 p.m. until 10:00 p.m. on October 1, 1975, and from 9:00 a.m. to adjournment on October 2, 1975. The meeting will be devoted to (a) preliminary discussion of alternative approaches to the analysis of the Institute's present portfolio of sponsored activities, and (b) the development of further plans for assessing present and potential Institute programs during the next 18 months. Attendance by the public will be limited to space available.

Substantive information may be obtained from Mr. Julian Morris, Head, Office of Scientific Reports and Program Planning Coordination, National Eye Institute, National Institutes of Health, Bethesda, Maryland 20014, Building 31, room 6A-27, telephone (301) 496-5248.

# Office of Education ADVISORY COUNCIL ON DEVELOPING INSTITUTIONS

## Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), that the next meeting of the Advisory Council on Developing Institutions will be held November 6 and 7, 1975, from 9:00 a.m. to 4:00 p.m. in Room 3652, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Advisory Council on Developing Institutions was established by Title III of the Higher Education Act of 1965, as amended. The Council is governed by the provisions of Part D of the General Education Provisions Act and of the Federal Advisory Committee Act (P.L. 92-463). The Council shall assist the Commissioner in identifying the characteristics of developing institutions through which the purpose of Title III may be achieved, and in establishing the priorities and criteria to be used in making grants under section 304(a) of that Title.

The meeting of the Council shall be open to the public. The meeting will be devoted to a progress and status report on the Program. Also, newly appointed Council members will be sworn in.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the Director of the College and University Unit, BPE, located in Room 4682, ROB, 7th & D Streets, SW.

Signed at Washington, D.C., on September 9, 1975.

PRESTON VALIEN,  
Director,  
College and University Unit.

# FULBRIGHT-HAYS TRAINING GRANTS Receipt of Applications; Notice of Closing Date

Notice is hereby given that pursuant to the authority contained in section 102(b)(6) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2452(b)(6)), applications are being accepted from eligible institutions for Fulbright-Hays training grants.

Eligible applicants for Fulbright-Hays training grants are as follows:

A. For the Doctoral Dissertation Research Abroad program, accredited institutions of higher education which offer doctoral programs in the fields of foreign languages and area studies.

B. For the Faculty Research Abroad program, accredited institutions of higher education.

C. For the Group Projects Abroad program, accredited institutions of higher education, State departments of education, private non-profit educational organizations, and consortiums of such entities.

D. For the Foreign Curriculum Consultants program, accredited institutions of higher education, State departments of education, local public school systems, private non-profit educational organizations, and consortiums of such entities.

Applications must be received by the U.S. Office of Education Application Control Center on or before November 7, 1975.

A. Applications sent by mail.

An application sent by mail should be addressed as follows: U.S. Office of Education, Application Control Center, 400 Maryland Avenue, S.W., Washington, D.C. 20202, Attention (as applicable): 13.438 Faculty Research Abroad; 13.439 Foreign Curriculum Consultants; 13.440 Group Projects Abroad; or 13.441 Doctoral Dissertation Research Abroad. An application sent by mail will be considered to be received on time by the Application Control Center if:

(1) The application was sent by registered or certified mail no later than November 3, 1975 as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the closing date by either the Department of Health, Education, and Welfare, or the U.S. Office of Education mail rooms in Washington, D.C. (In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.)

B. Hand delivered applications.

An application to be hand delivered must be taken to the U.S. Office of Education Application Control Center, Room 5673, Regional Office Building Three, 7th and D Streets, S.W., Washington, D.C. Hand delivered applications will be accepted daily between the hours of 8:00 a.m. and 4:00 p.m. Washington, D.C. time except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after 4:00 p.m. on the closing date.

C. Program information and forms.

Information and application forms may be obtained from the International Studies Branch, Division of International Education, Bureau of Postsecondary Education, Office of Education, Regional Office Building Three, 7th and D Streets, S.W., Washington, D.C. 20202.

D. Applicable regulations.

Awards made pursuant to this notice will be subject to (1) the Office of Education General Provisions Regulations (45 CFR Part 100a) and (2), upon their becoming effective, the regulations for Modern Foreign Language Training and Area Studies published as a Notice of Proposed Rulemaking on July 28, 1975 at 40 F.R. 31617.

# PRESIDENT'S COMMITTEE ON MENTAL RETARDATION

## Meeting

The President's Committee on Mental Retardation was established to provide advice and assistance in the area of mental retardation to the President including evaluation of the adequacy of the national effort to combat mental retardation; coordination of activities of Federal agencies; provision of adequate liaison between Federal activities and related activities of State and local governments, foundations and private organizations; and develop information designed for dissemination to the general public. The Committee will meet on Saturday, October 18, 1975, 9:00 a.m. to 5:00 p.m. at the Hotel Utah, Main at South Temple, Salt Lake City, Utah 84110. This meeting will be the quarterly meeting of the Committee. They will discuss full citizenship, minimum occurrence, humane services, and public awareness as they relate to mentally retarded people. These meetings are open to the public.

Dated: August 29, 1975.

FRED J. KRAUSE,  
Executive Director, President's  
Committee on Mental Retardation.

# DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales  
Registration

[Docket No. N-75-429]

PERRY PARK, COLO.

Notice of Hearing

In the matter of Perry Park 1-7, 9, 11, Perry Park East 1-2, Meribel Village 1-2, Sage Port 1-2, and Indian Head 1, OILSR No. 0-0484-05-27(B), 0-0484-05-27(A), 0-4484-05-27, Doc. No. 75-134-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. Perry Park 1-7, 9, 11, Perry Park East 1-2, Meribel Village 1-2, Sage Port 1-2, and Indian Head 1, Jack D. Lander, Executive Vice President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. L. 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued July 18, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the

developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Perry Park, located in Douglas County, Colorado, contain untrue statement of material fact or omit to state material facts required to be stated therein as necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 11, 1975 in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on October 10, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before October 2, 1975.

6. The Respondent is HEREBY NOTIFIED that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an ORDER Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: September 3, 1975.

By the Secretary.

JAMES W. MAST,  
Administrative Law Judge.

[Docket No. N-75-428]

THUNDER BAY VILLAGE, MICH.

Notice of Hearing

In the matter of Thunder Bay Village, OILSR No. 0-2583-26-46 Doc. No. 75-125-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. Thunder Bay Village, Harry Bloch, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued

## NOTICES

July 13, 1975, which was sent to the developer pursuant to 15 U.S.C. 1705(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Thunder Bay Village, located in Alpena County, Michigan, contain untrue statement of material fact or omit to state material facts required to be stated therein as necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 5, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), IT IS HEREBY ORDERED that a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on October 7, 1975, at 10:00 A.M.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 30, 1975.

6. The Respondent is HEREBY NOTIFIED that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an ORDER Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This Notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: September 3, 1975.

By the Secretary.

CIVIL SERVICE COMMISSION  
FEDERAL EMPLOYEES PAY COUNCIL  
Meeting

SEPTEMBER 8, 1975.

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the Federal Employees Pay Council will meet at 10:00 a.m. on Wednesday, October 1, 1975. This meeting will be held in room 5323 of the U.S. Civil Service Commission building, 1900 E Street, N.W., and will consist of continued discussions on future comparability adjustments for the statutory pay systems of the Federal Government.

The Chairman of the U.S. Civil Service Commission is responsible for the making of determinations under section 10(d) of the Federal Advisory Committee Act as to whether or not meetings of the Federal Employees Pay Council shall be open to the public. He has determined that this meeting will consist of exchanges of opinions and information which, if written, would fall within exemptions (2) or (5) of 5 U.S.C. 552(b). Therefore, this meeting will not be open to the public.

For the President's Agent.

## SOIL CONSERVATION SERVICE

## Final

Rock Creek Watershed, Gilliam and Morrow Counties, Oregon, September 2: The statement refers to the Rock Creek watershed protection, land treatment, flood prevention, and irrigation water storage and distribution in Gilliam and Morrow Counties. Adverse impacts are increased turbidity, increased dust and noise pollution, removal of 290 acres of rangeland vegetation, and construction disruptions. Comments made by: AHP, DOC, COE, DOI, DOT, EPA, and State and local agencies. (ELR Order No. 51310.)

## DEPARTMENT OF DEFENSE

## ARMY CORPS

Contact: Mr. Francis X. Kelly, Director, Office of Public Affairs, Attn: DAEN-PAP, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, D.C. 20314, 202-693-6861.

## Draft

New River and Phoenix City Streams, Maricopa County, Ariz., September 2: The project is the second phase of a 5-phase plan designed to serve as a framework for flood control in the Phoenix area. Three flood control dams, to be located on Cave Creek, Skunk Creek, and New River, will be constructed. A 17 mile long diversion channel, containing both earth and concrete sections will be constructed immediately north of and parallel

FEDERAL REGISTER, VOL. 40, NO. 178—FRIDAY, SEPTEMBER 12, 1975

## NOTICES

upgrading of Blanding Boulevard (State Road 21) to a divided, four-lane facility from the intersection with SR 215 to Robin Road. The improvement will provide for increased traffic

Interstate 5: the interchanges at Anlauf and Divide will be reconstructed, and a new system of frontage roads will be constructed. Adverse impacts will include the loss of some

to the Arizona Channel. Adverse impacts include the loss or alteration of 410 acres of riparian habitat, the alteration or destruction of 3 archeological sites, the urbanization of 310 acres of open space, and the relocation of 237 homes and 25 businesses. (Los Angeles District.) (ELR Order No. 51314.)

**Little River Development Plan.** Clark Hill Lake, Georgia and South Carolina. September 2: The Little River Development plan proposes the lease of 1,700 acres of the Clark Hill Project (public) lands from the Corps of Engineers for the development of a private home site and recreation complex. This complex would consist of nature trails, tent and trailer camping areas, rental cabins, a beach area, commercial stores, a marina and a motel, an 18-hole golf course, and second home development. Adverse impacts include severely reduced or eliminated wild turkey population used by the State of South Carolina wildlife department to recover other game lands, loss of forest resources, increase in human encroachment, and conversion of public lands to private homes. (ELR Order No. 51326.)

**Pomona Lake, O. & M., Osage County, Kans.** September 3: The statement concerns the continued operation and maintenance of Pomona Lake, consisting of water control operation and maintenance of recreation areas, and management of project land and water resources. The major adverse effect associated with the operation of the project is related to flood control operations. Shoreline erosion, loss of vegetation, disruption of recreation use, and damage to project roads and recreation areas result from these fluctuations. Sedimentation affects benthic life, fish populations, and recreational use of the lake. (ELR Order No. 51323.)

**Duluth Stormwater Flood Control.** Michigan. September 4: The proposed plan for stormwater flood protection includes both structural and non-structural measures. The plan consists of structural measures to accommodate the 100-year flood on 14 of the 42 study area streams. Flood plain regulation and flood insurance will be used exclusively on the remaining 28 study area streams. Two of the three proposed impoundments are designed to hold water for only a few days, and the animal populations upstream would suffer periodic losses especially when high water levels occur during or soon after breeding season. Some adverse impacts associated with floodplain regulation and flood insurance, such as land sale, would be unavoidable. (ELR Order No. 51334.)

**Roseau River Flood Control.** Roseau and Kittson Counties, Minn. September 2: The project would include modification of the existing Roseau River channel, construction of channel cutoffs, and installation of related works along the river between the city of Roseau and the Canadian border in northwestern Minnesota. The project would result in a decrease in bank stability which could result in some localized sloughing or erosion of the channel slope. Habitat alterations will cause a decrease in wildlife. (St. Paul District.) (ELR Order No. 51316.)

**Final**  
**Santa Cruz Harbor Maintenance Dredging.** Santa Cruz County, Calif. September 2: Proposed is the maintenance dredging of the entrance channel to Santa Cruz Harbor, with the disposal of dredge spoil on the beach east of the jetty. There will be increased turbidity and disruption of biota as a result of the actions. (San Francisco District.) Comments made by: USDA, DOT, EPA, HEW, DOI, State and local agencies, and one individual. (FLR Order No. 51312.)

**Moss Landing Harbor, Calif.** September 3: Proposed is the maintenance dredging of the

entrance channel and harbor channel at Moss Landing. Dredged spoil will be deposited at the head of the Monterey Canyon at the 60 foot isobath at the end of Sandholdt Pier. Adverse impact will accrue to marine biota. (San Francisco District.) Comments made by: USDA, DOC, DOI, HEW, EPA, and State agencies. (ELR Order No. 51327.)

**New Jersey Intracoastal Waterway.** New Jersey. September 4: The project involves the maintenance of the Manasquan, Barnegat, Absecon, and Cold Spring inlets, and the New Jersey Intracoastal Waterway. Periodic dredging is necessary for waterways to be used by pleasure craft, commercial, and sport fishing vessels. Adverse impacts of the action will include the disruption of marine biota. (Philadelphia District.) Comments made by: USDA, DOC, EPA, HUD, DOI, AHP, and State agencies. (ELR Order No. 51338.)

**Maintenance of Browning Creek, Long Island, N.Y.** September 4: The statement concerns future maintenance dredging of the existing Federal navigation project in Browns Creek, Long Island, N.Y., to its authorized project dimensions. The work would be performed when necessary by contract dredge with spoiling on existing disposal areas. Adverse effects include: removal of benthic organisms; increased turbidity; and depending upon the method used, either suspended and dissolved materials reintroduced into the waterway, disturbed shellfish beds, or turbidity in the surf zone. (New York District.) Comments made by: AHP, EPA, DOI, HEW, USDA, DOC, USCG, one State agency, and Blue Point Oyster Co. (ELR Order No. 51333.)

**Double Bayou, Maintenance Dredging.** Chambers County, Tex. September 4: The statement refers to the maintenance dredging of Double Bayou in Chambers County, Texas. Maintenance will be accomplished by hydraulic pipeline dredge with dredged materials disposed of in open water and on land disposal areas. Adverse impacts include disturbance to swimming and bottom dwelling organisms, destruction of vegetation at disposal sites, degradation of water quality, and objectionable odors caused by proposed land disposal operations. (Galveston District.) Comments made by: HEW, EPA, HUD, DOC, DOI, DOT, AHP, and State and local agencies. (ELR Order No. 51335.)

**ENVIRONMENTAL PROTECTION AGENCY**  
Contact: Mr. Sheldon Meyers Director, Office of Federal Activities, Room 3630, Waterside Mall, Washington, D.C. 20460, 202-755-0940.

**Final**  
**Also Water Management Agency Project.** Orange County, Calif. September 3: Proposed is the implementation of a local or regional wastewater treatment and disposal system to eliminate various systems and prevent future problems. The applicant is considering two alternatives: a regional system with central treatment and ocean disposal of most wastes and a regional disposal system with local treatment. Construction disruption and occasional objectionable odors will result. Comments made by: DOI, FEA, GSA, State and local agencies, and private interest groups and individuals. (ELR Order No. 51329.)

**FEDERAL POWER COMMISSION**  
Contact: Dr. Richard F. Hill, Acting Advisor on Environmental Quality, 441 G Street NW., Washington, D.C. 20428, 202-386-8084.

**Draft**  
**Columbia Gas Transmission Corp., Curtailment.** September 2: The action consists of FPC's analysis of two permanent curtailment plans for the Columbia Gas Transmission

Corporation. Environmental impacts resulting from the action are the increased use of coal and oil to replace the curtailed gas, the associated cost increases, and increased pollution in the form of sulfur dioxide and particulates. Alternatives include unregulated curtailment and new sources of gas supplies. Reference is made to the fact that decontrol and rate structure are not included as alternatives to curtailment. (ELR Order No. 51306.)

**Holt, Bankhead, and Lewis Smith Projects.** Ala., September 2: The action involved is the FPC's consideration of Alabama Power Company's contention that the turbine aerator devices installed in the draft tubes of Bankhead Project No. 2165 and Holt Project No. 2203 satisfies its obligation under Article 43 of the Holt license and also in the improvement of the water quality of the Black Warrior River at Tuscaloosa, Alabama. The proposed action would increase the dissolved oxygen released in the waters discharged through the Bankhead powerhouse to the Holt reservoir and the waters discharged through the Holt powerhouse into the Oliver pool, thus providing enough dissolved oxygen for industrial development and associated pollution. (ELR Order No. 51325.)

**DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**

Contact: Mr. Richard H. Brown, Director, Office of Environmental Quality, Room 7258, 451 7th Street SW., Washington, D.C. 20410, 202-755-6303.

**Final**  
**Government Square, Triangle Urban Renewal Projects.** Kanawha County, W. Va., September 2: The 113-acre project, located in downtown Charleston, consists of construction of 400 new housing units, a 20-acre enclosed commercial complex, new government buildings, and preservation/rehabilitation of single-family housing units and existing government buildings. A number of families and businesses will be displaced. COMMENTS MADE BY: EPA, DOT, USCG, DOI, DOC, and State and local agencies. (ELR Order No. 51321.)

The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD.)

**SECTION 104(h)**

**Draft**  
**Cleveland's Demolition Program.** Ohio, September 3: The statement concerns an application for a Community Development Block Grant by the City of Cleveland for demolition of condemned structures. Because these structures are vacant, there will be no displacements of families. Noise pollution and construction disruption will result. (ELR Order No. 51332.)

**Rodeo Lake Surface Drainage.** Othello, Adams County, Wash., September 2: The proposed action is the drainage of a seepage lake (Rodeo Lake) for the purpose of eliminating flooding of septic tanks and surface water conditions on residential suburban area adjacent to Othello City. The project will result in loss of the seepage lake, loss of fish population and reduction of wildlife population. (ELR Order No. 51313.)

**DEPARTMENT OF INTERIOR**  
Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 7260, Department of the Interior, Washington, D.C. 20240, 202-343-3891.

## BUREAU OF OUTDOOR RECREATION

## Draft

**Lewis and Clark National Historic Trail.** September 2: The statement concerns the legislative inclusion of the Lewis and Clark National Historic Trail in the National Trails System. The proposed action on the 3,700 mile route would require easement on 172 acres, resulting in restricted timber harvesting practices, and the development of recreation facilities along 21 components to accommodate increased use. (ELR Order No. 51309.)

## BUREAU OF SPORTS FISHERIES AND WILDLIFE

## Final

**Desert Wilderness Area.** Clark and Lincoln Counties, Nev., September 4: The statement proposes that approximately 1,322,000 acres of the Desert National Wildlife Range be designated wilderness within the National Wilderness Preservation System. It is also recommended that 76,000 acres of adjoining public domain lands be designated as wilderness when they become a part of the Desert National Wildlife Range. Designation of wilderness will limit visitor and resource and commercial growth. Comments made by: DOC, DOD, AEC, DOI, and state agencies. (ELR Order No. 51330.)

## NATIONAL PARK SERVICE

## Final

**Proposed Master Plan.** Hawaii Volcanoes National Park, Hawaii. September 4: The statement refers to the proposed master plan for the Hawaii Volcanoes National Park. The plan is intended to conserve and protect the unique resources of the Park for expanded public use and continued volcanic research by the U.S. Geological Survey. Direct impact of the plan will result primarily from the construction of new roads and campgrounds (180 pages). Comments made by: AHP, USDA, COE, DOI, DOT, EPA, and State agencies. (ELR Order No. 51337.)

## DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, 400 7th Street SW., Washington, D.C. 20590, 202-420-4357.

## FEDERAL AVIATION ADMINISTRATION

## Final

**New Orleans Lakefront Airport.** La., September 2: Proposed is the development of a Master Plan for the existing New Orleans Lakefront Airport. The Master Plan will determine the extent, type and nature of needed development based on forecast short, intermediate, and long range aeronautical needs. Installation of approach lights and an ILS Glide Slope Indicator for the present north-south runway is planned prior to implementation of Phase I of the Master Plan. Comments made by: COE, DOC, DOI, EPA, DOT, and State agencies. (ELR Order No. 51311.)

## FEDERAL HIGHWAY ADMINISTRATION

## Draft

**Florida Street Extension.** Mobile County, Ala., September 2: Proposed is the construction of an extension of Florida Street from Government Boulevard to Springhill Avenue in Mobile, Alabama. The project length ranges from 2.2 to 2.4 miles, depending upon the alternative selected. The most significant negative impact of the project is the potential displacement of approximately 19 families, 13 businesses, and 2 non-profit organizations. Temporary construction disruption would result. (ELR Order No. 51320.)

**SR 21 (Blanding Blvd.).** Clay County, Fla., September 2: The statement concerns the

upgrading of Blanding Boulevard (State Road 21) to a divided, four-lane facility from the intersection with SR 215 to Robin Road. The improvement will provide for increased traffic generated by numerous residential communities now planned from "Jacksonville South" to Orange Park. Adverse impacts include the displacement of families and businesses and noise level impacts on Middleburg Elementary School. (ELR Order No. 51322.)

**John C. Calhoun Expressway Extension.** Richmond County, Ga., September 2: The proposed highway extension begins at the present terminus of the John C. Calhoun Expressway at 15th Street and extends to either Greene or Telfair Streets, a distance of approximately 0.8 mile. Between 25 and 50 persons and 14 and 16 businesses will be displaced. There will be a loss of hardwoods in the corridor, and commercialization will increase. (ELR Order No. 51310.)

**Nebraska Highway 133 (90th St.).** Omaha, Douglas County, Nebr., September 3: The project consists of the improvement of Nebraska Highway 133 (90th Street) from Burt Street to Maple, a distance of 3.2 miles, and a second segment from Maple to the junction of N-133 and N-38, a distance of 1.9 miles. The project will displace three residences, and will require the acquisition of 6 acres of land. (ELR Order No. 51331.)

**U.S. 95 West Leg.** Las Vegas, Clark County, Nev., September 2: The statement concerns the construction of the west leg of U.S. 95 expressway from Rancho Drive West to Rainbow Boulevard and North to the Tonopah Highway in the City of Las Vegas and unincorporated areas of Clark County. Total length of the project is 9.55 miles. It will initially be constructed as a 4-lane expressway with provision for 6 lanes. Approximately 25 families will be displaced. The project may also encourage urban growth in areas lacking suitable infrastructure. (ELR Order No. 51318.)

## Final

**East Belt Freeway.** Little Rock, Pulaski County, Ark., September 2: The statement concerns the construction of a multi-lane interstate-type facility connecting I-40 and I-30, a distance of 10 miles, through eastern Little Rock and eastern North Little Rock. An undetermined number of businesses and families will be displaced and the project will also alter 600 to 800 acres of wetlands, residential, agricultural, commercial and industrial lands to highway use. Comments made by: AHP, USCG, COE, DOI, HEW, USDA, DOT, and State agencies. (ELR Order No. 51315.)

**Rte 87, Guadalupe Parkway.** San Jose, Santa Clara County, Calif., September 2: The proposed project is the improvement of a 4-lane freeway on Route 87 for a distance of 1.5 miles in the city of San Jose. The facility will require 50.3 acres and displace 237 people and 30 businesses. A crossing over the Guadalupe River will increase erosion and siltation. Loss of wildlife and substantial increases in air and noise pollution levels will occur. Comments made by: EPA, DOT, DOI, COE, State and local agencies, and concerned citizens. (ELR Order No. 51324.)

**I-84, Hudson River Crossing.** Orange and Dutchess Counties, N.Y., September 2: The project involves the expansion of an existing crossing of the Hudson River in Orange and Dutchess Counties. The total length of the project is 2.0 miles. Adverse impacts are increased air and noise pollution, loss of some river bottom, displacement of 1 family, and short-term degradation of water quality. Comments made by: USDA, HEW, DOI, USCG, DOT, DOC, FPC, EPA, and AHP. (ELR Order No. 51323.)

**Interstate 5, Divide-Anlauf Section.** Douglas and Lane Counties, Oreg., September 2: The project is to upgrade a 7 mile section of

Interstate 5; the interchanges at Anlauf and Divide will be reconstructed, and a new system of frontage roads will be constructed. Adverse impact will include the loss of some wildlife habitat as right-of-way, and the displacement of a number of families. Comments made by: USCG, DOI, EPA, USDA, and State agencies. (ELR Order No. 51317.)

**I-664, Hampton Roads.** several counties in Virginia, September 3: The statement considers alternate corridors for the construction of proposed I-665, a bridge tunnel water crossing at Hampton Roads. The project is proposed to connect the cities of Hampton and Newport News on the north of Hampton Roads Harbor with the Cities of Portsmouth, Norfolk and Nansemond on the southern side of Hampton Roads. The project, a limited access divided highway, will be 13.9 miles long, 6 lanes wide north and south of Hampton Roads, and 4 lanes wide across Hampton Roads. Encroachment upon 4(f) land displacement of families and businesses, and increased air, noise, and water pollution are adverse effects of the action. Comments made by: DOC, EPA, USDA, USCG, HUD, HEW, and State agencies. (ELR Order No. 51330.)

## ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

[ERDA-PR Temporary Regulation No. 12]

## INTERIM SOURCE EVALUATION AND SELECTION HANDBOOK

## Temporary Regulation

AUGUST 28, 1975.

1. **Purpose:** A draft handbook on evaluation and selection of sources is to be used in selected situations so that the final handbook, when issued, will have the benefit of lessons learned from that use. The following instructions describes how this interim draft is to be used and how it relates to present coverage of evaluation boards in the ERDA-PR.

2. **Effective date:** This regulation becomes effective September 12, 1975.

3. **Expiration date:** This regulation will remain in effect until cancelled or until its provisions are incorporated into a permanent ERDA-PR. The Interim Handbook will be revised in October based on experience to that time, and reissued as a numbered publication. Appropriate changes in the ERDA-PR also will be published concurrently.

4. **Explanation of change:**  
a. The procedures in the Interim ERDA Handbook on Source Evaluation and Selection (April 23, 1975), as amended, will be followed in making selections in competitively negotiated procurements expected to exceed \$5,000,000. The policy on use is stated in paragraph 803 of the Handbook.

b. Use of procedures of ERDA-PR 9-56 for procurements over \$5,000,000 is suspended as of this date.

5. **Authority:** Sec. 105 of the Energy Reorganization Act of 1974 (P.L. 93-438).

[SEAL] JOSEPH L. SMITH,  
Director of Procurement.

## **Draft Environmental Statement; Extension of Comment Period**

The availability of the Draft Environmental Statement, "Light Water Breeder Reactor Program" (ERDA-1541) was announced in the FEDERAL REGISTER August 15, 1975. The period for receipt of comments by the Energy Research and Development Administration (ERDA) was through October 15, 1975. Since this announcement, interested persons have requested ERDA to extend the closing of the comment period to allow additional time for consideration of the document and the formulation of written comments. In an effort to be responsive to these requests, the comment period is hereby extended to November 14, 1975.

Dated at Germantown, Maryland, this 10th day of September, 1975.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,  
Assistant Administrator for  
Environment and Safety.

# **ENVIRONMENTAL PROTECTION AGENCY**

[FRL 430-2; OPP-32012]

## **CENTER FOR DISEASE CONTROL**

### **Receipt of Application To Register a Pesticide Product Containing Strychnine for Control of Rabid Mammalian Carnivores**

On April 15, 1975, the Environmental Protection Agency (EPA) received an application to register a pesticide product containing strychnine intended for use in a rabies vector control program. Application was made pursuant to the provisions of the Federal Insecticide, Fungi-

cide, and Rodenticide Act (FIFRA) by the Center for Disease Control (CDC), Public Health Service, Department of Health, Education, and Welfare, 1600 Clifton Road, Atlanta GA 30333. The name of the product is STRYCHNINE POWDER (EPA File Symbol 36765-E).

**Background.**—In March of 1972, registrations of strychnine, sodium cyanide, and 1080 (Sodium fluoracetate) for predator control were cancelled and suspended by EPA Administrative Order (37 FR 5718). This Order immediately followed Executive Order 11643 of February 1972, banning the use of predacides on Federal lands. The President's Order specifically provided for an exception to the ban, if needed, in an emergency to protect human health. However, the Administrator's Order focused on predacides *per se* and did not provide for an exception to the ban for human health emergencies. At the time the EPA Order was issued, no apparent circumstances existed to counterbalance the possibility of a human health hazard. The administrator concluded in the preamble to the Order that the factors supporting the decision to cancel and suspend these predacides and thereby reduce their availability may have been different if the public health were affected.

The only techniques currently available to protect human health from rabid mammalian carnivores are methods such as shooting, trapping, and physical exclusion.

**Application to Register.**—The applicant states that this product is intended for use only by health agencies approved by the CDC for control of mammalian carnivores (skunks, foxes, or raccoons) which constitute a human health hazard as potential rabies vectors and that users of this product must be familiar with CDC policy on the use of toxicants for rabies control and must file certain information with CDC within 30 days of the field program's completion.

The directions for use call for a maximum of 500 strychnine-injected eggs to be placed in designated skunk habitats within a 3-mile radius where rabid skunks are diagnosed. A maximum of two strychnine eggs per setting would be placed in the following skunk habitats: skunk dens, holes, garbage dumps, road culverts, rock piles, and under nonoccupied buildings. Bait cannot be placed farther than 3 miles from human habitation. Eggs remaining after termination of the 30-day treatment period would be collected and destroyed. Strychnine eggs would be placed only on those lands where premise entry agreements are signed by the landowner, lessee or administrator, and warning signs would be posted at entries to all such premises and other visible positions near locations where treated eggs have been placed. Baits would be checked at least once a day to prevent secondary poisoning. All affected target and non-target animals would be removed daily, and after analysis, buried in a sanitary landfill or 18 inches below the ground away from water supplies.

Unused bait would be disposed of in a similar manner. Urban and suburban control programs would not be initiated unless exposure of humans and domestic animals to rabid animals was imminent. All local citizenry would be notified of the program to prevent poisoning domestic animals and humans. Only dyed eggs would be placed after 10:00 p.m. and removed prior to daybreak the next morning. Such programs would be terminated when imminent danger to humans and domestic animals was over.

**Control Programs.**—Control programs will be instituted only when the risk of human exposure to rabies has become abnormally high as a result of overpopulation of reservoir species or increased human (or domestic animal) reservoir contact. Total elimination of the rabies threat is seldom a practical goal; rather, reduction to "normal" levels of risk is more often a realistic goal. Programs will not be approved simply to control depredating or nuisance animals.

Although rabies is not usually contracted by man through direct contact with rabid wildlife animal species, the possibility does exist in areas where there is frequent contact between humans and wildlife. The aim of a control program would be to prevent the spread of rabies to domestic animals and thereby reduce the likelihood of human exposure. This can only be achieved by the selective reduction of the species involved.

**Request to Use Cancelled and/or Suspended Pesticide Products.**—The EPA has been petitioned by several State Health Departments to allow the use of previously cancelled and/or suspended pesticide products to control disease vectors. In fact, CDC made such a request in connection with this proposed rabies control program. In certain cases, such use has been authorized under the exemption provisions of Section 18 of the FIFRA (86 Stat. 995); other cases have been rejected because they did not qualify under these provisions. However, Section 18 exemption provisions were not designed for the purpose of solving recurring problems, such as periodic outbreaks of rabid bats or skunks, encephalitis-carrying mosquitoes, etc. Continued use of unregistered pesticides for vector control would be an abuse of the provisions of Section 18. At this time, there are no products registered for rabies vector control.

The Department of Health, Education, and Welfare is responsible for disease control. In some circumstances, pesticides are used, and the responsibilities of the EPA and HEW then overlap. The use of pesticides to protect public health needs is vested with the Center for Disease Control. To carry out this function and at the same time carry out the provisions of FIFRA, CDC proposes to control the dispensing of strychnine. This arrangement would permit the U.S. Public Health Service to act during emergency outbreaks of a public health nature and allow the EPA to restrict the

labeling and use of strychnine in such a manner as to protect human health and the environment.

**Petition to Reconsider the Administrator's Order of March 1972.**—Pursuant to the provisions of Subpart D, Part 164, 40 CFR, this application constitutes a petition for reconsideration of the March 1972 Order with regard to the cancellation and suspension of registrations of strychnine products. Consequently, it will be reviewed by the Administrator and further action will be taken in accordance with those provisions.

Briefly, the procedures require that the Administrator determine, on the basis of the application and supporting data, whether there is substantial new evidence which may materially affect the prior Order and whether such evidence could not have been presented during the original proceedings. If it is determined that there is no such evidence, the application will be denied. If it is determined that there is such evidence, then a formal hearing is held. A determination whether such evidence materially affects the prior Order is then made on the basis of the record and the recommendations of the administrative law judge presiding over the hearing, taking into account the human and environmental risks found by the Administrator in his prior order and the cumulative impact of past, present, and anticipated use in the future. A decision by the Administrator to either deny the application or reconsider the prior Order will be published in the FEDERAL REGISTER. If the Administrator decides that reconsideration is warranted, an announcement that a formal hearing is to be held will be made.

**Request for Comments.**—This notice is issued pursuant to section 3(c)(4) of FIFRA, as amended (86 Stat. 980), and does not indicate a decision by this Agency on the application. Interested persons are invited to submit written comments on this notice to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Room 401, East Tower, 401 M Street SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in inspecting them. The comments must be received on or before October 14, 1975, and should bear a notation indicating the subject (OPP-32012). All written comments filed pursuant to this notice will be available for public inspection in the Federal Register Section from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: September 9, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

## **CHEVRON CHEMICAL CO.**

### **Issuance of Experimental Use Permit**

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide

Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), an experimental use permit has been issued to Chevron Chemical Company, Richmond, California 94804. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

This experimental use permit (No. 239-EUP-75) allows the use of 560 pounds of paraquat dichloride on dry beans as a harvest aid. A total of 960 acres is involved; the program is authorized only in the States of Colorado, Kansas, Michigan, Minnesota, Nebraska, New York, North Dakota, and Wisconsin. The experimental use permit is effective from August 28, 1975, to August 28, 1976. A temporary tolerance for residues of the active ingredient in or on dry beans has been established.

Interested parties wishing to review the experimental use permit are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: September 5, 1975.

JOHN B. RITCH, Jr.,  
Director,  
Registration Division.

## **CHEVRON CHEMICAL CO.**

### **Issuance of Experimental Use Permit**

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), an experimental use permit has been issued to Chevron Chemical Company, Richmond, California 94804. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

This experimental use permit (No. 239-EUP-66) allows the use of 18 pounds of diquat on potatoes. A total of 48 acres is involved; the program is authorized only in the States of Iowa, Maine, Michigan, New Jersey, New York, and North Dakota. The experimental use permit is effective from September 2, 1975, to September 2, 1976. A temporary tolerance has been established for residues of the active ingredient in or on potatoes.

Interested parties wishing to review the experimental use permit are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested

## **FISONS CORP.**

### **Issuance of Experimental Use Permit**

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), an experimental use permit has been issued to Fisons Corporation, Bedford, Massachusetts 01730. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

This experimental use permit (No. 10065-EUP-5) allows the use of 4,500 pounds of 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuran-1 on grasses used for seed production only. None of the treated grass will be used for forage or feed. A total of 3,000 acres is involved; the program is authorized only in the States of Oregon and Washington. The experimental use permit is effective from August 22, 1975, to August 22, 1976.

Interested parties wishing to review the experimental use permit are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755-4851 before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: September 5, 1975.

## **MONTANA DEPARTMENT OF LIVESTOCK**

### **Receipt of Application To Register a Pesticide Product Containing Strychnine for Control of Rabid Mammalian Carnivores**

The Environmental Protection Agency (EPA) has received an application to register a pesticide product containing strychnine intended for use in a rabies vector control program. Application was made pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) by the Montana Department of Livestock, Capitol Complex, Helena MT 59601. The name of

the product is STRYCHNINE ALKALOID — 100% (EPA File Symbol

the product is STRYCHNINE ALKALOID — 100% (EPA File Symbol 35975-R).

**Background.**—In March of 1972, registrations of strychnine, sodium cyanide, and 1080 (Sodium fluoracetate) for predator control were cancelled and suspended by EPA Administrative Order (37 FR 5718). This Order immediately followed Executive Order 11643 of February 1972, banning the use of predacides on Federal lands. The President's Order specifically provided for an exception to the ban, if needed, in an emergency to protect human health. However, the Administrator's Order focused on predacides *per se* and did not provide for an exception to the ban for human health emergencies. At the time the EPA Order was issued, no apparent circumstances existed to counterbalance the possibility of a human health hazard. The Administrator concluded in the preamble to the Order that the factors supporting the decision to cancel and suspend these predacides and thereby reduce their availability may have been different if the public health were affected.

The only techniques currently available to protect human health from rabid mammalian carnivores are methods such as shooting, trapping, and physical exclusion.

**Application to Register.**—The applicant states that this product is intended for the following uses in Montana:

1. For control of skunk populations within a three-mile radius which encompasses areas of human or domestic animal habitation where rabies has been diagnosed in skunks.
2. For surveillance of skunk populations outside the three-mile radius in order to determine the perimeter of rabies within any county and/or adjacent counties.
3. For surveillance of skunk populations to monitor the migration of rabies as a known disease in Montana and to support encephalitis studies in skunks from which rabies is clinically indistinguishable.

The directions for use call for 1) a maximum of 500 strychnine treated paraffin lard baits to be placed within a three-mile radius per positive rabies cases where skunks are determined as the vector species, or per county for rabies surveillance purposes, or 2) a maximum of 500 strychnine treated eggs to be placed within a three-mile radius per positive rabies case where skunks are determined as the vector species, or per county for rabies surveillance purposes. A maximum of two strychnine lard baits or two strychnine treated eggs per setting may be placed in the following skunk habitats: skunk dens, holes, garbage dumps, road culverts, junk piles, and under nonoccupied buildings. At the end of a 30-day treatment period, treated bait and/or eggs would be collected and destroyed. Strychnine treated lard bait and/or strychnine treated eggs would be placed only on those lands where premise entry agreements are signed by the landowner, lessee, or administrator, and warning signs would be posted at entries to all premises and other visible positions near locations where treated bait or eggs have been placed.

All retrieved or excess strychnine treated lard bait and strychnine treated eggs would be disposed of in an approved sanitary landfill. Department of Livestock personnel would observe and supervise the destruction of treated bait/eggs. Containers to be destroyed would be handled in a similar manner. Animals destroyed in the control program would be buried to prevent possible secondary nontarget species poisonings.

**Request to Use Cancelled and/or Suspended Pesticides.**—The EPA has been petitioned by several states/state health departments to allow the use of previously cancelled and/or suspended pesticides to control disease vectors. In certain cases, such use has been authorized under the exemption provisions of Section 18 of the FIFRA (86 Stat. 995); other cases have been denied because they did not qualify under these provisions. In fact, the Montana Department of Livestock was granted a specific exemption to use strychnine alkaloid for emergency rabid skunk control as provided by Section 18 of FIFRA. (See the FEDERAL REGISTER concerning the granting of this exemption and subsequent amendments: 39 FR 13912, 39 FR 17466, and 39 FR 24951.) However, Section 18 exemption provisions were not designed for the purpose of solving recurring problems, such as periodic outbreaks of rabid bats or skunks, encephalitis-carrying mosquitoes, etc. Continued use of unregistered pesticides for vector control would be an abuse of the provisions of Section 18. At this time, there are no products registered for rabies vector control.

**Petition to Reconsider the Administrator's Order of March 1972.**—Pursuant to the provisions of Subpart D, Part 164, 40 CFR (40 FR 12261), this application constitutes a petition for reconsideration of the March 1972 Order with regard to the cancellation and suspension of registrations of strychnine products. Consequently, it will be reviewed by the Administrator and further action will be taken in accordance with those provisions.

Briefly, the procedures require that the Administrator determine, on the basis of the application and supporting data, whether there is substantial new evidence which may materially affect the prior Order and whether such evidence could not have been presented during the original proceedings. If it is determined that there is no such evidence, the application will be denied. If it is determined that there is such evidence, then a formal hearing is held. A determination whether such evidence materially affects the prior Order is then made on the basis of the record and the recommendations of the administrative law judge presiding over the hearing, taking into account the human and environmental risks found by the Administrator in his prior order and the cumulative impact of past, present, and anticipated use in the future. A decision by the Administrator to either deny the application or reconsider the prior Order will be published in the FEDERAL REGISTER. If the Administrator decides that re-

consideration is warranted, an announcement that a formal hearing is to be held will be made.

**Request for Comments.**—This notice is issued pursuant to section 3(c) (4) of FIFRA, as amended (86 Stat. 980), and does not indicate a decision by this Agency on the application. Interested persons are invited to submit written comments on this notice to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Room 401, East Tower, 401 M Street SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in inspecting them. The comments must be received on or before October 14, 1975, and should bear a notation indicating the subject (OPP-32013). All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated September 9, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

#### RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of  
Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of Section 3(c) (1) (d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by each applicant will be available for examination at the Environmental Protection Agency, Room EB-31, East Tower, 401 M Street SW., Washington, D.C. 20460.

On or before November 11, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under Section 3(c) (1) (D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street SW., Washington, D.C. 20460.

Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after November 11, 1975.

Dated: September 4, 1975.

JOHN B. RITCH, Jr.,  
Director,  
Registration Division.

[FRL 430-4; OPP-180038B]

#### WYOMING DEPARTMENT OF AGRICULTURE

Issuance of Specific Exemption and Extension To Control Rabid Skunks in Campbell and Crook Counties

Pursuant to the provisions of sections 6 and 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), notice is hereby given that the Environmental Protection Agency (EPA) has granted a specific exemption to the Wyoming Department of Agriculture (hereafter referred to as the "Applicant") to use strychnine alkaloid or strychnine sulfate baits in a rabid skunk control program in Campbell and Crook Counties, Wyoming. The control program is designed to reduce the probability of exposure of man and domestic animals to rabies. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, issued December 3, 1973 (38 FR 33303), which prescribes requirements for exemption of Federal and State agencies for the use of pesticides under emergency conditions. The section 18 regulations provide that the Administrator may grant an emer-

agency exemption to a Federal or State agency under the Act.

midwestern tall grass prairie areas, and in local areas of the far West.

(8) Experienced personnel from State agencies under the Applicant's supervision.

mation, interested parties are referred to the Office of the Director, Registration Division (WH-567), Office of Pesticide

March 17, 1971, requested Gross to furnish relevant information with respect to its practices in this regard. The Bureau

memorandum from Thomas B. Jones to H. F. Gross advised Gross both that WITM-TV had been cutting out of net-

gency exemption to a Federal or State agency when the following conditions exist:

(a) A pest outbreak has or is about to occur and no pesticide registered for the particular use, or alternative method of control, is available to eradicate or control the pest; (b) significant economic or health problems will occur without the use of the pesticide; and (c) the time available from discovery or prediction of the pest outbreak is insufficient for a pesticide to be registered for the particular use. 40 CFR 166.1.

The exemption is also subject to the provisions of 40 CFR Part 164, specifically, the new Subpart D, published in the Federal Register on March 18, 1975 (40 FR 12261). In cases such as the one presented by this Applicant, if the request is for the use of a pesticide which has been finally cancelled or suspended, then the application constitutes a petition for reconsideration of such cancellation or suspension order. Therefore, the exemption cannot be granted without the requirement of a prior public hearing, unless certain conditions are found to exist.

Subpart D of the section 6 regulations provides that in emergency circumstances the Administrator may rule on the application without convening a formal hearing and without making a finding as to the question of substantial new evidence when he determines:

- (1) That the application presents a situation involving need to use the pesticide to prevent an unacceptable risk: (i) to human health, or (ii) to fish or wildlife populations when such use would not pose a human health hazard; and
- (2) That there is no other feasible solution to such risk; and
- (3) That the time available to avert the risk to human health or fish and wildlife is insufficient to permit convening a hearing as required by section 164.131; and
- (4) That the public interest requires the granting of the requested use as soon as possible. 40 CFR 164.133.

On February 14, 1974, the Applicant requested permission to use strychnine alkaloid in a program of skunk control in areas where rabid animals had been found. A specific exemption was granted March 14, 1974, for a program permitting the use of strychnine alkaloid-treated eggs and paraffin lard baits within a three-mile radius of points at which rabid animals had been taken in Campbell and Crook Counties. Subsequently, the exemption was extended to November 30, 1974, following the identification of additional rabid skunks in both counties. Numerous complaints had been lodged regarding the appearance of skunks in daylight hours (unusual for this species) in and around towns, ranches, and farmstead yards. Skunks and foxes have been responsible for 14 human rabies deaths in the United States since 1951; these two species have been the most frequently infested every year since 1960. In a report entitled "Control of Rabies", the National Academy of Sciences published a report which indicated that rabies is endemic in skunks throughout the Mississippi River drainage, the

## NOTICES

midwestern tall grass prairie areas, and in local areas of the far West.

In 1975, the Applicant requested another specific exemption to use strychnine alkaloid for rabid skunk control; the basis of the threat to public health was the discovery of five (5) rabid skunks and one (1) rabid cow in Campbell and Crook Counties between January 6 and February 20, 1975. As of April 2, 1975, the Applicant had reported the discovery of three (3) additional cases of rabid skunks in the proposed treatment area.

In light of the above and pursuant to the controlling regulations, the Administrator determined that (a) a pest outbreak of rabid skunks had occurred; (b) there was no pesticide presently registered for use in suppressing populations of rabid skunks in Wyoming; (c) the application presented a situation involving a need to use the pesticide as requested to prevent an unacceptable risk to human health; (d) there was no other feasible solution to such human health risk; (e) the time available to avert the risk to human health was not sufficient to convene a hearing; and (f) the public interest required the granting of the requested use as soon as possible. Accordingly, the Applicant was granted a specific exemption to use strychnine baits in defined areas of Campbell and Crook Counties. The specific exemption was subject to the following conditions:

- (1) The area to be treated will be limited to Campbell and Crook Counties between 44 degrees, 0 minutes and 44 degrees, 45 minutes north latitude and between 104 degrees, 15 minutes and 105 degrees, 50 minutes west longitude;
- (2) The poison baits will be chicken eggs, each containing one-half grain of strychnine alkaloid or strychnine sulfate. Each egg will contain green food coloring and will be marked "Poison" in red;
- (3) The amount of strychnine alkaloid or strychnine sulfate used in the program shall not exceed six (6) ounces;
- (4) Treatment will begin as soon as the strychnine active ingredient can be obtained and will be completed in both counties within thirty (30) days and no later than August 15, 1975;
- (5) The maximum number of strychnine baits per three (3) mile radius of confirmed rabid skunks will be 500. Each bait station will be posted with warning signs;
- (6) Baits will be placed under buildings, in road culverts, in skunk dens, and in other relatively inaccessible locations to reduce exposure of non-target species. Baits will not be placed within 100 feet of wells, ponds, or streams;
- (7) In rural areas, baits will be located at least 500 yards from areas of human habitation. Warning signs will be posted at all access roads to treated properties. In urban areas near human dwellings, every resident within the treatment area will be notified verbally and in writing of the time period in which bait will be exposed in the vicinity to assure the protection of small children and pets. In urban areas, egg baits will be set out each evening and retrieved each morning;

(8) Experienced personnel from State agencies under the Applicant's supervision will formulate the baits, obtain permission of landowners to bait their properties, advise landowners and residents of necessary precautions, and set out the baits;

(9) Upon completion of the exposure period at a specific location, all unconsumed egg baits will be retrieved and placed, individually broken, in a trench, mixed with soil, and covered with at least eighteen inches of soil;

(10) Data recorded for each bait station will include the numbers of eggs placed, numbers of eggs consumed, numbers of eggs retrieved and buried, and the location of the disposal site;

(11) Monitoring data for the program shall include: (a) number and location of live skunks confirmed rabid, (b) number and location of dead skunks confirmed rabid, (c) total of skunks killed, and (d) number and location of non-target species killed by poisoning; and

(12) Requests for temporal and spatial extensions of the strychnine bait program must be approved by the Registration Division, EPA, Washington, D.C. 20460.

On July 18, 1975, the Applicant contacted the Registration Division and requested an extension in the expiration date from August 15, to October 15, 1975, because its available personnel were engaged in other programs and would not be able to initiate the poisoned bait program authorized until August 1, 1975. The Applicant also requested permission to treat all of Campbell and Crook Counties, because five confirmed cases of rabid animals were discovered outside the area designated for treatment under the specific exemption granted. Finally, the Applicant requested that the 500-yard restriction for placing treated eggs around farmsteads be lifted, because a large percentage of the rabid skunks occur in, around, and under these farmstead buildings.

After reviewing all available information and consultation with the Rabies Control Unit, Center for Disease Control, Atlanta, Georgia, EPA has decided to grant the extension of the specific exemption; the exemption will expire October 15, 1975. The treatment area is limited to Campbell and Crook Counties, with treatment of both Counties being completed within a 45-day period. The restriction against placing strychnine baits within 500 yards of areas of human habitation has been rescinded, to the extent that treatment of unoccupied buildings is allowed; specifically, strychnine baits are excluded from placement in, under, or around occupied farmstead buildings but may be placed in, under, or around unoccupied buildings, such as abandoned bunkhouses, corn cribs, silos, outhouses, machinery sheds, barns, etc. All other restrictions noted in the specific exemption previously granted remain in force.

This notice contains a summary of certain information set forth in the applications for the specific exemption and the extension. For more detailed information, interested parties are referred to the Office of the Director, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW., Room E-347, Washington, D.C. 20460.

Dated: September 5, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

FEDERAL COMMUNICATIONS  
COMMISSION

[Docket No. 20014; File No. BR-830, etc.;  
FCC 75R-331]

## GROSS TELECASTING, INC.

Memorandum Opinion and Order Enlarging  
Issues

In re Applications of Gross Telecasting, Inc., For Renewal of Licenses for Stations WJIM, WJIM-FM, WJIM-TV, Lansing, Michigan; Docket No. 20014, File Nos. BR-830, BRH-1052, BRSCA-207, BRCT-68.

1. The applications of Gross Telecasting, Inc. (Gross) for renewal of broadcast licenses of WJIM, WJIM-FM, and WJIM-TV, Lansing, Michigan, were designated for hearing by Memorandum Opinion and Order FCC 74-374, 46 FCC 2d 543, released April 22, 1974. Subsequently, the Review Board specified, *inter alia*, a network "clipping" issue against Gross.<sup>1</sup> The Board presently has under consideration a petition to enlarge issues,<sup>2</sup> filed May 13, 1975, by the Broadcast Bureau (Bureau) which seeks addition of the following issues against Gross:

(a) To determine whether, in connection with a letter submitted to the Commission on March 25, 1971, Harold F. Gross and/or Gross Telecasting, Inc. made misrepresentations, lacked candor, or failed to ascertain the true facts with respect to the "covering" of network programming by local material on Station WJIM-TV; and

(b) To determine, in light of the evidence adduced pursuant to issue (a) above, whether Harold F. Gross and/or Gross Telecasting, Inc. possess(es) the requisite character qualifications to be or to remain a licensee of this Commission.

2. As relevant background to its request, the Bureau relates that a March 2, 1971, letter to the Commission from a WJIM-TV viewer stated that the station frequently ran local commercials in lieu of network programming and, as a result, the station joined or rejoined the "CBS Evening News" late, and chronically joined or rejoined "The Merv Griffin Show" late. In light of the complaint, the Bureau continues, the Commission, on

<sup>1</sup> See 48 FCC 2d 1186, 31 RR 2d 796 (1974), 39 FR 37093.

<sup>2</sup> Related pleadings before the Board are: (a) opposition, filed June 9, 1975, by Gross; (b) comments, filed June 9, 1975, by the Lansing Branch of the American Civil Liberties Union of Michigan (ACLU); and (c) reply, filed June 19, 1975, by the Bureau.

## NOTICES

March 17, 1971, requested Gross to furnish relevant information with respect to its practices in this regard.<sup>3</sup> The Bureau notes that in a response dated March 25, 1971, H. F. Gross, then president of the licensee, stated, in part, that "[i]t is not now, nor has it been in the past, our policy or practice to insert locally originated commercial material within the body of a network telecast," that WJIM-TV has inserted local advertisements only in authorized designated times and positions, that WJIM-TV broadcasts a full 30 minutes of local news if network programming runs beyond 11:00 p.m. and, in such cases, joins "The Merv Griffin Show" in progress, and that WJIM-TV's newscasters present a lead-in to "The CBS Evening News" which is designed for a precise network join at exactly 6:30 p.m.

3. Various internal memoranda of the licensee, either written by or to H. F. Gross prior to his response to the Commission's March 17, 1971, inquiry, the Bureau asserts, support its allegation that H. F. Gross either knew, or should have known, that the representations made to the Commission in his March 25, 1971, letter were inaccurate or misleading.<sup>4</sup> Thus, for example, the Bureau explains that a September 15, 1970, H. F. Gross memorandum states, *inter alia*, that WJIM-TV's local commercials should not be affected "due to trying to rejoin the Merv Griffin show on their cue" and that "if they cut us short or the local commercial cut-in is longer than their break, then we should join Griffin late . . . and not lose a commercial announcement." Memoranda dated August 18, 1969, and December 28, 1970, from H. F. Gross to station personnel urge, in part, either cutting out of the preceding show early or eliminating the network credits or promotions so that the local advertisements can be run and the network program joined or rejoined on time. Moreover, a November 12, 1969,

<sup>3</sup> Specifically, the Commission sent Gross the following inquiry: Did or does Station WJIM-TV insert advertising in network programs at other than the scheduled times in such a manner as to affect the program content of such broadcasts? If so, state when and under what circumstances, and whether it is the policy of the licensee to insert commercial or other material in programs, join them late or leave them early with such effect.

<sup>4</sup> In addition, the Bureau relies on the deposition of one of the memoranda authors, Thomas B. Jones, then operations director of WJIM-TV.

<sup>5</sup> The information upon which the Bureau relies allegedly came to light during discovery proceedings undertaken in connection with the "clipping" issue. More specifically, the Bureau states that three of the letters pertinent to its request were not made available by Gross until the week of April 19, 1975. As a result, the Bureau maintains that good cause exists for the late filing of its petition under the reasoning of *Chicagoland TV Co.*, 5 FCC 2d 154, 8 RR 2d 758 (1966), and that, in any event, the allegations raised by it and the likelihood of their proof at hearing requires addition of the requested issues under the doctrine of *The Edgefield-Saluda Radio Company (WJES)*, 5 FCC 2d 148, 8 RR 2d 611 (1966).

memorandum from Thomas B. Jones to H. F. Gross advised Gross both that WJIM-TV had been cutting out of network programs early, thereby "clipping or eliminating" network promotions and that the breaks scheduled by the station during "The Merv Griffin Show" had been longer than those provided by the network resulting in the station rejoining the program late.

4. In sum, the thrust of the Bureau's petition is that the memoranda disclose that H. F. Gross seemingly was aware, in the period 1969-1971, of frequent late joins or rejoins to network programming as a result of the running of local commercials and the practice of running a full 30 minutes of local news at 11:00 p.m., even when this resulted in joining a network program already in progress.<sup>5</sup> The Bureau submits that memoranda it has described, when compared with H. F. Gross' March 25, 1971, letter, raises a substantial question of whether the licensee intentionally made misrepresentations to the Commission in responding to the "clipping" inquiry. Moreover, the Bureau asserts that H. F. Gross had a duty to affirmatively ascertain the true facts surrounding the "clipping" issue in responding to the Commission, and the failure to exercise that duty also raises a question as to the licensee's basic qualifications, citing *WPRY Radio Broadcasters, Inc.*, 40 FCC 2d 1183, 27 RR 2d 1043 (1973); *Milton Broadcasting Co.*, 34 FCC 2d 1038, 24 RR 2d 369 (1972). The petition is supported by the ACLU.

5. Gross, in opposition, avers that the Bureau, which has been in possession of documents relating to the requested issues for four years, has taken the memoranda out of context and distorted positive management directives which are consistent with its March 1971 response to the Commission's inquiry, in order to derive a negative inference of irregularity. Further, Gross submits that the Bureau selected only a small number of the memoranda bearing on management supervision of WJIM-TV and has omitted other material regarding compliance with the Commission's policies on "clipping". Moreover, it is urged that the Bureau has relied heavily on allegations relating to 1969, a time far removed from the March 1971 date of the correspondence between the Commission and H. F. Gross. Finally, Gross submits that the requested issues are unnecessary since evidence relating to the March

<sup>6</sup> The Bureau attaches various other memoranda which allegedly reflect that Gross was not only aware of but also involved in specific instances of "covering".

<sup>7</sup> In this regard, Gross notes that: (1) three memoranda instruct personnel to join network news programs on time; (2) four documents urge adherence to a WJIM-TV policy of joining "The Merv Griffin Show" in progress only where necessary for carriage of a full 30 minutes of local news which started after 11:00 p.m. due to a long network movie or for extended local editorials; and (3) other memoranda deal with technical execution and scheduling practices to avoid commercial clutter.

may be explored, to be a licensee? Accordingly, the Board is a petition to enlarge issues, filed

Hunter-Arnette Broadcasting Co., Ocala, Florida, Docket No. 20512, File No.

principals, management-level or prospective management-level employees or

[Dockets Nos. 20305, 20308; Files Nos. BRCT-53, BPCT-4580; FCC 75R-329]

1971 correspondence may be explored under the designated "clipping" issue.

6. In reply, the Bureau argues that even though it has been in possession of the viewer letter and correspondence between H. F. Gross and the Commission for four years, the alleged misstatements were not apparent on their face, and that it was not until the letter from Gross was viewed in the context of the recently discovered memoranda that the misstatements became apparent. With regard to Gross' contention that the majority of the memoranda were consistent with H. F. Gross' response to the Commission, the Bureau notes that the documents referred to by Gross do not include those damaging to the licensee. Moreover, the Bureau asserts, what is important is whether the licensee's policies were fully and accurately represented to the Commission, not whether those policies are valid. The Bureau cites FCC v. WOKO, Inc., 329 U.S. 223 (1946) in support. Thus, the Bureau reasons that Gross' explanations of the memoranda it does discuss are inadequate.

7. The Review Board will add the requested issues in light of the fact that the memoranda submitted by the Bureau appear to directly contradict H. F. Gross' unequivocal statement in his March 25, 1971, response that "[i]t is not now, nor has it ever been in the past, our policy or practice" to insert locally originated material or advertisements in network programming except when authorized.<sup>4</sup> These memoranda, contrary to Gross' response, not only indicate that specific instances of "clipping" occurred prior to Gross' March 25, 1971, response to the Commission, but that Gross was aware of the practices and sought to affirmatively correct the station's derelictions in this regard. Although some of the memoranda show that H. F. Gross tried, at times, to correct practices resulting in early leaves and/or late joins, this effort to cure station practices, albeit commendable, could in no way serve to mitigate the significance of any affirmative misrepresentations made to the Commission. Rather, as correctly noted by the Bureau, the question of whether a licensee has given false statements in response to a Commission inquiry is of independent significance in determining whether or not a licensee possesses the requisite qualifications to be a licensee.<sup>5</sup> Accordingly, the requested issues will be added.<sup>6</sup>

8. Accordingly, it is ordered, That the petition to enlarge issues, filed May 13, 1975, by the Broadcast Bureau, is granted; and

9. It is further ordered, That the issues in this proceeding are enlarged to include the following issues:

(a) To determine whether, in connection with a letter submitted to the Commission on March 25, 1971, Harold F. Gross and/or Gross Telecasting, Inc. made misrepresentations, lacked candor, or failed to ascertain the true facts with respect to the "covering" of network programming by local material on Station WJIM-TV; and

(b) To determine, in light of the evidence adduced pursuant to issue (a) above, whether Gross Telecasting, Inc., possesses the requisite character qualifications to be or to remain a licensee of this Commission.

10. It is further ordered, That the burden of proceeding with the introduction of evidence under the foregoing issues shall be upon the Broadcast Bureau, and that the burden of proof under the foregoing issues shall be upon Gross Telecasting, Inc.

Adopted: August 29, 1975.

Released: September 5, 1975.

1. The above-captioned mutually exclusive applications seek authorizations to construct a new FM broadcast station at Ocala, Florida. Now before the Review

\* Thus, we must reject Gross' suggestion that evidence relating to the March 1971 response may be explored under the designated "clipping" issue; rather, the question of misrepresentation must be treated as a separate and potentially disqualifying issue.

<sup>5</sup> We also note that the allegations raise a question as to whether Gross failed in its duty as a licensee to accurately ascertain the facts requested by the Commission. See WPRY Radio Broadcasters, Inc., supra, and Milton Broadcasting Co., supra.

<sup>6</sup> On August 7, 1975, Greater Ocala Broadcasting Corporation filed comments supporting the Bureau's petition (40 FR 27717).

<sup>7</sup> Board member Kessler dissenting to placing the burden of proceeding on the Broadcast Bureau.

Board is a petition to enlarge issues, filed on July 30, 1975, by the Broadcast Bureau, requesting the addition of an air hazard issue against Hunter-Arnette Broadcasting Co. (Hunter-Arnette).

2. The Bureau's unopposed petition will be granted. The request is predicated on a letter from an FAA official to an officer of Hunter-Arnette which, according to petitioner, was transmitted to Bureau counsel on July 23, 1975. In the letter, the FAA official states that Hunter-Arnette's antenna proposal would require a change in the landing procedure at Ocala Municipal Airport which would "have a substantial adverse effect upon aeronautical operations," and recommends that another site be selected by the applicant. Absent some showing to the contrary, the Board is of the view that this letter raises a substantial question as to whether Hunter-Arnette's proposal would constitute a hazard to air navigation, and an appropriate issue will therefore be specified.

3. Accordingly, it is ordered, That the Broadcast Bureau's petition to enlarge issues, filed on July 30, 1975, is granted, and that the issues in this proceeding are enlarged by the addition of the following issue:

To determine whether there is a reasonable possibility that the tower height and location proposed by Hunter-Arnette Broadcasting Co. would constitute a hazard to air navigations.

4. It is further ordered, That the burden of proceeding with the introduction of evidence under the issue added herein SHALL BE on the Broadcast Bureau, and the burden of proof SHALL BE on Hunter-Arnett Broadcasting Co.

Adopted: September 3, 1975.

Released: September 5, 1975.

HAROLD JAMES SHARP, ET AL.

Memorandum Opinion and Order Enlarging Issues

In re application of Harold James Sharp, Ocala, Florida, Docket No. 20510, File No. BPH-8873.

Greater Ocala Broadcasting Corporation, Ocala, Florida, Docket No. 20511, File No. BPH-9015.

<sup>1</sup> On August 7, 1975, Greater Ocala Broadcasting Corporation filed comments supporting the Bureau's petition (40 FR 27717).

<sup>2</sup> Board member Kessler dissenting to placing the burden of proceeding on the Broadcast Bureau.

Hunter-Arnette Broadcasting Co., Ocala, Florida, Docket No. 20512, File No. BPH-9211; For Construction Permits

1. This proceeding involves the mutually exclusive applications of Harold James Sharp (Sharp), Greater Ocala Broadcasting Corporation (Greater Ocala) and Hunter-Arnette Broadcasting Co. for construction permits for an FM broadcast facility for Ocala, Florida. Presently before the Review Board is a petition to enlarge issues, filed July 15, 1975, by Greater Ocala seeking the addition of a *Suburban* issue against Sharp.<sup>1</sup>

2. In support of its request, Greater Ocala alleges that Sharp has failed to fulfill the requirements of the Commission's *Primer on Ascertainment of Community Problems by Broadcast Applicants*<sup>2</sup> in three significant respects. First petitioner points out, although Sharp's demographic showing describes tourism, agricultural, union and industry groups as significant groups in the community, Sharp's listing of community leaders surveyed fails to include a single community leader associated with any of these groups.<sup>3</sup> This failure, contends Greater Ocala, is clearly contrary to the requirements of Q. & A. 10 of the *Primer*, supra, and Commission precedent, citing for support numerous cases including *Voice of Dixie, Inc.*, 45 FCC 2d 1027, 29 RR 2d 1127 (1974); *Sandern of Iowa, Inc.*, 23 FCC 2d 453, 19 RR 2d 154 (1970); and *North American Broadcasting Co., Inc.*, 21 FCC 2d 631, 18 RR 2d 452 (1970).

Greater Ocala next asserts that respondent has failed to comply with Q. & A. 13 (b) of the *Primer* since, although Sharp states that his public survey was done "at random" and "was . . . balanced," the methodology used to assure the randomness of the general public survey is not described.<sup>4</sup> Finally, petitioner asserts that Sharp has failed to specifically identify which assessed need will be treated by his proposed programming, as required by the *Primer* Q. & A. 29. Based on these alleged deficiencies, Greater Ocala argues that a *Suburban* issue should be added against Sharp. The Broadcast Bureau in addition to urging that Greater Ocala has persuasively demonstrated the need for a general *Suburban* issue against Sharp, asserts that Sharp's application contains one further deficiency, namely, it fails to show whether the parties who conducted the general public survey were

<sup>1</sup> The following related pleadings are also before the Board: (a) opposition, filed July 24, 1975, by Sharp; (b) reply, filed July 24, 1975, by Greater Ocala; (c) comments, filed July 30, 1975, by the Broadcast Bureau; and (d) motion to oppose reply, filed August 7, 1975, by Sharp. The pleading filed August 7, 1975, by Sharp is an unauthorized pleading and, as such, will be disregarded. See 40 FR 27717.

<sup>2</sup> 27 FCC 2d 650, 21 RR 2d 1507 (1971).

<sup>3</sup> Petitioner concedes that Sharp apparently interviewed an individual associated with the Florida Thoroughbred Farm Manager's Club, but claims that no interviews with traditional agricultural groups are included.

<sup>4</sup> Citing, *inter alia*, *Bud's Broadcasting Co.*, 51 FCC 2d 238, 32 RR 2d 1290 (1975).

principals, management-level or prospective management-level employees or members of a professional research or survey service as required by the *Primer*, Q. & A. 11(b).<sup>5</sup>

3. In opposition, Sharp submits *inter alia* a description of the methodology used to assure the randomness of his general public survey,<sup>6</sup> identifies the interviewers, and identifies specific proposed programs related to assessed community needs. Further, Sharp asserts that the broad spectrum of community leaders interviewed results in an ascertainment that exceeds the requirements of the *Primer*. Finally, Sharp argues, the community leaders interviewed represent all facets of community influence even though many interviewees are not organizationally identifiable due to their overlapping concerns. Thus, avers Sharp, a *Suburban* issue is not warranted.

4. The Review Board will add the requested issue. While Sharp's opposition appears to respond in some measure to the alleged deficiencies relating to the method employed to ensure a random general public survey, the identity of the interviewers, and the specific programming proposed to meet ascertained needs, the Board may not take cognizance of this information since it has not been the subject of an amendment to Sharp's application. In any event, it is our view that an issue is required in light of apparent deficiencies in Sharp's community leader survey. The *Primer*, and related case law clearly require consultation with community leaders chosen on the basis of the composition of the community. As a result, inasmuch as Sharp's survey effort apparently fails to include leaders from groups which Sharp himself has classified as significant, independent justification for adding the requested issue exists.

5. Accordingly, it is ordered, that the petition to enlarge issues, filed July 15, 1975, by Greater Ocala Broadcasting Corporation, IS GRANTED, and that the issues in this proceeding ARE ENLARGED to include the following issue:

To determine the efforts made by Harold James Sharp to ascertain the community problems of the area to be served and the manner in which the applicant proposes to meet these problems.

6. It is further ordered, That the burden of proceeding with the introduction of evidence and the burden of proof under the issue added herein SHALL BE upon Harold James Sharp.

Adopted: September 3, 1975.

Released: September 5, 1975.

FEDERAL COMMUNICATIONS

POST-NEWSWEEK STATIONS, FLA., INC. (WJXT) AND ST. JOHNS TELEVISION CO.

Memorandum Opinion and Order Enlarging Issues

In re applications of Post-Newsweek Stations, Florida, Inc. (WJXT), Jacksonville, Florida, Docket No. 20305, File No. BRCT-53; For Renewal of Broadcast License.

St. Johns Television Company, Jacksonville, Florida, Docket No. 20308, File No. BPCT-4580; For Construction Permit for New Television Broadcast Station.

1. The Review Board has before it for consideration a motion, filed January 22, 1975, by Post-Newsweek Stations, Florida, Inc., licensee of television broadcast station WJXT, Jacksonville, Florida (WJXT), seeking the addition of four issues against a competing applicant, St. Johns Television Company (St. Johns).<sup>1</sup> WJXT requests a *Suburban* issue, relating to St. Johns' community leader survey, a Section 1.580/1.526 issue, and character and Section 1.65 issues based upon a Federal Reserve Board (FRB) determination that a trust, of which a St. Johns principal is a trustee, had violated federal banking laws.

SUBURBAN ISSUE<sup>2</sup>

2. Based upon an investigation of a sample of the interviewees listed in St. Johns' community leader survey, WJXT alleges that the applicant's ascertainment efforts are deficient and/or defective.

<sup>1</sup> Related pleadings before the Board are: (a) opposition, filed April 25, 1975, by St. Johns; (b) comments, filed April 25, 1975, by the Broadcast Bureau; (c) motion for leave to file supplement to opposition, and supplement to opposition, filed April 28, 1975, by St. Johns; and (d) reply, filed May 21, 1975, by Post-Newsweek. St. Johns' motion is unopposed and will be accepted together with the supplement itself. See also 40 FR 39546.

<sup>2</sup> An additional requested issue, dealing with alleged misrepresentation by St. Johns in connection with the community leader survey, has been withdrawn by WJXT. The gravamen of that request was that 13 of the 60 leaders interviewed by St. Johns and investigated by WJXT stated to WJXT's investigators that they had no recollection of the interviews, and that one interviewee apparently was fictitious. Based on the fact that St. Johns has successfully refreshed the recollection of five of the 13 interviewees and established the existence of the allegedly fictitious interviewee, and that only two of the other eight interviewees were willing to provide WJXT investigators with affidavits, WJXT concluded that the record does not support the addition of a misrepresentation issue. The Board agrees with WJXT and, accordingly, is of the view that no further consideration of this aspect of WJXT's request is warranted. See *CBS Inc. (WCAU-TV)*, 49 FCC 2d 1214, 32 RR 2d 271 (1974).

<sup>3</sup> WJXT states that it investigated 60 of St. Johns' 268 person community leader survey filed with the Commission on January 28, 1974, but that it was only able to contact 47 individuals directly.

view in several important respects.<sup>1</sup> WJXT first asserts that several of St.

3. St. Johns opposes the requested *Suburban* issue and asserts that the ascer-

not specify a given time limit for interviews. Although opponent notes that the

or not contacted in sufficient number and that St. Johns' listing of "mass media" as a problem constitutes a distortion of

the listing of "mass media" as a problem was not elicited by means of valid survey questions.

suite number was not disclosed until the publication of St. Johns' January 1975 public notice advising that its applica-

tive in several important respects.<sup>1</sup> WJXT first asserts that several of St. Johns' interviews were not ascertainment consultations since the community leaders were not asked to identify community problems, needs and interests. Movant next maintains that St. Johns' ascertainment questions frequently were incidental to the solicitation of views and comments on WJXT in particular and television programming in general, questions which, movant asserts, are not considered adequate for purposes of ascertainment. *Primer on Ascertainment of Community Problems by Broadcast Applicants*, 27 FCC 2d 650, 21 RR 2d 1507 (1971), Q. & A. 18 (*Primer*). Additionally, WJXT alleges that a significant portion of St. Johns' sampled interviews typically were of short duration, some only 3-5 minutes<sup>2</sup> and, therefore, too brief to establish a meaningful dialogue for the ascertainment of community needs and problems. *Primer*, Q. & A. 19. The significance of the brevity of the interviews is compounded, in WJXT's view, by the fact that a large number of the interviews were conducted by telephone.<sup>3</sup> WJXT asserts further that St. Johns' interviewers erred in often failing to identify St. Johns for the purpose of the interviews and that this failure also inhibited ascertainment.<sup>4</sup> Further, WJXT argues that St. Johns' ascertainment practices, particularly its emphasis on programming questions, resulted in a distortion in the results of its survey as evidenced by its ascertainment of "mass media" as a major problem.<sup>5</sup> Finally, movant alleges that the survey is unrepresentative in that leaders of youths, students and the poor were not interviewed, and leaders in public education, agriculture and labor were not interviewed in sufficient numbers.

<sup>1</sup>In support of its allegations, WJXT attaches numerous affidavits from both individuals interviewed by St. Johns and its own investigators. To the extent that WJXT's investigators' affidavits are used to establish the facts upon which WJXT's allegations are based, they will be disregarded as hearsay, not based upon the affiant's personal knowledge of the facts alleged. Section 1.229(c) of the Rules.

<sup>2</sup>WJXT submits that 13 of the sampled interviews lasted between two and five minutes and four of the interviews lasted between five and ten minutes.

<sup>3</sup>St. Johns' opposition concedes that many of its community leader interviews were conducted via telephone. See also note 16, *infra*, and the accompanying text.

<sup>4</sup>It should be noted that the affiants generally did not aver that the interviewer definitely did not identify himself but, rather, that to the best of their recollection, the interviewer did not state his affiliation with St. Johns.

<sup>5</sup>WJXT argues that in frequently soliciting community leader opinions on WJXT and television programming, St. Johns may have been deliberately attempting to create a community problem which that applicant has captioned "mass media". Thus, WJXT alleges that interviewees were often asked to comment on local media, the types of television programming that they enjoyed and how local television service could be improved. Questions regarding programming prefer-

3. St. Johns opposes the requested *Suburban* issue and asserts that the ascertainment efforts of its principals comply with the requirements of the *Primer*.<sup>1</sup> Initially, the applicant notes that WJXT has investigated only 60 of the more than 300 community leader interviews that it conducted and has submitted only 47 affidavits. Of these, St. Johns argues, 22 are hearsay affidavits of WJXT's investigators which must be discounted as not being in compliance with the personal knowledge requirement of Section 1.229(c) of the Rules. *CBS Inc. (WCAU-TV)*, *supra*. Further, opponent observes that many of WJXT's remaining 25 affidavits are not unequivocal, but rather contain statements from interviewees indicating that they remember being interviewed by St. Johns but cannot recall details of the interview. This, St. Johns asserts, is an insufficient basis for the addition of the requested issue.

4. Substantively, St. Johns maintains that interviewees were asked their views on community problems and, further, that the interviews were not used primarily to solicit views on WJXT.<sup>2</sup> Opponent attaches twenty-two affidavits from interviewees investigated by WJXT who state, after having their memories refreshed by St. Johns' interviewers, that their views on community problems were, in fact, solicited by St. Johns' interviewers.<sup>3</sup> In response to the allegation that the interviews were too brief to be meaningful, St. Johns submits that WJXT's affidavits, only seven of which may be relied upon in this regard, are not sufficiently precise or definite to support the charge. In any event, the applicant maintains, aside from the fact that dialogues were in fact established, the *Primer* does

ences, WJXT continues, are irrelevant to ascertainment interviews, but, nevertheless, responses to such questions were reported by St. Johns as a dominant community problem—"mass media". The conclusion that St. Johns' "mass media" category is a distortion of its community leader survey is supported, in WJXT's opinion, by the fact that none of the other three applicants in this proceeding reported a comparable problem in their community leader surveys and that "mass media" is only barely mentioned in the results of their general public surveys.

<sup>2</sup>In its discussion of the *Primer*, St. Johns suggests that that document is directed towards requiring established stations to develop a continuing dialogue with community leaders. WJXT has erroneously applied this standard to St. Johns, the applicant avers, rather than the appropriate standard applicable to new applicants, that of ascertaining community needs and planning responsive programming. See, however, *Primer*, 27 FCC 2d at 655, 21 RR 2d at 1513; *Notice of Inquiry and Proposed Rulemaking*, FCC 75-540, 40 FR 22092 n. 1, published May 20, 1975.

<sup>3</sup>St. Johns adds, however, that some of the community leaders who frequently deal with the media did offer their opinions on WJXT and/or television programming during the interviews and, in addition, interviewers sometimes solicited views on these matters.

<sup>4</sup>St. Johns suggests that sufficient time had elapsed between its interviews and WJXT's investigation so as to have blurred the recollection of the interviewees with respect to the precise details of the original interviews.

not specify a given time limit for interviews. Although opponent notes that the *Primer* does not expressly require that an interviewer identify his affiliation with an applicant, St. Johns also disputes the contention that its interviewers failed to identify their affiliation, and, again St. Johns attaches affidavits from interviewees to substantiate this position. Turning to the fact that many of its interviews were conducted by telephone, St. Johns states that the *Primer* does not prescribe the use of telephones for community leader surveys, and, it asserts, regardless of the length of interviews, dialogues were established with those leaders who were contacted by telephone.<sup>5</sup> St. Johns also denies that it distorted the results of its survey to show "mass media" to be a major problem in the community. Finally, St. Johns disputes the argument that its survey was unrepresentative in terms of several groups, noting the various leaders from each of the above groups that it surveyed and, further, that it is the representative nature, and not the number, of leaders interviewed which is the appropriate criterion for assessing community leader surveys.

5. The Broadcast Bureau, in its comments, observes that WJXT's investigation reached only a limited number of the community leaders surveyed by St. Johns; nevertheless, the Bureau urges that WJXT has raised serious questions concerning St. Johns' community leader survey, thereby warranting the addition of a *Suburban* issue. First, the Bureau notes that several St. Johns' interviewees state that they were not asked to identify community needs and problems but rather were asked for their views on WJXT and general television programming, which questions, the Bureau continues, are inappropriate in an ascertainment interview. The Bureau is also troubled by the short length of several of the interviews and questions whether the contacts were too brief to have established the meaningful dialogue mandated by the *Primer*. This doubt, the Bureau continues, is compounded by the interviewer's failure to identify his affiliation. In sum, in the absence of a satisfactory explanation for these deficiencies, the Bureau supports the addition of a *Suburban* issue. The Bureau rejects, however, addition of the issue on the basis of telephone contacts since use of the telephone is not *per se* unacceptable and because there is no indication of extensive use of such method. Finally, the Bureau rejects WJXT's contentions that leaders from various groups were either not contacted

<sup>5</sup>In so doing, St. Johns distinguishes *Southern California Broadcasters Association*, 47 FCC 2d 519, 29 RR 2d 1739 (1974), and *Media, Inc.*, 41 FCC 2d 30, 27 RR 2d 1077 (1973), cited by WJXT, on the grounds that the interviewers in the cited cases were strangers to the proposed service area while the interviewers in the instant case are long-time residents of the service area and, additionally, the telephone interviews were formalized by contemporaneous notes and follow-up letters sent to each interviewee.

or not contacted in sufficient number and that St. Johns' listing of "mass media" as a problem constitutes a distortion of the survey results. Thus, the Bureau reasons that given the relatively small sample approached by WJXT, it cannot be assumed that deficiencies are likely to exist throughout the entire survey effort. And, the Bureau notes that petitioner has not shown that the elicitation of "mass media" as a community need or problem was not arrived at by a valid survey method.

6. Turning first to the allegations that ascertainment questions either were not asked or were merely incidental to a solicitation of views on WJXT and television programming, the Board is satisfied that St. Johns' clarifying affidavits successfully rebut the allegations and affidavits submitted by WJXT. Thus, only two interviewees now state that they were asked questions on both WJXT and programming in addition to ascertainment questions.<sup>6</sup> However, even if programming questions had been regularly asked, this practice would not necessarily draw an applicant's *Suburban* showing into question, absent a showing that the applicant did not employ an otherwise adequate questioning method. *Cf. CBS Inc. (WCAU-TV)*, *supra*. Second, we are satisfied that St. Johns has interviewed leaders from significant groups, including youth, poor, public school, agriculture, labor, and blacks and, accordingly, would deny WJXT's request to the extent that it is premised upon the allegation that certain leaders were either not interviewed at all or were not interviewed in sufficient numbers. More specifically, while student and youth leaders were not contacted, leaders of groups catering to students and youths were interviewed and such representative contacts satisfy the requirements of the *Primer*. See *Jimie H. Howell*, 46 FCC 2d 960, 30 RR 2d 277 (1974).<sup>7</sup> Our review of St. Johns' survey further satisfies us that sufficient numbers of poverty group, agriculture and black leaders were interviewed by the applicant. Further, we agree with the Bureau that WJXT has not shown that

<sup>6</sup>St. Johns recontacted many of the interviewees who had executed affidavits for WJXT and obtained and submitted clarifying affidavits from these interviewees. Moreover, St. Johns submitted affidavits from its interviewer/principals in which they indicate that appropriate ascertainment interviews were conducted by them.

<sup>7</sup>As noted in the *Primer*, Q. & A. 18, the purpose of the community leader survey is not to elicit program suggestions and preferences. *Estate of John C. Mullins*, 36 FCC 2d 78, 65, 25 RR 2d 73, 81 (1972). However, an applicant is not expected to ignore such comments, and when they are offered, they should guide the interviewer to elicit comments on community problems.

<sup>8</sup>Included among the youth and student leaders contacted were officials of the YWCA and YMCA, Hot Line for Drugs, Big Brothers, the Jacksonville Youth Coordinator Boy Scouts, Boys Club, Girl Scouts, Jacksonville School Board, Florida Junior College, North Florida University, various county school superintendents, and the Duval County Teachers Association.

the listing of "mass media" as a problem was not elicited by means of valid survey questions.

7. More serious questions have been raised by WJXT, however, which require addition of a *Suburban* issue. Specifically, the Board is concerned with the high incidence of telephone contacts, both in WJXT's sample (19 out of 25), and, perhaps more importantly, as conceded in the affidavits of St. Johns' interviewer/principals, where the applicant indicated that it generally employed the telephone as the means for conducting its interviews.<sup>8</sup> Indeed, based upon the sample and the admissions, it appears that the great majority of St. Johns' community leader interviews were conducted by telephone. Thus, while we agree with St. Johns and the Bureau that, as a general rule, telephone interviews are not *per se* unacceptable, *Lexington County Broadcasters, Inc.*, 40 FCC 2d 694, 27 RR 2d 416 (1973), the material before us indicates that there may have been an extensive use of the telephone.<sup>9</sup> In this regard, we have recently held that an "extremely high percentage" of contacts by telephone raises a question as to whether meaningful dialogues were achieved between the community leaders so interviewed and the interviewers requiring the addition of a *Suburban* issue. *Cf. Julie P. Miner (KDXU)*, 52 FCC 2d 684, 687, 33 RR 2d 705, 709 (1975). Finally, while we agree with opponent that the *Primer* does not prescribe the duration of community leader surveys, *California Stereo, Inc.*, 39 FCC 2d 401, 404, 26 RR 2d 887, 892 (1973), nevertheless, the short duration of many of the interviews investigated by WJXT, may, in connection with the use of telephone contacts reinforce the need for an inquiry concerning the meaningfulness of those contacts.

#### RULE 1.526 ISSUE

8. WJXT next contends that St. Johns' official notice, published on March 29, 1974, stating that its application was available for inspection at the office of St. Johns Television Company, 223 West Adams Street, Jacksonville, Florida, when St. Johns was not listed on the building directory, resulted in St. Johns' failure to make its application readily available to the public in violation of Section 1.526 of the Commission's Rules. WJXT alleges that the application was kept at the law offices of Culverhouse, Tomlinson, Mills, De Carion and Anderson, which are located in Suite 655 at the listed address, and that the

<sup>8</sup>The affidavits submitted by the principals, note 13, *supra*, are essentially identical and state: "I conducted most of my community leader consultations by telephone. Unless I knew the name of an individual in a leadership position at the organization, my usual procedure was to telephone the organization and to ask to speak with the head man."

<sup>9</sup>This question is raised even though St. Johns took contemporaneous notes and sent follow-up letters as discussed in *Southern California Broadcasters Association*, *supra*.

suite number was not disclosed until the publication of St. Johns' January 1975 public notice advising that its application had been designated for hearing. The Bureau supports addition of the requested issue, on a comparative basis, since there is no showing that St. Johns intended to deceive the public.

9. St. Johns submits that it complied with the intent, if not the letter, of the Rules, when its March 29, 1973, notice listed the address of St. Johns and the names of officers and directors of St. Johns, including Ronald D. Fairchild, Assistant Secretary, whose name is listed on the building directory and whose office is in Suite 655. St. Johns attributes the omission of the suite number to inadvertence—at most a technical violation—and urges that WJXT has not shown that its (St. Johns') application would not have been available if the seeker had used initiative in trying to locate the file.<sup>10</sup> Therefore, opponent concludes that the requested issue is unwarranted. In the event, however, that the Board decides to add an issue, St. Johns argues that it should be added on a comparative basis only.

10. The Board will specify a public file issue against St. Johns. In so doing, we note that St. Johns did publish the address, although incomplete, where its file was kept even though WJXT has established that there was no listing for St. Johns at the address specified in its notice. Thus, without engaging in the exacting efforts suggested by St. Johns in its opposition, a member of the public could not have readily obtained access to the file as contemplated by the Rules. In the absence of a showing of intent to impede access, however, we will add the issue on a comparative basis only. *Cf. Kennebec Western Broadcasting Co.*, 51 FCC 2d 1154, 33 RR 2d 343 (1975).

#### ISSUES RELATING TO WILLIAM MILLS

11. WJXT's final requests are for the addition of character and Section 1.65 issues against St. Johns based upon the fact that William Mills, a St. Johns principal, has, since 1965, been a trustee of the Alfred I. duPont Testamentary Trust, which the Federal Reserve Board (FRB) has found to have violated the Bank Holding Company Act of 1956, 12 USC §§ 1841, *et seq.* As related by WJXT,

<sup>10</sup>St. Johns asserts that without the need for any additional information and by using common sense, a member of the public could have found St. Johns' application by any of the following means: locating Fairchild's name on the building directory and proceeding to Suite 655; asking the building guard whether any of the persons listed in the notice had offices in the building; telephoning or writing to the Florida Secretary of State to obtain St. Johns' address; telephoning one of the persons listed in the notice and asking him where the public file was located; or telephoning WJXT and asking where St. Johns' file was located.

<sup>11</sup>WJXT characterizes the Act as being in the nature of antitrust legislation, and notes that the Trust did not contest the FRB's charges.

pursuant to a 1966 amendment to the Bank Holding Company Act, the duPont

14. Both of the requested issues will be denied. Whether or not the FRB's ac-

with the provisions of Section 1.526 of the Commission's Rules, and, if so, to determine the effect thereof on its com-

vision system must carry. On March 15, 1975, WTCI began offering late-night

programming free-of-charge prior to filing a tariff schedule, and that WTCI's offer-

hours per day and that the actual programming delivered, "shall be deter-

pursuant to a 1966 amendment to the Bank Holding Company Act, the duPont Trust was required either to divest itself of non-bank businesses or else to relinquish its control of some 30 Florida Banks. In its violation notice of July 1975, WJXT continues, the FRB, *inter alia*, announced its preliminary conclusion that, although the Trust's interests in the 30 banks had been transferred to a newly created bank holding company whose shares were sold to the public, the Trust had in fact retained control of the new holding company and its 30 banks in violation of the statute. The Trust did not contest any of the charges, movant notes, and the Board's preliminary notice became a final determination of violation requiring the Trust to terminate its unlawful control. Movant urges that the violation of the Act by the Trust and the alleged role of Mills as a Trustee requires the addition of a character issue to examine the nature and extent of Mills' involvement and the impact thereof on St. Johns' character qualifications. In addition, WJXT asserts that St. Johns failed to report the violations of the Act or the FRB's proceeding to the Commission in violation of Section 1.65 of the Rules.

12. St. Johns asserts that the requested issues are both procedurally and substantively unsupported. First, St. Johns notes that the only factual support for the allegations submitted by WJXT consists of the FRB's preliminary notice and order and that nothing in those documents supports WJXT's charge that Mills was responsible for the actions of the Trust which led to the FRB's action. Therefore, St. Johns concludes there is an insufficient factual basis for adding the issues. Further, St. Johns attaches an affidavit from Mills, St. Johns exhibit 60, in which Mills states that he was not responsible for the actions which resulted in the FRB's action and did not consider the action to constitute a determination that the Trust had violated federal antitrust laws and, therefore, that he did not inform St. Johns' communications counsel of the FRB's action. Opponent characterizes the FRB's order as being in the nature of a consent decree and not an admission of any issue of fact or law by the Trust. Finally, noting that there was no finding of willful violation by the Trust, St. Johns submits that the instant case is controlled by *CBS Inc. (WCAU-TV)*, 52 FCC 2d 423, 33 RR 2d 579 (1975).

13. The Bureau opposes addition of the requested issues in the absence of a showing of what Mills' role was in the activities of the Trust which led to the FRB's action. In this connection, the Bureau contends that WJXT failed to comply with Section 1.229(c) of the Rules because it has not submitted an affidavit from an individual with personal knowledge of Mills' alleged involvement. With regard to the Section 1.65 request, the Bureau argues that there is no showing that the FRB's action has any decisional significance and, therefore, that it was not necessary to report the FRB's action.

14. Both of the requested issues will be denied. Whether or not the FRB's action constitutes a judgment in the technical sense of the word, we are of the opinion that in view of all of the circumstances, an evidentiary hearing is not needed. *Cf. Town and Country Radio, Inc.*, 51 FCC 2d 1217, 33 RR 2d 671 (1975). Thus, although WJXT has shown that the Trust had not conformed with the requirements of the Bank Holding Company Act, as interpreted by the Federal Reserve Board, it has not been demonstrated that the conduct involved willful or deliberate violations or a pattern of recurring violations or that it otherwise has any relationship to St. Johns' ability to operate a broadcast station in the public interest. See *CBS Inc. (WCAU-TV)*, 52 FCC 2d at 424, 33 RR 2d at 581. In this latter connection, it is important to note that WJXT has failed to show that Mills had any involvement in acquiring control of the interests requiring divestiture. In the absence of such a showing, and based upon our review of the FRB determination and order for divestiture,<sup>2</sup> the Board perceives no basis for finding that the order raises a substantial question concerning St. Johns' qualifications to be a Commission licensee. Moreover, given the nature of the FRB order, we are of the view that it was not unreasonable for Mills to conclude that it did not constitute a judgment as contemplated by our Rules.

15. Accordingly, it is ordered, That the motion for leave to file supplement to opposition to WJXT's motion to enlarge issues, filed April 29, 1975, by St. Johns Television Company, is granted, and the supplement IS ACCEPTED; and

16. It is further ordered, That the motion to enlarge issues, filed January 22, 1975, by Post-Newsweek Stations, Florida, Inc., IS GRANTED to the extent indicated herein, and is denied in all other respects; and

17. It is further ordered, That the issues in this proceeding ARE ENLARGED to include the following issues:

a. To determine the efforts made by St. Johns Television Company to ascertain the community needs, interests and problems of the area to be served and the means by which the applicant proposes to meet these problems; and

b. To determine whether St. Johns Television Company has failed to comply

<sup>2</sup> Although the FRB directed the Trust to terminate its control over its subsidiary banks, it noted in the Order that the Trust (which had not contested the allegations or requested a hearing thereon) had informed the FRB of its willingness to terminate the control relationship and it further ordered the Trust to submit a specific plan for divestiture.

<sup>3</sup> The Board is aware that the Presiding Judge, by Order, FCC 75D-38, released July 24, 1975, has granted Post-Newsweek's motion for a summary decision, has granted renewal of its license, and has denied the application of St. Johns. A hearing on the issue added herein is contingent on disposition of appeal of the Presiding Judge's decision and will be heard only if the decision is overruled.

with the provisions of Section 1.526 of the Commission's Rules, and, if so, to determine the effect thereof on its comparative qualifications to be a Commission licensee.

18. It is further ordered, That the burdens of proceeding with the introduction of evidence and proof under issue (a) added herein SHALL BE on St. Johns Television Company.

Adopted; August 29, 1975.

Released: September 9, 1975.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] VINCENT J. MULLINS,  
Secretary.

[Docket No. 20493; FCC 75-978]

#### WESTERN TELECOMMUNICATIONS, INC. Memorandum Opinion and Order Instituting Investigation

In the Matter of Western Telecommunications, Inc., Revised Rates for Microwave Service to Broadcast Station and Cable Television System Customers located in Utah, Montana, Idaho, Wyoming, and North Dakota; Tariff F.C.C. No. 3, Transmittal No. 43.

Western Telecommunications, Inc., Revised Rates for Microwave Service to Broadcast and Cable Television Customers located in Wyoming, Idaho, and Montana; Tariff F.C.C. No. 3, Transmittal No. 38. Docket No. 20493.

1. On June 30, 1975, Western Telecommunications, Inc. (WTCI) filed revisions to its Tariff F.C.C. No. 3 under Transmittal No. 43 to become effective August 30, 1975. On July 25, 1975, Teleprompter Cable Communications Corp. and Teleprompter of Great Falls, Inc. (jointly referred to as Teleprompter) filed a "Petition to Suspend, to Investigate, to Order an Accounting and for Immediate Relief" directed against the above-captioned tariff revision. WTCI filed a "Reply to Petition" on July 30, 1975.

2. WTCI, through its Western Microwave Division, offers a variety of video and audio services to its cable television and broadcast customers in Utah, Montana, Idaho, Wyoming, and North Dakota. Part of its primary service to cable television systems is delivering the signals of four Salt Lake City, Utah television broadcast stations.<sup>1</sup> On September 6, 1974, in our *Report and Order in Docket No. 20023 (Late Night Programming)* 48 FCC 2d 699 (1974), we amended Part 76 of the Rules to provide generally that cable television systems are authorized to distribute any television station's signal during the period from sign-off of the last station which the cable television system must carry to the sign-on of the first station which the cable tele-

<sup>1</sup> For a more complete description of WTCI's point-to-point microwave services see *Western Telecommunications, Inc. (Docket No. 20493)*, FCC 75-614, FCC 2d (1975).

vision system must carry. On March 15, 1975, WTCI began offering late-night programming on a free trial basis to its customers receiving at least two Salt Lake City television channels. In Transmittal No. 43, WTCI proposes to offer late-night programming as a new service which will result in increased charges to customers who elect to continue receiving the service. Free late-night programming thus would terminate with the effective date of the above-captioned revisions unless we suspend the revised tariff. WTCI's late-night programming consists of the signals of San Francisco television broadcast stations, Sierra Microwave, Inc., a WTCI subsidiary, relays these signals to Salt Lake City over existing facilities. At Salt Lake City the late-night programming is switched onto microwave channels carrying the signals of Salt Lake City television stations after the Salt Lake City stations sign-off for relay throughout the Western Division system on existing facilities. The rate structure which WTCI proposes for the late-night programming is quite similar to the rate structure advanced in its Transmittal No. 38, and into which we have instituted an investigation.<sup>2</sup> WTCI's rates for late-night programming will vary according to (a) in which of two geographical zones a cable television system customer is located, and (b) the number of potential homes in the cable system's service area. WTCI admits that inasmuch as the late-night service will be provided over existing facilities its additional capital investment will be minimal. Therefore, its Section 61.38 material concentrates on the revenue requirements of Sierra Microwave and its Western Division system. WTCI contends that the resulting tariff revision results in rates that will contribute to its return on investment, which it claims should be 18.92%.

3. Teleprompter argues that the Commission should suspend and investigate the above-captioned tariff revision because (a) it unreasonably discriminates against cable television systems which serve large communities, but which have low subscriber penetration levels; (b) that the arbitrary zone classifications do not reflect the cost characteristics of WTCI's plant because cable systems located in zone II, but which, nevertheless, are close to zone I will pay unreasonably high rates; (c) that the rate structure presented by the instant case is the same as that in Transmittal No. 38 which the Commission concluded raised discrimination and rate of return questions; and (d) that WTCI's cost justification does not satisfy the requirements of Section 61.38 of the Commission's Rules because it fails to include a study of the costs associated with the late-night service. Additionally, Teleprompter contends that WTCI has violated Section 203(c) of the Communications Act of 1934, as amended, and Section 21.705 of the Rules by offering late-night pro-

<sup>2</sup> Western Telecommunications, Inc. (Docket No. 20493), FCC 75-614, FCC 2d (1975).

gramming free-of-charge prior to filing a tariff schedule, and that WTCI's offering also violates Section 201(b) of the Act because it fails to specify practices which will prevent impairment of service resulting from switching errors.

4. WTCI denies Teleprompter's arguments (a) through (d), but states that it

[d]oes not object to the inclusion of the above-captioned tariff revisions in the investigation and hearing proceeding (Docket No. 20493) involving WTCI's revised rate structure for its Western Division system.

WTCI, however, requests that any suspension period be limited to at the most one-day. As to Teleprompter's allegation that WTCI is in violation of Section 203 (c) of the Act and Section 21.705 of the Rules, WTCI notes that its effective tariff provides that it shall supply microwave service between given points during the programming hours of the television stations whose signals its subscribers request and that such programming may be provided 24 hours per day. WTCI admits that switching problems did occur, but states that it now has established reasonable procedures to prevent recurrences.

5. Teleprompter's argument that the above-captioned tariff violates Section 201(b) of the Act because it fails to specify procedures which will prevent impairment of service resulting from switching errors is without merit. The provision of late-night programming on microwave channels carrying Salt Lake City television signals until their sign-off necessitates a switching operation which our comparable experience in cable television matters indicates occasionally is imprecisely performed. Elimination of the switching errors may require several different courses of action. The above-captioned tariff revision implicitly recognizes this, and thus simply states that WTCI "shall take reasonable steps to prevent the delivery of signals not ordered by a customer." Should operational experience demonstrate that a specification of procedures is desirable we will, of course, reconsider our conclusion herein.

6. Although Teleprompter's contention that WTCI's failure to include the signals of the San Francisco television broadcast stations in the list of signals delivered has merit, we are not persuaded that WTCI has clearly violated Section 203(c) of the Act and Section 21.705 of the Rules by offering late-night programming, including the San Francisco stations, free-of-charge prior to filing a tariff schedule. While WTCI's currently effective tariff is not a model of clarity, we believe it nevertheless can be reasonably construed to allow free late-night service which does not adversely affect the interests of WTCI's users. As WTCI notes, the currently effective tariff provides for the transmission of specified numbers of channels of television programming to certain receive sites. Rates for service are directly related to the number of channels delivered. Sections B(2)(a) and B(10)(a) also state that service may be provided up to 24

hours per day and that the actual programming delivered, "shall be determined by agreement among the subscribers, if possible", and failing agreement, "the carrier will use its best judgment as to the needs of the public and the needs of the subscribers, transmitting the signals desired by the majority of subscribers". Under the currently effective tariff, a majority of WTCI's Western Division customers opted for late-night programming on a free trial basis. WTCI's consequent provision of late-night programming on existing channels thus is consistent with its currently effective tariff, since the majority of its customers choose to receive the programming and since they already subscribe to up to 24 hour service on the same channels that are used to relay late-night programming. However, we do not view this situation as a desirable one nor this action as a precedent for similar tariff ambiguities. In order to avoid uncertainty in the future, we hereby order WTCI to clarify the current tariff provisions by submitting appropriate revisions to expressly include the San Francisco signals and to provide for free trial service.<sup>3</sup> Permission is hereby granted to make such revisions to the current tariff effective on not less than one day's notice and for this purpose Section 61.58 of the Rules is waived.

7. However, we find that Teleprompter's arguments (a) through (d) raise substantially the same questions that are currently under investigation in Docket No. 20493. Therefore, we shall consolidate the issues raised by Teleprompter's arguments (a) through (d) with the pending investigation and hearing in Docket No. 20493. Moreover, inasmuch as WTCI contends that the instant tariff revision will contribute to Sierra Microwave's revenue requirement, we must also consider whether the portion of the revenues to be realized by Sierra Microwave from the instant tariff revision is just and reasonable or otherwise lawful under the Communications Act. We also shall suspend WTCI's proposed rate increases for the maximum ninety-day statutory period and shall impose an accounting order. Our reasons for the full 90 day suspension are essentially the same as those articulated in paragraph 10 of the Memorandum Opinion and Order initiating Docket No. 20493.<sup>4</sup>

Termination of the suspension ordered herein of the above-captioned tariff revisions will not negate these additional anticipated revisions to the current tariff because the above-captioned revisions offer late-night programming as a new service for which an additional charge will be made. The revisions here ordered, however, simply will clarify the current tariff (now and as modified by the above-captioned revisions when they become effective) so as to clearly allow free late-night service via San Francisco television broadcast signals.

<sup>3</sup> Western Telecommunications, Inc. (Docket No. 20493), FCC 75-614, FCC 2d (1975).

8. Accordingly, it is ordered, That, pursuant to Sections 4(i), 4(j), 201, 202,

report and order in this proceeding. That order granted approval to Agreement No.

8. Accordingly, it is ordered, That, pursuant to Sections 4(i), 4(j), 201, 202, 204, 205 and 403 of the Communications Act of 1934, as amended, an investigation is instituted into the lawfulness of the tariff schedules filed by WTCI with Transmittal No. 43 including any cancellations, amendments or re-issues thereof.

9. It is further ordered, That, pursuant to the provisions of Section 204 of the Act, the revised tariff schedules filed by WTCI with Transmittal No. 43 are hereby suspended until November 30, 1975 and that WTCI, as to the operation of such tariff schedules shall, in the case of all increased charges and until further order of the Commission, keep accurate account of all amounts received by reason of such increases, specifying by whom and in whose behalf such amounts were paid, and upon completion of the hearing and decision herein the Commission may by further order, require the refund thereof, with interest, pursuant to Section 204 of the Act, and the carrier shall file such reports on the amounts accounted for as the Chief, Common Carrier Bureau shall require.

10. It is further ordered, That, the unresolved issues raised herein regarding the above-captioned tariff revision are included in Docket No. 20493.

11. It is further ordered, That, WTCI and Sierra Microwave ARE MADE parties Respondent herein and that Teleprompter IS MADE a party pursuant to Section 1.221(d) of the Commission's Rules; and that all other interested persons wishing to participate may do so by filing a notice of intention to participate within 30 days of the release date of this order.

12. It is further ordered, That, the "Petition to Suspend, to Investigate, to Order an Accounting and for Immediate Relief" filed by Teleprompter Cable Communications Corp. and Teleprompter of Great Falls, Inc. on July 25, IS GRANTED to the extent indicated herein and otherwise IS DENIED.

13. It is further ordered, That, the Secretary shall send a copy of this order by certified mail, return receipt requested, to the parties identified in paragraph 11 above, and shall cause a copy to be published in the Federal Register.

Adopted: August 28, 1975.

Released: September 8, 1975.

FEDERAL COMMUNICATIONS COMMISSION,<sup>5</sup>

[SEAL] VINCENT J. MULLINS,  
Secretary.

#### FEDERAL MARITIME COMMISSION

[Docket No. 72-45; Agreement No. 57-96]

#### PACIFIC WESTBOUND CONFERENCE

Extension of Authority for Intermodal Services

After investigation and hearing, the Commission, on July 8, 1975, issued its

<sup>5</sup> Commissioners: Wiley, Chairman; Lee and Robinson acting as a board.

report and order in this proceeding. That order granted approval to Agreement No. 57-96 on condition that certain modifications be made in that Agreement, and that the modified Agreement be submitted to the Commission within 60 days of the date of our order. The time within which the Pacific Westbound Conference may comply with the conditions of approval will expire at the end of this day.

It has come to our attention that the members of the Pacific Westbound Conference have been unable to agree to the modifications required in our order of July 8, 1975. Having considered the aforesaid state of affairs, and having considered the many alternative actions now available to us, the Commission has determined to suspend its order of July 8, 1975. This is done in order to permit the Commission to consider what substantive action it can take regarding Agreement No. 57-96, and to make that consideration prior to the expiration of the time within which the Pacific Westbound Conference may comply with the conditions imposed in our order of July 8, 1975.

Therefore, it is ordered, That the order of the Federal Maritime Commission, entitled Docket No. 72-46, Agreement No. 57-96, Pacific Westbound Conference Extension of Authority for Intermodal Services, served July 8, 1975, is suspended until further order of the Commission.

It is further ordered, That this order of suspension be published in the FEDERAL REGISTER.

It is further ordered, That copies of this order of suspension be served upon all the parties to Docket No. 72-46.

By the Commission,

[SEAL] FRANCIS C. HURNEY,  
Secretary.

[FR Doc.75-24336 Filed 9-11-75;8:45 am]

#### GENERAL ACCOUNTING OFFICE REVIEW OF COMPLAINTS CONCERNING CONTRACTS UNDER FEDERAL GRANTS

##### Public Notice

Federal grant funds are disbursed throughout the economy to a wide variety of recipients ranging from State and local governments to private organizations and individuals. The magnitude of Federal grant activity is demonstrated by the fact that the fiscal year 1976 budget recommendations of the President were for \$56 billion in grants-in-aid, as compared with \$13 billion in 1966. Further, Federal aid constituted 21 percent of total State and local government receipts in 1974, more than twice the percentage of 1954. These recipients are engaged, in turn, in varied practices and procedures regarding controls over the manner in which grant funds are utilized. Recipients of Federal grants are engaged in a significant amount of contract activity financed from public funds. For example, in 1974, \$8 billion of grant funds were committed to construction project contracts entered into by grantees as opposed to \$5 billion of construction contracts entered into directly by Federal agencies. Aside from construction proj-

ects, grant funds are also frequently utilized to acquire by contract many other such items as office furnishings and equipment, automobiles, laboratory equipment, specialized clothing, and other types of materials required for the proper prosecution of the effort contemplated by the grant.

Of particular concern, in connection with the sizeable expenditure of grant funds for contract purposes, is the propriety of contracting procedures followed. Often particular procedures to be followed as specified in grant instruments are legally binding upon the grantee.

The General Accounting Office has from time to time considered on an *ad hoc* basis complaints regarding contract award procedures followed by grantees in specific cases. However, we think it is now necessary to clarify the GAO role concerning the review of such complaints. Therefore, consistent with the statutory obligation of the General Accounting Office to investigate the receipt, disbursement, and application of public funds, we will undertake reviews concerning the propriety of contract awards made by grantees in furtherance of grant purposes upon request of prospective contractors.

It is not the intent of the General Accounting Office to interfere with the functions and responsibilities of grantor agencies in making and administering grants. Prospective contractors are urged to seek resolution of their complaints through regular administrative channels prior to making a complaint with GAO. The purpose of our reviews will be to foster compliance with grant terms, agency regulations, and applicable statutory requirements. We will not consider complaints where the Federal funds in a project as a whole are insignificant.

Complaints are not for consideration under our bid protest procedures (see 40 Fed. Reg. 17979, April 24, 1975), since there is no direct contractual relationship between the Federal Government and the party engaged in contracting with the grantee. We will develop and publish appropriate detailed procedures to govern our consideration of requests for review of grantee contract award matters. In the interim we will receive and consider complaints under the following general interim procedure.

Upon receipt of a complaint, GAO will solicit a report from the grantor agency involved setting forth its views and the views of the grantee with respect to the issues raised. The grantee and other interested parties will be afforded an opportunity to comment on the agency report and to present their views concerning the matters at issue. At the conclusion of its review GAO will inform all interested parties of its conclusions.

Requests for GAO review of complaints concerning grantee contract awards shall be submitted to the General Counsel, General Accounting Office, Washington, D.C. 20548. Such requests should (1) identify the specific grant and contract thereunder at issue and (2) provide a full statement of the basis upon which it is believed that proper contracting procedures have not been fol-

lowed. It is important that complaints be received as promptly as possible.

Agencies will continue to be responsible for assuring that grant administration functions adhere to the statutory requirements applicable to their grant programs.

[SEAL] ELMER B. STAATS,  
Comptroller General  
of the United States.

#### REGULATORY REPORTS REVIEW

##### Receipt and Approval of a Proposed Report

The following request for clearance of a proposed report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on September 4, 1975. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt and action taken by GAO.

##### FEDERAL POWER COMMISSION

The Federal Power Commission (FPC) requested clearance of a revised Form No. 8, Underground Gas Storage Report, to broaden reporting of underground natural gas storage. The revised Form No. 8 will be filed by all companies subject to FPC jurisdiction that operate underground gas storage fields, and will permit continuous monitoring of all storage injections, withdrawals, balances, and capacities. The revised form will be filed within 5 days of the first and 15th day of the months from December through March, and the first day of the months of April through November. There will be approximately 35 respondents and it is estimated that an average of 4 manhours will be required per response.

The FPC requested expeditious clearance of Form No. 8 so that collection of the information can be coordinated on a timely basis with the issuance of an identical form by FEA. FEA's form solicits information from companies not under the jurisdiction of FPC, while the FPC form solicits the information from companies under their jurisdiction.

GAO noticed the FEA form in the FEDERAL REGISTER on July 28, 1975, and solicited comments. Because the FPC form is identical to the FEA form, we are of the opinion that no new comments would be made. Therefore, GAO has granted expeditious clearance to the FPC form under number B-180228 (R0273).

NORMAN F. HEYL,  
Regulatory Reports Review Officer.

#### REGULATORY REPORTS REVIEW

##### Notice of Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on September 8, 1975. See 44 U.S.C. 3512 (c) and (d). The purpose of

publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the requests received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FTC forms are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed forms, comments (in triplicate) must be received on or before September 30, 1975, and should be addressed to Mr. Carl F. Bogar, Assistant Director, Office of Special Programs, United States General Accounting Office, Room 5216, 425 I Street, N.W., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-376-5425.

##### FEDERAL TRADE COMMISSION

The Bureau of Consumer Protection of the Federal Trade Commission has submitted for clearance a one-time questionnaire to be sent to pharmaceutical trade and professional associations requesting information of acts and practices within the industry concerning ownership requirements of retail pharmacies anywhere within the United States. The respondent burden is estimated to be six hours per response. Response to the questionnaire is voluntary.

The Bureau of Consumer Protection of the Federal Trade Commission has submitted for clearance a one-time questionnaire to be sent to boards of pharmacy requesting information of acts and practices within the industry concerning ownership requirements of retail pharmacies anywhere within the United States. The respondent burden is estimated to be three hours per response. Response to the questionnaire is voluntary.

The Bureau of Consumer Protection of the Federal Trade Commission has submitted for clearance a one-time questionnaire to be sent to various consumer interest groups requesting information of acts and practices concerning ownership requirements or retail pharmacies anywhere within the United States. The respondent burden is estimated to be three hours per response. Response to the questionnaire is voluntary.

NORMAN F. HEYL,  
Regulatory Reports Review Officer.

#### GENERAL SERVICES ADMINISTRATION

##### ADVISORY COMMITTEE FOR PROTECTION OF ARCHIVES AND RECORDS CENTERS Notice of Meetings

Pursuant to Section 10(a) (2) of the Federal Advisory Committee Act, P.L.

92-463, notice is hereby given that meetings of the Advisory Committee for Protection of Archives and Records Centers will be held at 9:00 a.m. on September 25-26, 1975, in the Departmental Auditorium, Conference Room B, 14th and Constitution Avenue, N.W., Washington, D.C.

The meetings on September 25 and 26 will be devoted to review, comment and revision of the draft report prepared by the Advisory Committee Secretary.

Individuals wishing to offer testimony are requested to submit, in advance, to the Advisory Committee Secretary, a one-page outline of their testimony, and to limit their oral remarks to fifteen minutes. Written statements of any length will be accepted.

Further information with reference to these meetings can be obtained from Mr. D. Peter Lund, Advisory Committee Secretary, c/o Society of Fire Protection Engineers, 60 Battery March Street, Boston, MA 02110, or call (617) 482-0686.

Dated: August 15, 1975.

W. A. MEISEN,  
Acting Commissioner.  
Public Buildings Service.

#### NUCLEAR REGULATORY COMMISSION

[Docket No. 50-155]

##### CONSUMERS POWER CO.

##### Notice of Proposed Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering the issuance of an amendment to Facility Operating License No. DPR-6 issued to the Consumers Power Company (the licensee) for operation of the Big Rock Point Nuclear Plant (the facility), a boiling-water reactor located in Charlevoix County, Michigan, and currently authorized for operation at power levels up to 240 MWt.

In accordance with the licensee's application for a license amendment dated July 25, 1975, the amendment would modify operating limits in the Technical Specifications based upon an evaluation of ECCS performance calculated in accordance with an acceptable evaluation model that conforms to the requirements of the Commission's regulations in 10 CFR Section 50.46. The amendment would modify various limits established in accordance with the Commission's Interim Acceptance Criteria, and would impose instead, limitations established in accordance with the Commission's Acceptance Criteria for Emergency Core Cooling Systems for Light Water Nuclear Power Reactors, 10 CFR Section 50.46.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By October 14, 1975 the licensee may file a request for a hearing and any per-

son whose interest may be affected by

dated August 5, 1974, on Certain Re-

cant's Preliminary Safety Analysis Re-

FEDERAL REGISTER notice and Section 2.714, and must be filed with the Sec-

on page 42061, the document heading in the 1st column should read as set forth

shareholders and was dissolved by filing a Certificate of Dissolution pursuant to the laws of Delaware on June 17, 1975.

son whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of Section 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER Notice and Section 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Charles F. Bayless, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine the witnesses.

For further details with respect to this action, see (1) the application for amendment dated July 25, 1975, (2) the report "Heatup Analysis for EXXON Nuclear Company, Inc., G Fuel in the Big Rock Point Plant" in conformance with 10 CFR 50, Appendix K dated July 26, 1975, and letter dated July 26, 1975, from EXXON Nuclear Company, (3) the Commission's Determination with Respect to Variance from the Interim Acceptance Criteria and Extension in Submitting Evaluation from the Acceptance Criteria for Core Cooling Systems [10 CFR § 50.46(a) (2) (iii)] dated August 5, 1974, published in the FEDERAL REGISTER on August 15, 1974 (39 FR 29403), (4) the Commission's Memorandum and Order

dated August 5, 1974, on Certain Requests for Exemption from Emergency Core Cooling System Criteria, and (5) the Determination of Request for Extension of Time for Submittal of Evaluation Required by Acceptance Criteria for Emergency Core Cooling Systems dated April 1, 1975, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Charlevoix Public Library, 107 Clinton Street, Charlevoix, Michigan 49720. The license amendment and the Safety Evaluation, when issued, may be inspected at the above locations, and a copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 4th day of September, 1975.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,  
Chief, Operating Reactors  
Branch #2, Division of Reactor Licensing.

[FR Doc.75-24142 Filed 9-11-75; 8:45 am]

[Docket Nos. 50-458 and 50-459]

GULF STATES UTILITIES CO. RIVER BEND STATION, UNITS 1 AND 2

Notice of Issuance of Limited Work Authorization

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has authorized the Gulf States Utilities Company to conduct certain site activities in connection with the River Bend Station, Units 1 and 2 prior to a decision regarding the issuance of construction permits.

The activities that are authorized are within the scope of those authorized by 10 CFR 50.10(e) (1) and include clearing and grading of the plant site, excavation (and dewatering system) for reactor and other building foundations, installation of a railroad spur and new north access road, installation of water wells, installation of fire protection facilities, diversion of West Creek and erection of construction support facilities as follows: Offices, warehouses, shops, roads, and construction power.

Any activities undertaken pursuant to this authorization are entirely at the risk of the Gulf States Utilities Company and the grant of the authorization has no bearing on the issuance of construction permits with respect to the requirements of the Atomic Energy Act of 1954, as amended, and rules, regulations, or orders promulgated pursuant thereto.

An Initial Decision on matters relating to the National Environmental Policy Act and site suitability was issued by the Atomic Safety and Licensing Board in the above captioned proceeding on September 2, 1975. A copy of (1) The Partial Initial Decision; (2) the appli-

cant's Preliminary Safety Analysis Report and amendments thereto; (3) the applicant's Environmental Report, and amendments thereto; (4) the staff's Final Environmental Statement dated September 1974; and (5) the Commission's letter of authorization dated September 5, 1975, are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C., and the Audubon Library, West Felician Branch, Ferdinand Street, St. Francisville, Louisiana 70775.

Dated at Rockville, Maryland this 5th day of September, 1975.

For the Nuclear Regulatory Commission.

WM. H. REGAN, JR.,  
Chief, Environmental Projects  
Branch 4, Division of Reactor Licensing.

[FR Doc.75-24286 Filed 9-11-75; 8:45 am]

[Docket No. 50-245]

NORTHEAST NUCLEAR ENERGY CO. ET AL.

Proposed Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering the issuance of an amendment to Facility Operating License No. DPR-21 issued to Northeast Nuclear Energy Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Connecticut Light and Power Company (the licensees), for operation of the Millstone Nuclear Power Station, Unit No. 1, located in Waterford, Connecticut.

The amendment would revise the provisions in the Technical Specifications relating to the Average Power Range Monitor (APRM) flow biased rod block and trip setting, in accordance with the licensee's application for amendment, dated July 25, 1975.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations.

By October 14, 1975, the licensees may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of Section 2.714 of 10 CFR Part 2 of the Commission's regulations.

A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this

FEDERAL REGISTER notice and Section 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to William H. Cuddy, Esquire, Day, Berry & Howard, Counselors at Law, One Constitution Plaza, Hartford, Connecticut 06103, the attorney for the licensees.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendment dated July 25, 1975, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385. The license amendment and the Safety Evaluation, when issued, may be inspected at the above locations and a copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 3rd day of September 1975.

For the Nuclear Regulatory Commission.

GEORGE LEAR,  
Chief, Operating Reactors  
Branch No. 6, Division of Reactor Licensing.

[Rel. No. 8926 (811-184)]

CAPITAL INVESTORS GROWTH FUND, INC.

Notice of Application

SEPTEMBER 5, 1975.

Notice is hereby given that Capital Investors Growth Fund, Inc. (the "Applicant"), 2727 Allen Parkway, Houston, Texas 77019, registered under the Investment Company Act of 1940 (the "Act") as a diversified, open-end management investment company filed an application on June 25, 1975, pursuant to Section 8 (f) of the Act, for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized as a Delaware Corporation under the name of Mutual Investment Company of America on July 1, 1938 and was registered under the Act by Filing a Form N-8A Notification of Registration on October 31, 1940. Applicant's name was changed to Capital Investors Growth Fund, Inc. on October 10, 1966.

Applicant represents that pursuant to a plan of reorganization approved by its shareholders at a meeting held on December 20, 1974, it transferred substantially all of its assets to Capital Shares, Inc. on December 27, 1974 in exchange for shares of Capital Shares, Inc. Applicant further represents that it has no

shareholders and was dissolved by filing a Certificate of Dissolution pursuant to the laws of Delaware on June 17, 1975.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and, upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 30, 1975, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following September 30, 1975, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc.75-24237 Filed 9-11-75; 8:45 am]

[Rel. No. 8925; (811-2230)]

C. I. DIRECT PLACEMENT FUND, INC.

Notice of Application

SEPTEMBER 5, 1975.

Notice is hereby given that C. I. Direct Placement Fund, Inc. (the "Applicant"), c/o John J. McHugh, Secretary, 767 Fifth Avenue, New York, New York 10022, registered under the Investment Company Act of 1940 (the "Act") as a nondiversified, closed-end management investment company filed an application on August 11, 1975, pursuant to Section 8(f) of the Act, for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized as a Delaware Corporation on September 16, 1971 and

mington, Delaware, 19899; Delmarva

Power & Light Company of Maryland,

[Rel. No. 10158; 70-5732]

**DELMARVA POWER AND LIGHT CO. AND  
DELMARVA POWER AND LIGHT COM-  
PANY OF MARYLAND**

**Notice of Proposed Issuance and Sale of  
Long-Term Promissory Notes and Capital  
Stock**

SEPTEMBER 5, 1975.

In the matter of: Delmarva Power & Light Company, 800 King Street, Wil-

ilmington, Delaware, 19899; Delmarva Power & Light Company of Maryland, U.S. Route 13 and Naylor Mill Road, Salisbury, Maryland, 21801; (70-5732).

Notice is hereby given that Delmarva Power & Light Company of Maryland ("Maryland"), a wholly-owned electric utility subsidiary company of Delmarva Power & Light Company ("Delmarva"), a registered holding company and a public-utility company, have filed an application-declaration with this Commission, designating Sections 6(b), 9(a), 10, 12(d), and 12(f) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 43 and 44 promulgated thereunder regarding the following proposed transactions. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

All of the presently outstanding securities of Maryland are owned by Delmarva and pledged with Chemical Bank, Trustee, in accordance with the provisions of the Indenture of Mortgage and Deed of Trust of Delmarva to Chemical Bank, Trustee, dated as of October 1, 1943.

It is proposed that Maryland will, prior to September 30, 1977, issue and sell to Delaware its 30-year promissory notes in a total principal amount not exceeding \$10,000,000 and will also issue and sell to Delaware a total not to exceed 100,000 shares of its common capital stock of the par value of \$100 per share. It is proposed that Delaware will purchase such notes, when issued, at the principal amount thereof, plus accrued interest from their issuance date, and such common stock, when issued, at the par value thereof. Such notes and stock will be issued and sold by Maryland from time to time as may be necessary to meet Maryland's cash requirements. The notes will bear interest at 11.1% (such interest rate being based on the cost of the last public borrowing of Delaware (11.0674%)), rounded to the next higher one tenth of one per cent, but at such time as Delaware shall market its next issue of bonds, all notes thereafter issued by Maryland under this proposal shall bear interest equal to the cost of money to Delaware under such bond issue, rounded to the next higher one tenth of one per cent. At the time of the sale of any of said notes by Maryland to Delaware, Maryland will sell and Delaware will acquire common capital stock having a par value equal to the principal amount of notes being so sold and acquired.

It is also proposed that Maryland's 30-year, 3½% promissory notes to Delaware in the aggregate principal amount of \$2,490,000 maturing on various dates between April 1, 1976, and July 1, 1977, will be refunded by the issuance and sale to Delaware on the respective dates of maturity of new 30-year promissory notes in like amounts, to bear interest at the cost of the last public borrowing of Delaware prior to such respective issuances, rounded to the next higher one-tenth of one per cent.

Delaware further proposes that the notes and stock to be acquired by

Delaware will be pledged by it with Chemical Bank, Trustee, in accordance with the provisions of said Indenture of Mortgage and Deed of Trust of Delaware to Chemical Bank, Trustee, dated as of October 1, 1943.

Maryland will use the proceeds derived from the sale of the notes and stock to provide funds for the repayment of said 30-year, 3½% promissory notes in the principal amount of \$2,490,000, for future capital expenditures, and for other corporate purposes. Proposed additions to Maryland's property and plant are estimated at \$7,094,229 for the remaining months of 1975, \$14,995,000 for 1976, and \$13,088,000 for 1977.

It is stated that the Public Service Commission of Maryland has jurisdiction over the proposed transactions and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. Fees and expenses paid or incurred, or to be paid or incurred, directly or indirectly, in connection with the proposed transactions are estimated to be \$4,000, including counsel fees of \$1,750.

Notice is further given that any interested person may, not later than October 1, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

Rel. No. 8924/SEPTEMBER 5, 1975.

Notice is hereby given that the Commission proposes, pursuant to Section 8(f) of the Investment Company Act of 1940 ("Act") to declare by order upon its own motion that investment Capital Corporation ("ICC") c/o Bernard L. Greer, Jr. Shook, McLain, Jessee, Merritt & Lyle 3242 First National Bank Tower Atlanta, Georgia, 30303; 811-2308. Registered under the Act as a closed-end, non-diversified management investment company has ceased to be an investment company as defined in the Act.

ICC was organized as a Georgia Corporation on February 18, 1972, and filed a Notification of Registration on Form N-8A on August 14, 1972.

Material in the Commission's records indicate that none of ICC's securities have ever been offered or sold to the public and that ICC never became an operating investment company. Material in the Commission's records also indicates that, on December 27, 1972, ICC was merged into ABCO International Corporation ("ABCO"), a Georgia corporation, which is engaged in the business of management, marketing, executive consulting, franchise marketing, financial planning, and related fields, and that ABCO is not now, and never has been an investment company as defined in the Act.

Section 8(f) of the Act provides, in pertinent part, that when the Commission on its own motion, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than October 3, 1975, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon ICC at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule O-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing,

or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.  
[FR Doc. 75-24240 Filed 9-11-75; 8:45 am]

[Release No. 11635]

**MUNICIPAL SECURITIES RULEMAKING  
BOARD**

**Announcement of Appointment of Members  
SEPTEMBER 5, 1975.**

The Securities and Exchange Commission today announced the appointment of the members of the Municipal Securities Rulemaking Board (the "Board"), in accordance with the provisions of Section 15B(b)(1) of the Securities Exchange Act of 1934 (the "Act"), as set forth in the Securities Acts Amendments of 1975 (the "1975 Amendments"). Section 15B(b)(1) provides that the Board shall consist of 15 members: five individuals who are not associated with any broker, dealer, or municipal securities dealer ("public members"), as defined in Section 3(a)(18) and 3(a)(32) of the Act (at least one of whom shall be representative of investors in municipal securities, and at least one of whom shall be representative of issuers of municipal securities); five individuals who are associated with, and representative of, municipal securities brokers and municipal securities dealers which are not banks or subsidiaries, departments or divisions of banks ("broker-dealer members"); and five individuals who are associated with and representative of municipal securities dealers which are banks or subsidiaries, departments or divisions of banks ("bank members").

The 1975 Amendments grant the Board broad rulemaking authority. The Board will have primary responsibility for formulating rules regulating the activities of municipal securities brokers (as defined in Section 3(a)(31) of the Act) and municipal securities dealers (as defined in Section 3(a)(30) of the Act), including banks and subsidiaries, departments and divisions of banks which act as dealers in municipal securities. The Board's rule-making authority includes, but is not limited to, the power to: define and establish means of preventing fraudulent and manipulative acts and practices; promote just and equitable principles of trade; establish professional qualifications for municipal securities dealers; regulate selling and underwriting practices; determine the minimum scope and frequency of inspection of municipal securities brokers and dealers by the appropriate regulatory agency, as defined in Section 3(a)(34) of the Act; establish fair procedures for the nomination and election of future members of the Board; and define the relationship between a municipal securi-

ties professional's investment activities and its underwriting and dealing activities. Any rule proposed by the Board will be filed with the Commission, which is then required either to approve such proposed rule or institute proceedings to determine whether the proposed rule should be disapproved.

Following are the names and a brief description of the background of the individuals selected by the Commission to serve as the initial members of the Board, each for a two-year term:

**PUBLIC MEMBERS**

Mr. Harlan E. Boyles, Deputy Treasurer of North Carolina, Raleigh, North Carolina. Mr. Boyles has served as Deputy Treasurer since 1964 and has also served as Secretary to the State Local Government Commission. Mr. Roswell C. Dikeman, Partner specializing in municipal bonds, in the law firm of Sykes, Galloway & Dikeman. He also served as Associate Counsel for the New York State Department of Audit and Control. Mr. Harry B. Gilmore, Jr., consultant on domestic investment policy for the New Hampshire Insurance Company, Manchester, New Hampshire. He previously served as a Director and Vice President for Finance of the American International Group, an insurance holding company. Mr. Lennox L. Moak, Director of Finance for the City of Philadelphia, Pennsylvania. He has served as a consultant for municipal finance matters to various American cities and served as Executive Director, Bureau of Governmental Research for New Orleans. He is the author of several books on government budgeting and debt and has lectured in Public Finance at the Wharton School of Finance.

Mr. Richard R. West, Dean of the College of Business and Professor of Finance at the University of Oregon, Eugene, Oregon. He received degrees from the University of Chicago and Yale University and has published numerous articles and held various teaching and consulting responsibilities dealing with economic and securities market problems.

**BROKER-DEALER MEMBERS**

Mr. Gedale B. Horowitz, Partner in Charge of Municipal Bond Department, Salomon Brothers, New York, New York. He is the Chairman of the Securities Industry Association's Municipal Federal Legislation Committee.

Mr. Thomas W. Masterson, Senior Vice President and Director of Underwood Neuhaus & Company, Inc., Houston, Texas. He is the Chairman of the Municipal Advisory Council of Texas and is National Chairman of the Municipal Securities Committee of the Securities Industry Association. Mr. William J. Rex, Executive Vice President and Director of Foster & Marshall, Inc., Seattle, Washington. Prior to this position, he served in the Seattle Offices of John Nuveen & Co., Inc. and Merrill Lynch, Pierce, Fenner and Smith, Inc.

Mr. George Rinker, Jr., Executive Vice President and Director, The Ohio Company, Columbus, Ohio. He is a member of the Board of Governors of the National Association of Securities Dealers and serves as Chairman of its National Business Conduct Committee.

Mr. Wallace O. Sellers, Vice President and Director of Merrill Lynch, Pierce, Fenner & Smith, Inc., New York, New York. He has served in the firm's municipal department since 1957 and presently is the Director of the Municipal and Corporate Bond Division.

FEDERAL REGISTER, VOL. 40, NO. 178—FRIDAY, SEPTEMBER 12, 1975

**BANK MEMBERS**

Mr. Richard F. Koser, Senior Vice President

Agriculture for financial assistance in the form of grants, loans, or loan guarantees

1975 (40 FR 4393). In determining whether the applications should be ap-

## BANK MEMBERS

Mr. Richard F. Keizer, Senior Vice President and head of Money Market Division, First National City Bank, New York, New York. He was previously the head of the bank's Municipal Underwriting Department.

Mr. Bert C. Madden, Senior Vice President and Manager, Investment Banking Division, Trust Company Bank, Atlanta, Georgia. He has served as Assistant Vice President of the Municipal Bond Department of Chase Manhattan Bank and as an instructor at the Georgia Banking School and the Stonier Graduate School of Banking.

Mr. Frank K. Spinner, Senior Vice President and Manager of Bond Department, First National Bank in St. Louis, St. Louis, Missouri. He has been with the bank for over 25 years and has been in the Bond Department since it was formed 13 years ago.

Mr. David G. Taylor, Executive Vice President, Continental Illinois National Bank and Trust Company of Chicago. He is in charge of the bank's Bond Department and is also associated with the bank's Bond and Money Market Services Department.

Mr. John R. Vella, Vice President, Investment Banking Group of the Bank of America NT & SA, San Francisco, California. Previously he served as Vice President and Head of the Municipal Securities Department and also served in the Bank's Municipal Bond Dealer and Municipal Trading Departments.

By the Commission.

SMALL BUSINESS  
ADMINISTRATION

[License No. 09/12-0087]

## SUTTER HILL CAPITAL CORP.

## Surrender of License

Notice is hereby given that Sutter Hill Capital Corporation, Two Palo Alto Square, Palo Alto, California 94304, has surrendered its License No. 09/12-0087, issued September 20, 1962.

Sutter Hill Capital Corporation has complied with all conditions set forth by SBA for surrender of its license. Therefore, under the authority vested by the Small Business Investment Act of 1958, as amended, and pursuant to the regulations promulgated thereunder, the surrender of the license of Sutter Hill Capital Corporation is hereby accepted and it is no longer licensed to operate as a small business investment company.

Dated: September 4, 1975.

## DEPARTMENT OF LABOR

## Manpower Administration

EMPLOYMENT TRANSFER AND BUSINESS  
COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

## Notice of Applications

The organizations listed in the attachment have applied to the Secretary of

Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 USC 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75, published January 29,

1975 (40 FR 4393). In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing September 26, 1975, to: Deputy Assistant Secretary for Manpower, 601 D Street, NW., Washington, D.C. 20213.

Signed at Washington, D.C., this 8th day of September 1975.

BEN BURDETSKY,  
Deputy Assistant Secretary  
for Manpower.

Applications received during the week ending September 5, 1975

Name of applicant	Location of enterprise	Principal product or activity
Forest-All Corp.	Pembroke, N.H.	Manufacture of automatic sawmill machinery.
C and C Yachts (tenant to city of Middletown).	Middletown, R.I.	Construct sailing yachts.
The Industrial Development Board of the city of Fayette on behalf of Fayette Cotton Mill Inc.	Fayette, Ala.	Manufacture of cotton and cotton-polyester blended yarn.
Roy Stoville Studdard.	Talladega, Ala.	Pre-slaughtered beef and pork products.
Concept Inc.	Cherokee County, S.C.	Packaged orange juice.
Hancock Concrete Products Co., Inc.	Hancock, Minn.	Manufacture and sales of reinforced concrete products.
Fulton Square Corp.	Canton, Ill.	Redevelopment of downtown area.
Jerry Logan Bush.	Jerseyville, Ill.	Retail grocery.
Birchwood Investments.	Shawano, Wis.	Nursing home services.
American Lighting Standards Corp.	Brenham, Tex.	Manufacture of poles, steel, tubular; manufacture of anchor bolts.
Athens Steel Building Corp.	Athens, Tex.	Pre-engineered, prefabricated steel buildings for agriculture, commercial, industrial, and residential uses.
French Truss and Wholesale Products.	Cimarron, N. Mex.	Manufacture of laminated patio and indoor furniture.
Lodgepole Products Co.	Laramie, Wyo.	Manufacture of milled rail fencing, stock gates, treated fence posts, and corral poles.
I. I. Inc.	Roosevelt, Ariz.	Motel.
North Pacific Lumber Co.	Republic, Wash.	Manufacture of softwood (pine, fir and larch etc.) lumber.

FOURTH SECTION APPLICATIONS  
FOR RELIEF

SEPTEMBER 9, 1975.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43042—Iron and Steel Articles to Points in Central—Eastern Territory. Filed by Southwestern Freight Bureau, Agent, (No. B-552), for interested rail carriers. Rates on iron and steel articles, in carloads, as described in the application, from points in Arkansas, Louisiana, Missouri, Oklahoma and Texas, to points in central—eastern territory.

Grounds for relief—Rate relationship, modified short-line distance formula and grouping.

Tariff—Supplement 139 to Southwestern Freight Bureau, Agent, tariff 301-F, I.C.C. No. 5098. Rates are published to become effective on October 9, 1975.

FSA No. 43043—Recyclable materials from, to and between points in the United States and Canada. Filed by Traffic Executive Association—Eastern Railroads, Agent, (E.R. No. 3045), for interested rail carriers. Rates on recyclable materials, as described in the application, from, to and between points in the United States and Canada.

Grounds for relief—Carrier competition.

Tariff—Traffic Executive Association—Eastern Railroads, Agent, tariff I.C.C. No. C-1072, and supplement No. 1. Rates are published to become effective on October 11, 1975.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[Ex Parte No. 252 (Sub-No. 1)]

## INCENTIVE PER DIEM CHARGES, 1968

At a General Session of the Interstate Commerce Commission held at its office

in Washington, D.C., on the 4th day of September, 1975; service date September 9, 1975.

Upon consideration of the record in the above-captioned proceeding, including the report of March 31, 1975 at 349 I.C.C. 303; the petitions for reconsideration filed by Robert W. Blanchette, Richard C. Bond, and John H. McArthur, trustees of the Property of the Penn Central Transportation Company on May 2, 1975; by the Southern Railway Company on May 8, 1975; and by the Canadian National Railway Company and CP Rail on May 8, 1975; the replies filed by the Chicago and North Western Transportation Company on May 27, 1975; and by the Union Pacific Railroad Company on May 28, 1975; and the petition for interpretation and clarification filed by the Maine Central Railroad Company on May 8, 1975;

It appearing, That the Southern Railway objects to the 1964-68 test period average, the good cause standard for modification of this average, and the voluntary surrender of unspent incentive per diem funds to Rail Box without retention of the ownership of cars; but any arbitrariness in the test period average was remedied by the good cause standard for modification, that guidelines for using this standard were mentioned in the Commission's report at 349 I.C.C. at 314-15, and the carrier is not required to surrender funds to Rail Box but when it chooses to it does not retain ownership since the purpose of Rail Box is to set up a fleet of free-running boxcars in which "the participating railroad . . . takes no title or interest in the pool cars . . ." American Rail Box Car Co.—Pooling 347 I.C.C. 862, 869;

It further appearing, That the Canadian Railroads object to the surrender of incentive funds to Rail Box because the Canadian Railroads are not allowed to participate in Rail Box and Rail Box cars are barred from use in Canada, and thus there will be inefficient utilization of cars and some of the amounts paid by Canadian Railroads to American carriers could be surrendered to Rail Box which will be of no benefit to the Canadian Railroads; but since the objectives of the incentive per diem program are "to increase the supply of plain boxcars in the U.S." 339 I.C.C. 627, 630 and to "seek national solutions to the national 6-month shortage" 337 I.C.C. 217, 226 the Commission must look to the overall benefits of its modifications, the Canadian Railroads should raise their objections in the Rail Box proceeding, and their concern about the use of their funds is premature since they are net incentive creditors;

It further appearing, That the Penn Central requests that this proceeding be held open indefinitely, that carriers with net incentive balances file copies of their report to the Commission and to all parties of record for the year 1974, and that these carriers thereafter will file quarterly report to the Commission

with copies to all parties of record; but, that it has been repeatedly stated by the

chases and thus incentive funds can be used for leases the equivalent of a purchase of the cars; that per-

For Approval of the Pooling of Car Service with Respect to Box Cars" to the short title of "American Rail Box Car

with copies to all parties of record; but, that it has been repeatedly stated by the Commission that this proceeding is open-ended, that the Commission currently receives annual accounting of incentive funds, that there would be little benefit from quarterly reporting, and to supply the data to all the parties would be burdensome.

And it further appearing, That the Maine Central in its petition for interpretation and clarification asks that a carrier be allowed to draw down incentive funds for boxcars leased since the incentive per diem order became effective on June 1, 1970; that based on the Commission's decision in 343 I.C.C. 49, 57, incentive funds can be used not merely for the portion of the year after the effective date of the order but for the entire calendar year of the order; that leases the equivalent of a purchase have been interpreted as being the same as pur-

chases and thus incentive funds can be used for leases the equivalent of a purchase from January 1, 1970; that non-equity leases were not allowed until the Commission's order of March 31, 1975, and thus incentive funds can be applied on non-equity leases from January 1, 1975.

Wherefore and good cause appearing therefore:

It is ordered, That the Maine Central's petition be, and it is hereby, granted, in effect, by the above interpretation.

It is further ordered, That the petitions for reconsideration be, and they are hereby, denied.

It is further ordered, That the reference to the Rail Box decision in section 1036.4 of Title 49, Code of Federal Regulations at 349 I.C.C. 303, 333 be, and it is hereby changed from "Finance Docket No. 27589, American Rail Box Car Company and Trailer Train Company, et al.—

For Approval of the Pooling of Car Service with Respect to Box Cars" to the short title of "American Rail Box Car Co.—Pooling, 347 I.C.C. 862."

It is further ordered, That a copy of this order shall be delivered to the Director, Office of the Federal Register, for publication therein.

And it is further ordered, That the order entered in this proceeding on March 31, 1975, which order was stayed by order of May 12, 1975 pending disposition of the petitions be, and it is hereby, reinstated and modified to become effective October 1, 1975, without other change in the requirements of said order, except as indicated above.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

### INTERSTATE MOTOR CARRIER NOISE EMISSION STANDARDS

Final Regulations on Compliance

## Title 49—Transportation

## CHAPTER II—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. MC-42; Notice No. 75-17]

## PART 325—COMPLIANCE WITH INTERSTATE MOTOR CARRIER NOISE EMISSION STANDARDS

## Final Regulations on Compliance with Standards

• Purpose: The Director of the Bureau of Motor Carrier Safety is issuing these final regulations for the purpose of establishing measurement procedures and methodologies for determining whether commercial motor vehicles conform to the Interstate Motor Carrier Noise Emission Standards of the Environmental Protection Agency (40 CFR 202). •

## INTRODUCTION

On October 21, 1974, the Acting Administrator of the Environmental Protection Agency (EPA) issued final regulations establishing standards for maximum external noise emissions of motor vehicles having a gross vehicle weight rating (GVWR) or a gross combination weight rating (GCWR) of more than 10,000 pounds that are operated by commercial motor carriers engaged in interstate commerce (39 FR 38208). Those regulations were issued under the authority of section 18 of the Noise Control Act of 1972. Section 18 of the Noise Control Act of 1972 also directs the Secretary of Transportation to promulgate regulations to ensure compliance with the EPA's standards. The Secretary is required to carry out the regulations through the use of his powers and duties of inspection and enforcement authorized by the Interstate Commerce Act and the Department of Transportation Act. Those two statutes vest in the Department of Transportation the responsibility for issuing and enforcing the Federal Motor Carrier Safety Regulations.

On February 26, 1975, the Director of the Bureau of Motor Carrier Safety (BMCS) published in the FEDERAL REGISTER (40 FR 8658) a text of proposed regulations establishing measurement methodologies for determining whether commercial motor vehicles conform to the Interstate Motor Carrier Noise Emission Standards published by the EPA at 40 CFR 202. The purpose of this order is to establish final regulations which detail those measurement methodologies.

The objective of the regulations detailed herein is to prescribe the manner in which commercial motor vehicles will be inspected and examined, and their performance will be monitored and measured, to determine whether they conform to the EPA standards. Those standards become effective on October 15, 1975, and, as noted above, are applicable only to motor vehicles with a GVWR or a GCWR of more than 10,000 pounds which are operated by interstate motor carriers. The enforcement regulations contained herein also become effective on October 15, 1975.

## SUMMARY OF COMMENTS

Thirty responses were filed to the docket on this subject. The BMCS has carefully reviewed and considered all of those comments. A summary of the major points raised in those comments along with the Bureau's disposition of each follows:

(1) Several respondents suggested that the final rule should not be made applicable to older vehicles, thereby eliminating the potential of having to retrofit or improve the maintenance of some of these vehicles to meet the noise emission requirements.

Both the EPA and the BMCS were specifically directed by the language of section 18 of the Noise Control Act of 1972 to develop noise emission standards applicable to the operations of motor carriers engaged in interstate commerce regardless of the date of manufacture of the vehicle. The applicability section of the EPA standards reflects that mandate and the BMCS may not alter or limit the scope of that applicability.

(2) Several respondents cited the possibility of a vehicle being able to pass one test, say a low speed pass-by test, and yet fail another, say the stationary run-up test. They suggested a number of alternatives, such as using pass-by tests only for screening purposes while using stationary tests as the sole enforcing method. Another suggested that a successful demonstration that a vehicle could pass one of the three vehicle tests, should nullify a failure, by that same vehicle, of either of the other two tests.

EPA's noise emission standards clearly intend that the three vehicle tests that are specified be equally applicable to the operation of a motor vehicle subject to the standard. The BMCS regulations, therefore, merely specify the test procedures that are necessary when using each of these three tests.

BMCS is not at liberty to decrease the flexibility designed into the EPA standards by limiting enforcing agencies to only one of the specified tests.

(3) Numerous comments were submitted relative to the "need" for a tolerance when making measurements for enforcement purposes. Several respondents submitted data which were intended to document the imprecision of motor vehicle noise emission measurements. Variables, such as ambient temperature and atmospheric pressure, wind, sound measuring equipment variations, terrain at the measuring site, the presence of reflecting surfaces, such as curbs and guardrails in or around a site, and the potential for human error were cited as being factors which could influence noise measurements.

The Director is faced with a set of conflicting requirements with regard to this issue. On one hand is the need and desire to maintain the intended stringency of the EPA standard by not decreasing its effectiveness with the addition of a mandatory tolerance. On the other hand, there is the realization that unless some flexibility is built into any

enforcement measurement program, the probability is high that the rule will be improperly enforced and potentially inequitable.

The Director does not dispute the fact that the above-cited variables can, and do, affect motor vehicle noise emission measurements. What can be argued is the degree to which the presence or absence of these variables adversely affects a measurement in a practical sense.

It is highly improbable, for example, as one respondent suggested, that the positive tolerances implicitly allowed for both sound level meters (in ANSI S1.4-1971) and for coupler type calibrators (in ANSI S1.3-1971) could consistently combine to the disadvantage of fleet operators, thereby causing the meter readings to always be 3 dB higher than they should be. Theoretically this could happen, but practically and statistically it is a remote possibility.

If this logic were applied from the opposite viewpoint, it could be argued that a 3 dB penalty should be added to all readings since it is equally probable that all measured readings could be consistently 3 dB low. Mandating, as was suggested, that a 3 dB tolerance be added to all measurements to take into account this possibility alone would represent an irresponsible denigration of the intended stringency of the EPA standard.

Other respondents disputed the validity of allowing objects such as curbs and guardrails within a measurement site. Data were also submitted to show that high or low ambient temperature extremes can affect the levels measured.

One respondent cited the intent of Congress that there be uniform national standards in this area as being sufficient justification for a mandatory tolerance, since to do otherwise would potentially result in vehicles being cited in violation in one State and not in violation in another.

Some of the comments have pointed out combinations of conditions permitted under these regulations (i.e., reflecting surfaces just outside the required clear zone) which, under other test procedures (for example, those of the California Highway Patrol) would call for 1 dB corrections. Such corrections are not specified in these regulations. Other comments submitted to the EPA docket for that agency's standard, detailed the extraordinary circumstance of focusing reflecting surfaces (e.g., buildings behind and flanking the clear zone) which could increase measured sound levels by several dB.

The Director has carefully weighed these arguments and has decided against mandating a specific tolerance. He does so, however, with the knowledge that enforcement agencies will have to clearly demonstrate that a violation of the standard was measured, (i.e., that the specified level of the standard was exceeded by a meaningful minimum amount) and that the measurements were made with sufficiently accurate equipment in a sufficiently controlled environment to verify that the standard

was exceeded under the actual test conditions. In order to control as many of these variables as possible, one would have to choose a site having perfectly flat ground within and beyond the test site, uniform short grass in the case of a pass-by test, and paved asphalt or concrete for a stationary test, and absolutely no reflecting surfaces within or beyond the test site area.

Measurements would ideally be made only at temperatures of approximately 55° to 85° F (13° to 29.4° C), under standard atmospheric pressure, with no wind present. The site would ideally be in a rural location with extremely low background noise and low traffic volume. Measurements made on an individual vehicle would be taken with no other vehicles anywhere near the test site area.

Under the above conditions, and using Type 1 sound level measuring equipment, an enforcing agency could possibly cite as violations any vehicle measured at 1 decibel in excess of the level specified in the EPA Standard and be secure in the knowledge that their citation would be technically valid. However, noise measurements are rarely, if ever, made at sites such as the one described above.

In an effort to provide the widest geographic coverage possible, the Director has adopted an enforcement procedure that expands the potential number of inspection sites available to a higher number than would otherwise be possible if only "clean" test sites, from an acoustical measuring point of view, were utilized. What results is a trade-off. Measuring now becomes possible for a wider range of locations and conditions but the potential for variance slightly increases.

The regulation as written guards against many of the potential errors by including, among other things, such requirements as the 6 dB "rise and fall" requirement for pass-by tests and ground surface correction factors. The combined effects of these corrections do not guarantee with total certainty in each and every case, that other variables are not present to cause a meter reading to be high.

Enforcing agencies, therefore, must consider these uncertainties when enforcing the motor carrier noise emission standards. However, the application of a tolerance need not be mandatory in each and every case, as for example, in the situation where a carrier's vehicles are consistently measured at levels slightly above the allowable level, but within the tolerance range, and no corrective action on the part of the carrier has been evidenced. Enforcement agencies should inform the carrier of the situation, strongly recommending that the carrier take appropriate corrective actions to reduce the sound level of his vehicles safely below the standard before further equipment degradation produces actual violations.

The possibility that "noise traps" might emerge as a result of the issuance of these regulations was clearly on the minds of many respondents as they addressed themselves to this issue. The Director's position on this issue will not

totally satisfy them in that a lack of mandatory tolerance leaves some discretion to an enforcing agency. The narrow range within which enforcement agencies are to operate guards against the potential of noise traps to the extent feasible. The State and local agencies that currently enforce noise emission regulations generally do so in a professional and equitable manner. There is no reason to believe that these agencies or any other agencies enforcing noise regulations in the future will begin, with the issuance of these regulations, to do otherwise.

The BMCS, in the immediate future, will be issuing guidelines that will cover some of the more common pitfalls in noise emission measurements. When published, this document will be available to interested parties. The subject of measurement tolerances will be covered in that document.

(4) The EPA requested that the Bureau clarify which sections of this regulation must be incorporated by a State or local government wishing to adopt the Federal standards while complying with the "preemptive" clause contained in section 18(c) (1) of the Noise Control Act.

Clearly, the measurement methodologies contained in subparts C through G of these regulations constitute the second part of the Federal regulatory program of interstate motor carrier noise control. These subparts assure the uniform implementation and enforcement of the EPA noise emission standards. Subparts A and B need not be incorporated since they contain certain aspects which only pertain to the actions of Federal enforcing agents. The DOT is researching means to enhance the enforceability of the EPA standards. These research results, in addition to Federal, State, and local experience gained with the present regulations, will serve as bases for future amendments to these regulations.

(5) One respondent requested that proposed § 325.1(b) be modified to make it clear that the Bureau had no jurisdiction to enforce noise emission regulations on vehicles being operated in intrastate commerce.

Sections 18(a) (1) and (2) of the Noise Control Act authorize the EPA to set "... limits on noise emissions resulting from operation of motor carriers engaged in interstate commerce ...". Based on this language, EPA has promulgated final noise emission standards which clearly apply to both the intrastate as well as the interstate, operations of interstate motor carriers. Those standards do not apply to the wholly intrastate operations of intrastate motor carriers.

The role of the Department of Transportation, defined by section 18(b) of the Noise Control Act is to "... promulgate regulations to insure compliance with standards promulgated by the Administrator under this section."

Recognizing that EPA has the authority to set noise emission standards applicable to all operations of interstate motor carriers, it would be contrary to the Congressional intent for the Director to promulgate compliance regulations appli-

cable to only some operations of those motor carriers.

The Bureau's activities are further defined by the statement that, "The Secretary of Transportation shall carry out such regulations through the use of his powers and duties of enforcement and inspection authorized by the Interstate Commerce Act and the Department of Transportation Act." It is apparent that the phrase "... powers and duties of enforcement and inspection ..." as used in the above context does not carry with it the jurisdictional limitations referred to by the respondent. Rather, it expands upon the safety functions of the Bureau to now include jurisdiction over motor carrier noise emission enforcement activities. The jurisdiction attendant with these activities is derived from the Noise Control Act, not the Interstate Commerce Act, since this latter act addresses only the safety related activities of the Bureau.

To adopt the respondent's jurisdictional interpretation, pushed to its logical extreme, could result in the spurious argument that the Bureau could not enforce any EPA noise standard because it is not a safety standard. This was obviously not the intent of Congress. Accordingly, the applicability of these enforcement regulations extends to all the vehicles operated by a motor carrier who engages in interstate commerce.

(6) Several commenters suggested the need for additional language in § 325.1 (c) (3) and (6) to prohibit the intentional thwarting of noise measurements by sounding warning devices or by operating, at speeds greater than 5 mph (8 kph), auxiliary equipment designed for use at speeds less than 5 mph (8 kph).

The two sections in question, as originally proposed, were incorporated directly from the EPA noise emission standard. The exemptions were obviously added by EPA to preclude the possibility of inadvertently penalizing an operator for an otherwise justifiable and necessary act. They were not intended to provide a means for escaping noise emission measurements. Accordingly, these two sections have been modified to include measurement of sound generated by otherwise exempted sound sources if such sources are operated in an attempt to avoid enforcement measurements.

(7) Several suggestions were offered to change the time that an enforcement officer or agent may inspect a carrier's vehicles from "anytime" to "any reasonable time." Bureau safety investigators have never been intentionally unreasonable about the time they inspect the properties of motor carriers. Accordingly, it does not appear necessary to add the requested language.

(8) One respondent questioned the seemingly loose tolerances proposed for calibrators.

The tolerance proposed for calibrators was incorporated directly from ANSI S1.13-1971, *Methods for Measurements of Sound Pressure Levels*, for field type measurements. Since this is a recognized document for this subject area, its inclusion is appropriate herein. To further

emphasize this fact, the final regulation has been modified to incorporate by reference the typical highway locations. Relatively few, if any, of the sites used resemble the "freezing" type of test site that was

typical highway locations. Relatively few, if any, of the sites used resemble the "freezing" type of test site that was

having to be a minimum of 10 dB below the appropriate level in the new table.

(13) Concern was expressed by several

The 6 dB "rise and fall" requirement was added in an effort to ensure that when measurements are made, vehicles

a result of a period of "hot soak" while waiting to be tested. This condition is generally not encountered when the vehicle is operating.

waiver for radiator shutters, nor was one intended. Radiator shutters tend to increase a vehicle's overall noise level when they are closed. No data have been

emphasize this fact, the final regulation has been modified to incorporate by reference the requirements of this document rather than specifying a specific tolerance.

(9) The time intervals between sound level meter calibration checks, specified in proposed § 325.25, were questioned by several respondents as being too burdensome and potentially unnecessary. Several wording changes were suggested by these commenters. It was also suggested that microphone coupler type calibrators be specifically required.

The respondents on this issue indicate that repeated calibrations, relatively close in time, are unnecessary since the meter rarely drifts from its calibrated level after it has been set up. Accordingly, the section in question has been modified to incorporate fewer calibration checks once the meter stability has been established after initial set-up.

A requirement for coupler type calibrators has also been incorporated in the final rule, since this type of calibrator checks the function of both the microphone and the internal electronic systems of a sound level measurement system.

(10) It was suggested that the attenuation properties specified for windcreens in § 325.27 of the proposed regulation would place an unnecessary burden of proof on enforcing agents, and should, therefore, be dropped. The attenuation limits proposed were those specified by several sound level meter manufacturers as being the attenuation limits of the windcreens they currently offered for sale. It was the intention of the Bureau, in its proposal, to ensure that windcreens of the type and quality currently manufactured and in use, would continue to be the type used for enforcement purposes. Accordingly, the section has been reworded to reflect that intention.

Proposed §§ 325.33 and 325.53, which deal with site characteristics, drew the most comments and criticism from respondents. The comments were almost equally split in sentiment. State and local enforcement agencies generally indicated that the language, as proposed, was too legalistic, too precise in tone and would tend to hinder enforcement efforts by severely limiting the number of sites available for measurements and by creating evidential difficulties. Counter arguments were raised by users and manufacturers to the effect that the restrictions were too few, and that too many objects, such as curbs and guardrails, would be allowed within a site, thus potentially causing noise readings to be high. Specific objections were raised by both groups about 1) the allowable distances between the microphone and the vehicle, 2) clear zone distances, 3) allowable objects within a test site, specifically guardrails and curbs, 4) ground surface correction factors, and 5) topography at the measurement site.

Sufficient experience has been gained by State and local governments to indicate that noise emission measurements can be made effectively and equitably at

typical highway locations. Relatively few, if any, of the sites used resemble the "engineering" type of test site that was suggested to be made mandatory by several respondents.

In view of the previous discussions on measurement tolerances and the need for flexibility when choosing sites, little has been changed in this section from that which was proposed. The section has been reworded in an effort to make it clear that it will not be necessary to conduct topographical surveys of sites to ensure precise measurements of microphone heights and distances, and topography of the ground within the test site, relative to the roadway. The open site requirements relative to tunnels and overpasses have been extended to 200 feet (62 m) on the suggestion that this will totally preclude the possibility of this source of noise enhancement, but in so doing very few potential measurement sites will be excluded.

The distance correction factors have not been modified to allow measurements at distances less than 35 feet (10.7 m), nor more than 83 feet (25.3 m), since the sound propagation assumptions used to generate correction factors for these lesser or greater distances are not undisputed. Several factors cause measurements taken at distances closer than 35 feet to be viewed suspiciously. Among these are 1) near field acoustical effects not generally seen at greater measurement distances, 2) the fact that at close distances a passing truck can no longer be even approximated to be a point source of noise, thereby invalidating some theoretical source propagation models, and 3) the fact that reflection effects from the ground tend to become exaggerated at close-in measurement distances. These factors, heretofore, have combined to cause measurements at these closer distances to be highly unpredictable. Accordingly, until further data can be obtained relative to this issue, the Director has opted not to expand the range of allowable measurement distances.

New definitions have been added to define "relatively flat" as it applies to site topography, "traffic railings," and "hard" and "soft" as they relate to the ground surface within the site. For the sake of uniformity and consistency of enforcement, the last two definitions have been specified in absolute, quantitative terms. While it is realized that the break point between a "hard" and "soft" site, as defined herein, is arbitrary, it is presented in the interests of specificity, rather than as being a scientifically determined certainty. Due to this fact, care should be exercised when choosing sites to try to avoid those which are marginally "soft" or "hard."

(12) Several respondents pointed out the potential for confusion arising out of the use of the proposed tables of ambient sound levels.

In response to these comments, the ambient noise level tables have been dropped and a new table which lists maximum allowable emission levels has been included in the regulation, and ambient sound levels are now specified as

having to be a minimum of 10 dB below the appropriate level in the new table.

(13) Concern was expressed by several State noise enforcing agencies about the seeming stringency of the wind measurement requirements. Their practical experience has indicated that the maximum wind velocities specified can be viewed rather loosely with no detrimental effects to noise measurements. With this in mind, it was suggested that extremely accurate wind measuring devices, such as anemometers, while desirable, were not always necessary.

In view of the above, the wind measurement requirements have been reworded to reflect a wider latitude insofar as an absolute upper wind velocity limit is concerned.

(14) One State enforcing agency expressed the desire to be able to measure noise emissions with already fallen snow on the ground. Without this ability, they stated, enforcement efforts within their State would be severely curtailed.

Data were submitted to the docket which indicate that snow is generally a sound absorptive material. Accordingly, it could be expected to attenuate measured truck noise. Realizing this, if an enforcement agency still wishes to make measurements, they are free to do so and not be in jeopardy of unduly penalizing motor carriers. However, no correction factor can be applied for measurements made under these conditions since the amount of absorption attributable to snow varies so widely (e.g., from hard frozen to loose powder) as to preclude a single correction factor.

(15) Several respondents asked that §§ 325.35 and 325.55 be modified to make it clear that measurements were prohibited under any conditions of precipitation.

Since this was the original intention of the proposed language of the two sections, they have been modified to make this point clear.

(16) Several commenters requested a clarification as to what orientations were acceptable, with regard to observer position relative to the vehicle and the sound level meter, when the sound level meter is being hand held. Since the publication of the Notice of Proposed Rule Making (NPRM) on this subject, it has been noted that several observer positions may be appropriate, depending on which sound level measuring system is being used. Accordingly, §§ 325.37 and 325.57 have been modified to allow any observer orientation that is recommended by the manufacturer of the sound level meter.

(17) Several commenters suggested that § 325.51(a) (1) and (2), dealing with microphone location heights relative to the ground, be clarified.

The Director concurs and has simplified the language of the section in an attempt to clarify its original intent.

(18) Several commenters requested that the 6 dB "rise and fall" that was proposed in § 325.39 be changed to be an 8 or 10 dB "rise and fall." These requests were generally tied to discussions of the 10 dB "down" ambient noise level requirements contained in § 325.35.

The 6 dB "rise and fall" requirement was added in an effort to ensure that when measurements are made, vehicles are spaced sufficiently far apart so that neither direct sound radiation nor reflections from vehicles, other than the one being measured, interfere with or enhance the measured noise levels. This requirement is a corollary to the open site clear zone requirements and acts to validate those requirements.

The 6 dB figure was determined by B. H. Sharp in *Methods on Highway Noise Measurement Sites*, March 1972, Wyle Labs Report WSR 72-1. There is no reason to dispute the validity of the determination made therein nor is there any reason to tie the figure to the ambient noise level requirement. Accordingly, the figure remains at 6 dB.

(19) Considerable discussion centered around the proposal to reference microphone location points during stationary tests to the front face of the front bumper of the parked vehicle. Various alternative positions were suggested, such as on a line with the exhaust outlets, the rear face of the cab, and the midpoint of the vehicle's wheel base.

The proposed position was arbitrarily chosen as one which could be easily referenced and would therefore facilitate measurement procedures. The comments pointed out that, in some cases, this referencing system may result in less than maximum observed noise readings due to the sometimes distant location of the exhaust outlets relative to the vehicle's front bumper. Therefore, to ensure that the maximum readings envisioned by the test procedure are obtained, the referencing system has been changed to call out the vehicle's exhaust outlet(s).

(20) The New Jersey Turnpike Authority stated that they measure motor vehicle noise emissions with the microphone located 10±5 feet (3±1.5 m) above the ground. It was implied that they wished to continue this practice.

The noise survey data upon which the EPA based its Interstate Motor Carrier Noise Emission Standards were collected with microphone heights of 4±½ feet (1.2±.15 m) from the ground. In order to maintain the consistency of that standard, the microphone height originally proposed has been retained. Truck noise research sponsored by the U.S. DOT has shown that elevated microphones detect higher sound levels than those levels which would be detected at microphone heights of 4 feet (1.2 m). Thus, higher microphone elevations, if permitted, would impose a greater stringency than intended by the EPA standard.

(21) Several commenters, notably the U.S. EPA and the Illinois Environmental Protection Agency, expressed concern that the BMCS had, in effect, prescribed a standard by including a provision to allow vehicles equipped with fan clutches a "cool down" period, if necessary, prior to being subjected to a stationary noise emission test.

The provision was intended to eliminate the possibility of testing the vehicle with its radiator fan clutch engaged, as

a result of a period of "hot soak" while waiting to be tested. This condition is generally not encountered when the vehicle is operating.

The Director feels that, rather than prescribing a standard in this regard, he is merely prescribing the test procedures necessary to ensure compliance with the EPA standard when the technology identified by EPA as being available is utilized. The fan clutch has been identified as available noise abatement technology in the preamble to the EPA noise emission standard and in the EPA background document on the subject. Research sponsored by the U.S. DOT has shown rather conclusively that vehicles equipped with a fan clutch have their fans operating only 1 to 3 percent of the time the vehicle is in operation. (Accordingly, a substantial noise benefit is realized; see 40 FR 8658, February 28, 1975, for a further discussion of fan clutches.)

The exemption was proposed only for the stationary test since it is likely that during this test the fan clutch will engage. Vehicles waiting in a line at, say a weigh station, following high speed travel prior to arrival at the weigh station, are likely to be in a "hot soak" condition. Ram air across the radiator is absent and thermal loads on the engine cooling system will be high for this short period of time. Under these conditions, the fan may engage. If the vehicle were then subjected to a stationary test, which is likely to occur immediately after the vehicle is weighed, it is possible that, with the fan engaged, the vehicle would fail a test that it would otherwise pass, due to high fan noise. Such a situation is not compatible with the intent of the EPA standard since the manufacturer or the operator would have applied the technology available to him in this area, only to be penalized. If, after the prescribed 10-minute cool-down period, the vehicle still fails to comply, it is safe to assume that the fan clutch is out of adjustment or that another source of noise is excessive. Such failure to comply with the standard after cool-down shall be considered noncompliance.

The wording of the fan clutch provision has been modified to make it clear that any engine speed may be used to cool the engine down. This rewording should obviate the need for a cool down period longer than that initially proposed.

Subsequent discussions with officials of the U.S. EPA have clarified the logic, intent and authority of the proposed section. Agreement has been reached that the sections as included herein do not intrude upon the authority of EPA to set noise emission standards. However, to ensure the complete integrity of the EPA standards, EPA intends to amend their standard as soon as possible to provide specifically for use of fan clutches. The fan clutch provision applies only to the stationary test. No exemption or retest provisions apply to the drive-by tests.

In view of the above, the Bureau feels compelled to retain this provision. The provision does not, however, include a

waiver for radiator shutters, nor was one intended. Radiator shutters tend to increase a vehicle's overall noise level when they are closed. No data have been submitted to indicate that noise reduction benefits result from the use of radiator shutters. To the contrary, they tend to cause additional fan noise except when they are open.

(22) Several commenters suggested modifications to the proposed stationary test procedure to make it clear that: 1) the engine should be "rapidly" accelerated in neutral gear at wide open throttle; 2) tests could be made with the microphone located on either side of the vehicle; and 3) stationary tests on gasoline powered vehicles may be invalid due to excessive governor overshoot.

The first two points listed above appear to be valid, and, therefore, have been included in this final rule. The last point is not a valid one. The test data collected by the Society of Automotive Engineers (SAE) and others, taken to verify the repeatability and validity of the stationary test, included numerous gasoline engine vehicles. The peak readings obtained from those vehicles, during stationary tests, as well as the readings obtained from diesel engine vehicles, were equally considered by the EPA when arriving at the maximum allowable value for the stationary test. Accordingly, the high governor overshoot problem attributable to some gasoline engine vehicles has already been factored into the standard.

(23) Several respondents requested that the range of allowable measurement distances be expanded from 35 to 83 feet (10.7 to 25.3 m) to 26 to 99 feet (7.9 to 30.3 m).

For reasons outlined in the previous discussion on site characteristics (point No. 11 in this discussion), the Director has declined to expand the originally proposed limits. Should further data become available in the future which will verify the validity of measuring at these other distances without being too lenient or too stringent, the Director will reconsider this issue.

(24) Several respondents challenged the validity of the 2 dB correction factor for ground surfaces. Others proposed that measurements be made only at sites meeting the stringent requirements of the SAE J336 test procedure.

In both the preamble to the EPA final rule on the Interstate Motor Carrier Noise Emission Standards (39 FR 38208, October 29, 1975) and in the EPA Background Document for Interstate Motor Carrier Noise Emission Regulations (October 1974, EPA 550/9-74-017, p. 36-37), the EPA clearly states that the final maximum allowable values for the stationary and for highway operations tests were based on the assumption that the former test would be conducted on a "hard" site, and that the latter tests would be conducted at "soft" grassy sites. The documents then state that the differences between the allowable stationary test noise level and the low speed highway operations test level are attributable to site variations, and that

both levels would be the same if implemented at identical sites. The BMCS en-

associated with the exterior noise emission enforcement effort will not increase

tion. This is the statutory basis for § 325.13 of these rules. Section 220 also au-

This regulation is issued under the authority of Section 18 of the Noise Con-

mental Protection Agency, 40 CFR Part 202.

(b) Definitions in standards. All terms

both levels would be the same if implemented at identical sites. The BMCS enforcement procedures merely reflect this fact and, therefore, the inclusion of a ground surface correction factor is still deemed appropriate.

(25) One respondent pointed out the fact that under the proposed wording of § 325.91, exhaust-gas driven unloading systems would be prohibited since they employed an exhaust system cutout. It was requested that these types of cutouts be allowed.

The EPA standard on this subject obviously was not intended to prohibit exhaust-gas driven unloading systems. Accordingly, § 325.91 has been modified to make it clear that their continued use is not prohibited.

(26) One respondent asked that proposed § 325.93, dealing with visual inspections, be dropped since it was felt to be burdensome on carriers and manufacturers.

The BMCS is not at liberty to eliminate standards promulgated by the EPA under the provisions of the Noise Control Act. Accordingly, proposed § 325.93 has been retained.

#### ENVIRONMENTAL AND ECONOMIC IMPACT

Pursuant to the requirement of the National Environmental Policy Act (42 USC 4321 et seq.) and Executive Order 11821, Inflation Impact, Statements, dated November 27, 1974, the Director has considered both the economic and environmental impacts of these regulations and determined them to be negative. This is the case since the regulations impose no new substantive requirements on the motor carrier industry. Rather, the regulations specified herein merely detail the measurement methodologies that must be followed in order to implement the Interstate Motor Carrier Noise Emission Standards issued by the EPA at 40 CFR 202.

The EPA extensively considered both the economic and environmental impacts attendant to motor carrier noise emission standards in their Background Document for Interstate Motor Carrier Noise Emission Regulations, October 1974, EPA-550/9-74-017. That document should be consulted for a detailed discussion of the costs and benefits resulting from the EPA standards.

The BMCS has analyzed the costs attributable to its enforcement efforts in this area and again has determined them to have a negative impact. Bureau Safety Investigators, will add this function to their responsibilities. Approximately 10 new positions are envisioned, at this time, for noise enforcement purposes. Accordingly, manpower costs will be somewhat increased.

Equipment costs associated with the Federal enforcement effort have been largely absorbed during another related Bureau activity. As a consequence of the Bureau's recently promulgated in-cab noise level regulations (49 CFR 393.94), the Bureau procured sound level measurement systems, calibrators, and tripods. Therefore, new equipment costs

associated with the exterior noise emission enforcement effort will not increase significantly.

#### ENFORCEMENT

As stated in the preamble to the proposed rule on this subject, the Bureau anticipates that it will conduct a program of enforcing the noise emission standards through the same techniques that are used to enforce the Federal Motor Carrier Safety Regulations (FMCSR). Inspection and surveillance of motor carriers will be carried out through terminal surveys and equipment inspection and driver-equipment compliance checks at roadside sites. Under the Noise Control Act, a violation of an EPA Interstate Motor Carrier Noise Emission Standard gives rise to the possibility of imposing sanctions under Section 11 of the Act. The sanctions include criminal prosecution of knowing or willful violators, in which the maximum sentence may not exceed a fine of \$25,000 per day, imprisonment for 1 year, or both, in the case of first offenders, and a fine of \$50,000 per day, imprisonment for 2 years, or both, in the case of subsequent offenses. In addition, Section 11 authorizes the United States to secure an injunction against future violations in the appropriate United States District Court and permits the Administrator of the EPA, after notice and the opportunity for hearing, to issue cease-and-desist orders against violators.

Section 18(a) of the Noise Control Act clearly gives to the EPA the statutory authority to promulgate regulations setting limits on noise emissions resulting from the operation of motor carriers engaged in interstate commerce. The EPA has clearly defined the scope of its authority, in its final rule on this subject, to include all the vehicles, having a GVWR or a GCWR greater than 10,000 pounds (4,536 kg.), which are operated by motor carriers who engage in interstate commerce. This authority extends to both the intrastate and interstate operations of interstate motor carriers.

Section 18(b) of the Act authorizes the Secretary of Transportation to carry out the regulations for ensuring compliance with EPA noise emission standards "... through the use of his powers and duties of enforcement and inspection authorized by the Interstate Commerce Act and the Department of Transportation Act."

Since the scope of the EPA standard includes both the intrastate and interstate operations of interstate motor carriers, this section, in turn, expands the authority of the BMCS to allow active regulation of all the operations of interstate motor carriers, insofar as noise emissions are concerned.

The basic "powers and duties" referred to in section 220 of the Interstate Commerce Act, 49 U.S.C. 320, section 220, requires motor carriers to submit their properties and documents for inspection and examination by designated special agents of the Department of Transportation's Federal Highway Administra-

tion. This is the statutory basis for § 325.13 of these rules. Section 220 also authorizes the Department of Transportation to require periodic and special reports from motor carriers subject to the Department's jurisdiction. It is on this basis that the Bureau now requires motor carriers whose equipment is found to be defective during a driver-equipment compliance check to make a report to the Bureau certifying that repairs have been made (see 49 CFR 396.5). The Bureau will adopt a similar procedure in the case of motor vehicles which are found to be in violation of the noise emission standards.

The use by the Bureau of the administrative enforcement procedures described above, does not limit or restrict the administrative procedures or sanctions that a State or political subdivision thereof may employ in carrying out its motor carrier noise emission regulatory program, even after the effective date of the EPA standards and the Department of Transportation's regulations for implementing those standards. Section 18(c) of the Noise Control Act provides that after the Federal regulations have become effective, "... no State or political subdivision thereof may adopt or enforce any standard applicable to the same operation of such motor carrier unless such standard is identical to a standard applicable to noise emissions resulting from such operation prescribed by any regulation under this section." It is the position of the Bureau that, while the "preemption" provisions of Section 18(c) require States and their political subdivisions that have not secured a special variance to apply the criteria and measurement methodologies as are specified in Federal regulations to determine whether a motor vehicle is in conformity with noise emission standards, once a violation is detected, the State or local government may proceed to impose sanctions or take other corrective action in accordance with its own law. Thus, for example, a State could, if it wished, bring a civil penalty proceeding against a violator, notwithstanding the fact that, under Federal law, the violation is a crime. Similarly, a State could, if its law permits, impound equipment found in violation of the noise emission standards, even though Federal law does not provide for impoundment as a sanction.

The rules finalized herein do not explicitly refer to the matters discussed here under the heading of "Enforcement." This is the case because the resolution of issues relating to the imposition of sanctions after violations of the noise emission standards are detected is a function of statutory construction rather than regulatory issuance. The discussion is included at this point in order to give interested persons insight into the Bureau's current thinking on these important issues.

In consideration of the foregoing, the Director of the Bureau of Motor Carrier Safety is amending Subchapter A of Chapter III in title 49, CFR, by adding a new part 325, reading as set forth below.

This regulation is issued under the authority of Section 18 of the Noise Control Act of 1972, 42 U.S.C. 4917, the delegation of authority by the Secretary of Transportation at 49 CFR 1.48(p), and the delegation of authority by the Federal Highway Administrator at paragraph 7, Chapter 7, Part I of FHWA Order 1-1.

Issued on September 8, 1975.

ROBERT A. KAYE,  
Director, Bureau of  
Motor Carrier Safety.

#### Subpart A—General Provisions

- Sec. Scope of the rules in this part.
- 325.1 Effective date.
- 325.3 Definitions.
- 325.7 Allowable Noise Levels.
- 325.9 Measurement Tolerances.

#### Subpart B—Administrative Provisions

- 325.11 Issuance, amendment, and revocation of the rules in this part.
- 325.13 Inspection and examination of motor vehicles.

#### Subpart C—Instrumentation

- 325.21 Scope of the rules in this subpart.
- 325.23 Types of measurement systems which may be used.
- 325.25 Calibration of measurement systems.
- 325.27 Use of a windscreen.

#### Subpart D—Measurement of Noise Emissions; Highway Operations

- 325.31 Scope of rules in this subpart.
- 325.33 Site characteristics; highway operations.
- 325.35 Ambient conditions; highway operations.
- 325.37 Location and operation of sound level measurement systems; highway operations.
- 325.39 Measurement procedures; highway operations.

#### Subpart E—Measurement of Noise Emissions; Stationary Test

- 325.51 Scope of the rules in this subpart.
- 325.53 Site characteristics; stationary test.
- 325.55 Ambient conditions; stationary test.
- 325.57 Location and operation of sound level measurement systems; stationary test.
- 325.59 Measurement procedure; stationary test.

#### Subpart F—Correction Factors

- 325.71 Scope of the rules in this subpart.
- 325.73 Microphone distance correction factors.
- 325.75 Ground surface correction factors.
- 325.77 Computation of open site requirements—nonstandard sites.
- 325.79 Application of correction factors.

#### Subpart G—Exhaust Systems and Tires

- 325.91 Exhaust systems.
- 325.93 Tires.

AUTHORITY: Sec. 18, 86 Stat. 1234, 1249-1250, 42 U.S.C. 4917.

#### Subpart A—General Provisions

##### § 325.1 Scope of the rules in this part.

(a) The rules in this Part prescribe procedures for inspection, surveillance, and measurement of motor vehicles and motor vehicle equipment operated by motor carriers to determine whether those vehicles and that equipment conform to the Interstate Motor Carrier Noise Emission Standards of the Environ-

mental Protection Agency, 40 CFR Part 202.

(b) Except as provided in paragraph (c) of this section, the rules in this Part apply to motor carriers engaged in interstate commerce. The rules apply at any time or under any condition of highway grade, load, acceleration or deceleration.

(c) The rules in this Part do not apply to—

(1) A motor vehicle that has a Gross Vehicle Weight Rating (GVWR) of 10,000 pounds (4,536 kg.) or less;

(2) A combination of motor vehicles that has a Gross Combination Weight Rating (GCWR) of 10,000 pounds (4,536 kg.) or less;

(3) The sound generated by a warning device, such as a horn or siren, installed in a motor vehicle, unless such device is intentionally sounded in order to preclude an otherwise valid noise emission measurement;

(4) An emergency motor vehicle, such as a fire engine, an ambulance, a police van, or a rescue van, when it is responding to an emergency call;

(5) A snow plow in operation; or

(6) The sound generated by auxiliary equipment which is normally operated only when the motor vehicle on which it is installed is stopped or is operating at a speed of 5 miles per hour (8 kph) or less, unless such device is intentionally operated at speeds greater than 5 mph (8 kph) in order to preclude an otherwise valid noise measurement. Examples of that type of auxiliary equipment include, but are not limited to, cranes, asphalt spreaders, ditch diggers, liquid or slurry pumps, auxiliary air compressors, welders, and trash compactors.

##### § 325.3 Effective date.

The rules in this part are effective on October 15, 1975.

##### § 325.5 Definitions.

(a) Statutory definitions. All terms defined in the Noise Control Act of 1972

TABLE 1.—Maximum Permissible Sound Level Readings [decibel(A)]<sup>1, 2</sup>

If the distance between the microphone location point and the microphone target point is—	Highway operations test				Stationary tests	
	Soft site	Hard site	Soft site	Hard site	Soft site	Hard site
	35 mi/h or less	Above 35 mi/h	35 mi/h or less	Above 35 mi/h		
35 ft (10.7 m) or more but less than 39 ft (11.9 m).....	89	93	91	95	89	91
39 ft (11.9 m) or more but less than 43 ft (13.1 m).....	88	92	90	94	88	90
43 ft (13.1 m) or more but less than 47 ft (14.3 m).....	87	91	89	93	87	89
47 ft (14.3 m) or more but less than 51 ft (15.5 m).....	86	90	88	92	86	88
51 ft (15.5 m) or more but less than 55 ft (16.8 m).....	85	89	87	91	85	87
55 ft (16.8 m) or more but less than 59 ft (18.0 m).....	84	88	86	90	84	86

<sup>1</sup> The speeds shown refer to measurements taken at sites having speed limits as indicated. These speed limits do not necessarily have to be posted.

<sup>2</sup> This table is based on motor carrier noise emission requirements specified in 40 CFR 202.20 and 40 CFR 202.21.

##### § 325.9 Measurement tolerances.

(a) Measurement tolerances will be allowed to take into account the effects of the following factors:

(1) The consensus standard practice of reporting field sound level measurements to the nearest whole decibel.

(Pub. L. 92-574, 86 Stat. 1234) are used as they are defined in that Act.

(b) Definitions in standards. All terms defined in § 202.10 of the Interstate Motor Carrier Noise Emission Standards, 40 CFR 202.10, are used as they are defined in that section.

(c) Additional definitions.

(1) "Hard test site" means any test site having the ground surface covered with concrete, asphalt, packed dirt, gravel, or similar reflective material for more than ½ the distance between the microphone target point and the microphone location point.

(2) "Soft test site" means any test site having the ground surface covered with grass, other ground cover, or similar absorptive material for ½ or more of the distance between the microphone target point and the microphone location point.

(3) "Ground cover" means any of various low, dense-growing plants, such as ivy, myrtle, low weeds, or brush.

(4) "Traffic railing" means any longitudinal highway traffic barrier system installed along the side or median of a highway. For the purpose of this part, a traffic railing must have at least 35 percent of its vertical height, from the ground surface to the top of the railing, open to free space in order to qualify as an acceptable object within a noise measurement test site. Further, for the purposes of this part, posts or other discrete supports shall be ignored when ascertaining open free space.

(5) "Relatively flat" when used to describe a noise measurement site means a site which does not contain significant concave curvatures or slope reversals that may result in the focusing of sound waves toward the microphone location point.

##### § 325.7 Allowable noise levels.

Motor vehicle noise emissions, when measured according to the rules of this part, shall not exceed the values specified in Table 1.

(5) Variations resulting from reflected sound from small objects allowed within

(3) A relative response level tolerance consistent with those of either a Type 1

urement area. A plan view diagram of a standard test site, having an open site

(2) Loose material, such as gravel or sand.

be oriented toward the highway at an angle of not less than 70 degrees and not

(2) Measurements may be made at a test site having smaller or greater dimensions in accordance with the rules in

(5) Variations resulting from reflected sound from small objects allowed within the test site.

(6) The interpretation of the effects of the above cited factors by enforcement personnel.

(b) Measurement tolerances shall not exceed 2 decibels for a given measurement.

#### Subpart B—Administrative Provisions

§ 325.11 Issuance, amendment, and revocation of the rules in this part.

The procedures specified in Part 389 of this Chapter for the issuance, amendment, or revocation of the Federal Motor Carrier Safety Regulations apply to rule-making proceedings for the issuance, amendment, or revocation of the rules in this part.

§ 325.13 Inspection and examination of motor vehicles.

(a) Any special agent of the Federal Highway Administration (designated in Appendix B to Subchapter B of this Chapter) is authorized to inspect, examine, and test a motor vehicle operated by a motor carrier in accordance with the procedures specified in this Part for the purpose of ascertaining whether the motor vehicle and equipment installed on the motor vehicle conforms to the Interstate Motor Carrier Noise Emission Standards of the Environmental Protection Agency, 40 CFR Part 202.

(b) A motor carrier, its officers, drivers, agents, and employees must, at any time, submit a motor vehicle used in its operations for inspection, examination, and testing for the purpose of ascertaining whether the motor vehicle and equipment installed on it conforms to the Interstate Motor Carrier Noise Emission Standards of the Environmental Protection Agency, 40 CFR Part 202.

#### Subpart C—Instrumentation

§ 325.21 Scope of the rules in this subpart.

The rules in this subpart specify criteria for sound level measurement systems which are used to make the sound level measurements specified in Subpart D and Subpart E of this part.

§ 325.23 Type of measurement systems which may be used.

The sound level measurement system must meet or exceed the requirements of American National Standard Specification for Sound Level Meters (ANSI S1.4-1971), approved April 27, 1971, issued by the American National Standards Institute, throughout the applicable frequency range for either:

- (a) A Type 1 sound level meter;
- (b) A Type 2 sound level meter; or
- (c) A Type S sound level meter which has—

- (1) A-weighting frequency response;
- (2) Fast dynamic characteristics of its indicating instrument; and

<sup>1</sup> Copies of the specification may be secured from the American National Standards Institute, 1430 Broadway, New York, New York, 10018.

(3) A relative response level tolerance consistent with those of either a Type 1 or Type 2 sound level meter, as specified in Section 3.2 of ANSI S1.4-1971.

§ 325.25 Calibration of measurement systems.

(a) (1) The sound level measurement system must be calibrated and appropriately adjusted at one or more frequencies in the range from 250 to 1,000 Hz at the beginning of each series of measurements and at intervals of 5-15 minutes thereafter until it has been established that the sound level measurement system has not drifted from its calibrated level. Once this fact has been established, calibrations may be made at intervals of once every hour.

(2) The sound level measurement system must be checked periodically by its manufacturer, a representative of its manufacturer, or a person of equivalent special competence to verify that its accuracy meets the manufacturer's design criteria.

(b) An acoustical calibrator of the microphone coupler type designed for the sound level measurement system in use shall be used to calibrate the sound level measurement system in accordance with paragraph (a) of this section. The calibrator must meet or exceed the accuracy requirements specified in the American National Standards Institute Standard Methods for Measurements of Sound Pressure Levels, (ANSI S1.13-1971) for calibrators for field type measurements.

§ 325.27 Windscreens.

A properly installed windscreens, of the type recommended by the manufacturer of the Sound Level Measurement System, shall be used during the time that noise emission measurements are being taken.

#### Subpart D—Measurement of Noise Emissions Highway Operations

§ 325.31 Scope of the rules in this subpart.

The rules in this subpart specify conditions and procedures for measurement of the sound level generated by a motor vehicle engaged in a highway operation for the purpose of ascertaining whether the motor vehicle conforms to the Standards for Highway Operations set forth in 40 CFR 202.20.

§ 325.33 Site characteristics: highway operations.

(a) Measurement shall be made at a test site which is adjacent to, and includes a portion of, a traveled lane of a public highway. A microphone target point shall be established on the centerline of the traveled lane of the highway, and a microphone location point shall be established on the ground surface not less than 35 feet (10.7 m) or more than 83 feet (25.3 m) from the microphone target point and on a line that is perpendicular to the centerline of the traveled lane of the highway and that passes through the microphone target point. In the case of a standard test site, the microphone location point is 50 feet (15.2 m) from the microphone target point. Within the test site is a triangular measurement area. A plan view diagram of a standard test site, having an open site within a 50-foot (15.2 m) radius of both the microphone target point and the microphone location point, is shown in Figure 1. Measurements may be made at a test site having smaller or greater dimensions in accordance with the rules in Subpart F of this Part.

Figure 1  
STANDARD TEST SITE:  
HIGHWAY OPERATIONS

(b) The test site must be an open site, essentially free of large sound-reflecting objects. However, the following objects may be within the test site, including the triangular measurement area:

- (1) Small cylindrical objects such as fire hydrants or telephone or utility poles.
- (2) Rural mailboxes.
- (3) Traffic railings of any type of construction except solid concrete barriers (see § 325.5(c)(4)).
- (4) One or more curbs having a vertical height of 1 foot (.3 m) or less.

(c) The following objects may be within the test site if they are outside of the triangular measurement area of the site:

- (1) Any vertical surface (such as billboard), regardless of size, having a lower edge more than 15 feet (4.6 m) higher than the surface of the traveled lane of the highway.
- (2) Any uniformly smooth sloping surface slanting away from the highway (such as a rise in grade alongside the highway) with a slope that is less than 45 degrees above the horizontal.
- (3) Any surface slanting away from the highway that is 45 degrees or more and not more than 90 degrees above the horizontal, if all points on the surface are more than 15 feet (4.6 m) above the surface of the traveled lane of the highway.
- (4) The surface of the ground within the measurement area must be relatively flat (see § 325.5(c)(5)). The site shall be a "soft" test site. However, if the site is determined to be "hard," the correction factor specified in § 325.75(a) of this part shall be applied to the measurement.
- (5) The traveled lane of the highway within the test site must be dry, paved with relatively smooth concrete or asphalt, and substantially free of—
  - (1) Holes or other defects which would cause a motor vehicle to emit irregular tire, body, or chassis impact noise; and

(2) Loose material, such as gravel or sand.

(f) The traveled lane of the highway on which the microphone target point is situated must not pass through a tunnel or underpass located within 200 feet (61 m) of that point.

§ 325.35 Ambient conditions: highway operations.

(a) (1) Sound. The ambient A-weighted sound level at the microphone location point shall be measured, in the absence of motor vehicle noise, with fast meter response using a sound level measurement system that conforms to the rules in § 325.23 of this Part.

(2) The measured ambient level must be 10 dB(A) or more below that level specified in § 325.9, Table 1, which corresponds to the maximum permissible sound level reading which is applicable at the test site at the time of testing.

(b) Wind. The wind velocity at the test shall be measured at the beginning of each series of noise measurements and at intervals of 5-15 minutes thereafter until it has been established that the wind velocity is essentially constant. Once this fact has been established, wind velocity measurements may be made at intervals of once every hour. Noise measurements may only be made if the measured wind velocity is 12 mph (19.3 kph) or less. Gust wind measurements of up to 20 mph (32.2 kph) are allowed.

(c) Precipitation. Measurements are prohibited under any condition of precipitation, however, measurements may be made with snow on the ground. The ground surface within the measurement area must be free of standing water.

§ 325.37 Location and operation of sound level measurement system: highway operations.

(a) The microphone of a sound level measurement system that conforms to the rules in § 325.23 of this Part shall be located at a height of not less than 2 feet (.6 m) nor more than 6 feet (1.8 m) above the plane of the roadway surface and not less than 3½ feet (1.1 m) and not more than 4½ feet (1.4 m) above the surface on which the microphone stands.

(b) (1) When the sound level measurement system is hand-held or is otherwise monitored by a person located near its microphone, the holder must orient himself relative to the highway in a manner consistent with the recommendation of the manufacturer of the sound level measurement system.

(2) In no case shall the holder or observer be closer than 2 feet (.6 m) from the system's microphone, nor shall he locate himself between the microphone and the vehicle being measured.

(c) The microphone of the sound level measurement system shall be oriented toward the traveled lane of the highway at the microphone target point at an angle that is consistent with the recommendation of the system's manufacturer. If the manufacturer of the system does not recommend an angle of orientation for its microphone, the microphone shall

be oriented toward the highway at an angle of not less than 70 degrees and not more than perpendicular to the horizontal plane of the traveled lane of the highway at the microphone target point.

(d) The sound level measurement system shall be set to the A-weighting network and "fast" meter response mode.

§ 325.39 Measurement procedure: highway operations.

(a) In accordance with the rules in this subpart, a measurement shall be made of the sound level generated by a motor vehicle operating through the measurement area on the traveled lane of the highway within the test site, regardless of the highway grade, load, acceleration or deceleration.

(b) The sound level generated by the motor vehicle is the highest reading observed on the sound level measurement system as the vehicle passes through the measurement area, corrected, when appropriate, in accordance with the rules in Subpart F of this Part. (Table 1 in § 325.9 lists the range of maximum permissible sound level readings for various test conditions.) The sound level of the vehicle being measured must be observed to rise at least 6 dB(A) before the maximum sound level occurs and to fall at least 6 dB(A) after the maximum sound level occurs in order to be considered a valid sound level reading.

#### Subpart E—Measurement of Noise Emissions Stationary Test

§ 325.51 Scope of the rules in this subpart.

(a) The rules in this subpart specify conditions and procedures for measuring the sound level generated by a vehicle when the vehicle's engine is rapidly accelerated from idle to governed speed at wide open throttle with the vehicle stationary, its transmission in neutral, and its clutch engaged, for the purpose of ascertaining whether the motor vehicle conforms to the Standard for Operation Under Stationary Test, 40 CFR 202.21.

(b) The rules in this subpart apply only to a motor vehicle that is equipped with an engine speed governor.

(c) Tests conducted in accordance with the rules of this subpart may be made on either side of the vehicle.

§ 325.53 Site characteristics: stationary test.

(a) (1) The motor vehicle to be tested shall be parked on the test site. A microphone target point shall be established on the ground surface of the site on the centerline of the lane in which the motor vehicle is parked at a point that is within 3 feet (.91 m) of the vehicle's exhaust system outlet(s). A microphone location point shall be established on the ground surface not less than 35 feet (10.7 m) and not more than 83 feet (25.3 m) from the microphone target point. Within the test site is a triangular measurement area. A plan view diagram of a standard test site, having an open site within a 50-foot (15.2 m) radius of both the microphone target point and the microphone location point, is shown in Figure 2.

(2) Measurements may be made at a test site having smaller or greater dimensions in accordance with the rules in Subpart F of this Part.

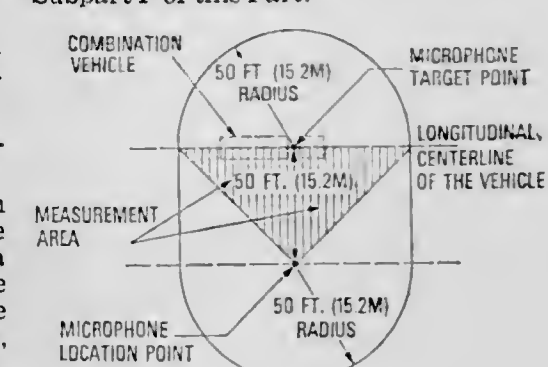

Figure 2  
STANDARD TEST SITE:  
STATIONARY TEST

(b) The test site must be an open site, essentially free of large sound-reflecting objects. However, the following objects may be within the test site, including the triangular measurement area:

- (1) Small cylindrical objects such as fire hydrants or telephone or utility poles.
- (2) Rural mailboxes.
- (3) Traffic railings of any type of construction except solid concrete barriers (see § 325.5(c)(4)).
- (4) One or more curbs having a height of 1 foot (.3 m) or less.

(c) The following objects may be within the test site if they are outside of the triangular measurement area of the site:

- (1) Any vertical surface, regardless of size (such as a billboard), having a lower edge more than 15 feet (4.6 m) above the ground.
- (2) Any uniformly smooth surface slanting away from the vehicle with a slope that is less than 45 degrees above the horizontal.
- (3) Any surface slanting away from the vehicle that is 45 degrees or more and not more than 90 degrees above the horizontal, if all points on the surface are more than 15 feet (4.6 m) above the surface of the ground in the test site.
- (4) The surface of the ground within the measurement area must be relatively flat. (See § 325.5(c)(5)). The site shall be a "hard" site. However, if the site is determined to be "soft," the correction factor specified in § 325.75(b) of this Part shall be applied to the measurement.

§ 325.55 Ambient conditions: stationary test.

(a) Sound. The ambient A-weighted sound level at the microphone location point shall be measured in the absence of motor vehicle noise, with fast meter response using a sound level measurement system that conforms to the rules in § 325.23 of this Part. The measured ambient level must be 10 dB(A) or more below that level specified in § 325.9, Table 1, which corresponds to the maximum permissible sound level reading which is applicable at the test site at the time of testing.

(b) Wind. The wind velocity at the test site shall be measured at the beginning of each series of noise measurements.

ments and at intervals of 5-15 minutes thereafter until it has been established that the wind velocity is essentially constant.

clude cranes, asphalt spreaders, liquid or slurry pumps, auxiliary air compressors, welders, and trash compactors.

level reading generated by the motor vehicle in accordance with § 325.39 of this part or the numerical average of the

between the microphone location point and the microphone target point. (See § 325.79(b)(1) for an example of the ap-

(b) The following examples illustrate the application of correction factors to sound level measurement readings:

(b) Is not equipped with either a muffler or other noise dissipative device, such as a turbocharger (supercharger driven

ments and at intervals of 5-15 minutes thereafter until it has been established that the wind velocity is essentially constant. Once this fact has been established, wind velocity measurements may be made at intervals of once every hour. Noise measurements may only be made if the measured wind velocity is 12 mph (19.3 kph) or less. Gust wind measurements of up to 20 mph (32.2 kph) are allowed.

(c) **Precipitation.** Measurements are prohibited under any conditions of precipitation, however, measurements may be made with snow on the ground. The ground within the measurement area must be free of standing water.

#### § 325.57 Location and operation of sound level measurement system; stationary test.

(a) The microphone of a sound level measurement system that conforms to the rules in § 325.23 of this part shall be located at a height of not less than 2 feet (.6 m) nor more than 6 feet (1.8 m) above the plane of the roadway surface and not less than 3½ feet (1.1 m) and not more than 4½ feet (1.4 m) above the surface on which the microphone stands.

(b) When the sound level measurement system is hand-held or otherwise monitored by a person located near its microphone, the holder must orient himself relative to the highway in a manner consistent with the recommendation of the manufacturer of the sound level measurement system. In no case shall the holder or observer be closer than 2 feet (.6 m) from the system's microphone, nor shall he locate himself between the microphone and the vehicle being measured.

(c) The microphone of the sound level measurement system shall be oriented toward the vehicle at an angle that is consistent with the recommendation of the system's manufacturer. If the manufacturer of the system does not recommend an angle of orientation for its microphone, the microphone shall be oriented at an angle of not less than 70 degrees and not more than perpendicular to the horizontal plane of the test site at the microphone target point.

(d) The sound level measurement system shall be set to the A-weighting network and "fast" meter response mode.

#### § 325.59 Measurement procedure: stationary test.

In accordance with the rules in this subpart, a measurement shall be made of the sound level generated by a stationary motor vehicle as follows:

(a) Park the motor vehicle on the test site as specified in § 325.53 of this subpart. If the motor vehicle is a combination (articulated) vehicle, park the combination so that the longitudinal centerlines of the towing vehicle and the towed vehicle or vehicles are in substantial alignment.

(b) Turn off all auxiliary equipment which is installed on the motor vehicle and which is designed to operate under normal conditions only when the vehicle is operating at a speed of 5 mph (8 kph) or less. Examples of such equipment in-

clude cranes, asphalt spreaders, liquid or slurry pumps, auxiliary air compressors, welders, and trash compactors.

(c) If the motor vehicle's engine radiator fan drive is equipped with a clutch or similar device that automatically either reduces the rotational speed of the fan or completely disengages the fan from its power source in response to reduced engine cooling loads, park the vehicle before testing with its engine running at high idle or any other speed the operator may choose, for sufficient time but not more than 10 minutes, to permit the engine radiator fan to automatically disengage when the vehicle's noise emissions are measured under stationary test.

(d) With the motor vehicle's transmission in neutral and its clutch engaged, rapidly accelerate the vehicle's engine from idle to its maximum governed speed with wide open throttle. Return the engine's speed to idle.

(e) Observe the maximum reading on the sound level measurement system during the time the procedures specified in paragraph (d) of this section are followed. Record that reading, if the reading has not been influenced by extraneous noise sources such as motor vehicles operating on adjacent roadways.

(f) Repeat the procedures specified in paragraphs (d) and (e) of this section until the first two maximum sound level readings that are within 2 dB(A) of each other are recorded. Numerically average those two maximum sound level readings. When appropriate, correct the average figure in accordance with the rules in Subpart F of this part.

(g) The average figure, corrected as appropriate, contained in accordance with paragraph (f) of this section, is the sound level generated by the motor vehicle for the purpose of determining whether it conforms to the Standard for Operation Under Stationary Test, 40 CFR 202.21. (Table 1 in § 325.9 lists the range of maximum permissible sound level readings for various test conditions.)

#### Subpart F—Correction Factors

##### § 325.71 Scope of the rules in this subpart.

(a) The rules in this subpart specify correction factors which are added to, or subtracted from, the reading of the sound level generated by a motor vehicle, as displayed on a sound level measurement system, during the measurement of the motor vehicle's sound level emissions at a test site which is not a standard site.

(b) The purpose of adding or subtracting a correction factor is to equate the sound level reading actually generated by the motor vehicle to the sound level reading it would have generated if the measurement had been made at a standard test site.

##### § 325.73 Microphone distance correction factors.

If the distance between the microphone location point and the microphone target point is other than 50 feet (15.2 m), the maximum observed sound

level reading generated by the motor vehicle in accordance with § 325.39 of this part or the numerical average of the recorded maximum observed sound level readings generated by the motor vehicle in accordance with § 325.59 of this part shall be corrected as specified in the following table:

TABLE 2—DISTANCE CORRECTION FACTORS

If the distance between the microphone location point and the microphone target point is:	The value (dB(A)) to be applied to the observed sound level reading is—
35 feet (10.7 m) or more but less than 39 feet (11.9 m) —	-3
39 feet (11.9 m) or more but less than 43 feet (13.1 m) —	-2
43 feet (13.1 m) or more but less than 48 feet (14.6 m) —	-1
48 feet (14.6 m) or more but less than 58 feet (17.7 m) —	0
58 feet (17.7 m) or more but less than 70 feet (21.3 m) —	+1
70 feet (21.3 m) or more but less than 83 feet (25.3 m) —	+2

##### § 325.75 Ground surface correction factors.

(a) Highway operations. When measurements are made in accordance with the rules in Subpart D of this part upon a test site which is "hard," a correction factor of 2 dB(A) shall be subtracted from the maximum observed sound level reading generated by the motor vehicle to determine whether the motor vehicle conforms to the Standards for Highway Operations, 40 CFR 202.20.

(b) Stationary Test. When measurements are made in accordance with the rules in Subpart E of this part upon a test site which is "soft," a correction factor of 2 dB(A) shall be added to the numerical average of the recorded maximum observed sound level readings generated by the motor vehicle to determine whether the motor vehicle conforms to the Standard for Operation Under Stationary Test, 40 CFR 202.21.

##### § 325.77 Computation of open site requirements—nonstandard sites.

(a) If the distance between the microphone location point and the microphone target point is other than 50 feet (15.2 m), the test site must be an open site within a radius from both points which is equal to the distance between the microphone location point and the microphone target point.

(b) Plan view diagrams of nonstandard test sites are shown in Figures 3 and 4. Figure 3 illustrates a test site which is larger than a standard test site and is based upon a 60-foot (18.3 m) distance

<sup>2</sup> Table 1, in § 325.9 is a tabulation of the maximum allowable sound level readings taking into account both the distance correction factors contained in § 325.73 and the ground surface correction factors contained in § 325.75.

between the microphone location point and the microphone target point. (See § 325.79(b)(1) for an example of the application of the correction factor to a sound level reading obtained at such a site.) Figure 4 illustrates a test site which is smaller than a standard test site and is based upon a 35-foot (10.7 m) distance between the microphone location point and the microphone target point. (See § 325.79(b)(2) for an example of the application of the correction factor to a sound level reading obtained at such a site.)

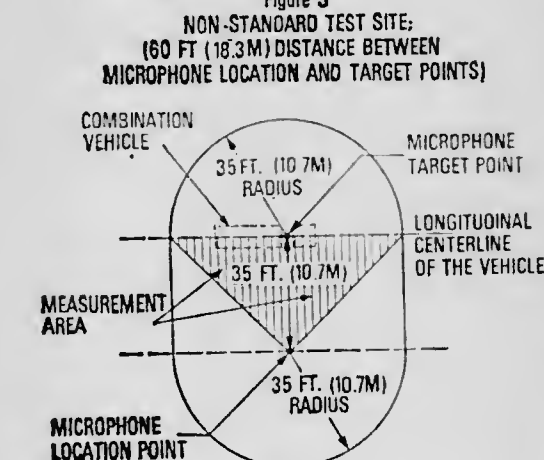

Figure 4  
NON-STANDARD TEST SITE;  
(35 FT. (10.7M) DISTANCE BETWEEN  
MICROPHONE LOCATION AND TARGET POINTS)

##### § 325.79 Application of correction factors.

(a) If two correction factors apply to a measurement they are applied cumulatively.

(b) The following examples illustrate the application of correction factors to sound level measurement readings:

(1) **Example 1—Highway operations.** Assume that a motor vehicle generates a maximum observed sound level reading of 86 dB(A) during a measurement in accordance with the rules in Subpart D of this Part. Assume also that the distance between the microphone location point and the microphone target point is 60 feet (18.3 m) and that the measurement area of the test site is acoustically "hard." The corrected sound level generated by the motor vehicle would be 85 dB(A), calculated as follows:

86 dB(A)	Uncorrected reading
+1 dB(A)	Distance correction factor
-2 dB(A)	Ground surface correction factor
85 dB(A)	Corrected reading

(2) **Example 2—Stationary test.** Assume that a motor vehicle generates maximum sound level readings which average 88 dB(A) during a measurement in accordance with the rules in Subpart E of this Part. Assume also that the distance between the microphone location point and the microphone target point is 35 feet (10.7 m), and that the measurement area of the test site is acoustically "soft." The corrected sound level generated by the motor vehicle would be 87 dB(A), calculated as follows:

88 dB(A)	Uncorrected average of readings
-3 dB(A)	Distance correction factor
+2 dB(A)	Ground surface correction factor
87 dB(A)	Corrected reading

#### Subpart G—Exhaust Systems and Tires

##### § 325.91 Exhaust systems.

A motor vehicle does not conform to the visual exhaust system inspection requirements, 40 CFR 202.22, of the Interstate Motor Carrier Noise Emission Standards, if inspection of the exhaust system of the motor vehicle discloses that the system—

(a) Has a defect which adversely affects sound reduction, such as exhaust gas leaks or alteration or deterioration of muffler elements, (small traces of soot on flexible exhaust pipe sections shall not constitute a violation of this subpart);

(b) Is not equipped with either a muffler or other noise dissipative device, such as a turbocharger (supercharger driven by exhaust gases); or

(c) Is equipped with a cut-out, by-pass, or similar device, unless such device is designed as an exhaust gas driven cargo unloading system.

##### § 325.93 Tires.

(a) Except as provided in paragraph (b) of this section, a motor vehicle does not conform to the visual tire inspection requirements, 40 CFR 202.23, of the Interstate Motor Carrier Noise Emission Standards, if inspection of any tire on which the vehicle is operating discloses that the tire has a tread pattern composed primarily of cavities in the tread (excluding sipes and local chunking) which are not vented by grooves to the tire shoulder or circumferentially to each other around the tire.

(b) Paragraph (a) of this section does not apply to a motor vehicle operated on a tire having a tread pattern of the type specified in that paragraph, if the motor carrier who operates the motor vehicle demonstrates to the satisfaction of the Director of the Bureau of Motor Carrier Safety or his designee that either—

(1) The tire did not have that type of tread pattern when it was originally manufactured or newly remanufactured; or

(2) The motor vehicle generates a maximum sound level reading of 90 dB(A) or less when measured at a standard test site for highway operations at a distance of 50 feet (15.3 m) and under the following conditions:

(i) The measurement must be made at a time and place and under conditions specified by the Director or his designee.

(ii) The motor vehicle must be operated on the same tires that were installed on it when the inspection specified in paragraph (a) of this section occurred.

(iii) The motor vehicle must be operated on a highway having a posted speed limit of more than 35 mph (56.3 kph).

(iv) The sound level measurement must be made while the motor vehicle is operating at the posted speed limit.

**DEPARTMENT OF DEFENSE**  
Defense Civil Preparedness Agency  
[ 32 CFR Part 1814 ]

**PERSONAL PRIVACY AND RIGHTS OF INDIVIDUALS REGARDING THEIR PERSONAL RECORDS**

**Extension of Comment Period and Correction of Reference to Systems of Records and Systems Notices**

In order to provide a thirty-day period of notice following **FEDERAL REGISTER** publication of the Notice of Proposed Rulemaking (40 FR 37498) the period for comment is extended five days to the new due date of September 25, 1975.

The proposed new Part 1814 is corrected by amending paragraph (b) of § 1814.9 (40 FR 47501) as follows:

1. In place of the date "August 13, 1975" substitute the date "August 18, 1975."

2. In place of the reference to system of records "PER 7, General personnel" substitute "PER 1, General personnel."

JOHN E. DAVIS,

Director,

Defense Civil Preparedness Agency,

[FR Doc. 75-24485 Filed 9-10-75; 3:55 pm]

**COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED**

**[ 41 CFR 51 ]**

**PRIVACY ACT RULES**

**Notice of Proposed Rulemaking**

Notice is hereby given that the Committee for Purchase from the Blind and Other Severely Handicapped has under consideration rulemaking action to amend 41 CFR 51 by establishing a new Part 8 which implements provisions of the Privacy Act of 1974 (Pub. L. 93-579).

The new Part 8 establishes procedures by which individuals may safeguard their privacy by obtaining access to and requesting changes in information about them which is under the Committee's control. The Committee accepts the responsibility to ensure that any system of records it maintains will be kept in such a way that the privacy of all individuals concerned is protected. Disclosure of information from any system of records will be made only in conformity with the Privacy Act.

Notice of system of records maintained by the Committee was published in the **FEDERAL REGISTER** on August 13, 1975 as required by Pub. L. 93-579, December 31, 1974.

Before taking action to issue the proposed rules in final form, the Committee will consider comments and suggestions received in writing on or before October 14, 1975.

Comments should be sent to the Executive Director, Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

**PROPOSED RULES**

Issued in Washington, D.C. on September 12, 1975.

By the Committee.

C. W. FLETCHER,  
Executive Director.

Part 51-8 is added as follows:

**PART 51-8—PRIVACY ACT RULES**

**Subpart 51-8.1—General Policy**

- Sec.
- 51-8.101 Maintenance of records
  - 51-8.101-1 Collection and use
  - 51-8.101-2 Standards of accuracy
  - 51-8.101-3 Content of systems of records
  - 51-8.101-4 Rules of conduct
  - 51-8.101-5 Safeguarding systems of records
  - 51-8.102 Availability of records
  - 51-8.102-1 Specific exemptions.

**Subpart 51-8.2—Disclosure of Records**

- 51-8.201 Conditions of disclosure.
- 51-8.202 Accounting of disclosures.

- 51-8.501 Reporting requirement.
- 51-8.502 FEDERAL REGISTER notices of establishment of new system or alteration of existing system.
- 51-8.503 Effective date of new systems of records or alteration of an existing system of records.

**Subpart 51-8.6—Exemptions**

- 51-8.601 [Reserved]

**Subpart 51-8.7—Rules of Conduct for Disclosure of Information About an Individual**

- 51-8.701 Committee rules of conduct.

AUTHORITY: Pub. L. 93-579, Dec. 31, 1974, 5 U.S.C. 552a.

**Subpart 51-8.1—General Policy**

- § 51-8.101 Maintenance of records.

- § 51-8.101-1 Collection and use.

Any information used in whole or in part in making a determination about an individual's rights, benefits, or privileges under the Committee programs, shall, to the extent practicable, be collected directly from the subject individual. At the time information is collected, the individual must be informed of the authority for collecting such information,

whether providing the information is mandatory or voluntary, the purposes for which the information will be used, the routine uses as published in the **FEDERAL REGISTER**, and the effects on the individual, if any, of not providing the information. The information collected shall be used only for the intended purpose or permission for additional use will be obtained from the subject individual.

**§ 51-8.101-2 Standards of accuracy.**

The Executive Director shall ensure that all records which are used by the agency to make determinations about any individual are maintained with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness to the individual. Upon petition by an individual, the Executive Director shall provide the individual with the opportunity to review his records, and to request amendment of a portion which the individual believes is not accurate, relevant, timely or complete. Prior to dissemination of records about any individual to any person or to another agency, exclusive of disclosure pursuant to the Freedom of Information Act, the Executive Director shall make reasonable effort to ensure that such records are accurate, complete, timely, and relevant.

**§ 51-8.101-3 Content of systems of records.**

The Executive Director shall maintain in records only such information about an individual as is relevant and necessary to accomplish an agency purpose required by statute or executive order. Such records shall not contain any information describing how any individual exercises rights guaranteed by the First Amendment unless specifically authorized by statute, by the subject individual, or is pertinent to and within the scope of an authorized law enforcement activity. For these purposes, First Amendment rights include, but are not limited to, religious and political beliefs, freedom of speech, the press, assembly, and freedom to petition.

**§ 51-8.101-4 Rules of conduct.**

Any employee of the Committee involved in the design, development, operation or maintenance of any system of records, or in maintaining any record, shall review the provisions of 5 U.S.C. 552a and these regulations, and shall conduct himself accordingly with the rules of conduct concerning the protection of personal information outlined in 41 CFR 51-8.7, Rules of Conduct for Disclosure of Information about an Individual.

**§ 51-8.101-5 Safeguarding systems of records.**

The Executive Director shall ensure that appropriate administrative, technical and physical safeguards are established to ensure the security and confidentiality of records and to protect against any anticipated threats or hazards to their security or integrity which could result in substantial harm, embarrassment, inconvenience, or unfairness

to any individual on whom information is maintained.

**§ 51-8.102 Availability of records.**

Committee records pertaining to an individual shall be made available to the subject individual to the greatest extent possible. Disclosures of records to other than the subject individual will be made only in accordance with subpart 51-8.2.

**§ 51-8.102-1 Specific exemptions.**

Systems of records maintained by the Committee which have been exempted from certain requirements of the Privacy Act are designated in subpart 51-8.6. An individual shall have access to all exempted records containing information about him under procedures outlined in subpart 51-8.3. Upon request, an individual shall receive an accounting of any disclosure of information about him.

**Subpart 51-8.2—Disclosure of Records**

**§ 51-8.201 Conditions of disclosure.**

No Committee member or employee of the Committee shall disclose any record to any person or to another agency without the express written consent of the subject individual unless the disclosure is:

(a) To Committee members or employees who have a need for the information in the official performance of their duties.

(b) Required under the provisions of the Freedom of Information Act.

(c) For a routine as published in the annual notice in the **FEDERAL REGISTER**.

(d) To the Bureau of Census for uses pursuant to Title 13.

(e) To a recipient who has provided the agency with advance adequate written assurance that the record will be used solely as a statistical research or reporting record and the record is to be transferred in a form that is not individually identifiable. The written statement should include as a minimum:

(1) A statement of the purpose for requesting the records, and

(2) Certification that the records will be used only for statistical purposes.

These written statements shall be maintained as records. In addition to stripping personally identifying information from records released for statistical purpose, the Committee will ensure that the identity of the individual cannot reasonably be deduced by combining various statistical records.

(f) To the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by the Administrator of General Services or his designee to determine whether the record has such value.

(g) To another agency or instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law, and if the head of the agency or instrumentality has made a written request to the agency which maintains the record specifying the particular portion desired and the law enforcement activity for which the record is sought.

**PROPOSED RULES**

quest to the agency which maintains the record specifying the particular portion desired and the law enforcement activity for which the record is sought.

(h) To a person showing compelling circumstances affecting the health and safety of an individual (not necessarily the individual to whom the record pertains). Upon such disclosure, a notification of such shall be sent to the last known address of the individual.

(i) To either House of Congress or to a subcommittee or committee (joint or of either House, to the extent that the subject matter falls within their jurisdiction).

(j) To the Comptroller General, or any of his authorized representatives in the course of the performance of the duties of the General Accounting Office, or

(k) Pursuant to the order of the court of competent jurisdiction.

**§ 51-8.202 Accounting of disclosures.**

(a) Except for disclosures made pursuant to paragraph (a) and (b) of subpart 51-8.201, an accurate accounting of each disclosure will be made and retained for five years after the disclosure or for the life of the record, whichever is longer. The accounting will include the date, nature, and purpose of each disclosure, and the name and address of the person or agency to whom the disclosure is made.

(b) The accounting will be recorded and maintained in any manner the Executive Director determines is satisfactory for the purposes of constructing a listing of all disclosures, and for providing a cross reference to the justification or basis upon which the disclosure was made, including written documentation required when records are released for statistical or law enforcement purposes and any written consents provided by the individual.

(c) Except for disclosures made to agencies or instrumentalities in law enforcement activities in accordance with § 51-8.201(2) or for disclosures made from systems exempted from this requirement of the Act as outlined in subpart 51-8.6, the accounting of disclosures will be made available to the individual upon request. Procedures for requesting access to the accounting are outlined in subpart 51-8.3.

**Subpart 51-8.3—Individual Access to Records**

**§ 51-8.301 Notification.**

Any individual who wishes to determine if a system of records maintained by the Committee contains a record pertaining to him should direct a request to the Executive Director at the address indicated in the public notice describing the system of records which has been published in the **FEDERAL REGISTER**. The request should display clearly the legend "Privacy Act Request" both on the face of the request letter and on the face of the envelope. The request letter should contain the complete name and identifying number of the system as published in the **FEDERAL REGISTER**; the full name, address, and telephone number of the subject individual; a brief description of the nature, time, place and circumstances of the individual's association with the Committee and any other information which the individual believes would facilitate the Executive Director's search for the record.

stances of the individual's association with the Committee and any other information which the individual believes would facilitate the Executive Director's determination whether the individual's name is included in the system of records. The Executive Director shall answer or acknowledge the request within ten working days.

**§ 51-8.302 Times, places and requirements for access requests.**

Records will be available for authorized access during normal business hours at the offices where the records are located. A requester should be prepared to identify himself through production of a driver's license, student or employee identification card, or other identification acceptable to the Executive Director. When the disclosure of records to the wrong individual would result in substantial harm, embarrassment, inconvenience, or unfairness to the subject individual, the Executive Director may require a notarized statement of identity. The Executive Director shall ensure that such times, places, and requirements for identification are not excessive and do not restrict individual access unduly.

**§ 51-8.303 Access procedures.**

**§ 51-8.303-1 Form of requests.**

(a) An individual must request access to his record in writing. The Executive Director shall accept by telephone only general inquiries for information regarding systems of records or procedures.

(b) A written request should be directed to the Executive Director as listed in the public notice describing the system of records. The individual should display clearly on the face of the request letter and on the face of the envelope the legend "Privacy Act Request", and include the complete name and identifying number of the system as published in the **FEDERAL REGISTER**; the full name, address, the telephone number of the individual; a brief description of the nature, time, place and circumstances of the individuals association with the Committee; and any other information which the individual believes would facilitate the Executive Director's search for the record.

(c) An individual who wishes to have a person of his choosing accompany him in reviewing a record must sign a statement authorizing the disclosure of his record in the presence of another individual, if so requested by the Executive Director. An individual who intends to visit the Committee office in order to review a record should make an appointment with the Executive Director at least one week in advance.

**§ 51-8.303-2 Special requirements for medical/psychological records.**

(a) The Executive Director may require an individual who requests access to his medical or psychological record to designate a physician of his choice to whom he may disclose the individual's record if in the opinion of the Executive Director, disclosure directly to the individual might be harmful.

**PROPOSED RULES**

**§ 51-8.304 Fees.**

**§ 51-8.304-1 Records available without**

(b) The Executive Director shall mark records which should not be disclosed directly to the subject individual and shall

results within ten working days. If a determination cannot be made within ten working days, the Executive Director

Blind and Other Severely Handicapped, 2009 14th Street N., Suite 610, Arlington, Virginia 22201.

**§ 51-8.502 Federal Register notice of establishment of new system or alteration of existing system.**

ual. The term "routine use" means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which

## PROPOSED RULES

(b) The Executive Director shall mark records which should not be disclosed directly to the subject individual and shall inform an individual requesting such records of the requirement to designate a physician to whom the records can be disclosed.

## § 51-8.303-3 Granting access.

(a) Upon receipt of a request for access to non-exempt records, the Executive Director shall make such records available to the individual, or shall acknowledge the request within ten working days. The acknowledgment shall indicate when the Executive Director will make the record available.

(b) If the Executive Director anticipates more than ten days in making a record available he also shall include in the acknowledgment specific reasons for the delay.

(c) If an individual's request for access does not contain sufficient information to permit the Executive Director to locate the record, the Executive Director shall request additional information from the individual and shall have ten working days following receipt of the additional information in which to make the record available, or to acknowledge receipt of the request and indicate when the record will be available. In no case shall more information be requested from the individual than that contained in the pertinent system of records.

(d) The Executive Director, at his discretion, either shall permit an individual to examine the original of the record, or shall provide the individual with a copy of the record. Fees shall be charged only for copies requested by the individual and not for copies provided to the individual for convenience of the agency.

(e) An individual may request to pick up a record in person or receive it by mail, directed to the name and address provided by the individual in his request. The Executive Director shall not make a record available to a third party for delivery to the subject individual, except in the case of medical records outlined in § 51-8.303-2.

(f) The Executive Director shall maintain in an individual's record an accounting of disclosures to the individual documenting compliance with the request.

(g) The procedures for access to an accounting of disclosures is identical to the procedure for access to a record as set forth in this subsection.

## § 51-8.303-4 Denials of access.

(a) The Executive Director may deny any individual access to his record only on the grounds that the Committee has published rules in the FEDERAL REGISTER exempting the pertinent system of records from the access requirement.

(b) Upon receipt of a request for access to an exempt system, the Executive Director shall prepare a letter denying access. The letter of denial shall contain a justification for denial of access which includes appropriate citation to the exemption provisions of these rules or other FEDERAL REGISTER notice exempting the system.

## § 51-8.304 Fees.

## § 51-8.304-1 Records available without charge.

The Executive Director shall make one copy of a record available to an employee without charge, and may waive the fee requirement for any other individual requesting records if the cost of collecting the fee is an unduly large part of, or greater than, the fee, or when furnishing the record without charge conforms to generally established business custom or is in the public interest.

## § 51-8.304-2 Records available at a fee.

The Executive Director shall provide one copy of a record to the individual at a fee proscribed in 51-8.304-5. A reasonable number of additional copies will be provided for the applicable fee where reproduction services are not readily available.

## § 51-8.304-3 Prepayment of fees over \$25.

When the Executive Director determines that the anticipated total fee is likely to exceed \$25, he shall notify the individual that he must prepay the anticipated fee prior to making the records available. The Committee will remit the excess paid by the individual or bill the individual for an additional amount according to variations between the final fee charged and the amount prepaid.

## § 51-8.304-4 Form of payment.

Payment shall be by check or money order payable to the Committee for Purchase from the Blind and Other Severely Handicapped and shall be addressed to the Executive Director.

## § 51-8.304-5 Reproduction fee schedule.

(a) The fee for reproducing a copy of a record (by routine electrostatic copying) up to and including material 8½ x 14 inches shall be \$0.10 per page.

(b) The fee for reproducing a copy of a record over 8½ x 14 inches or whose physical characteristics do not permit reproduction by routine electrostatic copying shall be the direct cost of reproducing the records through Government or commercial sources.

## Subpart 51-8.4—Requests To Amend Records

## § 51-8.401 Submission of requests to amend records.

An individual who desires to amend any record or information pertaining to him should direct a written request to the Executive Director, Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street, N., Arlington, Virginia 22201. A request should bear the legend "Privacy Act—Request to Amend Record" prominently marked on both the face of the request letter and the envelope.

## § 51-8.402 Review of requests to amend records.

(a) Upon receipt of a request to amend a record, the responsible official, whenever practicable shall complete the review and advise the individual of the

results within ten working days. If a determination cannot be made within ten working days, the Executive Director, within ten working days, shall send the individual a written acknowledgement of receipt of the request including a description of the request and the date when the requester may expect to be advised of action taken on the request. Except in unusual circumstances, the Executive Director shall complete the review within 30 working days. In unusual circumstances, causing delay beyond the 30 day limit, the Executive Director shall inform the individual in writing of the cause of delay, the actions taken to review the record, and the date the Executive Director anticipates the review to be complete.

(b) When reviewing a record in response to a request to amend, the Executive Director also shall review the request relevance, timeliness, and completeness of the record to ensure fairness to the individual in any determination made on the basis of the record. With respect to a request to delete information, the Executive Director also shall review the request and record to determine whether the information is relevant and necessary to accomplish an agency purpose required to be accomplished by law or Executive Order.

## § 51-8.403 Approval of requests to amend.

If the Executive Director agrees to amend a record, he promptly shall make the necessary corrections to the record and shall send a copy of the corrected record to the individual. Where an accounting of disclosure has been maintained, he shall advise all previous recipients of the record of the fact that a correction was made of the substance of the correction. Where practicable, the Executive Director shall send a copy of the corrected record to previous recipients.

## § 51-8.404 Refusal of request to amend.

(a) The Executive Director, or any official acting for him, shall have the authority to issue an initial refusal of a request to amend a record within his custody and shall be responsible for the initial adverse agency determination.

(b) If the Executive Director, after reviewing the request to amend a record, determines not to amend the record, he promptly shall advise the requester in writing of the determination. The refusal letter (1) shall state the reasons for refusal, (2) shall state the requester's right to seek a review of the initial determination, and (3) shall state the procedures for requesting such review.

## § 51-8.405 Request of review of refusal to amend a record.

(a) An individual who disagrees with the refusal to amend may appeal that refusal with the Committee. An individual should address a request for review of a refusal to amend any record, exclusive of a personnel record of a current Committee employee to the Chairman, Committee for Purchase from the

Blind and Other Severely Handicapped, 2009 14th Street N., Suite 610, Arlington, Virginia 22201.

(b) A request to review must be in writing and should include a copy of the initial request and refusal to amend. The request to review should bear the legend "Privacy Act—Request for Review of Refusal to Amend" on both the face of the letter and the envelope. The Chairman shall complete the review and make a determination no later than 30 working days after receipt of the request for review, unless a determination is made to extend the 30 day period. If a determination is made to extend the 30 day period, the Chairman shall notify the requester in writing of the reasons for the delay and the date when the review will be completed.

(c) Upon receipt of a request to review a refusal to amend, the Chairman shall undertake an independent review of the request and initial determination. If, after conducting the review, the Chairman agrees to amend, he shall notify the requester promptly in writing of the determination, amend the record, and notify previous recipients in accordance with § 51-8.403.

(d) If, after conducting the review, the Chairman agrees with the refusal to amend the record, he shall notify the requester promptly in writing of the determination. The notification shall include the reasons for the refusal, and shall advise the individual of his right to file a statement of disagreement, and the procedures for doing so. The Chairman also shall advise the individual that such statement of disagreement will be made available in any subsequent disclosures of the record together with a concise statement summarizing reasons for refusal where the responsible official deems it appropriate. The Chairman also will advise the individual of his right to bring civil action against the agency in a district court of the United States.

## Subpart 51-8.5—Report on New Systems and Alteration of Existing Systems

## § 51-8.501 Reporting requirement.

(a) No later than 30 days prior to the establishment of a new system of records, the Executive Director shall submit a copy of the proposal to the President of the Senate, the Speaker of the House of Representatives, and the Director of the Office of Management and Budget for their evaluation of the probable or potential effect of such proposal on the privacy and other personal or property rights of individuals of the disclosure of information relating to such individuals.

(b) No later than 30 days prior to the alteration of a system of records, the Executive Director for the maintenance of that system of records shall submit a copy of the proposal to the President of the Senate, the Speaker of the House of Representatives, and the Director of the Office of Management and Budget for their evaluation of such proposal on the privacy and other personal or property rights of individuals of the disclosure of information relating to such individuals.

## PROPOSED RULES

## § 51-8.502 Federal Register notice of establishment of new system or alteration of existing system.

(a) When the Executive Director receives notice that the Senate, the House of Representatives, and the Office of Management and Budget do not object to the establishment of a new system of records, or the alteration of an existing system of records, or

(b) When no fewer than 30 days elapse from the submission of the proposal to the Senate, the House of Representatives, and the Office of Management and Budget, without receipt by the Executive Director of an objection to the proposal, then a notice shall be published in the FEDERAL REGISTER of the proposed establishment or alteration of a system of records. The notice shall include all of the information required to be provided by the Privacy Act of 1974, and such other information as deemed necessary.

## § 51-8.503 Effective date of new systems of records or alteration of an existing system of records.

Systems of records proposed to be established or altered in accordance with the provision of the subpart shall be effective no sooner than 30 days from the publication of notice required by Section 51-8.502.

## Subpart 51-8.6—Exemptions

## § 51-8.601 [Reserved]

## Subpart 51-8.7—Rules of Conduct for Disclosure of Information About an Individual

## § 51-8.701 Committee rules of conduct.

(a) Every Committee member and employee who is involved in the design, development, operation, or maintenance of a system of records, or who has access to a system of records shall familiarize himself with the requirements of the Privacy Act of 1974 (5 U.S.C. 552a) and the Committee regulations and orders issued thereunder and apply these requirements to all systems of records.

(b) No Committee member or employee shall disclose any record which is contained in a system of records by any means of communication to any person, or to another agency, except pursuant to a written request by, or with the prior written consent of the individual to whom the record pertains, unless the disclosure would be to a recipient specified in paragraph c of this section. The term "record" means any item, collection, or grouping of information about an individual that is maintained by an agency, including but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph. The term "system of records" means a group of any records under the control of the Committee from which information is retrieved by the name of the individual or by some identifying number symbol, or other identifying particular assigned to the individual.

ual. The term "routine use" means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected. The term "individual" means a citizen of the United States or an alien lawfully admitted for permanent residence. The term "agency" is defined in 5 U.S.C. 552(e).

(c) An employee may disclose any record which is contained in a system of records, without a written request by and without the prior written consent of the individual to whom the record pertains, if the disclosure would be:

(1) To those Committee members and employees of the agency which maintains the record who have a need for the record in the performance of their duties;

(2) Required under section 552 of Title 5 U.S.C.;

(3) For a routine use as described in paragraph b, above;

(4) To the Bureau of the Census for purposes of planning or carrying out a census or survey or related activity pursuant to the provisions of Title 13 U.S.C.;

(5) To a recipient who has provided the agency with advance adequate written assurance that the record will be used solely as a statistical research or reporting record, and the record is to be transferred in a form that is not individually identifiable;

(6) To the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by the Administrator of General Services or his designee to determine whether the record has such value;

(7) To another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law, and if the head of the agency or instrumentality has made a written request to the agency which maintains the record specifying the particular portion desired and the law enforcement activity for which the record is sought;

(8) To a person pursuant to a showing of compelling circumstances affecting the health or safety of an individual if upon such disclosure notification is transmitted to the last known address of such individual;

(9) To either House of Congress, or, to the extent of matter within its jurisdiction, any committee or subcommittee thereof, any joint committee of Congress or subcommittee of any such joint committee;

(10) To the Comptroller General, or any of his authorized representatives, in the course of the performance of the duties of the General Accounting Office; or

(11) Pursuant to the order of a court of competent jurisdiction.

(d) No Committee member or employee shall maintain a record describing how any individual exercises rights guaranteed by the First Amendment un-

## PROPOSED RULES

## FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 206]

### PRIVACY ACT OF 1974

#### Notice of Proposed Rulemaking

The Federal Energy Administration ("FEA") hereby gives notice of a proposal to amend Chapter II of Title 10 of the Code of Federal Regulations by the addition of Part 206—Privacy Act. Through these proposed regulations and the notice of systems of records and "routine uses" of such records published in the August 27, 1975, issue of the FEDERAL REGISTER (40 FR 39321), FEA will implement the requirements of the Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a) ("Act").

#### INTRODUCTION

There are two broad objectives to the act—(1) to provide an individual the op-

portunity to determine if records maintained by Federal agencies contain personal information about him by giving public notice of the various systems of records being maintained and the uses to which the information routinely will be put, and to insure that he is able to ascertain the correctness of such information and have the records corrected or amended, if justified; and (2) to place restrictions on the manner in which personal information about an individual is collected, maintained and disseminated by Federal agencies.

The scope of the Act, as implemented by the proposed regulation, is circumscribed by the definitions of two terms:

"System of records" means a group of any records under the control of the FEA from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual.

"Record" means any item, collection, or grouping of information about an individual that is maintained by the FEA, including, but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph.

The only systems of records to which the Act applies, therefore, are those containing personal information about an individual, and only then if the record containing that information can be retrieved by use of the individual's name or some other identifier keyed to his name. In addition, the Office of Management and Budget Circular No. A-108 cites Senate legislative history to support a narrowing of the Act's coverage to exclude from "personal" information, information about an individual acting in an entrepreneurial capacity (40 FR 28951, July 9, 1975). Given the nature of FEA's responsibilities and functions, some of FEA's systems of records are excluded from the Act's coverage (E.g., FEA maintains records that contain information about an individual in his capacity as a sole proprietorship).

The Act's two objectives were satisfied in part by the August 27 publication in the FEDERAL REGISTER of a notice of the systems of records containing information about individuals that are maintained by FEA. These proposed regulations provide the structure and means to accomplish the remainder of the Act's objectives. The proposed regulations can be summarized by grouping their eighteen sections into four categories: (1) Description of procedures for gaining access to records, for verifying the identity of the individual making the request, and for disclosing the information to the person making the request, other agencies, or to persons other than the individual who is the subject of the record (§ 206.3 through § 206.6); (2) description of the content of the systems of records and the methods by which such information will be collected (§§ 206.7 and 206.8); (3) description of the method by which an individual can request that the record pertaining to him

be corrected or amended, FEA's procedures in acting on such request, and the procedures to appeal the denial by FEA of that request (§ 206.9 through § 206.11); and (4) the miscellaneous sections, which include the purpose and scope (§ 206.1), the requirement for public notice of the systems of records (§ 206.12), criminal penalties (§ 206.13); the fees for supplying copies of records (§ 206.16); the satisfaction of the requirement in Section 7(i)(1)(D) of the Federal Energy Administration Act of 1974 that any FEA regulations include certain procedures (§ 206.17); and the addresses of the FEA Regional Offices (§ 206.18).

**Exemptions.** Throughout this discussion there are references to the fact that certain systems of records may be exempt from some of the Act's requirements. The Act provides that an agency may claim an exemption from certain of the Act's requirements for certain systems of records. The exemptions are of two types—general and specific. At this time FEA is not proposing to claim the general exemption for any of its records. FEA, however, is proposing to claim exemptions for three systems of records noticed in the August 27 issue of the FEDERAL REGISTER: FEA-10 Minority Group Data File; FEA-6 Personnel Security Records (only the memorandum identified as OSI form DPA 24); and FEA-7 Investigative Report Records (only investigative records concerning FEA employees, past and present).

FEA-6 and 7 are systems of records that include investigatory materials compiled for law enforcement purposes. The Act (5 U.S.C. 552a(k)(2)) provides an exemption for such records. FEA proposes that the records be exempted from the requirement that FEA provide access to the record (§ 206.3-5) or make available upon request the accounting of any disclosures of information (§ 206.6(d)), and the requirement that information maintained in the record only be that necessary to carry out a purpose required to be accomplished by a statute or executive order (§ 206.7(a)). However, FEA does not propose to claim an exemption from the Act's requirement that procedures for access be provided. This is to enable an individual to exercise a provision in the Act (5 U.S.C. 552a(k)(2)) that requires disclosure "if any individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or for which he would otherwise be eligible, as a result of the maintenance of such material. . . ." (The assertion of these grounds would have to be included in the request for access (§ 206.3)). FEA is not required to disclose this record, however, if the material disclosed would reveal the identity of a source who provided the information on an assure of the confidentiality of his identity. Nevertheless, FEA may waive the exemption as to that material if the source who provided the information on an assurance of confidentiality will agree to the release of the information that would identify him. If FEA determines that the record does not contain information that is adverse

to the individual making the request, or if the material disclosed would reveal the identity of a source who provided the information on an assure of the confidentiality of his identity. Nevertheless, FEA may waive the exemption as to that material if the source who provided the information on an assurance of confidentiality will agree to the release of the information that would identify him. If FEA determines that the record does not contain information that is adverse

or detrimental to the individual making the request, or for good cause shown; and the proposed access procedures (§ 206.3) provide the means for the individual to seek this waiver. Furthermore, for good cause shown, FEA may in its discretion waive the exemption as to other records in the investigatory file, and the access procedures must be utilized for that request. The objective of these waiver procedures is to provide FEA the flexibility to review the blanket exemption from the Act's requirement that access to systems of records be provided upon request and, if appropriate, provide an individual access to an exempt record.

FEA-10 is a statistical record, and FEA proposes to claim an exemption, in accordance with 5 U.S.C. 552a(k)(4) from the requirement that FEA provide an individual access to the record (§§ 206.3-6, 206.9-11) and make available, upon request by an individual the accounting of any disclosures of the record by FEA to other agencies or other persons (§ 206.6(d)).

FEA-6 and 7 also are systems of records that include investigatory material used by FEA to determine suitability, eligibility, or qualifications for employment, and under the Act (5 U.S.C. 552a(k)(5)), an exemption may be claimed for such records. FEA proposes that the records be exempted from the requirement that FEA provide access to the record (§ 206.3-5) or make available upon request the accounting of any disclosures of information (§ 206.6(d)), and the requirement that information maintained in the record only be that necessary to carry out a purpose required to be accomplished by a statute or executive order (§ 206.7(a)). As with the "(k)(2)" exemption of these systems of records previously discussed, FEA does not propose to exercise its exemption from the Act's requirement that procedures for access be provided, to enable an individual to request a waiver of the exemption. The grounds on which it will provide access to a record containing information that would identify a source who had been assured his identity would be confidential are the same as described in the "(k)(2)" exemption.

#### PROCEDURES FOR ACCESS TO AND DISCLOSURE OF RECORDS

Any individual may request information regarding whether one of FEA's systems of records (as defined in the Act and in the proposed regulations) contains any information pertaining to him and may gain access to the record or any information about him in the system of records, unless access has been limited as a result of an exemption claimed by FEA. The individual may review and make copies of the record or information and, upon request, may be accompanied during such review by a person of his own choosing. The request must be in writing and may be submitted by mail or in person to the FEA Privacy Act Officer. The Act provides that if the individual is a minor or has been declared incompetent due to physical or mental incapacity or age by a court of competent jurisdiction, a parent or legal

guardian may request access and review the individual's record.

To insure that information in the record is not disclosed to an unauthorized individual, FEA is proposing procedures for verification of the identity of the individual making the request. That verification would be required whether the request is made by mail or in person. If the person making the request is acting in his capacity as either a parent or a legal guardian, there also must be verification of the status of the requester as parent or guardian of the individuals whose records are being sought.

The proposed regulations provide that FEA promptly will act on each request for information about a record or for access to a record. If FEA grants the request, the notification to the individual will include the methods of access, the place at which the record may be reviewed and other appropriate information. If the request is denied, it will state the reasons why and advise the individual making the request of the civil remedies provided by the Act (5 U.S.C. 552a(g)(1)(B)).

It is proposed that special access procedures apply to medical records. FEA may require the individual to provide a statement from his physician or mental health professional that release of the records directly to the individual will not adversely affect the individual. FEA may determine, however, that the record should only be released to a physician or mental health professional designated by the individual.

The proposed regulations provide that FEA will not disclose the record to agencies or persons other than the individual who is the subject of the record except in specified circumstances. These "circumstances" track the provisions of 5 U.S.C. 552a(b) or are otherwise specified in the Act. In addition, the regulations would require that FEA make an accounting of those disclosures, except disclosures made with the consent of the individual to whom the record pertains, pursuant to the Freedom of Information Act (5 U.S.C. 552), or to authorized FEA officers and employees.

#### COLLECTION OF INFORMATION FOR AND CONTENT OF SYSTEMS OF RECORDS

Under the Act, FEA is required, to the greatest extent practicable, to collect information for a record in a systems of records directly from the individual who is the subject of the record and with respect to whom an adverse determination regarding such individual's rights, benefits and privileges under Federal programs may be made based on the information collected and in the record. Under the proposed regulations, unless an exemption from this requirement is claimed, FEA will inform each individual it asks to supply information of the statutory authority for the collection, the primary purposes for which the information will be utilized, the "routine uses" of the record, and the effect, if any, of not providing the information.

The regulations proposed by FEA place restrictions on the information that may

be maintained in its systems of records, unless an exemption from the Act's requirements is claimed. To the extent the information is used in making determinations about an individual, the regulations would require that the information be as accurate, relevant, timely and complete "as is reasonably necessary to assure fairness to the individual in such determination."

#### CORRECTION OR AMENDMENT OF A RECORD

As provided in the proposed regulations, any individual may request the correction or amendment of information contained in a system of records that pertains to him. The regulations describe the grounds on which the request must be made, the procedures for filing the request and the time within which FEA must respond to the request. As with a request for access to or information about a record, FEA may require verification of the identity of the individual making the request. The request should contain sufficient information to enable FEA to locate the record and determine precisely what changes are being sought.

The regulations proposed describe the content of FEA's response to such request and the criteria by which the request will be evaluated. These criteria include the sufficiency of the evidence submitted, the factual accuracy of the information in the record, the relevance and necessity for the information given the purpose for which it was collected, and the timeliness and completeness of the information in the record. If the request is granted, the record will be corrected or amended, and all persons or agencies to which the amended or corrected portion of the record had been disclosed would be notified of the FEA action.

The request would be denied if the "individual has failed to establish, by a preponderance of the evidence, the propriety of the correction or amendment in relation to the criteria stated in the regulations." In addition, the request would be denied (1) if it seeks to alter a record compiled either in terminated or in pending judicial, quasi-judicial or quasi-legislative proceedings to which the individual was a party or a participant, (2) if the correction or amendment would violate a statute or regulation, or (3) if the individual making the request had unreasonably failed to comply with the procedural requirements of Part 206.

In contrast to requests for access to or information about a record, the Act requires that there be an administrative review (appeal) of the denial of a request for correction or amendment of a record. It is proposed that the appeal be filed with FEA's Office of Exceptions and Appeals. The proposed regulations state the contents of the appeal and the procedures FEA will utilize in evaluating it. If the individual disagrees with the determination on appeal, he may file with FEA a concise statement of disagreement, which will be noted in the disputed record, and a copy of the statement will be provided to those persons or agencies to which the record had been disclosed prior to the filing of the statement. Judicial re-

view of the denial of an appeal may be sought in accordance with 5 U.S.C.

provided in section 7(i)(1)(c) of the FEAA.

#### § 206.1 Purpose and scope.

(a) This part establishes the methods

with the purpose for which it was collected.

of the system of records, which appears in the notice of systems published in the FEDERAL REGISTER by the FEA: (ii) pro-

(c) If the Privacy Act Officer or other designated FEA official determines that the information in the record is so sensi-

view of the denial of an appeal may be sought in accordance with 5 U.S.C. 552a(g)(1)(A).

#### MISCELLANEOUS

**Public notice of systems of records.** The regulations would require that FEA annually publish in the FEDERAL REGISTER a notice containing a listing of the systems of records maintained by FEA that are subject to the Act, as required by the Act. Unless FEA has claimed an exemption from the requirements of the Act, the notice will contain a full description of FEA's systems of records, the location, the name of the person responsible for the record, the "routine uses" of the record, and other information. Copies of this annual notice will be available at the FEA National Office and Regional Offices.

**Criminal Penalties.** The Act provides that the knowing and willful request to obtain information about an individual (or the obtaining of such information) from FEA under false pretenses shall result in that person being guilty of a misdemeanor and fined not more than \$5,000.

Interested persons are invited to participate in this proposed rulemaking by submitting written comments consisting of data, views, or arguments with respect to the proposed regulation set forth in this notice to Executive Communications, Federal Energy Administration, Box EF, Washington, D.C. 20461. Hand-carried comments may be delivered to Room 3309, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. to 4:30 p.m., Monday through Friday, except on legal public holidays.

Comments should be identified on the outside of the envelope and on the documents submitted to FEA Executive Communications with the designation "Privacy Act Regulations". Ten copies should be submitted. All comments received by Monday, September 22, 1975, and all relevant information, will be considered by FEA before final action is taken on the proposed regulation.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Since the proposed rulemaking will not affect the quality of the environment, FEA has not submitted the proposed regulations to the Administrator of the Environmental Protection Agency for comment, as provided in section 7(c)(2) of the Federal Energy Administration Act of 1974 (Pub. L. 93-275) ("FEAA"). Also, since the proposed regulations are not likely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses because they regulate the record-keeping functions of FEA, no public hearing will be conducted with respect to this proposed rulemaking, as

#### PROPOSED RULES

provided in section 7(i)(1)(c) of the FEAA.

The inflationary impact of this proposal has been considered by the FEA, consistent with Executive Order 11821, issued November 27, 1974.

These regulations as proposed, with any modification made as a result of this proposed rulemaking, will be effective on or before September 27, 1975. Since the regulations must be in effect on or by such date to insure that procedures are available for individuals seeking access to or correction/amendment of any records in the notice of systems of records published in the FEDERAL REGISTER on August 27, 1975 (40 FR 39323), FEA finds good cause to waive the requirement of 5 U.S.C. 553(d) that these regulations not become effective until 30 days after their publication.

(Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a); Federal Energy Administration Act of 1974 (Pub. L. 93-275); E.O. 11790 (39 FR 23185)).

In consideration of the foregoing, it is proposed to amend Chapter II of Title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, D.C., September 9, 1975.

ROBERT E. MONTGOMERY, JR.,  
General Counsel,  
Federal Energy Administration.

Chapter II of 10 Code of Federal Regulations is amended to add Part 206, which reads as follows:

#### PART 206—PRIVACY ACT

COLLECTION, MAINTENANCE, ACCESS AND DISSEMINATION OF PERSONAL INFORMATION ABOUT INDIVIDUALS IN SYSTEMS OF RECORDS MAINTAINED BY FEA

- Sec. 206.1 Purpose and scope.
- 206.2 Definitions.
- 206.3 Procedures for requesting information about or for access to an individual's records in a system of records.
- 206.4 Procedures for identifying the individual making the request.
- 206.5 Disclosure of requested information to individuals.
- 206.6 Disclosure to other agencies or persons other than the individual to whom the record pertains.
- 206.7 Content of systems of records.
- 206.8 Collection of information by FEA about an individual for a system of records.
- 206.9 Request for correction or amendment of record.
- 206.10 FEA review of request for correction or amendment of a record.
- 206.11 Appeals of denial of requests for correction or amendment of a record.
- 206.12 Public notice of systems of records.
- 206.13 Criminal penalties.
- 206.14 General exemptions. [reserved]
- 206.15 Specific exemptions.
- 206.16 Fees.
- 206.17 Exceptions, exemptions, interpretations, rulings and rulemakings.
- 206.18 Addresses of FEA Regional Offices.

AUTHORITY: (Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a); Federal Energy Administration Act of 1974 (Pub. L. 93-275); E.O. 11790 (39 FR 23185)).

#### § 206.1 Purpose and scope.

(a) This part establishes the methods and procedures by which the Federal Energy Administration is implementing the Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a). This part applies to all records maintained by FEA that contain personal information about an individual, identify that individual by name or identifying number, symbol, or other identifying particular and are contained in a system of records from which such information is retrieved by the individual's name or identifying number, symbol or other identifying particular.

(b) Subject to the general and specific exemptions claimed by FEA in §§ 206.14 and 206.15 of this part, or any exemptions provided by the Privacy Act of 1974 that are claimed by another agency, or unless otherwise provided by such Act, this part prohibits FEA from disclosing any record that is contained in a system of records by any means of communication to any person, or to another agency, except pursuant to a written request by, or with the prior written consent of the individual to whom the record pertains.

#### § 206.2 Definitions.

"Agency" means any executive department, military department, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government (including the Executive Office of the President), or any independent regulatory agency.

"Act" means the "Privacy Act of 1974", Pub. L. 93-579, 5 U.S.C. 552a.

"FEA" means the Federal Energy Administration, including the Administrator of FEA or his delegate.

"Individual" means a citizen of the United States or an alien lawfully admitted for permanent residence. For purposes of this part, the parent of any minor, or the legal guardian of any individual who has been declared to be incompetent due to physical or mental incapacity or age by a court of competent jurisdiction, may act on behalf of the individual.

"Legal public holiday" means New Year's Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, Christmas Day, and any other day appointed as a national holiday by the President or the Congress of the United States.

"Maintain" includes maintain, collect, use or disseminate.

"Record" means any item, collection, or grouping of information about an individual that is maintained by the FEA, including, but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph.

"Routine use" means, with respect to the disclosure of a record, the use of such record for a purpose that is compatible

with the purpose for which it was collected.

"System of records" means a group of any records under the control of the FEA from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual.

"Statistical record" means a record in a system of records maintained for statistical research or reporting purposes only and not used in whole or in part in making any determination about an identifiable individual, except as provided by section 8 of title 13, United States Code.

Throughout this part, the use of a word or term in the singular shall include the plural and the use of the male gender shall include the female gender.

#### § 206.3 Procedures for requesting information about or for access to an individual's records in a system of records.

(a) Any individual may request information regarding whether a system of records maintained by the FEA contains any information pertaining to him, and may request access to his record or to any information pertaining to him that is contained in a system of records, unless such access has been restricted by a general or specific exemption claimed by FEA, as provided in §§ 206.14 and 206.15, or by another agency. All such requests shall be directed to the Privacy Act Officer, Federal Energy Administration, Washington, D.C. 20461, or to the Privacy Act Officer at the FEA Regional Offices, at the addresses listed in § 206.18. The consideration by FEA of requests submitted by mail will be facilitated if the words "PRIVACY ACT REQUEST" appear in capital letters on the face of the envelope.

(b) (1) A request for information about a record or for access to a record or to information pertaining to him that is contained in a system of records may be made by mail or in person during FEA's regular business hours.

(2) The regular business hours of the FEA National Office are 8:00 a.m. to 4:30 p.m. Requests made in person should be to the Privacy Act Officer, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C., or to the Privacy Act Officer at the FEA Regional Offices, at the addresses listed in § 206.18.

(c) (1) The request shall (i) be in writing and signed by the individual making the request; (ii) include the full name (including the middle name) of the individual seeking the information or record, his home address and telephone number, his business address and telephone number; (iii) include a certified or authenticated copy of documents establishing parentage or legal guardianship, if appropriate, and (iv) if a waiver of an exemption is sought by these procedures, as statement of the grounds on which such waiver is sought, as provided in § 206.15 (a) and (c).

(2) In addition, the request should (i) specify the title and identifying number

#### PROPOSED RULES

of the system of records, which appears in the notice of systems published in the FEDERAL REGISTER by the FEA; (ii) provide such additional identifying information, if any, as may be required by the description of the system contained in the notice or as will assist FEA in responding to the request, e.g., location of the record as stated in the FEDERAL REGISTER; and (iii) describe the information sought or the time, place, or form of access, as appropriate.

(d) Any request not addressed and marked as specified in paragraph (a) of this section shall be forwarded immediately to the Privacy Act Officer. A request that is improperly addressed by an individual shall not have been "received" for purposes of measuring time periods in this section until actual receipt by the Privacy Act Officer. In each instance when a request so forwarded is received by the Privacy Act Officer, the individual making the request shall be notified that the request was improperly addressed and the date when the request was received by the Privacy Act Officer.

(e) When access to a record or information pertaining to the individual that is contained in a system of records is requested, the individual either will be notified in writing where and when he may obtain access to the records requested or, if further arrangements are required, will be given the name, address and telephone number of the person at FEA responsible for such arrangements.

#### § 206.4 Procedures for identifying the individual making the request.

(a) When a request for information about or for access to a record or to information pertaining to an individual that is contained in a system of records has been made pursuant to § 206.3, the FEA shall require reasonable identification of the individual making the request before information will be given or access will be granted, to insure that information is given or records are disclosed only to the proper person.

(b) Subject to paragraphs (c) and (d) of this section, an individual making a request may establish his identity by:

(1) Including with his request if submitted by mail, subject to paragraph (c) of this section, a photocopy of two identifying documents bearing his name and signature, one of which shall bear his current home or business address; or

(2) Appearing at the FEA National Office or appropriate Regional Office during the regular business hours for the office and, subject to paragraph (c) of this section, presenting either of the following:

(i) One identifying document containing his photograph and signature, such as a driver's license or passport; or

(ii) Two identifying documents bearing his name and signature, one of which shall bear his current home or business address; or

(3) Providing such other proof of identity as the FEA deems satisfactory in the circumstances of a particular request.

(c) If the Privacy Act Officer or other designated FEA official determines that the information in the record is so sensitive that unauthorized access could cause harm or embarrassment to the individual whose record is involved, or if the individual making the request is unable to produce satisfactory evidence of identity under paragraph (b) of this action, the individual making the request may be required to submit a notarized statement attesting to his identity and that he is familiar with and understands the criminal penalties provided under section 1001 of Title 18 of the United States Code for making false statements to a Government agency and under section 552a(i)(3) of the Act for obtaining records under false pretenses. Copies of these statutory provisions and forms of such notarized statements may be obtained upon request from the Privacy Act Officer, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

(d) **Parents of minors and legal guardians.** (1) An individual acting as the parent of a minor or the legal guardian of the individual to whom a record pertains shall establish his personal identity in the same manner prescribed in either paragraphs (b) or (c) of this section. (A parent or legal guardian may act only for a living individual, not for a decedent).

(2) In addition to such identification, such person shall establish his identity in the representative capacity of parent or legal guardian. In the case of the parent of a minor, the proof of identity shall be a certified or authenticated copy of the minor's birth certificate. In the case of a legal guardian of an individual who has been declared incompetent due to physical or mental incapacity or age by a court of competent jurisdiction, the proof of identity shall be a certified or authenticated copy of the order from a court of competent jurisdiction.

(e) An individual shall not be required to state a reason or otherwise justify his request for information about or for access to a record or to information pertaining to him that is contained in a system of records.

#### § 206.5 Disclosure of requested information to individuals.

(a) Each request for information about or for access to a record or to information pertaining to him that is contained in a system of records shall be acted upon promptly. Every effort will be made to respond within ten days (excluding Saturdays, Sundays and legal public holidays) of the date of receipt. If a response cannot be made within ten days due to unusual circumstances, FEA shall send an acknowledgment during that period providing information on the status of the request and asking for such further information as may be necessary to respond to the request. The term "unusual circumstances" as used in this section shall include circumstances where a search for and collection of requested records from inactive storage, field facilities or other establishments are required, cases where a voluminous amount of data is involved, instances where in-

#### PROPOSED RULES

formation on other individuals must be separated or expunged from the particular record and cases where consultation

§ 206.7 Content of systems of records.

curate, complete, timely, and relevant for FEA's purposes.

§ 206.7 Content of systems of records.

formation on other individuals must be separated or expunged from the particular record, and cases where consultations with other agencies having a substantial interest in the determination of the request is necessary.

(b)(1) Any individual who has requested access to a record or to information pertaining to him that is contained in a system of record, other than medical records, in the manner prescribed in § 206.3 and has identified himself as prescribed in § 206.4 shall be permitted to review the record or information and have a copy made of all or any portion thereof in a form comprehensible to him upon payment of the fee, if applicable, for copying services set forth in § 206.17, unless such information or access is denied on the grounds stated in paragraph (e) of this section. Upon the request of an individual, persons of the individual's own choosing may accompany him to review the record at FEA, but the individual shall first furnish to the Privacy Act Officer a written statement authorizing discussion of that individual's record in the accompanying person's presence.

(2) The special procedures pertaining to requests for information about or access to the individual's medical records are stated in paragraph (f) of this section.

(c) Where record of a document containing information about an individual also contains information not pertaining to him, the portion not pertaining to the individual shall not be disclosed, except to the extent the information is available to any person under the Freedom of Information Act. If the records sought cannot be provided for review and copying in a meaningful form, the FEA shall provide to the individual a report of the information pertaining to the individual that is contained in the record or records, which report shall be complete and accurate in all material aspects.

(d) *Grant of access.*—(1) *Notification.* An individual shall be provided information about or granted access to a record or information pertaining to him that is contained in the system, except where the provisions of paragraph (e) of this section apply. The Privacy Act Officer shall notify the individual of such determination and provide the following information:

(i) The existence of a record or information pertaining to him that is contained in a system of records;

(ii) The methods of access, as set forth in paragraph (d)(2) of this section;

(iii) The place at which the record or information may be inspected;

(iv) The earliest date on which the record or information may be inspected and the period of time that the record or information will remain available for inspection (in no event shall the earliest date be later than thirty days (excluding Saturdays, Sundays and legal public holidays) from the date of notification.);

(v) The estimated date by which a copy of the record could be mailed and the estimate of fees that would be charged to provide other than the first copy of the record, pursuant to § 206.17

(In no event shall the estimated date be later than thirty days (excluding Saturdays, Sundays and legal public holidays) from the date of notification.);

(vi) The fact that the individual, if he wishes, may be accompanied by another person during the record or information review, subject to the procedures set forth in paragraph (b) of this section; and

(vii) Any additional requirements needed to provide information about or to grant access to the requested record or information.

(2) *Methods of access.* The following methods of access to records or information pertaining to an individual that is contained in a system of records may be available to that individual depending on the circumstances of a particular request:

(i) Inspection in person may be held in the office specified by FEA during the regular business hours;

(ii) Transfer of records to a Federal facility more convenient to the individual may be arranged, but only if FEA determines that a suitable facility is available, that the individual's access can be properly supervised at that facility, and that transmittal of the records or information to that facility will not unduly interfere with operations of the FEA or involve unreasonable costs, in terms of both money and manpower; and

(iii) The requested number of copies may be mailed at the request of the individual, subject to payment of the fees prescribed in § 206.17.

(c) *Initial denial of access.* This section does not apply to the denial of a request for waiver of an exemption in accordance with § 206.15 (a) and (c).;

(1) *Grounds.* A request by an individual for information about or access to a record or information pertaining to that individual that is contained in a system of records may be denied only upon a determination by the Privacy Act Officer that:

(i) The record is subject to an exemption under §§ 206.14 and 206.15, or to an exemption claimed by another agency; or

(ii) The record is information compiled in reasonable anticipation of a civil action or proceeding; or

(iii) The individual unreasonably has failed to comply with the procedural requirements of this part.

(2) *Notification.* The Privacy Act Officer shall give written notice of the denial of a request for information about or access to records or information pertaining to the individual that is contained in a system of records, which notice shall include the following information:

(i) The Privacy Act Officer's name and title or position;

(ii) The date of the denial;

(iii) The reasons for the denial, including citation to the appropriate section of the Act and this part; and

(iv) The individual's right to judicial review under 5 U.S.C. 552a(g) (1) (B), as limited by § 552a(g) (5).

(f) *Special procedures for medical records.*—(1) *Statement of physician or mental health professional.* When an in-

dividual requests access to records or information pertaining to him that include medical and/or psychological information, the FEA, if it deems it necessary under the particular circumstances, may require the individual to submit with the request a signed statement by his physician or a mental health professional indicating that, in his view, disclosure of the requested records or information directly to the individual will not have an adverse effect on the individual.

(2) *Designation of physician or mental health professional to receive records.* If the FEA believes, in good faith, that disclosure of medical and/or psychological information directly to an individual could have an adverse effect on that individual, the individual may be asked to designate in writing a physician or mental health professional to whom he would like the records to be disclosed, and disclosure that otherwise would be made to the individual will instead be made to the designated physician or mental health professional.

(g) The FEA shall supply such other information and assistance at the time of an individual's review of his record as is necessary to make the record intelligible to the individual.

(h) The FEA reserves the right to limit access to copies and abstracts of original records, rather than the original records. This election would be appropriate, for example, when the record is in an automated data media such as tape or disc, when the record contains information on other individuals, and when deletion of information is permissible under exemptions provided by the Act. In no event shall original records of the FEA be made available to the individual except under the immediate supervision of the Privacy Act Officer or his designee. Title 18, United States Code, section 2701(a) makes it a crime to conceal, mutilate, obliterate, or destroy any record filed in a public office, or to attempt to do any of the foregoing.

(i) Nothing in this section shall:

(1) Require the disclosure of systems of records subject to an exemption under §§ 206.14 or 206.15 or to an exemption claimed by another agency;

(2) Allow an individual access to any information compiled in reasonable anticipation of a civil action or proceeding or a criminal proceeding; or

(3) Require the furnishing of information or records which cannot be retrieved by the name or by some other identifying number, symbol or identifying particular of the individual making the request.

§ 206.6 *Disclosure to other agencies or persons other than the individual to whom the record pertains.*

(a) The FEA shall not disclose to any agency or to any person other than the individual who is the subject of the record, by any means of communication, a record pertaining to that individual which is contained in a system of records, except under the following circumstances:

(1) The individual to whom the record pertains has given his written con-

sent to the disclosure or has made a written request for such disclosure;

(2) The disclosure is to officers and employees of the FEA who have a need for the record in the performance of their duties;

(3) The disclosure is required under the Freedom of Information Act (5 U.S.C. 552);

(4) The disclosure is for a routine use as defined in § 206.2 of these rules and described in the FEDERAL REGISTER notice for that system of records;

(5) The disclosure is made to the Bureau of the Census for purposes of planning or carrying out a census or survey or related activity pursuant to the provisions of Title 13 of the United States Code;

(6) The disclosure is made to a recipient who has provided the agency with advance adequate written assurance that the record will be used solely as a statistical research or reporting record, and the record is to be transferred in a form that is not individually identifiable;

(7) The disclosure is made to the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by the Administrator of General Services or his designee to determine whether the record has such value;

(8) The disclosure is made to another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law and if the head of the agency or instrumentality has made a written request to the FEA specifying the particular portion desired and the law enforcement activity for which the record is sought;

(9) The disclosure is made to a person pursuant to a showing of compelling circumstances affecting the health or safety of an individual if upon such disclosure notification is transmitted to the last known address of such individual;

(10) The disclosure is made to either House of Congress, or, to the extent of matter within its jurisdiction, any committee or subcommittee thereof, any joint committee of Congress or subcommittee of any such joint committee;

(11) The disclosure is made to the Comptroller General, or any of his authorized representatives, in the course of the performance of the duties of the General Accounting Office;

(12) The disclosure is made pursuant to the order of a court of competent jurisdiction; or

(13) This disclosure is required by the Act and not covered explicitly by 5 U.S.C. 552a(b).

(b) The situations referred to in paragraph (a) (13) of this section include the following:

(1) 5 U.S.C. 552a(c) (4) requires dissemination of a corrected or amended record or notation of a disagreement statement by the FEA in certain circumstances;

(2) Sec. 5(e)(2) of the Act authorizes release of any records or information by the FEA to the Privacy Protection Study Commission upon request of the Chairman; and

(3) Sec. 6 of the Act authorizes the Office of Management and Budget to provide the FEA with continuing oversight and assistance in implementation of the Act.

(c) (1) For each system of records under its control, except disclosures made with the consent of the individual to whom the record pertains, disclosures to authorized officers and employees of FEA and disclosures required by the Freedom of Information Act, FEA shall keep an accurate accounting of:

(i) The date, nature, and purposes of each disclosure of a record made to any person or to another agency; and

(ii) The name and address of the person or agency to which the disclosure was made.

(2) The accounting shall be retained for at least five years or the life of the record, whichever is longer, after the disclosure for which the accounting is made.

(d) The accounting described in paragraph (c) shall be made available to the individual named in the record upon his written request, directed to the Privacy Act Officer, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, except that the accounting shall not be revealed with respect to disclosures made under paragraph (a) (8) of this section, pertaining to law enforcement activity, and to disclosures involving systems of records for which FEA has claimed an exemption from certain requirements of the Act, as provided in §§ 206.14 and 206.15, or with respect to which another agency has claimed an exemption.

(e) Whenever an amendment or correction of a record or a notation of dispute concerning the accuracy of records is made by the FEA in accordance with §§ 206.10 and 206.11, FEA shall inform any person or other agency to whom the record was previously disclosed if an accounting of the disclosure was made pursuant to the requirements of paragraph (c) of this section, unless the disclosure was made pursuant to paragraph (a) (8) of this section or the disclosure involved a system of records for which FEA has claimed an exemption from certain requirements of the Act, as provided in §§ 206.14 and 206.15, or with respect to which another agency has claimed an exemption.

(f) The FEA shall make reasonable efforts to serve notice on an individual when any record containing information about such individual in a FEA system of record is made available to any person under compulsory legal process when such process becomes a matter of public record.

(g) Prior to disclosing any record about an individual to any person other than an agency, unless the disclosure is pursuant to paragraph (a) (3) of this section, FEA shall make reasonable efforts to assure that such records are ac-

curate, complete, timely, and relevant for FEA's purposes.

§ 206.7 *Content of systems of records.*

(a) The FEA shall maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose FEA is required to accomplish by statute or by executive order of the President, unless an exemption to this requirement has been claimed by FEA, as provided in §§ 206.14 and 206.15, or by another agency.

(b) The FEA shall maintain no record describing how any individual exercises rights guaranteed by the First Amendment unless expressly authorized by statute or by the individual about whom the record is maintained or unless pertinent to and within the scope of an authorized law enforcement activity.

(c) The FEA shall maintain all records that are used by it in making any determination about any individual with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in such determination.

§ 206.8 *Collection of information by FEA about an individual for a system of records.*

(a) The FEA shall collect information to the greatest extent practicable directly from the subject individual when the information may result in adverse determinations about an individual's rights, benefits, and privileges under Federal programs, unless an exemption from the Act to this requirement has been claimed by FEA as provided in § 206.14, or by another agency.

(b) Unless an exemption from the Act has been claimed by FEA, as provided in § 206.14, or by another agency, FEA shall inform each individual whom it asks to supply information on the form or other means by which it uses to collect the information, or on a separate form that can be retained by the individual, of the following:

(1) The authority (whether granted by statute, or by executive order of the President) that authorizes the solicitation of the information and whether disclosure of such information is mandatory or voluntary;

(2) The principal purpose or purposes for which the information is intended to be used;

(3) The routine uses which may be made of the information, as published in the FEDERAL REGISTER pursuant to the requirements of the Act; and

(4) The effects on him, if any, of not providing all or any part of the requested information.

§ 206.9 *Request for correction or amendment of a record.*

(a) (1) Any individual may request the correction or amendment of information pertaining to him that is contained in a system of records maintained by the FEA (1) if he believes such information is not relevant or not necessary to accomplish a purpose that FEA is required to accomplish by statute or by executive order of the President, or (2) if the in-

formation to be used by FEA in making a determination about the individual necessary.

in the determination of the request as necessary.

receipt of the notification, to correct or amend the record and to apprise any

denial. When an appeal is filed by mail, the postmark is conclusive as to timeliness. (Service by FEA of a denial of a

unless unusual circumstances, as described in § 206.9(c) (2), are present.

(iv) Each routine use of the records contained in the system, including the categories of users and the purpose of

## PROPOSED RULES

formation is to be used by FEA in making any determination about the individual if he believes such information is not as accurate, relevant, timely or complete as is reasonably necessary to assure fairness in any determination about the individual.

(2) A request for amendment or correction may be made by mail or in person and shall be directed to the Privacy Act Officer, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. If the request is made in person, it must be submitted during the regular business hours of the FEA National Office or Regional Office regular business hours, which for the National Office are 8:00 a.m. to 4:30 p.m. If the request is submitted by mail, the envelope in which the request is mailed should have the words "PRIVACY ACT REQUEST (AMENDMENT)" in capital letters on the front of it.

(b) (1) A request for the correction or amendment shall (i) be in writing and signed by the person making the request; (ii) describe the particular record to be corrected or amended with sufficient specificity to permit the record to be located among those maintained by FEA; and (iii) specify the nature of the correction or amendment sought, including the specific words to be deleted from the record or added to it, as appropriate, and the justification for the requested change, including all available supporting documents and materials that substantiate the statement. The statement of justification for the change should identify the basis for the request, that is, whether the information in the record is unnecessary, inaccurate, irrelevant, untimely or incomplete.

(2) The individual making the request may be required to provide the information specified in § 206.3 and § 206.4 to simplify identification of the record and permit verification of the identity of the person making the request.

(c) (1) Receipt of a request for correction or amendment shall be acknowledged in writing within ten days (excluding Saturdays, Sundays and legal public holidays), except that if the individual is given notice within the ten day period that his request will or will not be complied with, no acknowledgment is required.

(2) The acknowledgement shall contain an estimate of the time within which action will be taken on the request and, if necessary, will request such additional information as may be necessary to act on the request. The estimate of time may take into account unusual circumstances that will delay the response. "Unusual circumstances" as used in this section shall include circumstances where a search for and collection of requested records from inactive storage, field facilities or other establishments are required, cases where a voluminous amount of data is involved, instances where information on other individuals must be separated or expunged from the particular record, and cases where consultations with other agencies having a substantial interest

in the determination of the request are necessary.

(3) Any request not addressed and mailed as specified in paragraph (a) of this section shall be forwarded immediately to the Privacy Act Officer. A request that is improperly addressed by an individual shall not have been "received" for purposes of measuring time periods in this section until actual receipt by the Privacy Act Officer. In each instance when a request so forwarded is received by the Privacy Act Officer, the individual making the request shall be notified that the request was improperly addressed and the date when the request was received by the Privacy Act Officer.

(d) Assistance in preparing a request to correct or amend a record may be obtained from the Privacy Act Officer, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

#### § 206.10 FEA review of request for correction or amendment of record.

(a) Within 30 days after acknowledging receipt of a request (excluding Saturdays, Sundays and legal public holidays), or after receiving such further information as may have been requested by FEA, or after arriving at a decision within the ten days, the Privacy Act Officer shall either:

(1) Make the requested correction or amendment and advise the individual in writing of such action, providing either a copy of the corrected or amended record, or a statement as to the means whereby the correction or amendment was effected in cases where a copy cannot be provided (for example, erasure of information from a record maintained only in an electronic data bank); or

(2) Inform the individual in writing that his request is denied and provide the following information:

(i) The Privacy Act Officer's name and title and position;

(ii) The date of the denial;

(iii) The reasons for the denial, including citation to the appropriate sections of the Act and this part; and

(iv) The procedures for appeal of the denial of a request for correction or amendment as set forth in § 206.11, including the name and address of the FEA Office or official with the responsibility for considering appeals.

(3) If the Privacy Act Officer cannot make the determination within thirty days, the individual will be advised in writing of the reason therefor and of the estimated date by which the determination will be made.

(b) Whenever an individual's record is corrected or amended pursuant to a request by that individual, the Privacy Act Officer shall notify all persons and agencies to which the corrected or amended portion of the record had been disclosed prior to its correction or amendment, if an accounting of such disclosure required by the Act was made. The notification shall require a recipient agency maintaining the record to acknowledge

receipt of the notification, to correct or amend the record and to apprise any agency or person to which it had disclosed the record of the substance of the correction or amendment.

(c) The following criteria will be considered by the Privacy Act Officer in reviewing a request for correction or amendment:

(1) The sufficiency of the evidence submitted by the individual;

(2) The factual accuracy of the information;

(3) The relevance and necessity of the information in relation to the purpose for which it was collected;

(4) If such information is used in making any determination about the individual, whether the information is as accurate, relevant, timely and complete as is reasonably necessary to assure fairness to the individual in such determination;

(5) The degree of possibility that denial of the request could unfairly result in determinations adverse to the individual;

(6) The nature of the record sought to be corrected or amended; and,

(7) The propriety and feasibility of complying with the specific means of correction or amendment requested by the individual.

(d) The FEA will not undertake to gather evidence for the individual, but does reserve the right to verify the evidence which the individual submits.

(e) Correction or amendment of a record requested by an individual shall be denied only upon a determination by the Privacy Act Officer that:

(1) The individual has failed to establish, by a preponderance of the evidence, the propriety of the correction or amendments in relation to the criteria stated in paragraph (c) of this section;

(2) The record sought to be corrected or amended was compiled in a terminal judicial, quasi-judicial or quasi-legislative proceeding to which the individual was a party or participant;

(3) The record sought to be corrected or amended is the subject of a pending judicial, quasi-judicial or quasi-legislative proceeding to which the individual is a party or participant.

(4) The correction or amendment would violate a duly enacted statute or promulgated regulation; or,

(5) The individual unreasonably has failed to comply with the procedural requirements of this part.

(f) If a request is partially granted and partially denied, the Privacy Act Officer shall follow the appropriate procedures of this section as to the records within the grant and the records within the denial.

#### § 206.11 Appeals of denial of requests for correction or amendment of a record.

(a) (1) Any individual may appeal the denial of a request made by him for correction or amendment of a record issued pursuant to § 206.10.

(2) An appeal, if filed, shall be filed within 30 days after the service of the

denial. When an appeal is filed by mail, the postmark is conclusive as to timeliness. (Service by FEA of a denial of a request may be by personal service or by registered, certified or regular United States Mail. Service upon an individual's duly authorized representative shall constitute service upon the individual.)

(b) (1) The appeal shall be in writing and shall be filed with the Office of Exceptions and Appeals, Federal Energy Administration, Washington, D.C. 20461. The envelope in which the application is mailed should have the words "PRIVACY ACT APPEAL" on both the appeal and on the outside of the envelope in which the appeal is transmitted.

(2) An appeal not addressed and marked as specified in paragraph (b) (1) of this section shall be forwarded immediately to the Office of Exceptions and Appeals. An appeal that is not properly addressed by an individual shall not have been "received" for purposes of measuring the time periods in this section until actual receipt by the Office of Exceptions and Appeals has been accomplished. In each instance when an appeal so forwarded is received, the individual filing the appeal shall be notified that the appeal was improperly addressed and the date when the appeal was received by the Office of Exceptions and Appeals.

(c) *Content of appeal.* (1) The appeal shall include the following: (i) A copy of the original request for correction or amendment; (ii) a copy of the initial denial; (iii) and a statement of the reasons why the initial denial is believed to be in error. The appeal shall be in writing and shall be signed by the individual.

(2) The record requested to be corrected or amended will be supplied to the Office of Exceptions and Appeals by the Privacy Act Officer who issued the initial denial. While such record normally will comprise the entire record on appeal, the Office of Exceptions and Appeals may seek such additional information as is necessary to assure that the final determination is fair and equitable and, in such instances, the additional information will be disclosed to the individual making the appeal and, consistent with the time periods provided in paragraph (e) of this section, an opportunity will be provided for comment thereon.

(d) No personal appearance or hearing on appeal will be allowed.

(e) The Office of Exceptions and Appeals shall act upon the appeal and issue a final determination in writing no later than thirty days (excluding Saturdays, Sundays and legal public holidays) from the date on which the appeal is received; provided that the Director of the Office of Exceptions and Appeals may extend the thirty day period upon a determination that a fair and equitable review cannot be made within that period, but only if the individual is advised in writing of the reason for the extension. The notice of extension shall include the estimated date by which a final determination will be issued, which shall not be later than the sixtieth day (excluding Saturdays, Sundays and legal public holidays) after receipt of the appeal

## PROPOSED RULES

unless unusual circumstances, as described in § 206.9(c) (2), are present.

(f) If the appeal is granted, that determination shall include the specific corrections or amendments to be made and a copy thereof shall be transmitted promptly both to the individual and to the Privacy Act Officer who issued the initial denial. Upon receipt of that determination, the Privacy Act Officer promptly shall take the actions set forth in §§ 206.6(e) and 206.10(b).

(g) If the appeal is denied, the final determination shall be transmitted promptly to the individual and shall state the reasons for the denial. The notice of that determination also shall include the following information:

(1) The right of the individual to file with the Office of Exceptions and Appeals a concise signed statement of reasons for disagreeing with the final determination, receipt of which statement shall be acknowledged by the Office of Exceptions and Appeals;

(2) The fact that any such disagreement statement filed by the individual shall be noted in the disputed record and that a copy of the statement shall be provided by the Privacy Act Officer to persons and agencies to which the record is disclosed subsequent to the date of receipt of such statement;

(3) The fact that the FEA shall append to any such disagreement statement filed by the individual a copy of the final determination or summary thereof that also will be provided to persons and agencies to which the disagreement statement is disclosed; and,

(4) The right of the individual to judicial review of the final determination under 5 U.S.C. 552a(g) (1) (A), as limited by 5 U.S.C. 552a(g) (5).

(h) In deciding the appeal, the Office of Exceptions and Appeals shall determine whether the denial of the request was erroneous in fact or in law.

(i) If an appeal is partially granted and partially denied, the Office of Exceptions and Appeals shall follow the appropriate procedures of this section as to the records within the grant and the records within the denial.

(j) Although a copy of the final determination or a summary thereof will be treated as part of the individual's record for purposes of disclosure in instances where the individual has filed a disagreement statement, it will not be subject to correction or amendment by the individual.

#### § 206.12 Public notice of systems of records.

(a) (1) The FEA shall publish in the FEDERAL REGISTER at least annually a notice of the existence and character of each of its system of records, which notice shall include:

(i) The name and location of the system;

(ii) The categories of individuals on whom records are maintained in the system;

(iii) The categories of records maintained in the system;

(iv) Each routine use of the records contained in the system, including the categories of users and the purpose of such use, subject to paragraph (c) of this section;

(v) The policies and practices of the FEA regarding storage, retrievability, access controls, retention, and disposal of the records;

(vi) The title and business address of the FEA official who is responsible for the system of records;

(vii) The procedures whereby an individual can be notified at his request if the system of records contains a record pertaining to him;

(viii) The procedures whereby an individual can be notified at his request how he can gain access to any record pertaining to him contained in the system of records, and how he can contest its content; and

(ix) The categories of sources of records in the system.

(2) Notwithstanding the requirements of paragraph (a) (1) of this section, the notice of such systems of records shall not include the information in paragraphs (a) (1) (vi)-(ix) of this section if FEA has claimed a general or specific exemption from the requirements of the Act, as provided in §§ 206.14 and 206.15, or such exemptions have been claimed by another agency.

(b) Copies of the notices as printed in the FEDERAL REGISTER shall be available in the FEA National Office and in each Regional Office. Locations of the Regional Offices are listed in § 206.18. Requests by mail should be sent to Privacy Act Officer, Federal Energy Administration, Washington, D.C. 20461. The first copy will be furnished free of charge. A charge reflecting the costs of printing and handling may be made for each additional copy.

(c) At least 30 days (including Saturdays, Sundays and legal public holidays) prior to the implementation of any new routine use of a system of records, or at least 30 days prior to publication of the annual notice of routine uses of systems of records as provided in paragraph (a) (1) of this section, FEA shall publish in the FEDERAL REGISTER notice of any new routine use or intended routine use of the information in the system of records, and shall provide an opportunity for interested persons to submit written comments consisting of data, views, or arguments regarding such use to FEA.

(d) If a request is partially granted and partially denied, the Privacy Act Officer shall follow the appropriate procedures of this section as to the records within the grant and the records within the denial.

(e) Although a copy of the final determination or a summary thereof will be treated as part of the individual's record for purposes of disclosure in instances where the individual has filed a disagreement statement, it will not be subject to correction or amendment by the individual.

#### § 206.13 Criminal penalties.

(a) The Act provides, in pertinent part:

Any person who knowingly and willfully requests or obtains any record concerning an individual from an agency under false pretenses shall be guilty of a misdemeanor and fined not more than \$5,000. (5 U.S.C. 552a(i) (3).)

(b) A person who falsely or fraudulently attempts to obtain records under the Act also may be subject to prosecution under such other criminal statutes as 18 U.S.C. 494, 495 and 1001.

# § 206.14 General exemptions. [Reserved]

## § 206.15 Specific exemptions.

The specific exemptions determined to be necessary and proper with respect to systems of records maintained by the FEA, including the parts of each system to be exempted, the provisions of the Act from which they are exempted, and the justification for the exemption, are as follows:

(a) (1) *Exempt under 5 U.S.C. 552a (k) (2)*. The system of records exempt and the sections of the Act from which they are exempted are:

(i) FEA-6 Personnel Security Records (only the memorandum identified as OSI form DPA 24);

(ii) FEA-7 Investigative Report Records (only investigative records concerning FEA employees, past and present).

(2) The foregoing are exempted from 5 U.S.C. 552a (c) (3) (accounting of disclosures), (d) (access to records) and (e) (1) (type of information maintained). The reasons for asserting the exemption are to prevent subjects of investigation from frustrating the investigatory process, to insure the proper functioning and integrity of law enforcement activities, to prevent disclosure of investigative techniques and to maintain the ability to obtain necessary information.

(3) (i) Notwithstanding the exemption from the Act's requirement that FEA, upon request, provide an individual information about or access to his record or to any information pertaining to him that is contained in the systems of records identified in paragraphs (a) (1) (i, ii) of this section, access to investigatory materials compiled for law enforcement purposes shall be provided to an individual upon his request, made in accordance with § 206.3, if such individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or for which he would otherwise be eligible, as a result of the maintenance of such material, except to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence.

(ii) *Waiver of exemption.* (A) FEA may, upon request made in accordance with § 206.3, waive the exemption with respect to records identified in paragraphs (a) (1) (i) (ii) of this section containing material or information that would reveal the identity of source who was given assurance of confidentiality if such source consents to the release of such material or information to the individual, or if FEA determines that such material or information is not adverse or detrimental to the individual, or for good cause shown. The exercise of FEA's discretion with respect to waiver of the exemption shall be final.

(B) FEA may, upon request filed in accordance with § 206.3, waive the ex-

emption with respect to any record in the systems of records identified in paragraphs (a) (1) (i) (ii) of this section, subject to the limitation as to records that would reveal the identity of certain sources, for good cause shown. The exercise of FEA's discretion with respect to waiver of the exemption shall be final.

(b) (1) *Exempt under 5 U.S.C. 552a (k) (4)*. The system of record exempt is—FEA-10 Minority Group Data File.

(2) The foregoing is exempted from 5 U.S.C. 552a (c) (3) (accounting of disclosures), (d) (access to record), and (f) (procedures for access). The system of record is used for statistical research or reporting purposes only and is not used in whole or in part in making any determination about the rights, benefits or entitlements identifiable with the individual, except as provided by section 8 of Title 18 of the United States Code.

(c) (1) *Exempt under 5 U.S.C. 552a (k) (5)*. The system of records exempt and the sections of the Act from which they are exempted are:

(i) FEA-6 Personnel Security Records (only the memorandum identified as OSI form DPA 24);

(ii) FEA-7 Investigative Report Records (only investigative records concerning FEA employees, past and present).

(2) The foregoing are exempted from 5 U.S.C. 552a (c) (3) (accounting of disclosures), (d) (access to records) and (e) (1) (type of information maintained). The reasons for asserting the exemption are to facilitate proper selection or continuance of the best applicants or persons for a given position, security clearance or contract.

(3) (i) *Waiver of exemption.* Notwithstanding the exemption from the Act's requirement that FEA, upon request, provide an individual information about or access to his record or to any information pertaining to him that is contained in the systems of records identified in paragraphs (b) (1) (i, ii) of this section, FEA may waive that exemption.

(ii) FEA may, upon request, made in accordance with § 206.3, waive the exemption with respect to such records if the source who furnished information to FEA under an express promise that his identity would be held in confidence or, prior to September 27, 1975, under an implied promise that his identity would be held in confidence, consents to the release of such information to the individual, or if FEA determines that such information is not adverse or detrimental to the individual, or for good cause shown. The exercise of FEA's discretion with respect to waiver of the exemption shall be final.

## § 206.16 Fees.

(a) The only fees to be charged to or collected from an individual under the provisions of this part are for copying records at the request of the individual. The fee charged may not exceed the direct cost of making the copy (i.e., printing, typing or photocopy and related personnel and equipment costs).

(1) No fees shall be charged or collected for the following: search for and

retrieval of the records; review of the records, copying by FEA incident to granting access, copying at the initiative of the FEA without a request from the individual, transportation of records and personnel, and first class postage.

(2) It is the policy of the FEA to provide an individual with one copy of each record corrected or amended pursuant to his or her request without charge.

(3) As required by the United States Civil Service Commission in its published regulations implementing the Act, the FEA will charge no fee for a single copy of a personnel record covered by that Commission's Government-wide published notice of systems of records.

(b) The schedule of fees is as follows:

(1) \$0.10 per each copy of each page, when the aggregate of fees for copying is more than \$3.00.

(2) For other forms of copying and other forms of materials (e.g., cassettes, computer materials), the direct cost of the materials, personnel and equipment, shall be charged, but only with prior specific approval of the person making the request.

(c) The FEA may, upon application by an individual, furnish any records without charge or at a reduced rate, if it determines that such waiver or reduction of fee is in the public interest.

(d) Requests for copies of documents should be addressed to Privacy Act Officer, Federal Energy Administration, Washington, D.C. 20461.

(e) Payment should be made by check or money order payable to the Treasury of the United States.

(f) Advance payment of all or part of the fee may be required at the discretion of the FEA. Unless the individual requesting the copies specifically states that he is willing to pay whatever fees are assessed by FEA for meeting the request or, alternatively, specifies an amount in excess of \$25 that he is willing to pay and which in fact covers the anticipated fees for meeting the request, a request that is expected to involve assessed fees in excess of \$25 will not be deemed to have been received, for purposes of the time periods specified in §§ 206.5(a), 206.9(c) (1) and 206.11(e), until the requester is advised of the anticipated cost, agrees to bear it, and makes any advance deposit required. Such notification shall be made by the Privacy Act Officer promptly upon receipt of the request.

## § 206.17 Exceptions, exemptions and interpretations, rulings and rule-making.

(a) Applications for exceptions, exemptions or request for interpretations relating to this part shall be filed in accordance with the procedures provided in Subparts D, E and F, respectively, of Part 205 of this chapter. Rulings shall be issued in accordance with the procedures of Subpart K of Part 205 of this chapter. Rulemakings shall be undertaken in accordance with the procedures provided in Subpart L of Part 205 of this chapter.

## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

[45 CFR Part 1115]

### PRIVACY ACT REGULATIONS

#### Correction of Deadline for Comments

On page 40052 and the highlights portion of the first page of the FEDERAL REGISTER of Friday, August 29, 1975, the deadline for submission of comments in reference to the Foundation's Privacy Act Regulations was listed as September 1, 1975. On page 40054 of the Federal Register of Friday, August 29, 1975, September 15, 1975, was listed as the deadline for comments in reference to the Foundation's Notice of Existence and Character of Systems of Records. This is to inform the general public that the correct deadline for comments concerning the Foundation's Privacy Act Regulations is September 29, 1975.

ROBERT KINGSTON,  
Deputy Chairman, National  
Endowment for the Humanities.

MICHAEL STRAIGHT,  
Deputy Chairman, National  
Endowment for the Arts.

PART IV:

## POSTAL SERVICE

### CERTAIN PERMANENT POSTAL RATES AND FEES

Effective Date

V 4 0 1 7 8

S E P 1 2 7 5

XUM

V

## RULES AND REGULATIONS

**POSTAL SERVICE**  
**CERTAIN PERMANENT POSTAL RATES**  
**AND FEES**

**Effective Date**

1. On September 25, 1973, the Postal Service requested the Postal Rate Commission to submit to the Governors of the Postal Service a recommended decision on changes in rates of domestic postage and fees for domestic postal services pursuant to chapter 36 of title 39, United States Code (Postal Rate Commission Docket No. R 74-1). Notice of this action was published in the FEDERAL REGISTER by the Postal Rate Commission on October 3, 1973 (38 FR 27482) and by the Postal Service on October 19, 1973 (38 FR 29193).

On August 28, 1975, the Postal Rate Commission transmitted to the Gover-

nors of the Postal Service its recommended decision in which it recommended permanent rates of domestic postage and fees for domestic postal services. On September 4, 1975, the Governors approved the permanent rates and fees recommended by the Postal Rate Commission and the Board of Governors determined the effective date thereof. (The Governors' decision, the record of the Commission's hearings, and the Commission's recommended decision is available for inspection in the Library at Headquarters, United States Postal Service, 475 L'Enfant Plaza West SW., Washington, D.C. 20260, and may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.)

In accordance with action by the Governors and the Board of Governors, the

Postal Service hereby gives notice that the rates and fees listed below become effective as of 12:01 a.m., September 14, 1975.

2. The schedules A-1 through E set forth below shall be applicable from and after the time and date specified, until further notice, except that the phased rates set forth in schedules 1-7, which are applicable to the classes of mail and kinds of mailers identified in subparagraphs (1) and (2) of § 3626 of title 39, shall instead be in effect, and the rates becoming effective shall be those set forth in the "year 4" column under the heading "Phased rates."

(39 U.S.C. sec. 101(d), 401, 403, 404, 407, 3621, 3625, 3626, 3627)

ROGER P. CRAIG,  
*Deputy General Counsel.*

## DEPARTMENT OF LABOR

Employment Standards  
AdministrationMINIMUM WAGES FOR FEDERAL AND  
FEDERALLY ASSISTED CONSTRUCTION

## General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Pre-determination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29

CFR, Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

## MODIFICATIONS AND SUPERSEDES DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedes Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedes Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedes Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR, Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-ex-

planatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

## MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

Alabama:

CHANGE POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS TO READ AS FOLLOWS:

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS

GROUP I - All crane type equipment with 200' of boom or over (including jib)  
GROUP II - All crane type equipment with 150-200' of boom (including jib)  
GROUP III - All crane type equipment with 100-150' of boom (including jib), all  
tower cranes and all crane type equipment of 3 cu. yd. or more (as rates by  
fig.), sideboom (booms 30' & over), guy derrick  
GROUP IV - Heavy duty mechanic welder, crane-hook & overhead mono-rail, whirley,  
panel board batch plant operator, pilerdriver engineer, dragline, shovel, clam-  
shell, backhoe, sideboom (under 30'), gradall, hydro crane, cherry picker,  
hoists while operating 2 or more drums, hoists while doing stack & chimney  
work (1 or 2 drums), power driven hole digger (with 30' & longer mast)

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS (CONT'D)

GROUP V - Motor patrol (blade), fork lift (35' and over), dozer (engine h.p. 65  
or over), fordon tractor or like equipment with hoe or loader equipment or  
ditcher, scraper type equipment, toumpull, BM 10, 15, 16, 20, 21, & similar  
ditcher, scraper type equipment, BM 15-24 and similar, loader operator or lift-lift  
(Engine h.p. 65 or over), asphalt lay machine, tail boom, conveyor-multiple,  
panel board control, power driven hole digger with less than 30' mast,  
trenching machine, concrete pump - boom type

Engineers for machines not listed under the above classifications shall receive  
the scale comparable to these classifications.

GROUP VI - Locomotive engineer, boring machine, tug boat, mixer, 18 cu. ft. and  
over, sand barge, dredging machine, tugger, hoist - when operating one drum,  
welding machine, 3 to 6, air compressor, 3 to 5, 500 cu. ft. and under, air  
compressor, over 500 cu. ft., (1) pumps, battery, 3 to 6, fork lift, bobcat  
and similar equipment, generator plant engineers, diesel elec., which truck  
with a lift, hoist, concrete buster or tamper, outside elevator or building type of  
personnel hoist, fireman, boiler operator, crushing plants, oiler distributor,  
operator, famer tractor-with or without attachments, batch plant  
operator - dual, continuous or belt bulk handling, screed operator, concrete  
pump, form grader, screening plant, well point pump operator, signal man on  
large wharves when and if required, operator for rotary drilling machines  
when operated from console or machines

Engineers for machines not listed under the above classifications shall receive  
the scale comparable to these classifications

GROUP VII - Greaser, tilt top trailer operator  
GROUP VIII - Permanent elevator - building type (automatic), concrete mixer,  
with hopper less than 18 cu. ft., air compressor, 500 cu. ft. & under (1 or 2)  
welding machine less than 20 cu. ft., fuelman, conveyor operator-single-  
continuous belt bulk handling  
GROUP IX - Asphalt lay machine back end man, helpers  
GROUP X - Truck crane oiler driver or truck crane oiler

DECISION NO. 0K75-4138 - Mod. #2  
(40 FR 32663 - August 1, 1975)  
Pittsburg County, Oklahoma

CHANGE POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS TO READ AS FOLLOWS:

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS

GROUP I - All crane type equipment with 200' of boom or over (including jib)  
GROUP II - All crane type equipment with 150-200' of boom (including jib)  
GROUP III - All crane type equipment with 100-150' of boom (including jib), all  
tower cranes and all crane type equipment of 3 cu. yd. or more (as rates by  
fig.), sideboom (booms 30' & over), guy derrick  
GROUP IV - Heavy duty mechanic welder, crane-hook & overhead mono-rail, whirley,  
panel board batch plant operator, pilerdriver engineer, dragline, shovel, clam-  
shell, backhoe, sideboom (under 30'), gradall, hydro crane, cherry picker,  
hoists while operating 2 or more drums, hoists while doing stack & chimney  
work (1 or 2 drums), power driven hole digger (with 30' & longer mast)  
GROUP V - Motor patrol (blade), fork lift (35' and over), dozer (engine h.p. 65  
or over), fordon tractor or like equipment with hoe or loader equipment or  
ditcher, scraper type equipment, toumpull, BM 10, 15, 16, 20, 21, & similar  
ditcher, scraper type equipment, BM 15-24 and similar, loader operator or lift-lift  
(Engine h.p. 65 or over), asphalt lay machine, tail boom, conveyor-multiple,  
panel board control, power driven hole digger with less than 30' mast,  
trenching machine, concrete pump - boom type

Engineers for machines not listed under the above classifications shall receive  
the scale comparable to these classifications.

GROUP VI - Locomotive engineer, boring machine, tug boat, mixer, 18 cu. ft. and  
over, sand barge, dredging machine, tugger, hoist - when operating one drum,  
welding machine, 3 to 6, air compressor, 3 to 5, 500 cu. ft. and under, air  
compressor, over 500 cu. ft., (1) pumps, battery, 3 to 6, fork lift, bobcat  
and similar equipment, generator plant engineers, diesel elec., which truck  
with a frame, roller, all types, outside elevator or building type of  
personnel hoist, concrete buster or tamper, heaters under jurisdiction of  
oper., engs., fireman, boiler operator, crushing plants, oiler distributor,  
operator, famer tractor-with or without attachments, batch plant  
operator - dual, continuous or belt bulk handling, screed operator, concrete  
pump, form grader, screening plant, well point pump operator, signal man on  
large wharves when and if required, operator for rotary drilling machines  
when operated from console or machines

Engineers for machines not listed under the above classifications shall receive  
the scale comparable to these classifications

GROUP VII - Greaser, tilt top trailer operator  
GROUP VIII - Permanent elevator - building type (automatic), concrete mixer,  
with hopper less than 18 cu. ft., air compressor, 500 cu. ft. & under (1 or 2)  
welding machine (1 or 2), pun (1 or 2), fuelman, conveyor operator-single-  
continuous belt bulk handling  
GROUP IX - Asphalt lay machine back end man, helpers  
GROUP X - Truck crane oiler driver or truck crane oiler

# THE EFFECT OF CRYSTAL

GROUP VII - ALL CRANE TYPE EQUIPMENT WITH 100-150° OF HOIST (INCLUDING JIB)

GROUP VII - All crane type equipment with 100-150° of boom (including jib), all tower cranes, boom cranes, 90° & over, ray device

GROUP VIII - Heavy duty, machine driven, crane-boom & overhead monorail, unit-ways, unit-boom hoist batch plant operators, pile-driver, engineer, dragline, shovel, clamshell, bucket, slackboom (under 30'), gradual, hydro crane, electric motor, hoist, while operating 2 or more drums, hoist while doing stack & chimney work (1 or 2 drums), power driven bolt digger (with 90° & longer mast), b.p. 65

GROUP V - Motor patrol (hulde), fork lift (4½' and over), dumper (conventional or over), fordon tractor or like equipment with hoe or bucket, (b.p. 20, 21, 6 similar rubber-tired equipment, Euclid, T-524 and similar), all 40, 45, 50, 60, 65, 70, 75, 80, 85, 90, 95, 100, 105, 110, 115, 120, 125, 130, 135, 140, 145, 150, 155, 160, 165, 170, 175, 180, 185, 190, 195, 200, 205, 210, 215, 220, 225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 275, 280, 285, 290, 295, 300, 305, 310, 315, 320, 325, 330, 335, 340, 345, 350, 355, 360, 365, 370, 375, 380, 385, 390, 395, 400, 405, 410, 415, 420, 425, 430, 435, 440, 445, 450, 455, 460, 465, 470, 475, 480, 485, 490, 495, 500, 505, 510, 515, 520, 525, 530, 535, 540, 545, 550, 555, 560, 565, 570, 575, 580, 585, 590, 595, 600, 605, 610, 615, 620, 625, 630, 635, 640, 645, 650, 655, 660, 665, 670, 675, 680, 685, 690, 695, 700, 705, 710, 715, 720, 725, 730, 735, 740, 745, 750, 755, 760, 765, 770, 775, 780, 785, 790, 795, 800, 805, 810, 815, 820, 825, 830, 835, 840, 845, 850, 855, 860, 865, 870, 875, 880, 885, 890, 895, 900, 905, 910, 915, 920, 925, 930, 935, 940, 945, 950, 955, 960, 965, 970, 975, 980, 985, 990, 995, 1000, 1005, 1010, 1015, 1020, 1025, 1030, 1035, 1040, 1045, 1050, 1055, 1060, 1065, 1070, 1075, 1080, 1085, 1090, 1095, 1100, 1105, 1110, 1115, 1120, 1125, 1130, 1135, 1140, 1145, 1150, 1155, 1160, 1165, 1170, 1175, 1180, 1185, 1190, 1195, 1200, 1205, 1210, 1215, 1220, 1225, 1230, 1235, 1240, 1245, 1250, 1255, 1260, 1265, 1270, 1275, 1280, 1285, 1290, 1295, 1300, 1305, 1310, 1315, 1320, 1325, 1330, 1335, 1340, 1345, 1350, 1355, 1360, 1365, 1370, 1375, 1380, 1385, 1390, 1395, 1400, 1405, 1410, 1415, 1420, 1425, 1430, 1435, 1440, 1445, 1450, 1455, 1460, 1465, 1470, 1475, 1480, 1485, 1490, 1495, 1500, 1505, 1510, 1515, 1520, 1525, 1530, 1535, 1540, 1545, 1550, 1555, 1560, 1565, 1570, 1575, 1580, 1585, 1590, 1595, 1600, 1605, 1610, 1615, 1620, 1625, 1630, 1635, 1640, 1645, 1650, 1655, 1660, 1665, 1670, 1675, 1680, 1685, 1690, 1695, 1700, 1705, 1710, 1715, 1720, 1725, 1730, 1735, 1740, 1745, 1750, 1755, 1760, 1765, 1770, 1775, 1780, 1785, 1790, 1795, 1800, 1805, 1810, 1815, 1820, 1825, 1830, 1835, 1840, 1845, 1850, 1855, 1860, 1865, 1870, 1875, 1880, 1885, 1890, 1895, 1900, 1905, 1910, 1915, 1920, 1925, 1930, 1935, 1940, 1945, 1950, 1955, 1960, 1965, 1970, 1975, 1980, 1985, 1990, 1995, 2000, 2005, 2010, 2015, 2020, 2025, 2030, 2035, 2040, 2045, 2050, 2055, 2060, 2065, 2070, 2075, 2080, 2085, 2090, 2095, 2100, 2105, 2110, 2115, 2120, 2125, 2130, 2135, 2140, 2145, 2150, 2155, 2160, 2165, 2170, 2175, 2180, 2185, 2190, 2195, 2200, 2205, 2210, 2215, 2220, 2225, 2230, 2235, 2240, 2245, 2250, 2255, 2260, 2265, 2270, 2275, 2280, 2285, 2290, 2295, 2300, 2305, 2310, 2315, 2320, 2325, 2330, 2335, 2340, 2345, 2350, 2355, 2360, 2365, 2370, 2375, 2380, 2385, 2390, 2395, 2400, 2405, 2410, 2415, 2420, 2425, 2430, 2435, 2440, 2445, 2450, 2455, 2460, 2465, 2470, 2475, 2480, 2485, 2490, 2495, 2500, 2505, 2510, 2515, 2520, 2525, 2530, 2535, 2540, 2545, 2550, 2555, 2560, 2565, 2570, 2575, 2580, 2585, 2590, 2595, 2600, 2605, 2610, 2615, 2620, 2625, 2630, 2635, 2640, 2645, 2650, 2655, 2660, 2665, 2670, 2675, 2680, 2685, 2690, 2695, 2700, 2705, 2710, 2715, 2720, 2725, 2730, 2735, 2740, 2745, 2750, 2755, 2760, 2765, 2770, 2775, 2780, 2785, 2790, 2795, 2800, 2805, 2810, 2815, 2820, 2825, 2830, 2835, 2840, 2845, 2850, 2855, 2860, 2865, 2870, 2875, 2880, 2885, 2890, 2895, 2900, 2905, 2910, 2915, 2920, 2925, 2930, 2935, 2940, 2945, 2950, 2955, 2960, 2965, 2970, 2975, 2980, 2985, 2990, 2995, 3000, 3005, 3010, 3015, 3020, 3025, 3030, 3035, 3040, 3045, 3050, 3055, 3060, 3065, 3070, 3075, 3080, 3085, 3090, 3095, 3100, 3105, 3110, 3115, 3120, 3125, 3130, 3135, 3140, 3145, 3150, 3155, 3160, 3165, 3170, 3175, 3180, 3185, 3190, 3195, 3200, 3205, 3210, 3215, 3220, 3225, 3230, 3235, 3240, 3245, 3250, 3255, 3260, 3265, 3270, 3275, 3280, 3285, 3290, 3295, 3300, 3305, 3310, 3315, 3320, 3325, 3330, 3335, 3340, 3345, 3350, 3355, 3360, 3365, 3370, 3375, 3380, 3385, 3390, 3

## NOTICES

engineers for machines not listed under the above classifications shall receive the scale comparable to these classifications.

[illegible]

Engineers for machines not listed under the above classifications shall receive the scale comparable to these classifications

GROUP VII - Greaser, tilt top trailer; operator  
GROUP VIII - Permanent elevator - building type (automatic), concrete mixer,  
with hopper less than 18 cu. ft., air compressor, 500 cu. ft. & under (1 or 2)  
welding machine (1 or 2), pump (1 or 2), fuclinar, conveyor operator-singe-  
continuous belt bulk handling

continuous belt bulk handling.

Group X - Truck crane operator or truck crane driver

Group 6: Asphalt Bureau and Recyclationist; Pavement Grinder and/or Grooving  
Machine (riding type); Cast-in-place type; Concrete Pump (concrete mobile;  
Full Slab Machine; Concrete Finishing Machine, Clary, Johnson, Bidsell,  
Bridges, etc.); Bridge Deck or similar type; Curb Machine, Mechanical Bema, Curb  
Machine, Concrete Joint Machine; Concrete Planer; Concrete  
Paving Machine; Concrete Spreader; Loaders, rubber-tired type, 2-1/2 cu. yds.  
and under; Rock Spreaders, self-propelled  
Group 7: Roller (any asphalt mix); Belteret; Pumpcrete Operator (any type);  
Cement Pump, Fuller-Kenyon and similar; Concrete Pump (concrete mobile;  
Concrete Mixer, single drum, five bag capacity and under; Concrete Mobile;  
Operator; A-Frame Truck double drum; Boom Truck; Concrete Drill and Earth  
Boring Machine; Hydraulic backhoe, wheel type, 2 7/8 cu. yds. and under with  
or without front end attachments 2 7/8 cu. yds. and under (Ford, John Deere,  
Case type); Elevating Grader, 12' or more, towed requiring operator or grader;  
Pot Hammer; Ballast Machine; Ballast Tamping Machine; Multiple-purpose; Track  
Lines; Tie Spacer; Shuttle Car; Locomotive, 40 tons and over  
Group 8: Diesel-Electric Engineer, Plant, Crusher, Generator, Floating Batch  
Plant and/or wet mix, one and two drum, Generator Operator; Belt Loaders,  
Kohman and Co. Cal. types; Asphalt Paver Operator  
Group 9: Bulldozer; Drill Cat Operator; Side-boom Cat; Compactor, with blade;  
Concrete Cooling Machine; Chicago Boom and similar types; Lift Slab Machine;  
Boom Type Lifting Device, .5 ton capacity or less; Cherry Picker or similar  
type Crane-Hoist, 5 ton capacity or less; Grizzly Crusher (any type); Surface  
Drill Doctor; Boring Machine; Guardrail Punch and Auger (any type); Loader, front  
Heater and Planer; Hydraulic backhoe, track type yds.; Hammer Operator; Pipe  
Cleaning, Doping, Bending and Knapping Machines; Bolt-threading Machine; Drill  
Doctor (bit grinder); H.D. Tractor, rubber-tired over 50 H.P. flywheel; Tractor  
Stationary Drag, Scaper, Tractor, rubber-tired over 50 H.P. flywheel; Tractor  
with boom attachment; Touch Machine, maximum digging capacity over 3 ft.  
depth; Asphalt Plant Operator  
Group 10: Bulldozer, twin-engine (TC12 and similar); Cable plov (any type);  
Compactor, multi-engine; Jack Operator, Elevating barges; Barge Operator,  
self-unloading; Combination H.D. Mechanic-Welder, when dispatched and/or  
when required to do both; Rubber-tired dozers and Pushers (Michigan, Cat,  
rough type); Driller-Percussion, Diamond, Core, Cable, Rotary and similar  
type

Group 11: Mixer Mobile; Concrete Breaker; Crane Operator, 25 tons and under;  
Combination Guardrail Machines, i.e., Punch, Auger, etc.; Shovel; Dragline;  
Clamshell; Hoe, etc., under 1 cu. yd.; Grade-all, under 1 cu. yd.; Mucking  
Machine (tunnel)  
Group 12: Blade Operator; Batch Plant and/or Wet Mix, 3 units or more; Rein-  
forced Tank Batching Machine (K-17 or similar); Hoist, two or more drums;  
Elevating Loader, Athey and similar; Piledriver (not crane type); Rubber-tired  
Scraper, single and twin engine, Single Scraper, with push-pull attachments,  
self-loading, Paddle Wheel, Auger type; Blade mounted Spreaders, Ulrich and  
similar types; Shiel Operator  
Group 13: Blade Operator, finish; Blade, externally controlled by electronic,  
mechanical hydraulic means; Blade, Multi-engines; Concrete Paving Road Mixer;  
Derrick, under 100 tons; Hoist, Stiff Leg, Guy Derrick or similar, 30 tons a  
and over; Cableway Operator 25 ton and over; Crane, over 25 ton and under;  
50 tons; Piledriver Operator; Floating Clamshell, etc., under 3 cu. yds.;  
Floating Crane (derrick barge), less than 30 ton; Backfilling Grader, Operated  
by tractor operator, Sierra, Euclid, or similar, 3 cu. yds.; Grade-all, 1 cu. yd. and  
Shovel, etc., 1 cu. yd. and less than 3 cu. yds.; Grade-all, 1 cu. yd. and  
over; Bridge Crane Operator, Locomotive Crane, Gantry and Overhead  
Group 14: Tower Crane Operator; Rubber-tired Scraper, with Tandem Scrapers,  
self-loading, Paddle Wheel, Auger type, Finish and/or 2 or more units  
Group 15: Rock Hound Operator; Loader, 4 cu. yds., but less than 6 cu. yds.  
Group 16: Auto-grader or "Trimmer"; Tandem Bulldozer, Quad-nine and similar;  
Automatic Concrete Slip Form Paver; Concrete Canal Line; Cableway, 25 ton and  
over; Crane, over 40 ton and including 100 ton; Whirley, 80 ton and under;  
Floating Clamshell, etc., 3 cu. yds. and over; Floating Crane (derrick barge),  
30 ton but less than 80 ton; Loader, 6 cu. yds., but less than 12 cu. yds.;  
Rubber-tired Scraper, with Tandem Scrapers, Multi-engine, Shovel, etc., 3 cu.  
yds., but less than 5 cu. yds.; Wheel Excavator, under 750 cu. yds. per hour  
Group 17: Crane over 100 ton and including 200 ton; Whirley over 80 ton and  
including 150 ton; Floating Crane (derrick barge) 80 ton less than 150 ton;  
Loader, 12 cu. yds. and over; Shovel, etc., 5 cu. yds. and over; Canal  
Trimmer  
Group 18: Crane, over 200 ton; Whirley, 150 ton and over; Floating Crane 150  
ton but less than 250 ton; Wheel Excavator, over 750 cu. yds. per hour; Band  
Wagons, in conjunction with Wheel Excavator  
Group 19: Helicopter, when used in erecting work; Floating Crane 250 ton and  
over; Remote Controlled Earth Moving Equipment; Underwater Equipment, remote  
or otherwise

Group Description for Areas 1 and 2  
Group 1: Assistant Mate (deckhand)  
Group 2: Fireman; Oiler  
Group 3: Assistant Engineer (Electric, Diesel, Steam or Booster Pump);  
Mates and hostmen  
Group 4: Engineer Welder; Craneman  
Group 5: Assistant Engineer (Electric Generator Operator for primary  
pump, power barge or dredge)  
Group 6: Leverman, Hydraulic  
Group 7: Leverman, Dipper:  
(a) 5 yards and under  
(b) Over 5 yards  
Group Description for Area 3  
Group 1: Leverman, Hydraulic  
Group 1A: Leverman, Dipper  
Group 2: Assistant Engineer (including Watch Engineer, Welder, Mechanic,  
and Machinist) and Mate  
Group 3: Tenderman (Boatman, Attending Dredge Plant); Fireman  
Group 4: Assistant Mate (Deckhand); Oiler

Area Code 202

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20403, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

**Notices**  
Meetings: Industry Advisory Committee 42596

## FEDERAL ENERGY ADMINISTRATION

**Proposed Rules**  
Supplemental fee payments originally due August 31, 1975; further deferral 42578

**Notices**  
Meetings: Environmental Advisory Committee 42596  
LP-Gas Industry Advisory Committee 42596

## FEDERAL INSURANCE ADMINISTRATION

**Rules**  
Map corrections: Cheektowaga, N.Y. 42557  
Dallas, Tex. 42557  
Special hazard areas 42553

## FEDERAL POWER COMMISSION

**Notices**  
Environmental Statements, availability, etc.: Detroit Edison Co. 42607  
Hearings, etc.: Alaska, Department of Highways 42602  
Arkansas Louisiana Gas Co. 42596  
Bangor Hydro-Electric Co. 42597  
Central Hudson Gas & Electric Corp. et al. 42597  
Central Telephone & Utilities Corp. 42598  
Cities Service Gas Co. 42602  
Columbia Gas Transmission Corp. 42598  
Community Public Service Co. 42599  
Damson Oil Corp. 42603  
East Tennessee Natural Gas Co. 42599  
El Paso Natural Gas Co. 42604  
Great Lakes Transmission Co. 42599  
Kentucky Utilities Co. 42599  
Marathon Oil Co. et al. 42599  
Michigan Wisconsin Pipe Line Co. 42600  
Mississippi Power & Light Co. 42600  
Monongahela Power Co. 42604

Natural Gas Pipeline Co. of America 42600  
New England Power Co. 42604  
North Penn Gas Co. 42600  
Northern States Power Co. 42604  
Panhandle Eastern Pipe Line Co. (2 documents) 42601, 42605  
South Texas Natural Gas Gathering Co. 42605  
Southern Natural Gas Co. 42602  
Southwest Gas Corp. 42603  
Trident Corp. 42605  
Trunkline Gas Co. 42607  
United Gas Pipe Line Co. 42602  
Utah Power & Light Co. 42606  
Virginia Electric & Power Co. 42607  
Western Massachusetts Electric Co. 42607  
Wisconsin Power & Light Co. 42607

## FOOD AND DRUG ADMINISTRATION

**Notices**  
Human drugs: Mephentermine; withdrawal of approval 42590  
Monobenzene topical lotion; withdrawal of approval 42590  
Protokylol with pentobarbital tablets; withdrawal of approval 42590

## GEOLOGICAL SURVEY

**Proposed Rules**  
OCS oil and gas development plans; provision for State consideration 42559

## HEALTH, EDUCATION, AND WELFARE DEPARTMENT

See also Alcohol, Drug Abuse, and Mental Health Administration; Food and Drug Administration; Health Services Administration; National Institutes of Health; Public Health Service; Social and Rehabilitation Service.  
**Proposed Rules**  
Indian Self-Determination Act; special types and methods of procurement 42673

## HOUSING AND URBAN DEVELOPMENT DEPARTMENT

See Federal Insurance Administration; Housing Management, Office of Assistant Secretary; Interstate Land Sales Registration Office.

## HOUSING MANAGEMENT, OFFICE OF ASSISTANT SECRETARY

**Proposed Rules**  
Resident manager qualifications for multifamily housing projects 42560

## IMMIGRATION AND NATURALIZATION SERVICE

**Rules**  
Certificates of citizenship; suspension of special procedure 42532

# CONTENTS

## INTERIOR DEPARTMENT

See Geological Survey; Land Management Bureau; National Park Service.

## INTERNATIONAL TRADE COMMISSION

**Notices**  
Certain non-powered hand tools from Japan; investigation and hearings 42607  
Passenger automobiles from Belgium, Canada, France, Italy, Japan, Sweden, The United Kingdom, and West Germany; antidumping investigation 42608

## INTERSTATE COMMERCE COMMISSION

**Proposed Rules**  
Review of rules of practice 42578  
**Notices**  
Hearing assignments 42618  
List of intermediaries 42619  
Motor Carrier Board transfer proceedings 42619

## INTERSTATE LAND SALES REGISTRATION OFFICE

**Notices**  
Land developers; investigatory hearings, order of suspension, etc.: Candlewood Lakes 42592  
Hiwan Subdivision 42592  
Jacksonville South, Unit One 42592  
Outdoor Resorts at Orlando 42593

## JUSTICE DEPARTMENT

See Immigration and Naturalization Service; Law Enforcement Assistance Administration.

## LABOR DEPARTMENT

**Notices**  
Adjustment assistance: Ambac Industries, Inc. 42617  
Electro Motive Corp. 42617  
Globe Union, Inc. 42618  
Servco Heel Factory 42618

## LAND MANAGEMENT BUREAU

**Rules**  
Public land orders: Alaska 42551  
California (2 documents) 42551  
Colorado 42551  
Idaho 42551  
New Mexico (2 documents) 42552, 42553  
Wyoming 42553

**Notices**  
Applications, etc.: New Mexico 42582  
**Meetings:**  
Coeur d'Alene District Multiple Use Advisory Board 42582  
Modification of administrative district office boundaries, jurisdiction, and grazing district; Utah 42582

## LAW ENFORCEMENT ASSISTANCE ADMINISTRATION

**Notices**  
Meetings: National Advisory Committee on Criminal Justice Standards and Goals 42582

## LEGAL SERVICES CORPORATION

**Notices**  
Meetings: Committee on Presidential Search 42613

## MANAGEMENT AND BUDGET OFFICE

**Notices**  
Budget rescissions and deferrals; fiscal 1976: Cumulative report as of September, 1975 42710  
Proposed rescissions and deferrals; summary 42696  
Clearance of reports; list of requests (2 documents) 42614

## MATERIALS TRANSPORTATION BUREAU

**Notices**  
Permits issued: Great Lakes Chemicals Corp., et al. 42594

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

**Notices**  
Meetings: Ad Hoc Advisory Subcommittee for evaluation of proposals for participation in the Scientific Investigations on the Mariner Jupiter/Uranus 1979 Mission 42613

## NATIONAL INSTITUTES OF HEALTH

**Notices**  
Meetings: Dental Caries Program Advisory Committee 42591  
Molecular Basis of Heparin Action Workshop 42592  
National Commission on Arthritis and Related Musculoskeletal Diseases 42591  
National Commission on Diabetes (2 documents) 42591

## NATIONAL PARK SERVICE

**Notices**  
Meetings: Advisory Board on National Parks, Historic Sites, Buildings and Monuments 42583  
Southwest Regional Advisory Committee 42583

## NATIONAL SCIENCE FOUNDATION

**Notices**  
Meetings: Advisory Panel for Metabolic Biology 42614

## NUCLEAR REGULATORY COMMISSION

**Rules**  
Radiation; miscellaneous amendments 42557

## PENSION BENEFIT GUARANTY CORPORATION

**Rules**  
Employee Retirement Income Security Act; notices of intent to terminate 42533

## POSTAL SERVICE

**Rules**  
Solicitations by mail in the guise of bills, invoices, or statements of account 42541

## PUBLIC HEALTH SERVICE

**Proposed Rules**  
Indian Self-determination Act; grants and contracts for development, construction and operation of facilities and services 42657

**Notices**  
Authority delegation: Director, Indian Health Service 42591

## SECURITIES AND EXCHANGE COMMISSION

**Notices**  
Hearings etc.: First Mortgage Investors 42615  
Hamilton Funds, Inc., et al. 42615  
Indiana & Michigan Electric Co. 42616  
Pennsylvania Electric Co. 42616  
Royal Properties Inc. 42617

## SOCIAL AND REHABILITATION SERVICE

**Proposed Rules**  
Medical Assistance Program; extension of comment period 42560

## STATE DEPARTMENT

**Rules**  
Visas; ineligible classes of immigrants 42532  
**Notices**  
Meetings: International Radio Consultative Committee (CCIR) Study Group 5 42580  
Shipping Coordinating Committee (4 documents) 42580

## TRANSPORTATION DEPARTMENT

See Federal Aviation Administration; Materials Transportation Bureau.

## TREASURY DEPARTMENT

See Customs Service.

## VETERANS ADMINISTRATION

**Rules**  
Schedule for rating disabilities; update 42535  
**Proposed Rules**  
Veterans benefits; evidence submitted with claims 42578

# list of cfr parts affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month. A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel  
CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE  
Department of Agriculture

Section 213.3313 is amended to show that one position of Private Secretary to the Deputy Assistant Secretary for International Affairs and Commodity Programs is excepted under Schedule C. Effective on September 15, 1975, § 213.3313(a) (13) is added as set out below:

§ 213.3313 Department of Agriculture.  
(a) Office of the Secretary. . . .  
(13) One Private Secretary to the Deputy Assistant Secretary for International Affairs and Commodity Programs. (5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.  
[FR Doc.75-24414 Filed 9-12-75;8:45 am]

PART 213—EXCEPTED SERVICE  
Department of Defense

Section 213.3306 is amended to show that one position of Private Secretary to the Principal Deputy Assistant Secretary (Legislative Affairs) is excepted under Schedule C. Effective on September 15, 1975, § 213.3306(a) (68) is added as set out below:

§ 213.3306 Department of Defense.  
(a) Office of the Secretary. . . .  
(68) One Private Secretary to the Principal Deputy Assistant Secretary (Legislative Affairs). (5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.  
[FR Doc.75-24415 Filed 9-12-75;8:45 am]

PART 213—EXCEPTED SERVICE  
Department of Health, Education, and Welfare

Section 213.3316 is amended to show that one position of Deputy Assistant Secretary for Legislation (Education) is excepted under Schedule C.

Effective on September 15, 1975, § 213.3316(f) (13) is added as set out below:

§ 213.3316 Department of Health, Education, and Welfare.

(f) Office of the Assistant Secretary for Legislation. . . .  
(13) One Deputy Assistant Secretary (Education). (5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-58 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.  
[FR Doc.75-24416 Filed 9-12-75;8:45 am]

PART 213—EXCEPTED SERVICE  
Department of Justice

Section 213.3310 is amended to show that one position of Secretary to the Assistant Attorney General, Legislative Affairs, is excepted under Schedule C.

Effective on September 15, 1975, § 213.3310(v) is added as set out below:

§ 213.3310 Department of Justice.  
(v) Office of Legislative Affairs. (1) One Secretary to the Assistant Attorney General. (5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.  
[FR Doc.75-24417 Filed 9-12-75;8:45 am]

PART 213—EXCEPTED SERVICE  
Department of the Treasury

Section 213.3305 is amended to show that one position of Special Assistant to the Assistant Secretary (Tax Policy) is excepted under Schedule C.

Effective on September 15, 1975, § 213.3305(a) (63) is added as set out below:

§ 213.3305 Department of the Treasury.  
(a) Office of the Secretary. . . .  
(63) One Special Assistant to the Assistant Secretary (Tax Policy). (5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.  
[FR Doc.75-24418 Filed 9-12-75;8:45 am]

PART 213—EXCEPTED SERVICE  
Veterans Administration

Section 213.3327 is amended to show (1) that one position of Confidential Assistant to the Special Assistant to the Administrator is no longer accepted under Schedule C, and (2) that one additional position of Confidential Assistant to the Assistant Deputy Administrator is accepted under Schedule C.

Effective on September 15, 1975, §§ 213.3327 (a) (1) and (a) (8) are amended as set out below:

§ 213.3327 Veterans Administration.  
(a) Office of the Administrator. (1) Three Confidential Assistants to the Special Assistant to the Administrator.

(8) Five Confidential Assistants to the Assistant Deputy Administrator. (5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-58 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.

Title 7—Agriculture

CHAPTER I—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTION, MARKETING PRACTICES), DEPARTMENT OF AGRICULTURE

PART 29—TOBACCO INSPECTION

Identification and Certification of Nonquota Maryland Broadleaf Tobacco, U.S. Type 32

Notice was published in the FEDERAL REGISTER of June 24, 1975, that the United States Department of Agriculture has under consideration the amendment of regulations governing the identification and certification of nonquota Maryland Broadleaf Tobacco, U.S. Type 32, produced and marketed in quota areas, pursuant to the authority contained in The Tobacco Inspection Act (49 Stat. 731; 7 U.S.C. 511 et seq.).

Statement of Consideration. Subpart F—Policy Statement and Regulations Governing the Identification and Certification of Nonquota Maryland Broadleaf Tobacco, U.S. Type 32, Produced and Marketed in a Quota Area, was issued in the FEDERAL REGISTER for October 9, 1973 (38 FR 27817). Past certifications of nonquota Maryland tobacco produced in quota areas had shown the need for establishing procedures to follow in certifying such tobacco as to type and for use in distinguishing Type 22 tobacco from quota tobacco. The regulations issued in Subpart F established procedures

to accomplish proper type classification production of each kind or type of non- engaged in the production of a kind of  
quotas tobacco in order to make an ac- tobacco traditionally grown in that

Done at Washington, D.C., this 9th day of Sept. 1975. (1) Seeded grapefruit shall grade at least U.S. No. 1 and be of a size not United States Department of Agriculture, is hereby designated as the governmental

to accomplish proper type classification and certification through the use of the applicable U.S. official standards after examination of a crop-lot arrangement of the tobacco. They applied to mandatory and permissive inspection as authorized or required under Sections 5 and 6 of The Tobacco Inspection Act. The procedures established in those regulations provided that determinations with respect to certification on nonquota Type 32 tobacco should be based on the Official Standard Grades for Maryland Broadleaf Tobacco, U.S. Type 32.

Public Law 93-411 was enacted into law on September 3, 1974. That statute provides that, beginning with the 1975 crop, any kind of tobacco for which marketing quotas are not in effect that is produced in an area where producers who are engaged in the production of a kind of tobacco, traditionally produced in the area, have approved marketing quotas pursuant to the Agricultural Adjustment Act of 1938, shall be subject to the quota for the kind of tobacco traditionally produced in the area. If marketing quotas are in effect for more than one kind of tobacco in an area, any nonquota tobacco produced in the area shall be subject to the quota for the kind of tobacco, traditionally produced in the area, having the highest price support under the Agricultural Act of 1949. The statute further provides that it shall not apply in cases where the Secretary or his designee finds any such nonquota tobacco is readily and distinguishably different from any kind of tobacco produced under quota through the application of the Federal Standards of Inspection and Identification of quota types and that the tobacco does not possess any of the distinguishable characteristics of a quota type. The regulations governing the certification of Maryland tobacco, a nonquota type, is, therefore, amended to comply with the requirements of Pub. L. 93-411.

The regulations are further amended to provide for an additional 60-day certification period beginning September 15 of each calendar year and changes the previous 90-day certification period beginning February 15 to a 60-day period beginning February 1 of each calendar year. These changes will more adequately accommodate growers of Maryland tobacco in all quota areas.

Interested persons desiring to submit written data, views or arguments in connection with the proposed revisions were given until July 24, 1975, to do so. Only two comments were received. One commentor generally approved the proposed amendments to the regulations but asked that the Department consider rewriting or even eliminating the crop-lot concept of display and confining the certification to individual basket, pile or sheet to avoid misinterpretation of the procedure to be followed in grading Maryland nonquota, Type 32, Broadleaf tobacco. Crop-lot display refers to the assemblage of individual lots representing the season's production of each type or kind of nonquota tobacco produced on an individual farm. It is preferable for the inspector to have access to the grower's entire

production of each kind or type of non-quota tobacco in order to make an accurate type determination applicable to the crop-lot or to individual lots, as the case may be.

The other commentor felt that the proposed regulations fail to provide the tobacco inspectors with sufficient guidance in distinguishing between Maryland and burley tobacco grown in the Southwest Virginia-Upper East Tennessee region. He further stated that the proposed regulations do not identify the "distinguishable characteristics of a quota type" which must be known in order to apply the proviso contained in Public Law 93-411.

The enactment of Public Law 93-411 requires the change in the regulations, with regard to the procedure that the Department's inspectors will use in the certification of Maryland Type 32 tobacco, that was contained in the noticed amendment which is adopted without change. The comments made by this commentor do not relate to the procedure but rather to the finer points of the inspector being able to distinguish between types of tobacco. Ample guidance is provided inspectors in this regard in the regulations found at 7 CFR 29.3251 to 29.3395 which describe the Official Standard Grades for Maryland Broadleaf Tobacco (U.S. Type 32), and the regulations found at 7 CFR 29.3001 to 29.3182 which describe the Official Standard Grades for Burley Tobacco (U.S. Type 31).

After consideration of relevant facts and exceptions, the proposed regulations are hereby adopted without change. The regulations are set forth below.

**Effective date:** September 15, 1975.

The regulations are amended as follows:

1. Section 29.9221 is revised as follows:

§ 29.9221 Policy statement.

Nonquota Maryland tobacco, U.S. Type 32, is being produced and marketed in the burley and flue-cured areas. Both burley and flue-cured tobaccos are produced under the quota system. The Official Standard Grades developed for all major tobacco types produced in the United States and Puerto Rico are adequate for inspection and grading at the market centers. However, the enactment of Pub. L. 93-411 on September 3, 1974, requires a change in the method by which certifications on nonquota Type 32 tobacco are made. Accordingly, the regulations in this subpart contain a procedure to follow in the certification of nonquota Maryland tobacco, Type 32. Certification services shall be made available to an interested party or his authorized agent following receipt of appropriate application. These services will be provided at approved receiving stations during two 60-day periods beginning September 15 and February 1 of each calendar year. This will allow producers of such tobacco in a quota area adequate time to bring the tobacco to the normal stage of cure and moisture content before certification. The determination with respect to certifications on nonquota Type 32 tobacco produced in a county where producers who are

engaged in the production of a kind of tobacco traditionally grown in that county, have approved marketing quotas under the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281, *et seq.*) shall be based on the Official Standard Grades for the quota tobacco. If marketing quotas are in effect for more than one kind of tobacco in a county, the determination with respect to certifications on nonquota Type 32 tobacco shall be based on the Official Standard Grades for the quota tobacco produced in that county having the highest price support under the Agricultural Act of 1949 (7 U.S.C. 1421, *et seq.*). *Provided, That*, if the Secretary or his designee finds, that: (a) Type 32 tobacco is readily and distinguishable different from any kind of tobacco produced under quota, through the Federal Standards of Inspection and Identification; and (b) that Type 32 tobacco does not possess any of the distinguishable characteristics of a quota type, the determination with respect to certification shall be based on the Official Standard Grades for Type 32 tobacco.

2. Section 29.9233 is revised as follows:

§ 29.9233 When certification will be made.

Certification services for the non-quota tobacco shall be made available during two 60-day periods beginning September 15 and February 1 of each calendar year. This section shall not affect provisions of existing cooperative agreements with the various tobacco producing states or state agencies.

3. Section 29.9261 is revised as follows:

§ 29.9261 Procedure to be followed.

In permissive or mandatory inspections and certifications of nonquota Maryland tobacco the inspector shall use the Official Standard Grades for the type of quota tobacco produced in the county in which the tobacco for which certification is sought has been produced or to determine whether the crop-lot can or cannot be classified as and certified to be that kind of tobacco. If there are marketing quotas in effect, in that county, for more than one kind of tobacco, the inspector shall use the Official Standard Grades for the kind of tobacco, having the highest price support under the Agricultural Act of 1949 (7 U.S.C. 1421, *et seq.*), to determine whether the crop-lot can or cannot be classified as and certified to be that kind of quota tobacco. When the inspector determines that each individual pile, basket, or sheet in the crop-lot can be graded in one of the Official Standard Grades for that type of quota tobacco, he shall certify the entire crop-lot to be that type. If the inspector determines that each individual pile, basket, or sheet in the crop-lot cannot be graded in one of the standard grades for that type of quota tobacco, he shall then establish which Official Standard Grades are applicable and certify each pile, basket, or sheet to show the appropriate class and type.

Done at Washington, D.C., this 9th day of Sept., 1975.

WILLIAM H. WALKER, III,  
Deputy Administrator,  
Program Operations.

[FR Doc. 75-24433 Filed 9-12-75; 8:45 am]

#### CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Grapefruit Reg. 16; Grapefruit Reg. 15 Terminated]

#### PART 944—FRUITS; IMPORT REGULATIONS

##### Grade and Size Restrictions

The regulations prescribe minimum grade and size restrictions applicable to imported grapefruit as follows: Imported seeded grapefruit—U.S. No. 1 and 3-12/16 inches in diameter; and imported seedless grapefruit—Improved No. 2 and 3-9/16 inches in diameter. These requirements are the same as those applicable to grapefruit produced in Florida and regulated pursuant to Marketing Order No. 905.

This regulation is consistent with section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). This section requires that whenever specified commodities, including grapefruit, are regulated under a federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity. This regulation establishes the same grade and size requirements on imported seeded and seedless grapefruit as are effective under Marketing Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines and tangelos grown in Florida.

It is hereby found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective time of this regulation beyond that herein specified (5 U.S.C. 553) in that (a) the requirements of this import regulation are imposed pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), which makes such regulation mandatory; (b) this regulation fixes the same requirements on imports of seeded and seedless grapefruit as are applicable under Grapefruit Regulation 76 (§ 905.563); (c) notice hereof in excess of three days, the minimum that is prescribed by said section 8e, is given with respect to this import regulation; and (d) such notice is hereby determined, under the circumstances, to be reasonable.

§ 944.112 Grapefruit Regulation 16.

(a) During the period September 19, 1975, through October 26, 1975, the importation into the United States of any grapefruit is prohibited unless such grapefruit is inspected and meets the following requirements:

(1) Seeded grapefruit shall grade at least U.S. No. 1 and be of a size not smaller than 3 1/16 inches in diameter, except that a tolerance for seeded grapefruit smaller than such minimum size shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in § 51.761 of the United States Standards for Florida Grapefruit; and

(2) Seedless grapefruit shall grade at least Improved No. 2 and be of a size not smaller than 3 9/16 inches in diameter, except that a tolerance for seedless grapefruit smaller than such minimum size shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in § 51.761 of the United States Standards for Florida Grapefruit. ("Improved No. 2" shall mean grapefruit grading at least U.S. No. 2 and also meeting the requirements of the U.S. No. 1 grade as to shape (form) and color.)

(b) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service,

United States Department of Agriculture, is hereby designated as the governmental inspection service for the purpose of certifying the grade, size, quality, and maturity of grapefruit that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with appropriate evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of grapefruit, is required on all imports of grapefruit. Such inspection and certification services will be available upon application in accordance with the rules and regulations governing inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51) but, since inspectors are not located in the immediate vicinity of some of the small ports of entry, such as those in southern California, importers of grapefruit should make arrangements for inspection, through the applicable one of the following offices, at least the specified number of days prior to the time when the grapefruit will be imported:

Ports	Office	Advance notice
All Texas points.....	Leo M. Denbo, P.O. Box 107, San Juan, Tex. 78589 (Phone—512-787-4091), or Charles E. Parrigon, P.O. Box 10750, El Paso, Tex. 79905 (Phone—915-543-7728)	1 day.
All New York points.....	Carmine J. Cavallo, Room 28A Hunts Point Market, Bronx, N.Y. 10474 (Phone—212-991-7668 & 7669), or Charles D. Renek, 176 Niagara Frontier Food Terminal, Room 8, Buffalo, N.Y. 14206 (Phone—716-824-1585).	Do.
All Arizona points.....	B. O. Morgan, P.O. Box 1614, Nogales, Ariz. 85021 (Phone—602-287-2902)	Do.
All Florida points.....	Lloyd W. Boney, 1350 Northwest 12th Ave., Room 539, Miami, Fla. 33136 (Phone—305-324-6116), or J. T. Scruggs, P.O. Box 20194, Orlando, Fla. 32814 (Phone—305-884-9511), or Johnnie L. Corbitt, Unit 46, 3335 North Edgewood Ave., Jacksonville, Fla. 32205 (Phone—904-354-5083).	Do.
All California points.....	Daniel P. Thompson, 784 South Central Ave., Room 266, Los Angeles, Calif. 90021 (Phone—213-622-8756).	3 days.
All Louisiana points.....	Jesse M. Anderson, 6027 Federal Office Bldg., 701 Loyola Ave., New Orleans, La. 70113 (Phone—504-589-6741).	1 day.
All other points.....	Michael A. Castille, Fruit and Vegetable Division, AMS-USDA, Washington, D.C. 20250 (Phone—202-447-2482).	3 days.

(c) Inspection certificates shall cover only the quantity of grapefruit that is being imported at a particular port of entry by a particular importer.

(d) The inspection performed, and certificates issued, by the Federal or Federal-State Inspection Service shall be in accordance with the rules and regulations of the Department governing the inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51). The cost of any inspection and certification shall be borne by the applicant therefor.

(e) Each inspection certificate issued with respect to any grapefruit to be imported into the United States shall set forth, among other things:

- (1) The date and place of inspection;
- (2) The name of the shipper, or applicant;
- (3) The commodity inspected;
- (4) The quantity of the commodity covered by the certificate;
- (5) The principal identifying marks on the container;
- (6) The railroad car initials and number, the truck and the trailer license number, the name of the vessel, or other identification of the shipment; and
- (7) The following statement if the facts warrant: Meets U.S. import requirements under section 8e of the Agri-

cultural Marketing Agreement Act of 1937, as amended.

(f) Notwithstanding any other provisions of the regulation, any importation of grapefruit which, in the aggregate, does not exceed five standard nailed boxes, or equivalent quantity, may be imported without regard to the restrictions specified herein.

(g) It is hereby determined that imports of grapefruit, during the effective time of this regulation, are in most direct competition with grapefruit grown in the State of Florida. The requirements set forth in this section are the same as those being made effective for grapefruit grown in Florida.

(h) No provisions of this section shall supersede the restrictions or prohibitions on grapefruit under the Plant Quarantine Act of 1912.

(i) Nothing contained in this regulation shall be deemed to preclude any importer from reconditioning prior to importation any shipment of grapefruit for the purpose of making it eligible for importation.

(j) The terms used herein relating to grade, except Improved No. 2 grade, and diameter shall have the same meaning as when used in the United States Standards for Florida Grapefruit (7 CFR 51-750-51.784). Improved No. 2 shall have

the same meaning as set forth in the potatoes handled by him as the first han-

tity, of potatoes handled by him as the

regulation, all French variety prunes

on Committee proposals. Committee § 993.400 Modification.

the same meaning as set forth in the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905). Importation means release from custody of the United States Bureau of Customs.

(k) Grapefruit Regulation 15 (§ 944.111; 39 FR 33306, 37188; 40 FR 8322, 11346, 14891, 20063, 21468) is hereby terminated at the effective time hereof.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: September 10, 1975.

Effective date: September 19, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and  
Vegetable Division, Agricultural  
Marketing Service.

#### PART 945—IRISH POTATOES GROWN IN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

##### Expenses and Rate of Assessment

This document authorizes the Idaho-Eastern Oregon Potato Committee to spend \$40,648.50 for its operations during the fiscal period ending May 31, 1976, and to collect \$0.0026 per hundredweight on assessable potatoes handled by first handlers under the program.

The committee is the administrative agency established under Marketing Agreement No. 98 and Order No. 945, both as amended (7 CFR Part 945), regulating the handling of Irish potatoes grown in Idaho and Malheur County, the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

Notice was published in the August 25 FEDERAL REGISTER (40 FR 37045) regarding the proposals. It afforded interested persons an opportunity to file written comments not later than September 9, 1975. None was filed.

After consideration of all relevant matters, including the proposals in the notice, it is found that the following expenses and rate of assessment shall be approved.

It is further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because this part requires that the rate of assessment for a particular fiscal period shall apply to all assessable potatoes from the beginning of such period.

The regulation follows:

§ 945.228 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending May 31, 1976, by the Idaho-Eastern Oregon Potato Committee for its maintenance and functioning and for such other purposes as the Secretary determines to be appropriate will amount to \$40,648.50.

(b) The rate of assessment to be paid by each handler in accordance with this part shall be \$0.0026 per hundredweight, or equivalent quantity, of assessable

potatoes handled by him as the first handler during the fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as a reserve to the extent authorized in § 945.44(b).

(d) Terms used in this section shall have the same meaning as when used in the marketing agreement and this part.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: September 10, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and Veg-  
etable Division, Agricultural  
Marketing Service.

[FR Doc. 75-24486 Filed 9-12-75; 8:45 am]

#### PART 946—IRISH POTATOES GROWN IN WASHINGTON

##### Expenses and Rate of Assessment

This document authorizes the State of Washington Potato Committee to spend not more than \$13,450 for its operations during the fiscal period ending June 30, 1976, and to collect four-tenths cent per hundredweight on assessable potatoes handled by first handlers under the program.

The committee is the administrative agency established under Marketing Agreement No. 113 and Order No. 946, both as amended, regulating the handling of Irish potatoes grown in Washington. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

Notice was published in the August 8 FEDERAL REGISTER (40 FR 33458) regarding the proposals. It afforded interested persons an opportunity to file written data, views, or arguments pertaining thereto not later than August 22, 1975. None was filed.

After consideration of all relevant matters, including the proposals set forth in the notice, it is hereby found and determined that the following budget and rate of assessment should be approved.

It is further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because this part requires that the rate of assessment for a particular fiscal period shall apply to all assessable potatoes from the beginning of such period.

The regulation follows:

§ 946.228 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending June 30, 1976, by the State of Washington Potato Committee for its maintenance and functioning and for such other purposes as the Secretary may determine to be appropriate will amount to \$13,450.

(b) The rate of assessment to be paid by each handler in accordance with this part shall be four-tenths cent (\$0.004) per hundredweight, or equivalent quan-

tity, of potatoes handled by him as the first handler thereof during the fiscal period, except potatoes for canning, freezing, and "other processing" as defined in the act shall be exempt.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as a reserve.

(d) Terms used in this section have the same meaning as when used in the marketing agreement and this part.

Dated: September 9, 1975.

CHARLES R. BRADER,  
Deputy Director, Fruit and  
Vegetable Division, Agricultural  
Marketing Service.

[FR Doc. 75-24431 Filed 9-12-75; 8:45 am]

#### PART 993—DRIED PRUNES PRODUCED IN CALIFORNIA

##### Undersized Prune Regulation and Salable and Reserve Percentages for the 1975-76 Crop Year

Notice was published in the August 6, 1975, issue of the FEDERAL REGISTER (40 FR 33047) on proposals to: (1) Establish salable and reserve percentages of 100 percent and 0 percent, respectively, for the 1975-76 crop year; (2) modify the size openings prescribed in § 993.49(c) for the determination of undersized prunes; and (3) on the basis of this modification, establish an undersized prune regulation for prunes received by handlers from producers and dehydrators during the 1975-76 crop year.

The proposals were recommended by the Prune Administrative Committee in accordance with the provisions of the marketing agreement, as amended, and Order No. 993, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

Interested persons were given until August 21, 1975, in which to submit written comments with respect to the proposals. Three comments were received, two of which were submitted by the same person but were withdrawn from consideration.

The proposals in the notice were based on estimates of the Committee that California's 1975 dried prune production would approximate 145,000 natural condition (N.C.) tons, and that carryin on August 1, 1975, the beginning of the 1975-76 crop year, of salable prunes from 1974 production would be about 58,000 N.C. tons. No information has been received materially altering these estimates.

These estimates would result in a supply of about 28,500 N.C. tons in excess of trade demand. In order to remove a portion of this excess from the supply for human consumption, it was proposed in the notice that an undersized regulation be established for the 1975-76 crop year. The undersized regulation would be applicable to all prunes received by handlers from producers and dehydrators during that crop year, and would remove the smallest—i.e., the least desirable—prunes from the 1975 crop. Under this

regulation, all French variety prunes which pass freely through a screen opening 24/32 of an inch in diameter would be classified as undersized prunes. For non-French prunes the opening would be 30/32 of an inch in diameter.

Although an undersized regulation would not remove the entire excess, it is concluded that the interests of producers would best be served during the 1975-76 crop year if no volume regulation were established for that year. Producers would be able to deliver all their prunes, other than undersized prunes, as salable prunes to handlers and could be paid promptly for these. If volume regulation were established, payment for the reserve portion would necessarily be deferred until the Committee disposed of the reserve. Moreover, producers would not incur costs involved in reserve pooling operations. Finally, making the entire crop, other than undersized prunes, available for sale by handlers for human consumption would give them greater flexibility in marketing of the 1975 crop of prunes.

The comment which was not withdrawn from consideration contended that size regulation is an indirect but effective method of controlling volume. The commentator stated that it is much easier to assess the effects on price of direct volume control, whereas size standards are harder to measure and open up possibilities of favoritism to particular producers with particular types of yields. The commentator also contended that size and quality standards cannot be legitimate unless actual consumer input is included in the standard process of decision making, and urged that consumer and public representatives be included on the Committee.

That an undersized regulation is a form of volume control is not denied. Handlers cannot market undersized prunes for human consumption, but can dispose of them in non-human consumption outlets such as livestock feed. However, prunes which would be removed by the 1975-76 undersized regulation would not, in the absence of the regulation, be used for human consumption as prunes. They are too small for this purpose, but may be used under the order in products such as prune juice. An undersized regulation for the 1975-76 crop year would not short the supply of prunes for prune products since this supply is ample. On the other hand, a direct volume control such as ordinarily established under the order would withhold, as reserve, prunes which could be marketed for human consumption as prunes as well as for prune products.

The order provides that the Committee shall consist of 21 members, 14 of whom shall represent producers and 7 shall represent handlers. In order to include a public representative on the Committee it would be necessary to amend the order. Although the composition of the Committee does not provide for a public representative, members of the public are not estopped from presenting their views

on Committee proposals. Committee meetings are open to the public and those in attendance are permitted to present their views. Moreover, Committee proposals on grade, size and volume regulations are subject to the requirements of the Administrative Procedure Act, including publication of the proposals in notices of proposed rule making and opportunity for all interested persons to submit written data, views, or arguments on the proposals. Consideration was given to the views presented by the commentator in this matter, and thus these views were included in the standard process of decision-making. No useful purpose would be served to discontinue direct quantity control or eliminate it altogether "until such time as the public is adequately protected", as urged by the commentator.

In order to establish the undersized regulation proposed in the notice for the 1975-76 crop year, it is necessary to modify the openings prescribed in § 993.49(c). Paragraph (c) provides, in part, that any undersized regulation shall provide that the diameter of the round opening for French prunes shall be 23/32 of an inch, and for non-French prunes 28/32 of an inch, or such larger openings as may be prescribed pursuant to § 993.52. Based on the authority in §§ 993.49(c) and 993.52, a new § 993.400 should be included in Subpart—Undersized Prune Regulation (7 CFR 993.401) modifying the openings prescribed in § 993.49(c) to permit undersized regulations using openings of 24/32 of an inch for French prunes, and 30/32 of an inch, for non-French prunes.

After consideration of all relevant matter presented, including that in the notice, the information and recommendation of the Committee, the comment submitted pursuant to the notice, and other available information, it is found, based on the authority in §§ 993.49(c) and 993.52, that to modify the openings prescribed in § 993.49(c) to permit undersized regulations of 24/32 of an inch for French prunes and 30/32 of an inch for non-French prunes would tend to effectuate the declared policy of the act, and further, it is determined that for the 1975-76 crop year supply conditions warrant the establishment of such size regulation for undersized prunes.

1. Subpart Salable and Reserve Percentages and Handler Reserve Obligation and Voluntary Diversion Operations for 1974-75 Crop Year (7 CFR 993.210) is revised to read as follows:

##### Subpart—Salable and Reserve Percentages

§ 993.211 Salable and reserve percentages for prunes for the 1975-76 crop year.

The salable and reserve percentages for the 1975-76 crop year shall be 100 percent and 0 percent, respectively.

2. Subpart—Undersized Prune Regulation (7 CFR 993.401) is amended by adding new §§ 993.400 and 993.402 reading as follows:

##### § 993.400 Modification.

Pursuant to the authority in § 993.52, the provisions in § 993.49(c) prescribing size openings for undersized prune regulations are hereby modified to permit larger size openings. For French prunes, any undersized regulation may prescribe an opening of 23/32 of an inch or 24/32 of an inch; for non-French prunes, any undersized regulation may prescribe an opening of 28/32 of an inch or 30/32 of an inch.

##### § 993.402 Undersized prune regulation for the 1975-76 crop year.

Pursuant to §§ 993.49(c) and 993.52, an undersized prune regulation for the 1975-76 crop year is hereby established. Undersized prunes are prunes which pass freely through round openings as follows: For French prunes, 24/32 of an inch in diameter; for non-French prunes, 30/32 of an inch in diameter.

It is further found that good cause exists for not postponing the effective time of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that: (1) The relevant provisions of said amended marketing agreement and this part require that salable and reserve percentages established for any crop year shall also apply to prunes received by handlers in the subsequent crop year and before salable and reserve percentages are established for that crop year; (2) salable and reserve percentages of 90 percent and 10 percent, respectively, were established for the 1974-75 crop year; (3) this action establishes salable and reserve percentages of 100 percent and 0 percent, respectively, for the current 1975-76 crop year, and these percentages should become effective promptly so as to terminate any reserve obligations accrued during this crop year on the basis of the previously effective percentages; (4) the provisions of the amended marketing agreement and this part also require that an undersized regulation established for a particular crop year shall be applicable to all prunes received during the crop year by handlers from producers and dehydrators; (5) the current crop year began on August 1, 1975, and the percentages and undersized regulation established herein will apply automatically to such prunes beginning with such date; and (6) handlers are beginning to receive prunes in volume and no useful purpose would be served by delaying the effective time of this action.

It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with OMB Circular A-107.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: September 8, 1975.

CHARLES B. BRADER,  
Deputy Director,  
Fruit and Vegetable Division.

**Title 8—Aliens and Nationality**  
**CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE**

**PART 341—CERTIFICATES OF CITIZENSHIP**

**Suspension for an Additional Period of Special Procedure Authorizing Certain Naturalization Applicants To File, Prior to Naturalization, Application for Certificate of Citizenship for Derivative Child**

Reference is made to the Notice published in the *FEDERAL REGISTER* of October 21, 1974 (39 FR 37355) suspending until October 1, 1975, the provisions of 8 CFR 341.1(b).

In view of the continuing manpower considerations which resulted in the temporary suspension of the special procedure provided by 8 CFR 341.1(b), the provisions of § 341.1(b) are being suspended for an additional period (until April 1, 1976, unless manpower considerations render feasible or practicable their reinstatement at an earlier date).

In the light of the foregoing, the provisions of 8 CFR 341.1(b) are hereby suspended until April 1, 1976, unless the suspension is revoked prior thereto by notice published in the *FEDERAL REGISTER*.

Dated: September 9, 1975.

**Title 22—Foreign Relations**

**CHAPTER I—DEPARTMENT OF STATE**

[Dept. Reg. 108.715]

**PART 42—VISAS: DOCUMENTATION OF IMMIGRANTS UNDER THE IMMIGRATION AND NATIONALITY ACT, AS AMENDED**

**Ineligible Classes of Immigrants**

A Notice of proposed rule making regarding amendments to subparagraph (15) of paragraph (a) of § 42.91 of Title 22, Code of Federal Regulations, was published in the *FEDERAL REGISTER* on January 8, 1975 (40 FR 1515). The amendments were proposed for the purpose of establishing standards to be applied by consular officers in determining the eligibility of an alien to receive an immigrant visa under section 212(a) (15) of the Act.

Comments in response to the notice were received from over 50 persons. All but three writers were opposed to some of the amendments. A majority of the objections related to paragraph (a) (15) (iii) of § 42.91 which proposed to limit the persons who could vouch support for the intending immigrant to certain members of his immediate family and to paragraph (a) (15) (v) of § 42.91 which proposed a bond requirement for certain categories of immigrants. Most of the writers expressed the opinion that paragraph (a) (15) (iii) contemplated arbitrary and unduly restrictive limitations and many also urged that such a regulation would illegally circumscribe the discretionary authority which the Con-

gress has vested in consular officers through the enactment of section 212(a) (15) of the Immigration and Nationality Act. Paragraph (a) (15) (v) was also universally attacked as being an arbitrary and unreasonable approach to the problem posed by the high incidence of newly arrived immigrants applying for and receiving public assistance.

In view of the public comments in opposition to paragraphs (a) (15) (iii) and (v) of § 42.91, the Department is not adopting these two amendments at this time but is giving further consideration and study to alternative ideas which were generated as a result of these proposals. A rule making relating to the substance of these controversial proposals will be published at a later date.

There were no significant public comments directly related to paragraph (a) (15) (i). Paragraph (a) (15) (ii) of § 42.91 was the subject of objections by over half of the persons responding. Most of the objections were based on the grounds that employers would be reluctant to provide information and details about their business and because of this and the trouble in completing the forms, the regulation would serve to deter companies, especially large institutionalized companies, from making employment offers to aliens. Some of the writers also felt that the formal requirement for confirming a prospective employment offer would pose contractually binding obligations on behalf of each party. The form which is prescribed by the Department will provide only for the information needed by the consul to form an opinion about the reality of the employment offer and the level of income that will be afforded the immigrant through employment. Aside from the name, address and telephone number of the employer, the form will require only that the employer state the nature of his business and the number of employees (if under ten) as well as a description of the job being taken by the alien, the weekly hours he is to work and his hourly rate of pay. Documentary evidence of the employment offer has always been required of an immigrant relying on an offer of prearranged employment to meet public charge issues and the more formalized documentary requirement being imposed by this regulation is not viewed as affecting the contractual rights of the parties.

About half of the writers submitting comments objected to paragraph (a) (15) (iv) of § 42.91 because consular officers have no authority to use discretion when an immigrant visa applicant's annual income falls below the specified poverty guideline level but will still be able to consider other circumstances and even refuse a visa under section 212(a) (15) of the Act in some cases in which an applicant establishes that he will have a prospective income above the poverty guideline level. These dissenters argue that this proposal imposes an arbitrary and unrealistic decision upon the consular officer in cases involving special circumstances such as, for example, where the immigrant will be receiving free or low cost living accommodations

from relatives. The Department agrees that the consular officer should not be precluded from considering and evaluating all material circumstances relating to public charge issues and the language of the paragraph has been modified accordingly. The paragraph, as modified, will create a presumption of ineligibility under section 212(a) (15) of the Act when an applicant does not establish that he will have an income above the specified poverty guideline level. The paragraph also raises an implication intended by the Department; that an applicant who establishes that his prospective income will exceed the specified poverty guideline level will be presumed eligible for a visa under this section of the Act.

After consideration of all the public comments, paragraphs (a) (15) (i) and (a) (15) (ii) amending § 42.91 of Title 22, Code of Federal Regulations, are being adopted without change. Proposed paragraph (a) (15) (iii) is not being adopted at this time but proposed paragraph (a) (15) (iv) is slightly modified and adopted as paragraph (a) (15) (iii). The amendments to the bond regulation in the proposed paragraph (a) (15) (v) are not being adopted at this time but the original bond regulation is being retained and renumbered as paragraph (a) (15) (iv).

Subparagraph (15) of paragraph (a) of § 42.91 is amended to read:

§ 42.91 Aliens ineligible to receive a visa.

(a) Aliens ineligible under the provisions of section 212(a) of the Act. . . .

(15) Public Charge. (i) Any conclusion that an alien is ineligible to receive an immigrant visa under the provisions of section 212(a) (15) of the Act shall be predicated upon circumstances which indicate that the alien will probably become a charge upon the public after entry into the United States.

(ii) An alien relying on an offer of prearranged employment to establish eligibility under section 212(a) (15) of the Act, other than an offer of employment certified by the Department of Labor pursuant to section 212(a) (14) of the Act (shall not be deemed eligible to receive an immigrant visa unless the employment offer has been made on a form prescribed by the Department which has been sworn to and subscribed to by the employer before a notary public.

(iii) An alien relying solely on the personal income he will be receiving to establish eligibility under section 212(a) (15) of the Act who does not establish that he will have an annual income above the income poverty guidelines published annually or at shorter intervals by the Community Services Administration (formerly the Office of Economic Opportunity) as derived from the low income threshold tables which are also published annually by the Bureau of the Census, and who is without other adequate financial resources, shall be presumed ineligible under that section of the Act.

(iv) An alien within the purview of section 212(a) (15) of the Act, who is

otherwise eligible to receive a visa, may be issued an immigrant visa upon receipt of notice by the consular officer of the giving of a bond or undertaking, as provided in section 221(g) of the Act, if the consular officer is satisfied that the giving of such bond or undertaking removes the alien's ineligibility to receive a visa under this section of the law.

Effective date. The amendments will become effective on October 20, 1975.  
 (Sec. 104, 66 Stat. 174; 8 U.S.C. 1104)

Dated: September 2, 1975.

For the Secretary of State.

LEONARD F. WALENTYNOWICZ,  
 Administrator, Bureau of Security and Consular Affairs,  
 Department of State.

**Title 29—Labor**

**CHAPTER XXVI—PENSION BENEFIT GUARANTY CORPORATION**

**PART 2604—NOTICE OF INTENT TO TERMINATE**

**Purpose, Scope, Requirement of Notice**

On July 14, 1975 the Pension Benefit Guaranty Corporation ("the PBGC") published for comment in the *FEDERAL REGISTER*, 40 FR 29555, proposed regulations pertaining to the Notice of Intent to Terminate required to be filed with the PBGC pursuant to § 4041(a) of the Employee Retirement Income Security Act of 1974 ("the Act"). The PBGC received several comments on the proposed regulations and has given consideration to each of them in promulgating these final regulations. As set forth in greater detail below several of the recommended changes have been implemented, but others have not. In addition, these final regulations contain technical changes from the proposed version and some substantive changes initiated by the PBGC staff.

A number of the comments received focused on the large amount of information required to be submitted with the Notice of Intent to Terminate and the expected difficulty of some plans in gathering all the information and filing it in a timely manner under the regulations. In response to these comments several changes have been made in the final regulations. The final regulations do not require the submission of all amendments to the plan, but rather only those plan amendments adopted or effective within the 5-year period preceding the proposed date of termination (§ 2604.4(b) (1)). The proposed regulations required the submission of copies of all requests for determination submitted to the Internal Revenue Service since the establishment of the plan. The final regulations only require submission of a request for determination relating to the termination of the plan (§ 2604.4(b) (18)). Consistent with this change in the regulations, the final regulations no longer require the submission of all letters of determination issued by the Internal Revenue Service. Rather they require merely the submission of the initial letter of determination, any letters relating to the disqualification and subsequent requalification of the plan and any letters of determination pertaining to the termination of the plan (§ 2604.4(b) (19)). Further, the table contained in § 2604.4(b) (20) of the final regulations has been simplified. The proposed regulations (§ 2604.3(b) (19)) required a breakdown of the data on retired and disabled participants by the type of benefit they are receiving. The final regulations simply require figures on the total number of retired and disabled participants and the aggregate amount of monthly benefits paid to such participants.

In addition to the changes discussed above, which should minimize the burden placed on the plan administrator in filing the Notice of Intent to Terminate, it should be noted that the proposed regulations contained a provision, § 2604.3(c), which allowed the plan administrator to request an extension of time to file or a waiver of the obligation to file any of the information required to be submitted with the Notice. This provision has been expanded in the final regulation to make clear that if the PBGC grants such extension or waiver, the Notice will be deemed to be complete when filed and shall not be voidable by the PBGC (§ 2604.4(c)). Moreover, a provision has been added, § 2604.4(d), stating that whenever the plan administrator requests an extension of time to complete the filing of the Notice, he shall also submit a signed agreement in which he agrees that if the PBGC grants such request, the 90-day period set forth in § 4041(a) of the Act, during which time assets of the plan may not be distributed pursuant to the termination of the plan, shall be automatically extended for an amount of time equal to the extension of time granted by the PBGC. It was believed necessary to add this provision so as to insure that the PBGC will have the full statutory 90-day period in which to make the required determination regarding the sufficiency of the plan's assets.

Some comments noted that certain of the information required to be submitted, i.e., that relating to compensation contained in requests for IRS determinations, is barred from public disclosure (see § 6104(a) (1) (C) of the Internal Revenue Code of 1954). In general, the PBGC believes that the Notice of Intent to Terminate and the information submitted therewith will be subject to public disclosure under the Freedom of Information Act, 5 U.S.C. 552. It is recognized, however, that in certain limited situations some of the information may not be required to be disclosed. In addition to the information relating to compensation referred to above, it is possible that the statement of the reason for terminating the plan (§ 2604.4(d) (22)) might, in some cases, contain confidential commercial or financial information which would be exempt from disclosure pursuant to paragraph (b) (4) of the Freedom of Information Act, to assist the PBGC in determining whether

any portion of the filing may not be disclosable a new provision, § 2604.4(b) (25), has been added, which requires the plan administrator state whether he believes any of the information submitted with the Notice is not disclosable under the Freedom of Information Act, to specify such information and to state the grounds for his belief.

A number of groups suggested that the plan administrator be required to deliver a copy of the Notice of Intent to Terminate to the union representative of the affected employees. The PBGC believes, with certain reservations noted below, that, as modified, this is a good suggestion. Accordingly, the final regulations require at § 2604.3(e) that immediately upon the filing of a Notice with the PBGC the plan administrator shall give written notification of this fact to the affected employees. The notification need simply state the date on which the Notice of Intent to Terminate was filed with the PBGC and the date of termination of the plan proposed therein. The PBGC believes it would be unduly burdensome to require the plan administrator to transmit all of the information required to be filed with the Notice to the employees or their bargaining representative. Employees or union representatives who wish to see the entire filing may request it from the PBGC pursuant to the Freedom of Information Act, and it will be made available in accordance with the regulations of the PBGC issued thereunder, 29 CFR 2603.

Delivery of the notification to the employees may be accomplished in one of two ways:

1. If the employees are represented by a union, the notification shall be delivered to the union representative; and  
 2. If the employees are not represented by a union, the notification shall be posted in a location or locations normally used by the employer for posting notices to employees.

Several questions and comments were received relating to the information on "active participants" required to be submitted pursuant to § 2604.4(b) (20). The final regulations do two things to clear up the apparent confusion. First, that term as it is used in § 2604.4(b) (20) is defined in § 2604.2. Second, the first item in the table contained in paragraph (20) referred to above has been amended to read "Active participants without vested rights."

There were suggestions made that the information required to be submitted under § 2604.4(b) (15) and (16) may not be recent enough to be of value to the PBGC. The PBGC recognizes that this, indeed, may be true in some cases. However, we believe that a rule that would require that an actuarial statement and a financial statement be prepared in connection with the filing of the Notice would be unduly burdensome. Where the PBGC believes that the information it has received under paragraphs (b) (15) and (16) is not adequate for its needs, the PBGC will require the submission of more up-to-date information.

Some confusion was expressed regarding the statement required to be made

under § 2604.4(b) (24) as to the suffi-

in-service as provided by the plan, upon

of the IRS Form or submission where it

plan at market value, the latest available such list.

Act. The statement shall specify the information that may not be subject to

Title 38—Pensions, Bonuses, and Veterans' Relief

under § 2604.4(b) (24) as to the sufficiency of the plan assets. Accordingly, that provision has been amended to make it clear that the statement goes to whether the plan assets are believed to be sufficient to satisfy all nonforfeitable benefits under the plan other than those benefits which become nonforfeitable solely because of the termination of the plan.

Finally, as noted above, certain technical and clarifying changes have been made in the regulations. Among the most important is that the language of § 2604.4(b) (4) has been made more explicit with respect to the nine-digit Internal Revenue Service Identification Number required to be reported under that paragraph, and the second part of that paragraph pertaining to the three-digit Plan Number has been set off as a new paragraph (b) (5) or § 2604.4. The subsequent paragraphs of that section have been re-numbered accordingly. Further, a new § 2604.2, "Definitions," has been added, and the subsequent sections of the regulations have therefore been re-numbered.

Because of the need to provide immediate guidance to the public with respect to the procedures to be followed in filing a Notice of Intent to Terminate and with respect to the information which must be submitted with such Notice, I find that good cause exists for making these regulations effective immediately September 15, 1975.

Accordingly, Chapter XXVI of Title 29 of the Code of Federal Regulations is amended by adding a new Part 2604, reading as follows:

#### PART 2604—NOTICE OF INTENT TO TERMINATE

Sec.

- 2604.1 Purpose and Scope
- 2604.2 Definitions
- 2604.3 Requirement of Notice
- 2604.4 Contents of Notice
- 2604.5 Date of Filing
- 2604.6 Computation of Time

**AUTHORITY:** Secs. 4002, 4041, Pub. L. 93-406, 88 Stat. 1004, 1020.

##### § 2604.1 Purpose and scope.

(a) **Purpose.** The purpose of this part is to prescribe for non-multiemployer plans the contents of and procedures for filing the Notice of Intent to Terminate required by § 4041(a) of the Act.

(b) **Scope.** This part applies to terminations of non-multiemployer pension benefit plans covered by § 4021 of the Act. With respect to those plans, this part supersedes the interim rules governing Notices of Intent to Terminate which appeared at 39 FR 39163 (Sept. 3, 1974).

##### § 2604.2 Definitions.

As used in this part—

"Act" means the Employee Retirement Income Security Act of 1974, 88 Stat. 1001 et seq.

"Active participants" means those participants who are currently employed, or on furlough, leave of absence, or lay-off, if the plan provides that such individuals continue to retain or accrue pension credits. A participant ceases to be an "active participant" upon incurring a break-

in-service as provided by the plan, upon terminating employment with a right to a deferred vested benefit, or upon retiring under the terms of the plan.

"PBGC" means the Pension Benefit Guaranty Corporation.

##### § 2604.3 Requirement of notice.

(a) **General.** A Notice of Intent to Terminate a plan to which this part applies shall be filed with the PBGC.

(b) **Who shall file.** The plan administrator, as defined in section 3(16) of the Act, or a duly authorized representative acting on behalf of the plan administrator, shall sign and file the Notice. A Notice submitted by a duly authorized representative, other than an attorney at law, shall be accompanied by a notarized power of attorney, signed by the plan administrator, which authorizes the said representative to sign and submit such a Notice, and, if desired, to act on behalf of the plan administrator in connection with the termination.

(c) **When to file.** A Notice required to be filed with the PBGC under the provisions of this part shall be delivered to the PBGC at least 10 days prior to the proposed date of termination of the plan.

(d) **Where to file.** A Notice or supplemental information required to be filed with the PBGC under the provisions of this part may be submitted by mail to the Office of Program Operations, Pension Benefit Guaranty Corporation, P.O. Box 7119, Washington, D.C. 20044, or may be submitted by hand to the Office of Program Operations, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C.

(e) **Notice to employees.** Whenever a Notice is filed pursuant to this part, the plan administrator or his duly authorized representative shall immediately give written notification in the manner set forth below to the employees covered by the plan of the filing of the Notice. The notification shall state the date on which the Notice was filed and the date of termination proposed in the Notice. If the employees are represented by a union, the notification required by this section shall be delivered to the union representative. If the employees are not represented by a union, the notification shall be posted in the location or locations normally used by the employer for posting notices to employees.

(f) **Effect of failure to file.** Failure to file the Notice required by this part prior to the termination of a pension plan constitutes a violation of the provisions of Title IV of the Act.

##### § 2604.4 Contents of notice.

(a) **General.** Each Notice required to be submitted pursuant to this part shall contain the information listed below. The response to each numbered item must be identified by item number. If any requested information is included in an Internal Revenue Service Form or submission attached to the Notice, that information need not be repeated in the body of the Notice. Instead, the information may be incorporated by reference to the number, date, and page or pages

of the IRS Form or submission where it appears.

(b) **Information to be contained in notice.** Except as provided in paragraph (a) of this section, each Notice shall contain:

(1) The name, address, zip code and telephone number of the plan administrator and of the duly authorized representative, if any, of the plan administrator;

(2) The name of the plan;

(3) The name and address of the plan sponsor or sponsors, and, if different, of each employer employing plan participants, and the name and address of each trust under the plan;

(4) The nine-digit Internal Revenue Service Employer Identification Number assigned to each person identified in response to item (3);

(5) The three-digit Plan Number assigned to the plan by the sponsor or sponsors, or if applicable, by the employer or employers employing plan participants. If the plan has not previously been assigned a Plan Number, the terminating plan shall be given the number "001". If Plan Numbers have been assigned to other plans, the terminating plan should be assigned the three-digit number following the last number assigned;

(6) The nine-digit Internal Revenue Service Employer Identification Number of the trust, or trusts, established with respect to the plan;

(7) The name, address, and telephone number of every person, including a trust, holding or managing any plan assets;

(8) The number, if any, that had been assigned to the plan by the United States Department of Labor under the Welfare and Pension Plans Disclosure Act;

(9) The proposed date of termination of the plan, which date shall be no earlier than 10 days after the date the Notice is delivered;

(10) A copy of the document or documents establishing the plan;

(11) Copies of all amendments to the plan adopted or effective within the 5-year period preceding the proposed date of termination;

(12) A copy (or copies) of any group annuity or group insurance contracts or trust agreement (or agreements) providing for management of the assets of the plan, its administration, or the payment of benefits under the plan;

(13) The name, address and telephone number of each labor organization, if any, which represents employees who are participants in the plan; and the name and title of the principal officer, or officers, of that organization and/or of a labor organization of which it is a subordinate body, with whom the employer negotiates over matters relating to the plan;

(14) A complete copy of any collective bargaining agreement which contains provisions relating to the plan;

(15) A copy of the most recent actuarial statement and opinion (if any) relating to the plan;

(16) A copy of the most recent financial statement and opinion (if any) relating to the plan and, if that statement does not include a list of the assets of the

plan at market value, the latest available such list;

(17) A statement of any material change in the assets or liabilities of the plan occurring after the date of the actuarial and financial statements referred to in items (15) and (16);

(18) A copy of any request for a determination from the Internal Revenue Service with respect to the plan's termination;

(19) Complete copies of any letters of determination issued by the Internal Revenue Service relating to the establishment of the plan, any letters of determination relating to the disqualification of the plan and any subsequent requalification, and any letters of determination relating to the termination of the plan;

(20) Information as of the proposed date of termination concerning the number of participants and, for retired and disabled participants, the number of such participants and the aggregate monthly dollar amount of the benefits such participants are currently receiving from the plan compiled in the following tabular format:

##### ALL PARTICIPANTS

1. Active participants without vested rights.
2. Active participants with deferred vested rights.
3. Separated participants with deferred vested rights.
4. Retired and disabled participants and beneficiaries receiving payments from the plan.
5. Total.

##### ALL RETIRED AND DISABLED PARTICIPANTS

1. Number of participants and beneficiaries receiving benefits.
2. Aggregate amount of monthly benefit payments.

(21) Show the number of active participants who, if the plan were not terminated as of the proposed date of termination, would reasonably be expected to attain a nonforfeitable benefit under the terms of the plan (other than a benefit becoming nonforfeitable because of the termination of the plan) within the following number of days after the proposed date of termination.

- 30 days
- 60 days
- 90 days
- 120 days

(22) A statement of the reason for terminating the plan;

(23) A brief description of the proposed method of distributing the plan assets, e.g., purchase of single premium annuities;

(24) A statement whether the plan assets are believed sufficient to satisfy all nonforfeitable benefits under the plan, other than those benefits which become nonforfeitable solely because of the termination of the plan.

(25) A statement whether any of the information required to be submitted pursuant to this section is of the nature that its disclosure may not be required pursuant to the Freedom of Information

#### Title 38—Pensions, Bonuses, and Veterans' Relief

#### CHAPTER I—VETERANS ADMINISTRATION

#### PART 4—SCHEDULE FOR RATING DISABILITIES

##### Updating the Schedule for Rating Disabilities

On page 30502 of the FEDERAL REGISTER of July 21, 1975, there was published a notice of proposed regulatory development to amend Part 4, Title 38, Code of Federal Regulations, to update the Schedule for Rating Disabilities to reflect advances in medical science, modern surgery and new drug usage and to reflect changes in laws and interpretations of laws as well as changes in rating practice and procedures. In addition, more realistic evaluations for the epilepsies at various levels of disablement were provided.

Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations.

No written comments have been received and the proposed regulations are hereby adopted without change and are set forth below.

**Effective date.** An amendment to Appendix A, Table of Amendments and Effective Dates since 1946, is added to include effective dates.

The effective date is September 9, 1975.

Approved: September 9, 1975.

[SEAL] R. L. ROUDEBUSH,  
Administrator.

1. Section 4.3 is revised to read as follows:

##### § 4.3 Resolution of reasonable doubt.

It is the defined and consistently applied policy of the Veterans Administration to administer the law under a broad interpretation, consistent, however, with the facts shown in every case. When after careful consideration of all procurable and assembled data, a reasonable doubt arises regarding the degree of disability such doubt will be resolved in favor of the claimant. See § 3.102 of this chapter.

2. Section 4.16 is revised to read as follows:

##### § 4.16 Total disability ratings for compensation based on unemployment of the individual.

(a) Total disability ratings for compensation may be assigned, where the schedular rating is less than total, when the disabled person is, in the judgment of the rating agency, unable to secure or follow a substantially gainful occupation as a result of service-connected disabilities: *Provided that*, if there is only one such disability, this disability shall be ratable at 60 percent or more, and that, if there are two or more disabilities, there shall be at least one disability ratable at 40 percent or more, and sufficient additional disability to bring the combined rating to 70 percent or more. For the above purpose of one 60 percent disability

ity, or one 40 percent disability in combination with such determinations, the following guide-

6. Section 4.27 is revised to read as

NOTE 1.—The 100 percent rating for 1 year following implantation of prosthesis will be reduced to 60 percent after 1 month.

and diagnostic code 6035 is added to read as follows:

ity, or one 40 percent disability in combination, the following will be considered as one disability: (1) Disabilities of one or both upper extremities, or of one or both lower extremities, including the bilateral factor, if applicable, (2) disabilities resulting from common etiology or a single accident, (3) disabilities affecting a single body system, e.g. orthopedic, digestive, respiratory, cardiovascular, renal, neuropsychiatric, (4) multiple injuries incurred in action, or (5) multiple disabilities incurred as a prisoner of war. It is provided further that the existence or degree of non-service-connected disabilities or previous unemployability status will be disregarded where the percentages referred to in this paragraph for the service-connected disability or disabilities are met and in the judgment of the rating agency such service-connected disabilities render the veteran unemployable.

(b) It is the established policy of the Veterans Administration that all veterans who are unable to secure and follow a substantially gainful occupation by reason of service-connected disabilities shall be rated totally disabled. Therefore, rating boards should submit to the Director, Compensation and Pension Service for extra-schedular consideration all cases of veterans who are unemployable by reason of service-connected disabilities, but who fail to meet the percentage standards set forth in paragraph (a) of this section. The rating board will include a full statement as to the veteran's service-connected disabilities, employment history, educational and vocational attainment and all other factors having a bearing on the issue.

3. Section 4.17 is revised to read as follows:

§ 4.17 Total disability ratings for pension based on unemployability and age of the individual.

All veterans who are basically eligible and who are unable to secure and follow a substantially gainful occupation by reason of disabilities which are likely to be permanent shall be rated as permanently and totally disabled. For the purpose of pension, the permanence of the percentage requirements of § 4.16 is a requisite. The percentage requirements, however, are reduced on the attainment of age 55 to a 60 percent rating for one or more disabilities, with no percentage requirements for any one disability. The requirement at age 60 through 64 will be a 50 percent rating for one or more disabilities. At age 65 and thereafter, a veteran is conclusively presumed to be permanently and totally disabled by statute; hence, rating action for this purpose is unnecessary. When the reduced percentage requirements are met, and the disabilities involved are of a permanent nature, a rating of permanent and total disability will be assigned if the veteran is found to be unable to secure and follow substantially gainful employment by reason of such disability. Prior employment or unemployment status is immaterial if in the judgment of the rating board the veteran's disabilities render him or her unemployable. In making

such determinations, the following guidelines will be used:

(a) Marginal employment, for example, as a self-employed farmer, while employed in his or her own business, or at odd jobs or while employed at less than half the usual remuneration will not be considered incompatible with a determination of unemployability, if the restriction, as to securing or retaining better employment, is due to disability.

(b) Cases of all veterans who fail to meet the percentage standards but who meet the basic entitlement criteria and are unemployable, will be referred by the rating board to the Adjudication Officer under § 3.321(b) (2) of this chapter.

4. Section 4.17a is revised to read as follows:

§ 4.17a Misconduct etiology.

A permanent and total disability rating under the provisions of §§ 4.15, 4.16 and 4.17 will not be precluded by reason of the coexistence of misconduct disability when:

(a) A veteran, regardless of employment status, also has innocently acquired 100 percent disability, or

(b) Where unemployable, the veteran has other disabilities innocently acquired which meet the percentage requirements of §§ 4.16 and 4.17 and would render, in the judgment of the rating agency, the average person unable to secure or follow a substantially gainful occupation.

Meritorious cases of veterans meeting the specifications in this section except they do not meet the percentage standards of §§ 4.16 and 4.17, will be referred to Central Office under § 3.321(b) of this chapter.

5. Section 4.18 is revised to read as follows:

§ 4.18 Unemployability.

A veteran may be considered as unemployable upon termination of employment which was provided on account of disability, or in which special consideration was given on account of the same, when it is satisfactorily shown that he or she is unable to secure further employment. With amputations, sequelae of fractures and other residuals of trauma shown to be of static character, a showing of continuous unemployability from date of incurrence, or the date the condition reached the stabilized level, is a general requirement in order to establish the fact that present unemployability is the result of the disability. However, consideration is to be given to the circumstances of employment in individual cases, and, if the employment was only occasional, intermittent, tryout or unsuccessful, or eventually terminated on account of the disability, present unemployability may be attributed to the static disability. Where unemployability for pension previously has been established on the basis of combined service-connected and non-service-connected disabilities and the service-connected disability or disabilities have increased in severity, § 4.16 is for consideration.

6. Section 4.27 is revised to read as follows:

§ 4.27 Use of diagnostic code numbers.

The diagnostic code numbers appearing opposite the listed ratable disabilities are arbitrary numbers for the purpose of showing the basis of the evaluation assigned and for statistical analysis in the Veterans Administration, and as will be observed, extend from 5000 to a possible 9999. Great care will be exercised in the selection of the applicable code number and in its citation on the rating sheet. No other numbers than these listed or hereafter furnished are to be employed for rating purposes, with an exception as described in this section, as to unlisted conditions. When an unlisted disease, injury, or residual condition is encountered, requiring rating by analogy, the diagnostic code number will be "built-up" as follows: The first 2 digits will be selected from that part of the schedule most closely identifying the part, or system, of the body involved; the last 2 digits will be "99" for all unlisted conditions. This procedure will facilitate a close check of new and unlisted conditions, rated by analogy. In the selection of code numbers, injuries will generally be represented by the number assigned to the residual condition on the basis of which the rating is determined. With diseases, preference is to be given to the number assigned to the disease itself; if the rating is determined on the basis of residual conditions, the number appropriate to the residual condition will be added, preceded by a hyphen. Thus, atrophic (rheumatoid) arthritis rated as ankylosis of the lumbar spine should be coded "5002-5289." In this way, the exact source of each rating can be easily identified. In the citation of disabilities on rating sheets, the diagnostic terminology will be that of the medical examiner, with no attempt to translate his or her terms into schedule nomenclature. Residuals of diseases or therapeutic procedures will not be cited without reference to the basic disease.

7. In § 4.71a, diagnostic codes 5174 and 5264 are added to read as follows:

§ 4.71a Schedule of ratings—musculoskeletal system.

AMPUTATIONS: LOWER EXTREMITY		Rating
5174 Hip replacement (prosthesis):		
Prosthetic replacement of the head of the femur or of the acetabulum:		
For 1 year following implantation of prosthesis.....	100	
Following implantation of prosthesis with painful motion or weakness such as to require the use of crutches.....	90	
Markedly severe residual weakness, pain or limitation of motion following implantation of prosthesis.....	70	
Moderately severe residuals of weakness, pain or limitation of motion.....	50	
Minimum rating.....	30	

<sup>2</sup> Also entitled to special monthly compensation.

NOTE 1.—The 100 percent rating for 1 year following implantation of prosthesis will commence after initial grant of the 1 month total rating assigned under § 4.30 following hospital discharge.

NOTE 2.—Special monthly compensation is assignable during the 100 percent rating period the earliest date permanent use of crutches is established.

#### THE KNEE AND LEG

	Rating
5264 Knee replacement (prosthesis):	
Prosthetic replacement of knee joint:	
For 1 year following implantation of prosthesis.....	100
With chronic residuals consisting of severe painful motion or weakness in the affected extremity.....	60
With intermediate degrees of residual weakness, pain or limitation of motion rate by analogy to diagnostic codes, 5256, 5261, or 5262.....	30
Minimum rating.....	30

NOTE.—The 100 percent rating for 1 year following implantation of prosthesis will commence after initial grant of the 1 month total rating assigned under § 4.30 following hospital discharge.

8. Section 4.75 is revised to read as follows:

§ 4.75 Examination of visual acuity.

Ratings on account of visual impairments considered for service connection are, when practicable, to be based only on examination by specialists. Such special examinations should include uncorrected and corrected central visual acuity for distance and near, with record of the refraction. Snellen's test type or its equivalent will be used. Mydriatics should be routine, except when contraindicated. Funduscopic and ophthalmological findings must be recorded. The best distant vision obtainable after best correction by glasses will be the basis of rating, except in cases of keratoconus in which contact lenses are medically required. Also, if there exists a difference of more than 4 diopters of spherical correction between the two eyes, the best possible visual acuity of the poorer eye without glasses, or with a lens of not more than 4 diopters difference from that used with the better eye will be taken as the visual acuity of the poorer eye. When such a difference exists, close attention will be given to the likelihood of congenital origin in mere refractive error.

§ 4.81 [Revoked]

9. Section 4.81 is revoked.

10. Section 4.84 is revised to read as follows:

§ 4.84 Differences between distant and near visual acuity.

Where there is a substantial difference between the near and distant corrected vision, the case should be referred to the Director, Compensation and Pension Service.

11. In § 4.84a, the notes following diagnostic codes 6029 and 6080 are revised

and diagnostic code 6035 is added to read as follows:

§ 4.84a Schedule of ratings—eye.

#### DISEASES OF THE EYE

	Rating
6029 Aphakia:	
Bilateral or unilateral.....	30

NOTE.—The 30 percent rating prescribed for aphakia is a minimum rating to be applied to the unilateral or bilateral condition and is not to be combined with any other rating for impaired vision. When only one eye is aphakic, the eye having poorer corrected visual acuity will be rated on the basis of its acuity without correction. When both eyes are aphakic, both will be rated on corrected vision. The corrected vision of one or both aphakic eyes will be taken one step worse than the ascertained value, however, not better than 20/70. Combined ratings for disabilities of the same eye should not exceed the amount for total loss of vision of that eye unless there is an enucleation or a serious cosmetic defect added to the total loss of vision.

6035 Keratoconus: To be evaluated on impairment of corrected visual acuity using contact lenses.

NOTE.—When contact lenses are medically required for keratoconus, either unilateral or bilateral, the minimum rating will be 30 percent.

#### RATINGS FOR IMPAIRMENT OF FIELD VISION

	Rating
6080 Field vision, impairment of.	

NOTE.—Demonstrable pathology commensurate with the functional loss will be required. The concentric contraction ratings require contraction within the stated degrees, temporally; the nasal contraction may be less. The alternative ratings are to be employed when there is a detectable defect of visual acuity, or a different impairment of the visual field in the other eye. Concentric contraction resulting from demonstrable pathology to 5 degrees or less will be considered on a parity with reduction of central visual acuity to 5/200 or less for all purposes including entitlement under subparagraph (1), 38 U.S.C. 314; not, however, for the purpose of subparagraph (k). Entitlement on account of blindness requiring regular aid and attendance, subparagraph (m), will continue to be determined on the facts in the individual case.

12. Section 4.87 is revised to read as follows:

§ 4.87 Conversational voice in feet.

The column and row containing entries in feet will not be used for the purpose of determining service connection or evaluation except in the rating of those unusual cases where no other data are available. In those cases showing no loss by spoken voice on induction but showing loss by spoken voice on discharge, evaluation will be deferred pending examination by controlled speech and pure tone apparatus. In those cases showing loss for spoken voice on induction, the footage equivalents on table II will be used to determine the extent of hearing loss at induction for comparison with the results of examination by controlled speech and pure tone.

	Rating
14. In § 4.97, diagnostic codes 6600, 6602, 6800 and 6802 are revised and diag-	

	Rating
Moderate; with moderate dyspnea	
7015 Auriculoventricular block:	
Complete; with attacks of syncope	

Rating	7714 Sickle cell anemia:	Rating
60	Pronounced; with repeated painful crises, occurring in skin, joints, bones or any major organs caused by hemolysis and sickling of red blood cells with anemia, thrombosis and infarction, in symptom combinations that are totally incapacitating.....	100
20	Severe; with painful hemolytic crises several times a year or in symptom combinations less disabling than above with more than light manual labor not feasible.....	60
	Moderately severe; following repeated hemolytic sickling crises but with only moderate impairment of health.....	30
	Mild; asymptomatic, established case in remission, but with identifiable organ impairment present.....	10
	NOTE.—Sickle cell trait alone without a history of or current pathological findings directly attributable to such trait is not a ratable disability. Cases of symptomatic sickle cell trait will be forwarded to the Director, Compensation and Pension Service for review.	
	19. In § 4.118, diagnostic code 7806 is revised to read as follows:	
	§ 4.118 Schedule of ratings—skin.	
	7806 Eczema:	Rating
	With ulceration or extensive exfoliation or crusting, and systemic or nervous manifestations, or exceptionally repugnant.....	50
	With exudation or itching constant, extensive lesions, or marked disfigurement.....	30
	With exfoliation, exudation or itching, if involving an exposed surface or extensive area.....	10
	With slight, if any, exfoliation, exudation or itching, if on a nonexposed surface or small area.....	0
	20. In § 4.119, diagnostic code 7913 is revised to read as follows:	
	§ 4.119 Schedule of ratings—endocrine system.	
	7913 Diabetes mellitus:	Rating
	Pronounced; uncontrolled, that is, with persistent hyperglycemia and glycosuria, despite large insulin dosage, restricted diet and regulation of activities; with progressive loss of weight and strength, or severe complications.....	100
	Severe; requiring large insulin dosage, but with considerable loss of weight and strength and with mild complications, such as pruritis ani, mild vascular deficiencies, or beginning ocular disturbances.....	60
	Moderately severe; requiring large insulin dosage, restricted diet, and careful regulation of activities, i.e., avoidance of strenuous occupational and recreational activities.....	40
	Moderate; with moderate insulin or oral hypoglycemic agent dosage, and restricted (maintenance) diet; without impairment of health or vigor or limitation of activity.....	20
	NOTE.—The 100 percent rating for 2 years following transplant surgery will commence after initial grant of the 1-month total rating assigned under § 4.30 following hospital discharge.	
	18. In § 4.117, diagnostic code 7714 is added to read as follows:	
	§ 4.117 Schedule of ratings—hemie and lymphatic systems.	

Rating	Mild; controlled by restricted diet, without insulin; without impairment of health or vigor or limitation of activity.....	10
--------	--	----

NOTE.—Definitely established complications such as amputations, impairment of central visual acuity, peripheral neuropathy with definite sensory or motor impairment or definitely established arteriosclerotic focalizations will be separately rated under the applicable diagnostic codes. When the diagnosis of diabetes mellitus is definitely established it is neither necessary nor advisable to request glucose tolerance tests for rating purposes.

21. In § 4.124a, the "General Rating Formula for Major and Minor Seizures" in diagnostic code 8911 and "Epilepsy and Unemployability" in diagnostic code 8914 are revised to read as follows:

§ 4.121a Schedule of ratings—neurological conditions and convulsive disorders.

#### THE EPILEPTICS

8911 Epilepsy, petit mal:

Rating	General Rating Formula for Major and Minor Epileptic Seizures:	Rating
100	Averaging at least 1 major seizure per month over the last year.....	100

Averaging at least 1 major seizure in 3 months over the last year; or more than 10 minor seizures weekly.....

Averaging at least 1 major seizure in 4 months over the last year; or 9-10 minor seizures per week.....

At least 1 major seizure in the last 6 months or 2 in the last year; or averaging at least 5 to 8 minor seizures weekly.....

At least 1 major seizure in the last 2 years; or at least 2 minor seizures in the last 6 months.....

A confirmed diagnosis of epilepsy with a history of seizures.....

8914 Epilepsy, psychomotor.

Epilepsy and Unemployability: (1) Rating specialists must bear in mind that the epileptic, although his or her seizures are controlled, may find employment and rehabilitation difficult of attainment due to employer reluctance to the hiring of the epileptic.

(2) Where a case is encountered with a definite history of unemployment, full and complete development should be undertaken to ascertain whether the epilepsy is the determining factor in his or her inability to obtain employment.

(3) The assent of the claimant should first be obtained for permission to conduct this economic and social survey. The purpose of this survey is to secure all the relevant facts and data necessary to permit of a true judgment as to the reason for his or her unemployment and should include information as to:

(a) Education;

(b) Occupations prior and subsequent to service;

#### 20. Appendix A, Table of Amendments and Effective Dates Since 1946, is amended to read as follows:

1. Section 4.71a is revised to read as follows:

4.71a Diagnostic Code 5000—60%; February 1, 1962.

Diagnostic Code 5000 Note (2): First three sentences; July 10, 1956. Last sentence; July 6, 1950.

Diagnostic Code 5002—100%, 60%, 40%, 20%; March 1, 1963.

Diagnostic Code 5003; July 6, 1950.

In sentence following DC 5024: "except gout which will be rated under 5002"; March 1, 1963.

Diagnostic Code 5164—60%; June 9, 1952.

Diagnostic Code 5172; July 6, 1950.

Diagnostic Code 5173; June 9, 1952.

Diagnostic Code 5174; September 9, 1975.

Diagnostic Code 5255 "or hip"; July 6, 1950.

Diagnostic Code 5257—Evaluations; July 6, 1950.

Diagnostic Code 5264; September 9, 1975.

Diagnostic Code 5297—(Removal of one rib) "or resection of 2 or more"; August 23, 1948.

Diagnostic Code 5297—Note (2): Reference to lobectomy, pneumonectomy and graduated ratings; February 1, 1962.

Diagnostic Code 5298; August 23, 1948.

2. Section 4.84a is revised to read as follows:

4.84a Diagnostic Code 6029—Note; August 23, 1948.

Diagnostic Code 6035; September 9, 1975.

Diagnostic Code 6076—60%; Vision 1 eye 15/200 and other eye 20/100; August 23, 1948.

Diagnostic Code 6080—Note—"as to '33 U.S.C. 314(L)"; July 6, 1950.

Diagnostic Code 6000—100% evaluations and criteria for 60%; September 9, 1975.

Diagnostic Code 6602—Criteria for all evaluations; September 9, 1975.

Diagnostic Code 6603; September 9, 1975.

Subparagraph (1) following Diagnostic Code 6704; December 1, 1949.

Subparagraph (1) following Diagnostic Code 6704; December 1, 1949.

Note preceding Diagnostic Code 6721; July 6, 1950.

Second note following Diagnostic Code 6724; December 1, 1949.

Diagnostic Code 6802—Criteria for all evaluations; September 9, 1975.

Diagnostic Code 6821—Evaluations and note; August 23, 1948.

3. Section 4.104 is revised to read as follows:

4.104 Diagnostic Code 7000—30%; July 6, 1950.

Diagnostic Code 7005—100% evaluation for chronic residuals; September 9, 1975.

Diagnostic Code 7015—100% evaluation, criteria all evaluations and Notes (1) and (2); September 9, 1975.

Diagnostic Code 7016; September 9, 1975.

Diagnostic Code 7100—20%; July 6, 1950.

Diagnostic Code 7101 "or more"; September 1, 1960.

Diagnostic Code 7101—Note (2); September 9, 1975.

Diagnostic Code 7110—criteria for 100%, Note and 60% and 20% evaluations; September 9, 1975.

(c) Places of employment and reasons for termination;

(d) Wages received;

(e) Number of seizures.

(4) Upon completion of this survey and current examination, the case should have rating board consideration. Where in the judgment of the rating board the veteran's unemployability is due to epilepsy and jurisdiction is not vested in that body by reason of schedular evaluations, the case should be submitted to the Director, Compensation and Pension Service.

19. In § 4.132, the reference to notes at the beginning of diagnostic code 9406 is revised, Note (3) is revoked and Notes (4) and (5) redesignated (3) and (4) and diagnostic code 9504 is revised so that the revised material reads as follows:

§ 4.132 Schedule of ratings—mental disorders.

#### PSYCHONEUROTIC DISORDERS

9406 Psychoneurotic reaction, other.

Read well notes (1) to (4) following general rating formula before applying the general rating formula.

NOTE 3.—It is to be emphasized that vague complaints are not to be erected into a concept of conversion reaction. A diagnosis of conversion reaction must be established on the basis of specific distinctive findings characteristic of such disturbance and not merely by exclusion of organic disease. If a diagnosis of conversion reaction is found by the rating board to be inadequately supported by findings, the report of examination will be returned through channels to the examiner for reconsideration.

NOTE 4.—When two diagnoses, one organic and the other psychophysiological or psychoneurotic, are presented covering the organic and psychiatric aspects of a single disability entity, only one percentage evaluation will be assigned under the appropriate diagnostic code determined by the rating board to represent the major degree of disability. When the diagnosis of the same basic disability is changed from an organic one to one in the psychophysiological or psychoneurotic categories, the condition will be rated under the new diagnosis.

#### PSYCHOPHYSIOLOGIC DISORDERS

9504 Psychophysiological reaction, other (specify reaction and manifestation).

Evaluate psychophysiological reaction by the general rating formula for psychoneurotic disorders.

NOTE 1.—It is to be emphasized that vague complaints are not to be erected into a concept of psychophysiological disorder. A diagnosis of a psychophysiological reaction must be established on specific distinctive findings characteristic of such disturbance and not merely by exclusion of organic disease. If a diagnosis of a psychophysiological reaction is found by the rating board to be inadequately supported by findings, the report of examination will be returned.

NOTE 2.—When two diagnoses, one organic and the other psychophysiological or psychoneurotic, are presented covering the organic and psychiatric aspects of a single disability entity, only one percentage evaluation will be assigned under the appropriate diagnostic code determined by the rating board to represent the major degree of disability. When the diagnosis of the same basic disability is changed from an organic one to one in the psychophysiological or psychoneurotic categories, the condition will be rated under the new diagnosis.

20. Appendix A, Table of Amendments and Effective Dates Since 1946, is amended to read as follows:

1. Section 4.71a is revised to read as follows:

4.71a Diagnostic Code 5000—60%; February 1, 1962.

Diagnostic Code 5000 Note (2): First three sentences; July 10, 1956. Last sentence; July 6, 1950.

Diagnostic Code 5002—100%, 60%, 40%, 20%; March 1, 1963.

Diagnostic Code 5003; July 6, 1950.

In sentence following DC 5024: "except gout which will be rated under 5002"; March 1, 1963.

Diagnostic Code 5164—60%; June 9, 1952.

Diagnostic Code 5172; July 6, 1950.

Diagnostic Code 5173; June 9, 1952.

Diagnostic Code 5174; September 9, 1975.

Diagnostic Code 5255 "or hip"; July 6, 1950.

Diagnostic Code 5257—Evaluations; July 6, 1950.

Diagnostic Code 5264; September 9, 1975.

Diagnostic Code 5297—(Removal of one rib) "or resection of 2 or more"; August 23, 1948.

Diagnostic Code 5297—Note (2): Reference to lobectomy, pneumonectomy and graduated ratings; February 1, 1962.

Diagnostic Code 5298; August 23, 1948.

2. Section 4.84a is revised to read as follows:

4.84a Diagnostic Code 6029—Note; August 23, 1948.

Diagnostic Code 6035; September 9, 1975.

Diagnostic Code 6076—60%; Vision 1 eye 15/200 and other eye 20/100; August 23, 1948.

Diagnostic Code 6080—Note—"as to '33 U.S.C. 314(L)"; July 6, 1950.

Diagnostic Code 6000—100% evaluations and criteria for 60%; September 9, 1975.

Diagnostic Code 6602—Criteria for all evaluations; September 9, 1975.

Diagnostic Code 6603; September 9, 1975.

Subparagraph (1) following Diagnostic Code 6704; December 1, 1949.

Subparagraph (1) following Diagnostic Code 6704; December 1, 1949.

Note preceding Diagnostic Code 6721; July 6, 1950.

Second note following Diagnostic Code 6724; December 1, 1949.

Diagnostic Code 6802—Criteria for all evaluations; September 9, 1975.

Diagnostic Code 6821—Evaluations and note; August 23, 1948.

3. Section 4.104 is revised to read as follows:

4.104 Diagnostic Code 7000—30%; July 6, 1950.

Diagnostic Code 7005—100% evaluation for chronic residuals; September 9, 1975.

Diagnostic Code 7015—100% evaluation, criteria all evaluations and Notes (1) and (2); September 9, 1975.

Diagnostic Code 7016; September 9, 1975.

Diagnostic Code 7100—20%; July 6, 1950.

Diagnostic Code 7101 "or more"; September 1, 1960.

Diagnostic Code 7101—Note (2); September 9, 1975.

Diagnostic Code 7110—criteria for 100%, Note and 60% and 20% evaluations; September 9, 1975.

Diagnostic Code 7111—Note; September 9, 1975.

Diagnostic Code 7114, 7115, 7116 and Note; June 9, 1952.

Diagnostic Code 7117 and Note; June 9, 1952.

Note following Diagnostic Code 7120; July 6, 1950.

Diagnostic Code 7121—Criteria for 30% and 10% and Note; July 6, 1950.

Last sentence of Note following Diagnostic Code 7122; July 6, 1950.

4. Section 4.114 is revised to read as follows:

4.114 Diagnostic Codes 7304 and 7305—Evaluations; November 1, 1962.

Diagnostic Code 7308—Evaluations; April 8, 1959.

Diagnostic Code 7319—Evaluations; November 1, 1962.

Diagnostic Code 7321—Evaluations and Note; July 6, 1950.

Diagnostic Code 7328—Evaluations and Note; November 1, 1962.

Diagnostic Code 7329—Evaluations and Note; November 1, 1962.

Diagnostic Code 7330—60% evaluation; November 1, 1962.

Diagnostic Code 7332—60% evaluation; November 1, 1962.

Diagnostic Code 7334—50% and 30% evaluations; July 6, 1950.

Diagnostic Code 7334—10% evaluation; November 1, 1962.

Diagnostic Code 7345—100%, 60% and 30% evaluations; August 23, 1948.

Diagnostic Code 7345—10% evaluation; February 17, 1955.

Diagnostic Code 7346—Evaluations; February 1, 1962.

Diagnostic Code 7347; September 9, 1975.

5. Section 4.115a is revised to read as follows:

4.115a Diagnostic Code 7500—Note; July 6, 1950.

Diagnostic Code 7524—Note; July 6, 1950.

Diagnostic Code 7530; September 9, 1975.

Diagnostic Code 7531; September 9, 1975.

6. Section 4.117 is revised to read as follows:

4.117 Diagnostic Code 7703—Evaluations; August 23, 1948.

Diagnostic Code 7709—Evaluation and Note; June 9, 1952.

Diagnostic Code 7714; September 9, 1975.

7. Section 4.119 is revised to read as follows:

4.119 Diagnostic Code 7911—Evaluations and Note; March 1, 1963.

Diagnostic Code 7913—Note; September 9, 1975.

8. Section 4.124a is revised to read as follows:

4.124a Diagnostic Code 8045; October 1, 1961.

Diagnostic Code 8046; October 1, 1961.

Diagnostic Code 8100—Evaluations; June 9, 1953.

Diagnostic Codes 8910 through 8914; October 1, 1961.

Diagnostic Codes 8910 through 8914 General Rating Formula—Criteria and evaluations; September 9, 1975.

#### Title 39—Postal Service

#### CHAPTER I—U.S. POSTAL SERVICE PART 111—GENERAL INFORMATION ON POSTAL SERVICE

Solicitations by Mail in the Guise of Bills, Invoices, or Statements of Account  
On November 22, 1972, at the conclusion of a public rulemaking proceeding,

the Postal Service published a revision of § 123.4(f) of title 39, CFR, dealing with the mailability of solicitations in the guise of bills, invoices, or statements of account. 37 FR 24825. On February 10, 1975, at the conclusion of another public rulemaking proceeding, the Postal Service, in the course of a complete revision of parts 123 and 124 of the Postal Service Manual (which had previously been incorporated by reference in the FEDERAL REGISTER, see 39 CFR 111.1), carried over the material covered by § 123.4(f) of title 39, CFR, and renumbered it as 123.41 of the Postal Service Manual. 40 FR 6206. However, due to an administrative error, the material carried over failed to include the revisions made in the November 22, 1972 rulemaking proceeding. Accordingly, in order to correct this error and thus to reinstate the regulation as revised and adopted on November 22, 1972, the Postal Service hereby adopts the following amendment of the Postal Service Manual:

**PART 123—NONMAILABLE MATTER—WRITTEN, PRINTED AND GRAPHIC MATTER**

In 123.4 of the Postal Service Manual, revise .41 to read as follows:

.41 solicitation in the guise of bills, invoices, or statements of account (39 U.S.C. § 3001(d))

Any otherwise mailable matter which reasonably could be considered a bill, invoice, or statement of account due, but is in fact a solicitation for an order, is nonmailable unless it conforms to the following requirements:

a. Each such solicitation shall bear the notice: **THIS IS NOT A BILL.** The notice shall appear on the face of such solicitation in boldface capital letters of a color prominently contrasting with the background against which it appears, including all other print thereon, and at least as large and as bold as any other print thereon but not smaller than 30-point type. The notice shall be located in accordance with one of the following options.

(1) On the center of the diagonal described by a straight line drawn from the vertex of the lower left corner to the vertex of the upper right corner; or

(2) Overprinting each portion of the solicitation which reasonably could be considered to specify a monetary amount due and payable by the recipient.

b. In addition to the requirements in a., such solicitation shall bear on its face the following disclaimer:

**THIS IS A SOLICITATION. YOU ARE UNDER NO OBLIGATION TO PAY UNLESS YOU ACCEPT THIS OFFER.**

c. The disclaimer shall meet the following requirements:

(1) It shall be surrounded by clear space of at least one-quarter inch;

(2) It shall appear in boldface capital letters no smaller than 18-point type and of the same color as the notice required by .41a; and

(3) It shall not, by folding or any other device, be rendered less prominent than any other information on the face of the solicitation.

d. Any solicitation which states that it has been approved by the Postal Service or by the Postmaster General or that it conforms to any postal law or regulation is nonmailable.

The above amendment is effective immediately.

A Post Office Services (Domestic) transmittal letter making this change in the pages of the Postal Service Manual is in the process of being published and will be transmitted to subscribers automatically as soon as possible. Notice of the issuance of this transmittal letter will be published in the usual manner in the FEDERAL REGISTER through an appropriate amendment to 39 CFR 111.3. (39 U.S.C. 401)

ROGER P. CRAIG,  
Deputy General Counsel.  
[FR Doc.75-24404 Filed 9-12-75; 8:45 am]

**Title 40—Protection of Environment**

**CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY**

**SUBCHAPTER C—AIR PROGRAMS**  
[FRL 418-1]

**PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS**

**Revision to the New York State Implementation Plan**

On January 27, 1975, the Commissioner of the New York State Department of Environmental Conservation (NYSDEC) submitted a proposed revision to the New York State implementation plan which consisted of a recently adopted Part 203 (Indirect Sources of Air Contamination), of Subchapter A, Chapter III, Title 6 of New York's Official Compilation of Codes, Rules and Regulations (6NYCRR).

Part 203 was subject to New York State public hearings on October 15 and 17, 1974 and became effective on January 13, 1975. The regulation provides for the preconstruction review of indirect sources which meet the following criteria:

(1) In New York County: the construction or modification of any parking facility or any associated parking area in New York County;

(2) Throughout the State: the construction or modification of any airport which results or may result in the following activity within ten years after completion of the construction or modification:

(i) In the case of a new airport, 50,000 or more aircraft operations per year by regularly scheduled air carriers, or use by 1,600,000 or more passengers per year;

(ii) In the case of a modified airport, an increase of 50,000 or more aircraft operations per year by regularly scheduled air carriers over the existing annual volume of aircraft operations, or an increase of 1,600,000 or more passengers per year;

(3) In any urban area: (i) The construction of any new parking facility, or other new indirect source with an associated parking area, which adds new parking capacity of 1,000 vehicles or more;

(ii) The modification of any parking facility or any associated parking area

which, by itself, or when added together with all parking capacity constructed since November 4, 1973 or the date the latest permit to construct has been issued for such facility or area, will produce parking capacity of 500 vehicles or more, unless such modification has been approved under the latest permit to construct;

(iii) The construction of any road or highway section on which the annual average of daily traffic volume within 10 years of completion of construction exceeds or may exceed 20,000 vehicles;

(iv) The modification of any existing section of road or highway which increases or may increase the annual average of daily traffic volume within 10 years of completion of modification by more than 10,000 vehicles;

(4) Outside an urban area: (i) The construction of any new parking facility, or other new indirect source with an associated parking area, which adds new parking capacity of 2,000 vehicles or more;

(ii) The modification of any parking facility or of any associated parking area which, by itself or when added together with all parking capacity constructed since November 4, 1973 or the date the latest permit to construct has been issued for such facility or area, will produce parking capacity of 1,000 vehicles or more, unless such modification has been approved under the latest permit to construct;

(5) Whenever an indirect source or associated parking area is to be constructed or modified in planned incremental phases, the Commissioner may approve any or all such phases in a singular review and approval action.

Urban areas are defined as those locations in the State which may have a potential for violating any national ambient air quality standard in the 10-year period following standard attainment. A listing of these "urban areas" is given in § 203.2(e) of the regulation.

The regulation requires that all affected indirect sources be subject to a detailed analysis to show that operation of the source will not cause contravention of applicable national ambient air quality standards. The applicable national standards for a parking facility are the national standards for carbon monoxide. With regard to construction and modification of highway sections and airports the applicable ambient air quality standards are the national standards for carbon monoxide, photochemical oxidants and nitrogen dioxide.

Section 203.9 describes the criteria by which the State will determine whether or not to issue an indirect source permit to construct. Prior to the issuance of the permit it must be shown that the operation of the indirect source will not: (1) Cause a violation of any applicable ambient air quality standard or, where a violation of such standard exists, increase the ambient concentration of the applicable pollutant or interfere with attainment or maintenance of such standard; (2) cause a violation of applicable portions of any control strategy of an ap-

plicable implementation plan approved or promulgated under the Clean Air Act and in effect at the time of the issuance of the permit; and (3) result in a violation of any of the provisions of New York's Codes, Rules and Regulations.

The regulation submitted by New York State will allow EPA to revoke the indirect source regulations which EPA promulgated on February 25, 1974 (39 FR 7282) and amended July 9, 1974 (39 FR 25292). In addition, the EPA disapproval of § 201.4 of Part 201 of 6NYCRR will also be revoked. This occurs since Part 201 has been modified and Part 203 replaces Part 201 with regard to the preconstruction review of indirect sources of air pollution.

EPA has completed its review of the adequacy of the proposed revision request and has determined that the New York State regulation is either as stringent or more stringent than the EPA promulgations of February 25 and July 9, 1974. Specifically, the State regulation is more stringent than the EPA regulation in the following way: In New York County, preconstruction review of parking facilities will be required for all new or modified facilities, regardless of size. The EPA review is limited to new facilities having greater than 1,000 spaces and to modifications of facilities of 500 or more spaces.

Section 203.1(a) states that the City of New York has the authority to enforce the requirements of Part 203 in the New York City area. However, the information submitted with the proposed revision request did not contain documentation of the authority under which the City would be able to review indirect sources in accordance with the requirements of Part 203. In addition, the State failed to present a showing of resources which are considered necessary to enforce Part 203. To provide clarification on these points the State of New York, on May 8, 1975, sent to the Region II Office:

(1) A Copy of an order which delegates to the New York City Environmental Protection Administration the authority to enforce Part 203 of 6NYCRR. This order requires the City to report to the State on at least a quarterly basis all applications received and permits to construct, either issued or denied; and

(2) A State stipulation that, in addition to manpower currently assigned for National Environmental Policy Act review of highways, there are five additional people employed in the indirect source review program. Three of these are in the New York City Environmental Protection Administration and the other two are employed by the State.

The Administrator's review of this material has determined that it adequately responds to the issues raised.

On April 4, 1975 (40 FR 15094) EPA announced receipt of the proposed revision to the New York implementation plan and provided the opportunity for a 30-day public comment period on the proposed revision. The public comment period ended on May 4, 1975 with four comments being submitted to the Region II Office. In this notice, it was erroneously mentioned that Part 203 of 6NYCRR

was more stringent than the EPA promulgations with regard to highways and airports since the New York State review included a determination that the national standards for carbon monoxide, photochemical oxidants, and nitrogen oxides would not be contravened while the EPA review was limited to a determination that only the national standard for carbon monoxide and photochemical oxidants would not be contravened. It should be noted that the EPA regulation also provides for review of highways and airports to determine that national standards for nitrogen oxides will not be contravened.

Two of the four comments which were received objected to the proposed revision on the basis that nonstructural modifications of parking facilities are allowed without prior State approval. Changes in operating procedures, such as from self parking to attendant parking, which do not involve physical modifications, but do increase the number of parking spaces, are exempt from review under Part 203. The Administrator has considered this comment and determined that the only facilities which could benefit from this would be those whose operation was begun prior to the effective date of Part 203 which later change to attendant parking. However, the Administrator does not consider this to be a matter of great significance insofar as it does not contradict any of the provisions of the EPA promulgations of February 25 and July 9, 1974.

Another comment recommends a series of regulatory changes clarifying Part 203 easing the burden of complying with the regulation. The Administrator believes that these matters can best be handled through the State's administrative process and that specific regulatory changes should be addressed to New York State rather than EPA for consideration for inclusion in possible future revisions of Part 203. EPA believes that New York State's regulation is clear enough to be enforceable and to give fair notice to those affected by it of the permit requirements. It is not EPA's function under the Clean Air Act to second guess states on draftsmanship unless EPA finds that a regulation is so vague as to be unenforceable or contains fatal loopholes.

The last comment claims that to require that all parking facilities in New York County undergo preconstruction review would not be cost effective. It also suggested that since EPA has not required the review of any parking facility of less than 250 parking spaces (except in Fairbanks, Alaska) the scope of the State's review should be similarly limited. The State of New York believes that the review of all new or modified parking facilities in New York County is warranted in view of the magnitude of the carbon monoxide problem in the City. Moreover, by virtue of sections 110(a) and 116 of the Clean Air Act, EPA has no authority to disapprove state regulations on the ground that they are more stringent than necessary to meet Federal standards.

**Effective Date.** In view of the fact that New York is already conducting review under its regulation and that it will serve

no useful purpose to defer the effectiveness of this approval for 30 days, the Administrator hereby finds good cause for making this rulemaking effective immediately.

(42 U.S.C. 1857c-5 and 9)

Dated: September 8, 1975.

JOHN QUARLES,  
Acting Administrator.

Part 52 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

**Subpart HH—New York**

1. In § 52.1670, paragraph (c) is amended by revising subparagraph (3) as follows:

§ 52.1670 Identification of Plan.

(c) . . . . .  
(3) October 26, 1973, November 27, 1973, January 17, 1974, August 29, 1974, October 11, 1974, December 6, 1974, January 27, 1975, February 25, 1975, May 8, 1975.

§ 52.1680 [Revoked]

2. Section 52.1680 is revoked.

[FR Doc.75-24361 Filed 9-12-75; 8:45 am]

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS  
[FRL 430-7]

**PART 435—OFFSHORE SEGMENT OF THE OIL AND GAS EXTRACTION POINT SOURCE CATEGORY**

**Notice of Interim Final Rule Making**

Notice is hereby given that effluent limitations and guidelines for existing sources to be achieved by the application of best practicable control technology currently available as set forth in interim final form below are promulgated by the Environmental Protection Agency (EPA). The regulation set forth below establishes Part 435—oil and gas extraction point source category and will be applicable to existing sources for the near-offshore subcategory (Subpart A), and the far-offshore subcategory (Subpart B) of the offshore segment of the oil and gas extraction point source category pursuant to sections 301, 304 (b) and (c), of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1311, 1314 (b) and (c), 86 Stat. 816 et seq.; Pub. L. 92-500) (the Act). Simultaneously, the Agency is publishing in proposed form effluent limitations and guidelines for existing sources to be achieved by the application of best available technology economically achievable, standards of performance for new point sources and pretreatment standards for existing sources and for new sources.

(a) Legal authority.

(1) Existing point sources.

Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section

304(b) of the Act. Section 301(b) also re-

time effluent limitations are established

were considered. These included the total

and free floating emulsified oils in the waste water will effect the aquatic flora

cuttings are brought to the surface of the well with the drilling muds and then

easily achieved by the introduction of either dry or gaseous chlorine in flow dependent amounts. Sanitary wastes from

304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) of the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedural innovations, operating methods and other alternatives. The regulation herein sets forth effluent limitations and guidelines, pursuant to sections 301 and 304(b) of the Act, for the near-offshore subcategory (Subpart A), and the far-offshore subcategory (Subpart B) of the offshore segment of the oil and gas extraction point source category.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under section 306 of the Act. The report or "Development Document" referred to below provides, pursuant to section 304(c) of the Act, information on such processes, procedures or operating methods.

#### (2) New sources.

Section 306 of the Act requires the achievement by new sources of a Federal standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306 also requires the Administrator to propose regulations establishing Federal standards of performance for categories of new sources included in a list published pursuant to section 306 of the Act. The regulations proposed herein set forth the standards of performance applicable to new sources for the near-offshore subcategory (Subpart A), and the far-offshore subcategory (Subpart B) of the offshore segment of the oil and gas extraction point source category.

Section 307(b) of the Act requires the establishment of pretreatment standards for pollutants introduced into publicly owned treatment works and 40 CFR 128 establishes that the Agency will propose specific pretreatment standards at the

time effluent limitations are established for point source discharges.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to section 306. In another section of the Federal Register regulations are proposed in fulfillment of these requirements.

(b) Summary and basis of interim final effluent limitations and guidelines for existing sources, proposed effluent limitations and guidelines for existing sources to be achieved by the application of the best available technology economically achievable, proposed standards of performance for new sources, and proposed pretreatment standards for both new and existing sources.

#### (1) General methodology.

The effluent limitations and guidelines set forth herein were developed in the following manner. The point source category was first studied for the purpose of determining whether separate limitations are appropriate for different segments within the category. This analysis included a determination of whether differences in raw material used, product produced, manufacturing process employed, age, size, waste water constituents and other factors require development of separate limitations for different segments of the point source category. The raw waste characteristics for each such segment were then identified. This included an analysis of the source, flow and volume of water used in the process employed, the sources of waste and waste waters in the operation and the constituents of all waste water. The constituents of the waste waters which should be subject to effluent limitations were identified.

The control and treatment technologies existing within each segment were identified. This included an identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which is existent or capable of being designed for each segment. It also included an identification of, in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants, the effluent level resulting from the application of each of the technologies. The problems, limitations and reliability of each treatment and control technology were also identified. In addition, the nonwater quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise and radiation were identified. The energy requirements of each control and treatment technology were determined as well as the cost of the application of such technologies.

The information, as outlined above, was then evaluated in order to determine what levels of technology constitute the "best practicable control technology currently available." In identifying such technologies, various factors

were considered. These included the total cost of application of technology in relation to the effluent reduction benefits to be achieved from such application, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, nonwater quality environmental impact (including energy requirements) and other factors.

The data upon which the above analysis was performed included EPA permit applications, EPA sampling and inspections, consultant reports, and industry submissions.

(2) Summary of conclusions with respect to the near-offshore subcategory (Subpart A), and the far-offshore subcategory (Subpart B), of the offshore segment of the oil and gas extraction point source category.

#### (i) Categorization.

For the purpose of studying waste treatment and effluent limitations, the offshore segment of the oil and gas extraction point source category was divided into two discrete subcategories. These subcategories were primarily based on considerations of (1) geographic location; (2) type of facility; and (3) waste water characteristics and treatability as outlined in the Development Document for the Offshore Segment of the Oil and Gas Extraction Industry Point Source Category. These subcategories are defined as:

(1) Subpart A—Near-Offshore Subcategory. This subcategory includes those offshore facilities within State waters engaged in the production, field exploration, drilling, well completions and well treatment of the oil and gas extraction industry.

(2) Subpart B—Far-Offshore Subcategory. This subcategory includes those offshore facilities within Federal waters engaged in the production, field exploration, drilling, well completions and well treatment of the oil and gas extraction industry.

A preliminary evaluation of the initial economic impact analysis, indicates that the draft recommendations for no discharge effluent limitations may not be justified for all onshore facilities. Therefore, a new level of best practicable control technology currently available must be defined, costed, and a subsequent economic impact analysis must be performed for onshore facilities. As a result of the stringent court ordered dates requiring promulgation of effluent limitations for this industry, sufficient time was not available to perform the above mentioned redefinition, costing and economic analysis. Consequently, the effluent limitations guidelines for the onshore segment of the oil and gas extraction point source category will be published by the Agency at a later date.

#### (ii) Waste characteristics.

The major pollutant parameters in the waste waters resulting from the oil and gas extraction industry are oil and grease, residual chlorine, and floating solids. The water insoluble hydrocarbons

and free floating emulsified oils in the waste water will effect the aquatic flora and fauna by interfering with oxygen transfer, coating bottom fauna and fish spawning grounds, damaging the plumage and coats of water fowl and animals, by adhering to the gills of fish, and by causing taste and toxicity problems. Thus, due to the significant impact of oil and grease upon aquatic systems and existence of technologically and economically viable treatment systems, effluent limitations have been developed to control this pollutant parameter. Residual chlorine concentrations are directly correlatable to fecal coliform bacteria counts in the sanitary wastes generated on offshore facilities. Fecal coliform bacteria concentrations serve as an indication of the pathogenic potential of water resulting from the disposal of human wastes. Compliance with residual chlorine limitations is readily achieved through the proper control of waste water chlorinators. Floating solids are primarily the result of discharges from domestic and sanitary wastes from manned and intermittently manned offshore facilities. These pollutants may settle to form detrimental deposits or they may continue to float and produce objectionable odors. The technologies and "good-housekeeping" practices necessary to control floating solids are readily available.

Interim final effluent limitation guidelines achievable through the application of the best practicable control technology currently available are established below to control each of the above pollutants. No limitations have been established for several other existing waste water pollutants because: they occur in insignificant quantities; the technology is not presently available to control the pollutant discharge; the benefit derived from removal of the pollutants does not justify the high treatment costs; or available data indicates they are normally reduced incidentally with the removal or reduction of a limited pollutant parameter.

(iii) Origin of waste water pollutants in the offshore segment of the oil and gas extraction category (1) Subpart A—Near-Offshore Subcategory. The waste waters generated in this subcategory are the result of eight separate sources. These sources are: produced water; deck drainage; drilling muds; drill cuttings; well treatment; sanitary; domestic; and produced sands. Produced waters are those waste waters generated when the natural oil-water or gas-water interfaces within the oil-gas bearing formations are disrupted. Deck drainage includes all waste resulting from platform washings, deck washings, and run-off from curbs, gutters, and drains including drip pans and work areas. Drilling muds are those materials used to maintain hydrostatic pressure control in the well, lubricate the drilling bit, remove drill cuttings from the well, or stabilize the walls of the well during drilling or workover. Drill cuttings wastes contain metallic and mineral particles resulting from drilling into subsurface geologic formations. Drill

cuttings are brought to the surface of the well with the drilling muds and then separated from the muds. Well treatment wastes result from acidizing and hydraulic fracturing to improve oil recovery. Sanitary wastes include human body wastes discharged from toilets and urinals on board the platforms. Domestic wastes are those wastes discharged from sinks, showers, laundries, and galleys. Produced sands wastes consist of the slurried particles used in hydraulic fracturing and of the accumulated formation sands generated during production.

The controlled pollutant for all waste water sources except sanitary and domestic wastes is oil and grease. For the sanitary wastes and domestic wastes sources only residual chlorine and floating solids will be limited respectively.

(2) Subpart B—Far-Offshore Subcategory. The waste water pollutant sources for this subcategory are the same as those outlined above for the near-offshore subcategory. The pollutants limited for this subcategory are, again, the same as those limited for the near-offshore facilities.

#### (iv) Treatment and control technology.

Waste water treatment and control technologies have been studied for each subcategory of the industry to determine what is the best practicable control technology currently available.

The major source of waste waters generated by offshore facilities are produced waters. These produced waters account for 0 to 99 percent of the total volume of fluids produced. This extreme fluctuation of flow volumes of produced waters is dependent on natural phenomena and is not subject to process controls. Consequently, the effluent limitations guidelines for the offshore segment of the oil and gas extraction industry are concentration based as opposed to a mass per unit production basis.

(1) Treatment in the Near-Offshore Subcategory. Several technologies have been identified as the best practicable control technology currently available. The determination of which technology is to be applied to meet these interim final limitations is dependent upon the source of the waste water within this subcategory. For those waste waters originating from produced water sources or deck drainage sources, any of the following treatment technologies may be employed to achieve these interim final limitations: gas flotation; parallel plate coalescers; loose or fibrous media filter systems; or gravity separation. The drilling muds and drill cuttings may be discharged if they are water based and their discharge does not result in free oil on the surface waters. Muds and cuttings that are oil based may not be discharged. Well treatment waste waters are typically combined with other waste streams entering the waste water treatment system. This waste may not be discharged without treatment. Sanitary wastes from platforms manned continuously by ten or more personnel will be required to maintain a residual chlorine concentration as close to 1 mg/l as possible. This is

easily achieved by the introduction of either dry or gaseous chlorine in flow dependent amounts. Sanitary wastes from platforms manned by 9 or less persons or from platforms that are intermittently manned must prevent the discharge of floating solids. This may be accomplished by the use of screening devices, shredders or similar devices. Produced sand wastes must be treated by solvent washes or other oil removal processes to prevent the discharge of free oil to surface waters or disposed of on-shore.

Oil and gas extraction facilities in the near-offshore subcategory have the option of piping their waste waters to on-shore treatment facilities. In many cases this method of treating wastes will be preferable to treatment on the near-offshore facility.

The 1983 best available technology economically achievable limitations and the new source performance standards will require no discharge of waste water pollutants to navigable waters for wastes generated by produced waters sources of this subcategory. This will generally require subsurface disposal technologies. In those cases where the produced waters are needed for pressure maintenance the produced waters may be reinjected into the original formation. If the produced waters are either incompatible or are not needed they must be injected into formations other than their place of origin. When deep-well injection is chosen as the method of disposal adequate precautions must be taken to prevent the horizontal or vertical migration of pollutants. Alternative technologies include discharge to lined pits, ponds, or reservoirs for evaporation, and disposal by commercial waste collectors.

(2) Treatment in the Far-Offshore Subcategory. The waste water sources, characteristics, and treatment technologies associated with best practicable control technology currently available for this subcategory are identical, with one exception, to those described for the near offshore category. The exception to the above is that far-offshore facilities generally are not capable of piping their wastes to onshore treatment facilities.

To comply with the best available technology economically achievable limitations and with the new source performance standards no new or additional treatment technology should be necessary for this subcategory. It is expected that during the next eight years adequate experience and expertise will be acquired to allow higher, more efficient pollutant removals employing the same technologies. New sources can design and integrate waste treatment systems into the plant operation prior to construction. This reduces many problems inherent with "add-on-end-of-pipe" treatment systems and thus results in achievement of higher pollutant removal efficiencies.

Solid waste control must be considered. Best practicable control technology as known today, requires disposal of the pollutants removed from waste waters in this industry in the form of solid wastes and liquid concentrates. In most cases these are nonhazardous substances re-

quiring only minimal custodial care. of crude per day or 1,700,000 KWH per

quiring only minimal custodial care. However, some constituents may be hazardous and may require special consideration. In order to insure long-term protection of the environment from these hazardous or harmful constituents, special consideration of disposal sites must be made. All landfill sites where such hazardous wastes are disposed should be selected so as to prevent horizontal and vertical migration of these contaminants to ground or surface waters. In cases where geologic conditions may not reasonably ensure this, adequate legal and mechanical precautions (e.g. impervious liners) should be taken to ensure long term protection to the environment from hazardous materials. Where appropriate, the location of solid hazardous materials disposal sites should be permanently recorded in the appropriate office of legal jurisdiction.

The application of best practical control technology currently available results in no additional solid waste disposal problems. That may not be properly disposed by practices currently employed by the industry.

(v) Cost estimates for control of waste water pollutants.

The costs for providing in-plant controls are largely those associated with capital investment for process and equipment modifications. The capital investment costs for compliance with the 1977 limitations for the offshore segment of the oil and gas extraction industry range from approximately 68.0 to 148.9 million dollars. The operating and maintenance costs associated with these capital costs are estimated to vary from 6.0 to 12.8 million dollars.

The costs associated with end-of-pipe treatment to comply with 1983 limitations include amortization of capital investments over a 10 year period, debt servicing, and operation and maintenance. The 1983 limitations will require an estimated 61.8-68.5 million dollars of capital investment and an estimated 6.3 million dollars increase in annual operation and maintenance costs.

(vi) Energy requirements and non-water quality environmental impacts.

Energy requirements for this industrial category to comply with these interim final regulations by the application of best practicable control technology currently available are approximately 120,000 KWH/day. This is approximately equivalent to 391 barrels of crude per day or 0.03 percent of the total crude produced by offshore facilities.

These energy requirements are due primarily to the need for additional electrical power generation equipment and will generally be consumed in the form of diesel fuel.

The application of best practicable control technology will result in a net energy savings of 25 percent. This is a direct result of the 1.4 barrels of crude recovered by the treatment system for every one barrel of diesel fuel used.

The energy requirements for compliance with best available technology economically achievable limitations are estimated to be approximately 5400 barrels

of crude per day or 1,700,000 KWH per day. This represents 0.54 percent of the total estimated crude production from existing sources expected in 1983. These energy requirements assume that there will be a 20 percent reduction in crude production from 1977 levels and that all produced waters from near-offshore facilities will go to subsurface disposal. More probably some portion of the produced water wastes will be used in secondary recovery. A net recovery of approximately 1100 barrels per day of crude from the treatment systems has been assumed in the determination of these energy requirements.

It is estimated that compliance with the new source performance standards will require considerably less energy than that needed to achieve the 1983 best achievable technology limitations. This estimate is based on the assumption that much less raw waste water volume will be generated from new formations and the same treatment technologies will be employed.

A minimal impact is expected for solid waste disposal from offshore facilities. The collection, and subsequent transport to shore of oily sand, silt, and clays from the addition of desanding units, where appropriate, will generate a possible need for additional approved land disposal sites. There are no known radioactive substances used in the industry other than as integral components of certain instruments, such as well-logging instruments. Therefore, no radiation problems are expected. Noise levels will not be increased except in those cases where additional power generating equipment must be added to an offshore facility. The only possible source of air pollution would result from the above mentioned additional power generation equipment.

(vii) Economic impact analysis.

Estimated internal costs for existing sources in millions of dollars.

Region	1977		1983	
	Investment	Operating	Investment	Operating
Gulfoffset	\$63.8-\$144.7	\$5.6-\$12.4	\$49.7-\$56.4	\$5.2
Alaska	4.2	.4	12.1	1.1
Total	68.0-148.9	6.0-12.8	61.8-68.5	6.3

The investment and operating costs for a new source should be similar to the cost for an existing source, though the investment cost may be somewhat lower since prior planning would alleviate the cost of acquiring additional space that some existing sources must cope with.

External costs are assessed in terms of the effect which the increase in internal costs will have on prices, employment, communities and regions, international trade, closures of existing facilities, and production.

**Effect on Prices:** A projection of the price effect, if any, that might be expected given the investment and operating costs of compliance is difficult since a major change in the regulation of oil, and possibly of gas, seems likely at this time. Nonetheless, prices of uncontrolled oil and gas output can be expected to be

This summary of the economic impact of the effluent limitation guidelines is based largely on the report entitled "Economic Analysis of Proposed and Interim Final Effluent Guidelines of the Offshore Oil and Gas Producing Industry." The internal and external costs of compliance with the guidelines are considered acceptable. (Data presented in this section is in 1974 dollars and, unless otherwise indicated, encompasses the industry's petroleum and gas operations in both Federal and State waters.)

Internal costs are defined as the increase in investment and annual operating costs for the industry as a whole that will occur as a result of the guidelines. For existing operations, the 1977 standards will require an estimated \$68.0-\$148.9 million of investment and an estimated \$6.0-\$12.8 million initial increase in annual operating costs; the 1983 guidelines will require an estimated \$61.8-\$68.5 million of investment and an estimated \$6.3 million initial increase in annual operating costs. The annual operating costs for existing sources should decline over time as producing units reach the end of their economic life and are shut-in.

Estimates of the total internal costs for existing sources were derived from an analysis of the industry's three producing regions. The estimated internal costs for two of these regions, the Gulf Coast and off-shore Alaska, are shown below in tabular form. A range of costs is shown for the Gulf Coast; the range indicates how the investment and initial annual operating costs can be expected to change in response to change in a critical parameter, i.e. price, decline rate, or cost of capital. Only a point estimate is available for Alaska at this time. The third region, off-shore California, is not shown since the guidelines will have virtually no impact on operations in this area.

unaffected by the costs of compliance with the proposed regulations; these prices will move with world oil and gas prices. Thus, in the event of total decontrol, no increase in prices would be expected to result from the added pollution control costs. In the event that some form of control is perpetuated, price increases on the proportion of output that is controlled might be allowed by the regulatory authorities.

Prices of interstate gas are currently regulated. Assuming continued regulation, the increased costs of producing interstate gas would probably be recovered; however, in terms of total U.S. gas production this would probably constitute a price increase of less than one-third of one percent. Similarly, if prices of old oil continue to be controlled and one assumes that the regulatory authorities

would allow full cost recovery, then in terms of total U.S. oil consumption the price of oil might increase by a few cents a barrel. However, because of the uncertain regulatory environment, a "worst case" assumption—that producers will have to absorb all costs of compliance—has been made in estimating the impact on production.

**Effect on Well Abandonment and Foregone Production:** In the Gulf, less than 0.2% of existing well completions could be abandoned in 1977 as a result of the increased costs of pollution abatement, while in 1983 an estimated 0.9%-1.5% of existing completions could be abandoned. However, the economic impact of the effluent limitation guidelines is best shown by data on the loss in potential production, not by the percentage of abandoned completions, for two reasons. First, any of the abandoned completions are already near the end of their producing life, and, second, Gulf production losses result almost entirely from a decrease in producing life due to increased operating costs rather than from shut-ins precipitated by 1977 or 1983 investment requirements. Since the losses in production occur at the end of producing life, most of the losses will be significantly deferred beyond 1983 and spread over many years. For existing sources in the Gulf of Mexico, the loss in potential production is estimated as 0.6%-1.2% (14.0-27.8 million BBL) for oil and 0.3%-1.0% (81.4-249.4 million MCF) for gas.

Assuming that the costs of operating off-shore Alaska are similar to the Gulf, no abandonments are projected for Alaska in either 1977 or 1983. The loss in potential production is estimated as .8% (2.26 million BBL) for oil and .8% (2.44 million MCF) for gas. However, the costs of operating in Alaska may be significantly higher than in the Gulf. Assuming that costs are three times as high, the estimated loss in potential production would increase to 2.4% (6.8 million BBL) for oil and 2.7% (7.0 million MCF) for gas. Due to uncertainties about the costs of operating off-shore Alaska, the Agency will be reviewing its Economic Impact Analysis for this area and would be particularly interested in receiving comments on this point, especially cost data.

The impact on new sources is difficult to estimate since energy needs and the returns associated with developing and operating a new source may change dramatically over the next several decades. Moreover, by 1985 only a small proportion of off-shore oil is expected to come from state waters; new off-shore production is expected to occur principally in federal waters. However, an indication of the likely impact on new sources might be obtained by examining the impact on existing Gulf sources in federal waters where the loss in potential production for oil is estimated at .5%-1.0% and the loss in potential production for gas is estimated at 0.3%-0.85%. For a new source these ranges would be expected to be even lower since new wells should, on average, have a larger potential production than existing wells that have been

worked for a number of years. Moreover, the deferral of production losses discussed in connection with existing sources in the Gulf should be even more pronounced for a new source that has yet to begin a longer expected production life.

**Other Effects:** The impact on the balance of payments will be adverse. Assuming a world price of \$11/BBL for oil and \$2/MCF for gas an outflow of less than \$30 MM is expected through 1985 however. No significant employment or community impacts are anticipated.

The report entitled "Development Document for Interim Final Effluent Limitations Guidelines and New Source Performance Standards for the Offshore Segment of the Oil and Gas Extraction Point Source Category" details the analysis undertaken in support of the interim final regulation set forth herein and is available for inspection in the EPA Freedom of Information Center, Room 204, West Tower, Waterside Mall, Washington, D.C., at all EPA regional offices, and at State water pollution control offices. A supplementary analysis prepared for EPA of the possible economic effects of the regulation is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulation or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460, Attention: Ms. Ruth Brown, A-107.

When this regulation is promulgated in final rather than interim form, revised copies of the Development Document will be available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the economic analysis document will be available through the National Technical Information Service, Springfield, VA 22151.

(c) Summary of public participation. Prior to this publication, the agencies and groups listed below were consulted and given an opportunity to participate in the development of effluent limitations, guidelines and standards proposed for the offshore segment of the oil and gas extraction category. All participating agencies have been informed of project developments. An initial draft of the Development Document was sent to all participants and comments were solicited on that report. The following are the principal agencies and groups consulted:

- (1) Effluent Standards and Water Quality Information Advisory Committee (established under section 515 of the Act);
- (2) all State and U.S. Territory Pollution Control Agencies;
- (3) Exxon Chemical Corporation;
- (4) Nalco Chemical Company;
- (5) Phillips Petroleum Company;
- (6) Oil Operators, Inc.;
- (7) Sun Oil Company;
- (8) Petrolite Corporation;
- (9) Enviro-tech Corporation;
- (10) Pollution Control Engineering,

- Inc.;
- (11) Marathon Oil Company;
- (12) Mobil Oil Company;
- (13) Champlain Petroleum Company;
- (14) Brown & Root, Inc.;
- (15) Western Oil & Gas Association;
- (16) American Society of Mechanical Engineers;
- (17) The Conservation Foundation;
- (18) Businessmen for the Public Interest;
- (19) Environmental Defense Fund, Inc.;
- (20) Natural Resources Defense Council;
- (21) American Society for Civil Engineers;
- (22) Water Pollution Control Federation;
- (23) National Wildlife Federation;
- (24) Kimberly Clark Corporation;
- (25) Off-shore Operators Committee;
- (26) Exxon Company, U.S.A.;
- (27) American Petroleum Institute;
- (28) American Oil Company;
- (29) Atlantic Richfield Company;
- (30) Chevron Oil Company;
- (31) Continental Oil Company;
- (32) Gulf Oil Company;
- (33) Noble Drilling Company;
- (34) Rheem Superior;
- (35) Shell Oil Company;
- (36) Texaco, Inc.;
- (37) United States Filter;
- (38) Union Filter Company;
- (39) WEMCO.

The following responded with comments: Marathon Oil Company; Mid-Continent Oil & Gas Association; American Petroleum Institute; South Texas Section, A.I. Ch. E.; Offshore Operators Committee; Department of Health, Education, and Welfare; Shell Oil; Getty Oil Company; Petrolite Corporation-Tretolite Division; Sun Oil Company; Atlantic Richfield Company; Exxon Company, U.S.A.; Colorado Department of Health; Western Oil & Gas Association; Illinois Environmental Protection Agency; North Carolina Department of Natural and Economic Resources; State of Michigan, Department of Natural Resources; Texaco; U.S. Department of the Interior; U.S. Department of Commerce; State of Alaska, Department of Environmental Conservation; Effluent Standards and Water Quality Information Advisory Committee; Wyoming Department of Environmental Quality; Wyoming Environmental Institute; Powder River Basin Resource Council—Buffalo, Wyoming; Wyoming Game and Fish Department; and Wyoming State League of Women Voters.

The primary issues raised in the development of the interim final effluent limitations and guidelines and the treatment of these issues herein are as follows:

(1) A common criticism was that in defining BPCT for continuously manned facilities with ten or more people, provisions be made for the use of other satisfactory methods of treatment, besides biological waste treatment systems, that may be available in the future.

The treatment systems used do not have to be biological. Any type of system may be used, as long as it meets the residual chlorine limits.

(2) One commenter suggested that the residual chlorine should be specified to be a minimum of 1 mg/l and maintained as close to this concentration as possible.

It is recognized that the disinfection technique used on offshore platforms is not as sophisticated and doesn't have the control capabilities of the units used in large municipal plants. For this reason,

the limitation has been changed to decks are necessary to eliminate fire and

for the daily maximum being higher than the annual average results from the

(22) Several commenters suggested the need for a special provision in the

available, or which may be relied upon by the Agency, comments should identify

Subpart A—Near-Offshore Subcategory § 435.10 Applicability; description of

the limitation has been changed to greater than 1 ppm and as close to this concentration as possible.

(3) One commenter recommended that chlorine residual monitoring frequency be changed from daily to monthly.

This regulation does not set monitoring requirements. Any requirements of this kind are set out in individual permits.

(4) One commenter recommended that the 204B colorimetric method, given on page 385 in Standards Method, be adopted for monitoring the chlorine residual for offshore operations.

The specification of analytical methods is not within the scope of this regulation.

(5) One commenter suggested that the EPA adopt a NPDES permit compliance monitoring frequency for produced water discharges no greater than four samples in a 24 hour period each month.

The daily maximum limit for oil and grease is based on composite sampling (e.g., 4 samples taken over a 24 hour period, analyzed separately and the 4 results averaged) and the maximum monthly average is based on weekly composite sampling. However, the monitoring requirements will be fixed in the individual permits.

(6) One commenter recommended that effluent limitations guidelines consistent with BPTCA be promulgated for BAT and as a standard of performance for new sources.

Based on the evaluation of existing technologies, the cost of implementing these technologies, and other factors, the limitations have been changed to reflect improved operation and experience with continued discharge for the far-offshore subcategory and remains no discharge of produced water for near-offshore.

(7) One commenter recommends deletion of the 7 day performance test of each sanitary treatment system on initial installation, on major modification, or as an annual requirement. The commenter states that performance tests are run but may take greater than or less than 7 days.

This has been eliminated as part of the regulation, but it is recommended that some sort of performance testing be required in the NPDES permit. The determination of frequency and test interval should be on a case by case basis.

(8) One commenter wants a distinction to be made between the 2 possible types of deck drainage: one that becomes contaminated with oil and one that is kept essentially free from oil contamination. No treatment should be required for the latter.

There is no distinction made between types of deck drainage. If they are not contaminated they can meet the limitation without treatment. The contaminated deck drainage will require treatment to meet the limitation.

(9) One commenter suggested that elimination of detergents from deck washdowns could reduce water treatment system upsets. However, there is no other way to effectively clean decks. Clean

decks are necessary to eliminate fire and safety hazards.

The intent of the regulation was not the elimination of detergents but the discriminant use thereof. There exist alternate methods of deck cleaning (e.g. steam or solvent). EPA, in its field investigations, has seen exceptionally well maintained platforms where neither solvents nor detergents are used.

(10) One commenter stated that storm water runoff should be exempt from subsurface disposal provided that it is segregated from oily waste sources.

It is agreed that this should be the case and the regulation sets a separate limitation for the discharge of deck drainage in the cases where no discharge of produced water is required.

(11) One commenter states that "NONE" is not an achievable oil and grease limitation. It could literally be interpreted as "ZERO" which would effectively eliminate the discharge of the natural and fresh water based muds and the resultant cuttings.

The word "NONE" no longer appears in the regulation. "No discharge of free oil to surface waters" has been substituted.

(12) A comment was received that the size of the facility should be a consideration in setting the regulations.

Size was considered in determining applicable technology and was found to be of minimal impact. Size was also considered in the economic impact analysis.

(13) A comment was stated that the document fails to mention background concentrations of hydrocarbons, the tolerance of marine ecosystems to oil, biodegradability, short term tolerances to higher concentrations, the nutrient value of hydrocarbon in certain ranges of concentration, etc.

The regulation is designed to define treatment technologies, their costs, and the economic impact of their implementation. The Development Document is a summary of the background materials used to arrive at the conclusions reached in the regulation. Section 6 of the Development Document defines some of the effects of the pollutant parameters. Additional information on pollutants and their effects is contained in Supplement B.

(14) One commenter suggested that a limit on monthly or yearly averages be included.

The regulation is designed to fix the levels at which a technology is capable of performing. The limitations are set on short term basis so that compliance with these limitations can be determined within a short period of time. A monthly maximum is set, therefore an annual average is unnecessary.

(15) One commenter stated that produced water treatment technology is subject to malfunction caused by fluid characteristics, variations in flow rate, equipment failure, biological action, start-up problems, and improper operations.

In determining limitations set out in this regulation, all of these factors were considered. In the analysis of the data, those points which represented preventable upsets were eliminated. The reason

for the daily maximum being higher than the annual average results from the above causes.

(16) Many commenters thought that the EPA did not adequately consider environmental impact of crude oil in the marine environment and the cost of treatment or elimination of discharge.

An economic impact analysis was done in terms of lost energy through the year 2000. Constituents other than oil and grease were also looked at. The result was elimination of the zero discharge requirement for the far-offshore subcategory. It is felt that the other constituents (BOD, heavy metals, TDS, chlorides, etc.) are potentially harmful in a near shore environment. The BAT and new source requirements in this area therefore remain unchanged.

(17) Some commenters stated that there should not be different guidelines for California, the Gulf of Mexico, and Alaska.

These guidelines have been changed to be the same for all areas.

(18) One commenter suggested that biological treatment for human sewage should not be required for offshore installations normally manned by less than 30 people.

Biological treatment is not required for removal of BOD or suspended solids but rather to allow disinfection (reduction of fecal coliform level). It was felt that portable sanitary facilities would be adequate for less than ten people. To lessen the load on biological systems, regulations have been changed to separate domestic from sanitary wastes (domestic wastes do not contain fecal coliform).

(19) Several comments were received that subsurface injection was developed for purpose of secondary recovery, before being required by any state.

There was apparently some confusion when the interpretation was made that "injection was required by states", as it was known that injection is also used for production stimulation.

(20) One commenter stated that oil and grease removals attained by offshore facilities cannot and should not be applied to onshore facilities. The commenter believes that the performance of onshore facilities is much better.

A statistical comparison was made between a total of 27 facilities (including both onshore and offshore). Eight of the 10 best facilities were offshore. Therefore, there is no reason why these facilities should not be considered comparable.

(21) One commenter questioned the use of a log-normal distribution assumption.

After first assuming that the data were distributed according to a normal or bell shaped distribution, it was found that the data more nearly approximated a log-normal distribution (where the logarithm of the data is normally distributed). The upper 70-80 percent of the data, in fact, fit almost perfectly to a lognormal distribution. The limits set in the regulation are the 99th percentile probability limits of the fitted data.

(22) Several commenters suggested the need for a special provision in the regulation for treatment bypass during upsets, start-ups, and maintenance.

Fluctuations in the effluent quality caused by unpreventable upsets and malfunctions were included as part of the data base. These fluctuations are in large part the reason for the daily maximum being set almost three times as high as the annual average (72 vs. 25). Provision is made for start-up of the treatment facilities as part of the implementation schedule in each permit. When major preventive maintenance becomes necessary, there will usually be options available other than discharge of the bypassed wastes. These options include but may not be limited to: 1) storage on the platform; 2) storage onshore; 3) storage on a barge. There may be rare cases when none of these options are technically possible and these will be considered on a case by case basis.

(23) Questions have been raised concerning the availability of standards or guidelines applicable to the disposal of solid wastes resulting from the operation of pollution control systems.

The principles set forth in "Land Disposal of Solid Wastes Guidelines" (40 CFR 241) may be used as guidance for acceptable land disposal techniques. Potentially hazardous wastes may require special considerations to ensure their proper disposal. Additionally, state and local guidelines and regulations should be considered wherever applicable.

The Agency is subject to an order of the United States District Court for the District of Columbia entered in *Natural Resources Defense Council vs. Train et al.* (Cv. No. 1609-73) which requires the promulgation of regulations for this industry category no later than September 1, 1975. This order also requires that such regulations become effective immediately upon publication. In addition, it is necessary to promulgate regulations establishing limitations on the discharge of pollutants from point sources in this category so that the process of issuing permits to individual dischargers under section 402 of the Act is not delayed.

It has not been practicable to develop and publish regulations for this category in proposed form, to provide a 30 day comment period, and to make any necessary revisions in light of the comments received within the time constraints imposed by the court order referred to above. Accordingly, the Agency has determined pursuant to 5 USC § 553(b) that notice and comment on the interim final regulations would be impracticable and contrary to the public interest. Good cause is also found for these regulations to become effective immediately upon publication.

Interested persons are encouraged to submit written comments. Comments should be submitted in triplicate to the EPA Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460, Attention: Ms. Ruth Brown, A-107. Comments on all aspects of the regulation are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which are

available, or which may be relied upon by the Agency, comments should identify and, if possible, provide any additional data which may be available and should indicate why such data are essential to the amendment or modification of the regulation. In the event comments address the approach taken by the Agency in establishing an effluent limitation or guideline EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of sections 301 and 304(b) of the Act.

A copy of all public comments will be available for inspection and copying at the EPA Freedom of Information Center, Room 204, West Tower, Waterside Mall, 401 M Street, S.W., Washington D.C. A copy of preliminary draft contractor reports, the Development Document and economic study referred to above, and certain supplementary materials supporting the study of the industry concerned will also be maintained at this location for public review and copying. The EPA information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

All comments received on or before October 15, 1975, will be considered. Steps previously taken by the Environmental Protection Agency to facilitate public response within this time period are outlined in the advance notice concerning public review procedures published on August 6, 1973 (38 FR 21202). In the event that the final regulation differs substantially from the interim final regulation set forth herein the Agency will consider petitions for reconsideration of any permits issued in accordance with these interim final regulation.

In consideration of the foregoing, 40 CFR Part 435 is hereby established as set forth below.

Dated: August 29, 1975.

RUSSELL E. TRAIN,  
Administrator.

#### Subpart A—Near Offshore Subcategory

- Sec. 435.10 Applicability; description of the near-offshore subcategory.  
435.11 Specialized definitions.  
435.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

#### Subpart B—Far-Offshore Subcategory

- 435.20 Applicability; description of the far-offshore subcategory.  
435.21 Specialized definitions.  
435.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

AUTHORITY: Secs. 301, 304 (b) and (c), 306 (b) and (c), 307(c), Federal Water Pollution Control Act, as amended (the Act); 33 U.S.C. 1261, 1311, 1314 (b) and (c), 1316 (b) and (c), 1317(c); 86 Stat. 816 et seq.; Pub. L. 92-500.

#### Subpart A—Near-Offshore Subcategory

##### § 435.10 Applicability; description of the near-offshore subcategory.

The provisions of this subpart are applicable to discharges resulting from those near-offshore facilities within States waters engaged in the production, field exploration, drilling, well completions, and well treatment of the oil and gas extraction industry.

##### § 435.11 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "State waters" shall mean the territorial seas as defined in 40 CFR 125.1(gg)—(excluding the Great Lakes).

(c) The term "M10" shall mean those offshore facilities continuously manned by ten (10) or more persons.

(d) The term "M9IM" shall mean those offshore facilities continuously manned by nine (9) or less persons or intermittently manned by any number of persons.

##### § 435.12 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of facility, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry subcategory and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain facilities in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protec-

tion Agency. The Administrator may approve or disapprove such limitations, pollutant properties, controlled by this section, which may be discharged by a

Effluent limitations

The area contains 40 acres in San Bernardino County.

## RULES AND REGULATIONS

tion Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or

pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

## Effluent limitations

Pollutant parameter waste source	Oil and grease		Residual chlorine minimum for any 1 d, milligram per liter
	Maximum for any 1 d, milligram per liter	Average of daily values for 30 consecutive days shall not exceed milligram per liter	
Produced water.....	72	48	NA
Deck drainage.....	72	48	NA
Drilling muds.....	(1)	(1)	NA
Drill cuttings.....	(1)	(1)	NA
Well treatment.....	(1)	(1)	NA
Sanitary:			
M10.....	NA	NA	11
M9IM.....	NA	NA	NA
Domestic L.....	NA	NA	NA
Produced sand.....	(1)	(1)	NA

<sup>1</sup> No discharge of free oil.

<sup>2</sup> Minimum of 1 mg/l and maintained as close to this concentration as possible.

<sup>3</sup> There shall be no floating solids as a result of the discharge of these wastes.

## Subpart B—Far-Offshore Subcategory

§ 435.20 Applicability: description of the far-offshore subcategory.

The provisions of this subpart are applicable to discharges resulting from those far-offshore facilities within Federal waters engaged in the production, field exploration, drilling, well completions and well treatment of the oil and gas extraction industry.

## § 435.21 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR 401 shall apply to this subpart.

(b) The term "Federal waters" shall mean all waters seaward from the territorial seas as defined in 40 CFR 125.1 (gg)—(excluding the Great Lakes).

(c) The term "M10" shall mean those offshore facilities continuously manned by ten (10) or more persons.

(d) The term "M9IM" shall mean those offshore facilities continuously manned by nine (9) or less persons or intermittently manned by any number of persons.

§ 435.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

(a) In establishing the limitations set forth in this section, EPA took into account all information it was able to collect, develop and solicit with respect to factors (such as age and size of facility, raw materials, manufacturing processes, products produced, treatment technology available, energy requirements and costs) which can affect the industry sub-

categorization and effluent levels established. It is, however, possible that data which would affect these limitations have not been available and, as a result, these limitations should be adjusted for certain facilities in this industry. An individual discharger or other interested person may submit evidence to the Regional Administrator (or to the State, if the State has the authority to issue NPDES permits) that factors relating to the equipment or facilities involved, the process applied, or other such factors related to such discharger are fundamentally different from the factors considered in the establishment of the guidelines. On the basis of such evidence or other available information, the Regional Administrator (or the State) will make a written finding that such factors are or are not fundamentally different for that facility compared to those specified in the Development Document. If such fundamentally different factors are found to exist, the Regional Administrator or the State shall establish for the discharger effluent limitations in the NPDES permit either more or less stringent than the limitations established herein, to the extent dictated by such fundamentally different factors. Such limitations must be approved by the Administrator of the Environmental Protection Agency. The Administrator may approve or disapprove such limitations, specify other limitations, or initiate proceedings to revise these regulations.

(b) The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best practicable control technology currently available:

## RULES AND REGULATIONS

Title 43—Public Lands: Interior  
CHAPTER II—BUREAU OF LAND  
MANAGEMENTAPPENDIX—PUBLIC LAND ORDERS  
[Public Land Order 5529; J-012096]

## ALASKA

Withdrawal for National Forest  
Administrative Site

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

Subject to valid existing rights, the minerals in the following described national forest lands are hereby withdrawn from prospecting, location, entry and purchase under the mining laws, 30 U.S.C., Ch. 2, in aid of programs of the Forest Service for utilization of the surface as an administrative site:

TONGASS NATIONAL FOREST  
HOONAH ADMINISTRATIVE SITE

U.S. Survey No. 2414,  
Lots 1, 2, 3, 7, and 8.  
Containing 10.93 acres.

JACK O. HORTON,  
Assistant Secretary of the Interior.

SEPTEMBER 8, 1975.

[FR Doc.75-24463 Filed 9-12-75; 8:45 am]

[Public Land Order 5535; Riverside 1604]

## CALIFORNIA

Withdrawal for Addition to National Forest  
Administrative Site

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from appropriation under the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws, in aid of programs of the Department of Agriculture:

LOS PADRES NATIONAL FOREST  
SAN BERNARDINO MERIDIAN  
Chuchupate Administrative Site

T. 8 N., R. 20 W.,  
Sec. 8, E½NE¼NE¼;  
Sec. 9, W½NW¼NW¼, NW¼SW¼NW¼.

The areas described contain 50 acres in Ventura County.

2. The withdrawal made by this order does not alter the applicability of the public land laws governing the use of the national forest lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,  
Assistant Secretary of  
the Interior.

SEPTEMBER 8, 1975.

[Public Land Order 5533; Riverside 1151]

## CALIFORNIA

Withdrawal of Lands for Water Resource  
Development

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

Subject to valid existing rights the following described public land, which is under the jurisdiction of the Secretary of the Interior, is hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws, 30 U.S.C., Ch. 2, and the mineral leasing laws, in aid of programs of the Corps of Engineers, Department of the Army, for construction, operation and maintenance of the Mojave River Forks Reservoir flood control project, authorized by the Act of July 14, 1960, 74 Stat. 480, 497:

SAN BERNARDINO MERIDIAN  
T. 3 N., R. 4 W.,  
sec. 22, SE¼NE¼.

The area contains 40 acres in San Bernardino County.

JACK O. HORTON,  
Assistant Secretary of  
the Interior.

SEPTEMBER 8, 1975.

[Public Land Order 5530; Colorado 17547]

## COLORADO

## Withdrawal for Recreation Sites

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights, the following described public lands which are under the jurisdiction of the Secretary of the Interior, are hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws, for protection of their public recreation values:

SIXTH PRINCIPAL MERIDIAN  
WOLCOTT RECREATION SITE

T. 4 S., R. 83 W.,  
Sec. 9, Lots 4, 5, 6, those portions south of the centerline of the Denver and Rio Grande Western Railroad, as constructed (right-of-way, Colorado 093762) and north of the centerline of U.S. Highway 6-24, as constructed (now within right-of-way, Colorado 4370 for Interstate Highway 70).

STATE BRIDGE RECREATION SITE

T. 2 S., R. 83 W.,  
Sec. 26, S½NW¼, N½NW¼SW¼;  
Sec. 27, SE¼SE¼NE¼, NE¼NE¼SE¼.

The areas described aggregate approximately 170 acres.

2. The withdrawal made by this order does not alter the applicability of the public land laws governing the use of the lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws. However, leases, licenses, or permits will be issued only if the proposed use of the lands will not interfere with the primary use for which they are withdrawn.

JACK O. HORTON,  
Assistant Secretary of  
the Interior.

SEPTEMBER 8, 1975.

## IDAHO

Reservation for Constructed Forest  
Service Road

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. Subject to valid existing rights and to the provisions of existing with-

## RULES AND REGULATIONS

drawals, the following described public lands, which are under the jurisdiction

along the south boundary of the tract, identical with the south boundary of the

tract, identical with the southwest corner of lot 5 said section; thence, N.

portion of the south boundary of SW¼ SE¼ of section 3, and the line between sections 3 and 10, 5.62 chains distance

1. Executive Order No. 6583 of February 3, 1934, withdrawing lands in New Mexico to aid the State of New Mexico in

ervation, but title to said lands remain in the United States pursuant to the Act of July 18, 1952, 66 Stat. 780:

drawals, the following described public lands, which are under the jurisdiction of the Secretary of the Interior, are hereby withdrawn from all forms of appropriation under the public land laws, including the mining laws, 30 U.S.C. Ch. 2, but not from leasing under the mineral leasing laws, nor the disposal of materials under the Act of July 31, 1947, as amended, 30 U.S.C. 601, 604 (1970), and reserved for the use of the Department of Agriculture for the granting of easements for road rights-of-way as authorized by section 2 of the Act of October 13, 1964, 16 U.S.C. 532, 533 (1970):

KANIKSU NATIONAL FOREST  
BOISE MERIDIAN

T. 65 N., R. 2 W.,  
Sec. 23, lot 4 (a strip of land 100 feet in width, being 50 feet on both sides of the centerline of Smith Creek Road No. 281, as shown in right-of-way map dated July 13, 1972, over and across the named subdivision).

The area described aggregates 3.24 acres in Boundary County.

2. The withdrawal made by this order shall not preclude agricultural entries, or sales, exchanges or leases, under applicable public land laws of any legal subdivisions traversed by lands withdrawn by this order: Provided, that any such entry, sale, exchange, or lease shall be subject to this order and to any road right-of-way easement over the lands issued by the Department of Agriculture.

JACK O. HORTON,  
Assistant Secretary of  
the Interior.

[Public Land Order 5534; New Mexico 13389]

NEW MEXICO

Partial Revocation of Withdrawals for the  
Rio Grande Canalization Project

By virtue of the authority vested in the President by the Act of May 13, 1924, as amended by the Act of August 19, 1935, 22 U.S.C. 277c (1970), and pursuant to Executive Order No. 10355 of May 26, 1952 (17 FR 4831), it is ordered as follows:

1. The Executive Orders No. 8649 of January 23, 1941 and No. 8780 of June 11, 1941, and Public Land Orders No. 78 of January 15, 1943, No. 349 of February 12, 1947, No. 709 of April 10, 1951, and No. 851 of July 1, 1952, which withdrew certain lands for use of the Department of State in connection with the Rio Grande Canalization Project are hereby revoked so far as they affect the following described lands:

NEW MEXICO PRINCIPAL MERIDIAN

T. 21 S., R. 1 W.,  
Sec. 23, those tracts of land more particularly described as follows:

A tract of land beginning at the southwest corner of SW $\frac{1}{4}$ NE $\frac{1}{4}$  section 23, identical with the southwest corner of the tract; from which the corner of sections 14, 15, 22 and 23, bears N. 44°58' W., 57.22 chains distance; thence S. 89°42' E.,

along the south boundary of the tract, identical with the south boundary of the SW $\frac{1}{4}$ NE $\frac{1}{4}$  of section 23, 19.94 chains distance to the southeast corner of the tract identical with the southeast corner of the SW $\frac{1}{4}$ NE $\frac{1}{4}$  of said section; thence, with the traverse of the northeast boundary of the tract, N. 43°45' W., 11.85 chains distance, N. 53°33' W., 14.52 chains distance to a point on the west boundary of the SW $\frac{1}{4}$ NE $\frac{1}{4}$  of said section, identical with the north corner of the tract; thence, S. 0°14' W., along the west boundary of the tract, identical with the west boundary of the SW $\frac{1}{4}$ NE $\frac{1}{4}$  of said section, 17.08 chains distance to the point of beginning, containing 18.50 acres, more or less.

A tract of land beginning at the northeast corner of the SW $\frac{1}{4}$ NE $\frac{1}{4}$  of section 23, identical with the northeast corner of the tract; from which the South  $\frac{1}{16}$  section corner of sections 13 and 14 this township bears N. 27°48' E., 44.61 chains distance; thence, N. 89°59' W., along the north boundary of the SW $\frac{1}{4}$ NE $\frac{1}{4}$  of section 23, identical with the north boundary of the tract, 3.73 chains distance to a point, identical with the northwest corner of the tract; thence S. 47°26' E., along the southwest boundary of the tract, 5.07 chains distance to a point on the east boundary of the SW $\frac{1}{4}$ NE $\frac{1}{4}$  of section 23, identical with the south corner of the tract; thence N. 0°02' W., along the east boundary of the SW $\frac{1}{4}$ NE $\frac{1}{4}$  of section 23, identical with the east boundary of the tract, 3.43 chains distance to the point of beginning, containing .64 acre, more or less.

An unsurveyed tract of land lying within lot 5, beginning at the southeast corner of lot 5, identical with the southeast corner of the tract; from which the  $\frac{1}{4}$  section corner of sections 23 and 24, bears N. 0°17' E., 20.165 chains distance; thence, N. 0°17' E., along the line between sections 23 and 24, identical with the east boundary of the tract, 2.54 chains distance to a point; thence, with the traverse of the northeast boundary of the tract, N. 42°10' W., 10.93 chains distance, N. 53°30' W., 16.33 chains distance to the north corner of the tract, identical with the northwest corner of lot 5 of section 23; thence, S. 0°02' E., along the west boundary of the tract, identical with the west boundary of lot 5 of section 23, 20.05 chains distance to the southwest corner of the tract, identical with the southwest corner of lot 5 said section; thence, S. 89°21' E., along the south boundary of the tract, identical with the south boundary of lot 5, section 23, 20.50 chains distance to the point of beginning, containing 24.97 acres, more or less.

T. 22 S., R. 1 W.,  
Sec. 1, an unsurveyed tract of land lying within lot 5, beginning at a point on the line between sections 1 and 36, Tps. 21 and 22 S., R. 1 W., identical with the northeast corner of the tract; from which the true point for the corner of Tps. 21 and 22 S., Rs. 1 E. and 1 W., bears N. 89°57' E., 16.55 chains distance; thence, S. 89°57' W., along the north boundary of the tract, identical with a portion of the north boundary of lot 5 of section 1, 2.87 chains distance to the northwest corner of the tract, identical with the northwest corner of lot 5 on the line between sections 1 and 36; thence, S. 0°12' W., along the west boundary of the tract, identical with the west boundary of lot 5, section 1, 19.94 chains distance to the southwest corner of the

tract, identical with the southwest corner of lot 5 said section; thence, N. 89°38' E., along the south boundary of the tract, identical with the south boundary of lot 5 of section 1, 19.30 chains distance to the southeast corner of the tract, identical with the southeast corner of lot 5 said section; thence, with the traverse of the northeast boundary of the tract, N. 42°52' W., 19.47 chains distance, N. 29°23' W., 6.36 chains distance to the point of beginning, containing 19.83 acres, more or less.

T. 22 S., R. 1 E.,  
Sec. 20, an unsurveyed tract of land lying within lots 1, 2 and 3 of section 20, beginning at the corner of sections 17, 18, 19 and 20, identical with the northwest corner of the tract; thence, south, along the west boundary of the tract, identical with the west boundary of lot 1 of section 20, 10.50 chains distance to the closing corner of sections 19 and 20 for those portions of sections 19 and 20 north of the rejected north boundary of the Mesilla Colony Grant; thence N. 89°14' E., along the north boundary of said grant, 2.50 chains distance to the closing corner of sections 19 and 20 for those portions of sections 19 and 20 south of the rejected north boundary of the Mesilla Colony Grant; thence, S. 0°01' W., along the west boundary of lot 2 of section 20, identical with a portion of the line between sections 19 and 20, 9.00 chains distance to the northwest corner of lot 3; thence, continue same bearing along west boundary of lot 3 of section 20, 20.00 chains distance to the southwest corner of the tract, identical with the  $\frac{1}{4}$  section corner of sections 19 and 20; thence, S. 89°54' E., along the south boundary of the tract identical with the south boundary of lot 3 of section 20, 20.00 chains distance to the southeast corner of the tract, identical with the southeast corner of lot 3 said section; thence, N. 0°01' E., along the east boundary of the tract, identical with a portion of the east boundary of lot 3 of section 20, 9.81 chains distance to a point; thence, with the traverse of a portion of the east boundary of the tract, N. 46°52' W., 4.33 chains distance, N. 28°52' W., 12.59 chains distance, N. 11°42' W., 16.03 chains distance to the northeast corner of the tract, identical with a point on the north boundary of lot 1 of section 20; thence, West, along the north boundary of the tract, identical with a portion of the north boundary of lot 1 of section 20 and the line between sections 17 and 20, 10.22 chains distance to the point of beginning, containing 57.95 acres, more or less.

Sec. 3, A tract of land beginning at the northwest corner of lot 5, identical with the northwest corner of the tract from which the corner of sections 3, 4, 9 and 10 bears S. 10°03' E., 19.925 chains distance; thence, N. 89°47' E., along the north boundary of the tract, identical with the north boundary of lots 5, 6 and the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of section 3, 61.35 chains distance to the northeast corner of the tract, identical with the northeast corner of SW $\frac{1}{4}$ SE $\frac{1}{4}$  said section; thence S. 8°07' E., along the east boundary of the tract, identical with the east boundary of the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of section 3, 19.86 chains distance to the southeast corner of the tract, identical with the southeast corner of the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of said section; thence S. 89°39' W., along the south boundary of the tract, identical with a

1. Executive Order No. 6583 of February 3, 1934, withdrawing lands in New Mexico to aid the State of New Mexico in making exchange selections as provided for by the Act of June 15, 1926, 44 Stat. 746-748, is hereby revoked so far as it affects the following described land:

PRINCIPAL MERIDIAN

T. 28 S., R. 11 W.,  
Sec. 27, S $\frac{1}{2}$ ;  
Sec. 33, N $\frac{1}{2}$  and N $\frac{1}{2}$ S $\frac{1}{2}$ ;  
Sec. 34, N $\frac{1}{2}$  and N $\frac{1}{2}$ S $\frac{1}{2}$ .

The area described aggregates 1,280 acres in Luna County.

2. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, at 10 a.m. on October 14, 1975, the land shall be open to operation of the public land laws generally. All valid applications received at or prior to 10 a.m. on October 14, 1975, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The lands will be open to location for nonmetalliferous minerals at 10 a.m. on October 14, 1975. They have been open to applications and offers under the mineral leasing laws and to location for metalliferous minerals.

Inquiries concerning the land should be addressed to Chief, Division of Technical Services, Bureau of Land Management, P.O. Box 1449, Santa Fe, New Mexico 87501.

JACK O. HORTON,  
Assistant Secretary of  
the Interior.

[Public Land Order 5531; Wyoming 36479]

WYOMING

Amendment of Public Land Order  
No. 5427

By virtue of the authority contained in section 5 of the Act of July 27, 1939, 25 U.S.C. 575 (1970), and pursuant to the recommendations of the Tribal Council and the Commissioner of Indian Affairs, it is ordered as follows:

1. Public Land Order No. 5427 of July 23, 1974, which restored to the Shoshone-Arapahoe Tribes of Indians certain lands and/or specific mineral rights, and added certain lands to the Wind River Reservation, is hereby amended to include the restoration of the coal and all mineral rights in the following described lands, and the addition of the surface of said lands to the Wind River Reservation:

WIND RIVER MERIDIAN

T. 8 N., R. 1 E.,  
Sec. 14, SW $\frac{1}{4}$ SW $\frac{1}{4}$ ;  
Sec. 15, SE $\frac{1}{4}$ SE $\frac{1}{4}$ ;  
Sec. 22, N $\frac{1}{2}$ NE $\frac{1}{4}$ .

The area described contains 160 acres in Hot Springs County.

2. Public Land Order No. 5247 of July 23, 1974, is hereby further amended to show that the following lands described therein were returned to the Res-

ervation, but title to said lands remain in the United States pursuant to the Act of July 18, 1952, 66 Stat. 780:

WIND RIVER MERIDIAN

T. 4 N., R. 6 E.,  
Sec. 3, lot 5.  
T. 3 N., R. 6 E.,  
Sec. 27, S $\frac{1}{2}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$ , SW $\frac{1}{4}$ SW $\frac{1}{4}$ ;  
Sec. 28, SE $\frac{1}{4}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$ , SE $\frac{1}{4}$ SE $\frac{1}{4}$ ;  
Sec. 34, NW $\frac{1}{4}$ NW $\frac{1}{4}$ , W $\frac{1}{2}$ SW $\frac{1}{4}$ NW $\frac{1}{4}$ .

The areas described aggregates 197.29 acres in Fremont County.

JACK O. HORTON,  
Assistant Secretary of  
the Interior.

Title 24—Housing and Urban Development  
CHAPTER X—FEDERAL INSURANCE  
ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD  
INSURANCE PROGRAM

[Docket No. FI-688]

PART 1915—IDENTIFICATION OF  
SPECIAL HAZARD AREAS

List of Communities With Special Hazard  
Areas

The purpose of this notice is the identification of communities with areas of special flood/ or mudslide/ or erosion hazards in accordance with Part 1915 of Title 24 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001-4128). The identification of such areas is to provide guidance so that communities may adopt appropriate flood plain management measures to minimize damage caused by flood losses and to guide future construction, where practicable, away from locations which are threatened by flood hazards.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community currently participating in the National Flood Insurance Program.

Effective July 1, 1975, or one year after the identification of the community as flood prone, whichever is later, the requirement will apply to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply to loans by a Federally regulated, insured, supervised or approved lending institution prior to January 1, 1976, to finance the acquisition of a previously occupied residential dwelling used as the primary residence of the owner.

The effective date of identification shall be October 15, 1975, or the date which appears in this notice, whichever is later.

This 30 day period does not supersede the statutory requirement that a com-

date of publication in the FEDERAL REGISTER or the effective date of the Flood

Where several dates appear in the column set forth below marked Effective

## RULES AND REGULATIONS

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. Effective July 1, 1975, the six months period shall be considered to begin 30 days after the

#### PART 1920—PROCEDURE FOR MAP CORRECTION

##### Letter of Map Amendment for the Town of Cheektowaga, New York

On September 7, 1973, in 38 FR 24359, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the Town of Cheektowaga, New York, as an eligible community and included Map No. H 360231 06 which indicates that a portion of Lots 1 and 71, Township 11, Range 7, Cheektowaga, New York, as recorded in Liber 8004, Pages 288 and 289 in the office of the Clerk of Erie County, New York, which can be described as follows:

Beginning at the northerly line of Rowley Road, as a 66 foot wide road, with the southeasterly side line of lands conveyed to John Joseph Feduski and Antoinette, his wife, by Deed recorded in said Clerk's office in Liber 3884 of Deeds at Page 571; thence northeasterly along the southeasterly line of land so conveyed to Feduski by aforesaid Deed 176.94 feet to the east line of lands conveyed to Feduski by aforesaid Deed; thence northerly along east line of lands conveyed to Feduski by aforesaid Deed and being along the west line of lands conveyed to New York State Realty and Terminal Company by Deed recorded in Liber 1023 of Deeds at Page 574, said line being the east line of the middle part of Lot No. 1, Township 11,

Range 7, 7.720 feet; thence northeasterly direction parallel to the center line of Cayuga Creek, as the same winds and turns to a point 930 feet along said parallel line; thence southeasterly 300 feet to the Center Line of Track No. 250 of the Penn Central Railroad; thence southeasterly along the center line of said track a distance of 776 feet to the northerly line of Rowley Road; thence easterly 1200 feet along the northerly side of Rowley Road to the point of beginning,

is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of addi-

tional, recently acquired flood information, that the above property is not within the Special Flood Hazard Area. Accordingly, effective September 7, 1973, Map No. H 360231 06 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974)

Issued: September 3, 1975.

[Docket No. FI-443]

#### PART 1920—PROCEDURE FOR MAP CORRECTION

##### Letter of Map Amendment for the City of Dallas, Texas

On January 10, 1975, in 40 FR 2199, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas and the map number and locations where Flood Hazard Boundary Maps were available for public inspection. This list included the City of Dallas, Texas, as an eligible community and included Map No. H 480171 11 which indicates that parts of Hillcrest Villa, City Blocks 7464 and 7465, Dallas, Texas, as recorded in Volume 73146, Pages 0095 and 0096 in the office of the Clerk of Dallas County, Texas, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that Hillcrest Villa, in its entirety, is not within the Special Flood Hazard Area. Accordingly, effective December 13, 1974, Map No. H 480171 11 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act

of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).

Issued: September 3, 1975.

#### Title 10—Energy

##### CHAPTER 1—NUCLEAR REGULATORY COMMISSION

##### Miscellaneous Amendments to Chapter

Notice is hereby given of the amendment of the Nuclear Regulatory Commission's regulations in 10 CFR Parts 20 and 73 and revocation of 10 CFR Part 37. The amendments correct the definition of "calendar quarter" in § 20.3(a) (4) and change certain telephone listings and other pertinent information regarding the Commission's Regional Offices in Appendix D of 10 CFR Part 20 and Appendix A of 10 CFR Part 73.

The amendments revoke 10 CFR Part 37, "Radioisotope Research Support Program." In accordance with § 37.14 the radioisotope research support program expired in 1961.

Because these amendments relate solely to corrections and minor matters, the Commission has found that good cause exists for omitting notice of proposed rule making, and public procedure thereon, as unnecessary, and for making the amendments effective on September 15, 1975.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, and sections 552 and 553 of title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Parts 20 and 73 and revocation of Part 37 are published as a document subject to codification.

#### PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

1. Paragraph 20.3(a) (4) is amended to read as follows:

FEDERAL REGISTER, VOL. 40, NO. 179—MONDAY, SEPTEMBER 15, 1975

#### § 20.3 Definitions.

(a) As used in this part:

shall be such that no day is included in more than one calendar quarter or

## RULES AND REGULATIONS

## § 20.3 Definitions.

(a) As used in this part:

(4) "Calendar quarter" means not less than 12 consecutive weeks nor more than 14 consecutive weeks. The first calendar quarter of each year shall begin in January and subsequent calendar quarters

shall be such that no day is included in more than one calendar quarter or omitted from inclusion within a calendar quarter. No licensee shall change the method observed by him of determining calendar quarters except at the beginning of a calendar year.

2. Appendix D of 10 CFR Part 20 is revised to read as follows:

## proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF THE INTERIOR

## Geological Survey

## [30 CFR Part 250]

## DRILLING AND DEVELOPMENT PROGRAMS

## Proposed Procedures for State Consideration of OCS Oil and Gas Development Plans

Notice is hereby given that the regulation 30 CFR 250.34, Drilling and Development Programs, will be modified to provide procedures for State consideration of developments proposed by lessees of Federal OCS lands. The objective of the proposed modification is to provide affected States with information and an opportunity to review and comment on developments associated with Outer Continental Shelf (OCS) oil and gas. Lessees will be required to provide information on planned developments to such States before submitting development plans to the U.S. Geological Survey. The development plans will be sent to the Governors for 60 days for review and comment. The proposed regulation is consistent with the requirements of the Freedom of Information Act in protecting private information of lessees concerning their operations or wells. It has been drafted to be compatible with the provisions of the Coastal Zone Management Act. The consistency provision of that act does not directly apply to development plans, although it may apply to permits and licenses issued to implement them.

The proposed modification consists of: An addition to § 250.34(b), Development plan; the insertion of a new paragraph § 250.34(c), Information for States, and relettering of subsequent paragraphs; and an addition to § 250.34(e), Modifications. The entire regulation, 30 CFR 250.34, is presented below with the modified portions shown in a different type.

Comments on the proposed regulation are requested. Any significant comments received will be published along with any revisions to the proposed regulation at the time of final rulemaking. After final publication of the regulation, discussions will be held with interested parties and OCS Orders will be issued which will more specifically define the information to be provided to the States.

Please submit your comments on the proposed modification of 30 CFR 250.34 on or before October 15, 1975, to the Director, U.S. Geological Survey, National Center, Reston, Virginia 22092.

## § 250.34 Drilling and development programs.

(a) *Exploratory drilling plan.* Prior to commencing each exploratory drilling program on a lease, including the construction of platforms, the lessee shall

submit a plan to the Supervisor for approval. Each plan for the leased area shall include (1) a description of drilling vessels, platforms, or other structures showing the location, the design, and the major features thereof, including features pertaining to pollution prevention and control; (2) the general location of each well including surface and projected bottom hole location for directionally drilled wells; (3) structural interpretations based on available geological and geophysical data; and (4) such other pertinent data as the Supervisor may prescribe.

(b) *Development plan.* Prior to commencing each development program on a lease, the lessee shall submit a plan to the Supervisor for approval. The plan shall include all information specified in paragraph (a) of this section in detail. The development plan except for those portions which the operator shall designate, with the Supervisor's approval, as (1) trade secrets and commercial or financial information which are privileged or confidential, or (2) geological and geophysical information, data and maps concerning wells, shall be provided by the Supervisor to the Governors of directly affected States. Prior to the Supervisor's approval of the plan, a period of 60 days, commencing with the date of the Governor's receipt of the development plan, shall be provided to each Governor for review of the plan and the submission of comments. If the Governor's comments are received before the 60 day period ends, the Supervisor may then proceed to act upon the plan without further delay.

(c) *Information for States.* Prior to submission of a development plan, the lessee shall deliver to the Governor of each directly affected State, as determined by the Supervisor, information about the development to be proposed. The final delivery of such information shall be made at least 30 days before submission of the relevant development plan, at which time the lessee shall notify both the Governor of each directly affected State and the Supervisor that such final delivery has been made. When submitting a development plan, the lessee shall certify to the Supervisor that he has, at least 30 days before such submission, provided the required information about the development proposed in that plan to the Governor of each directly affected State. The information provided to the States under this paragraph (c), which is not to be a part of the development plan itself, shall include a description of all offshore and onshore facilities and operations proposed by the lessee or directly related to the proposed development, including location, size, re-

source requirements, timing of development and operation, and such other information as may be required by the Supervisor to assist the State or States in considering the environmental, social and economic impacts of the proposed development. Copies of all information given to Governors under this paragraph shall be provided to the Supervisor. A State provided such information shall indicate to the Supervisor at the earliest practicable time whether the State concurs that the information meets the requirements of this paragraph and any subsequent implementing Orders issued by the Supervisor. If a State fails to provide such notification within 30 days after final delivery of the information, the State's concurrence will be conclusively presumed. If a State notifies the Supervisor that the information does not, in its judgment, satisfy the requirements, then the Director shall review the information and make a determination either that the information satisfies the requirements or that the lessee must provide additional information. The Director shall make his review and determination as expeditiously as possible after receipt of such notification. In the event the Director determines that the information satisfies the requirements, then the 60 day period for comment shall begin on the date of his determination. In the event the Director determines that the requirement has not been satisfied, the 60 day comment period will not begin until the State shall have received the additional information required.

(d) *Drilling applications.* Prior to commencing drilling operations either under an exploratory or development plan, the lessee shall submit an Application for Permit to Drill (Form 9-331C) to the Supervisor for approval. The application shall include the integrated blowout prevention, mud, casing, and cementing program for the well, and shall meet the requirements specified in § 250.41(a), and contain the information specified in § 250.91(a), and shall conform with the approved exploratory or development plan.

(e) *Modifications.* The lessee shall submit: (1) All requests for modifications of an approved exploratory or development plan in writing to the Supervisor for approval; and (2) all notices of changes to plans set forth in approved Application for Permit to Drill on Sunday Notices and Reports on Wells (Form 9-331), except that these requirements shall not relieve the lessee from taking appropriate action to prevent or abate damage, waste, or pollution of any natural resource or injury to life or property. When the Supervisor shall determine that the proposed modification of an approved development plan is major

## PROPOSED RULES

considered without regard to its admissibility under rules of evidence employed in

Project Mortgages and Management Agents selecting Resident Managers during the two-year period following

to the effective date of this Part to select persons who meet the stated requirements or who will qualify after

and would directly affect the interest of a State, he shall require the lessee to follow the same procedures with respect to the State as those provided in 30 CFR 250.34 (b) and (c).

WILLIAM L. FISHER,  
Acting Assistant Secretary,  
Energy and Minerals.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing  
Management

[24 CFR Part 406]

[Docket No. R-75-351]

### RESIDENT MANAGER QUALIFICATIONS

Notice of Proposed Rule Making

Notice is hereby given that the Department proposes to amend Title 24 of the Code of Federal Regulations to include a new Part 406, Resident Manager Qualifications under Chapter IV, Subchapter A. This part would set forth specific qualifications and training for Resident Managers of Multifamily Housing Projects financed by a mortgage which is insured or held by the Secretary and would establish standards for evaluation of those qualifications.

Interested persons are invited to submit written comments, suggestions or data regarding the proposed regulations to the Rules Docket Clerk, Room 10245, Office of the General Counsel, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410. Communications should have reference to the above docket number and title. All relevant material received on or before October 17, 1975, will be considered before

## PROPOSED RULES

adoption of the final rule. A copy of each communication submitted will be available for public inspection during business hours at the above address.

The Department has determined that this proposed regulation would not have a substantial environmental impact. A copy of the Finding of Inapplicability is available for public inspection in the Office of the Rules Docket Clerk at the above address.

Accordingly, the Department proposes to amend Title 24 by adding a new Part 406 to read as follows:

### PART 406—RESIDENT MANAGER QUALIFICATIONS

Sec.  
406.1 Purpose.  
406.5 Definitions.  
406.10 Requirements for certification.  
406.15 Revocation of certificate.  
406.20 Removal under the regulatory agreement.  
406.25 Responsibility for selection.  
406.30 Effective date.  
Appendix.

AUTHORITY: Section 211 of the National Housing Act, 52 Stat. 23; Sec. 7(d) of the HUD Act (42 U.S.C. 3535(d)).

#### § 406.1 Purpose.

This part sets forth standards which the Secretary will apply in granting the certification required for a person who serves as a Resident Manager of a Multifamily Housing Project financed by a mortgage insured or held by the Secretary.

#### § 406.5 Definitions.

(a) "Resident Manager" means the person who has direct responsibility for the day-to-day operation of a Multifamily Housing Project.

(b) "HUD-related Multifamily Housing Project" means a project financed by a mortgage:

(1) Insured by the Secretary pursuant to Sections 207, 208, 213, 220, 221, 231, 234, or 236 of the National Housing Act; or

(2) Held by the Secretary.

(c) "Multifamily Housing Project" means a HUD-related Multifamily Housing Project as well as any non-HUD-related multifamily project.

(d) "Secretary" means the Secretary of Housing and Urban Development or the Secretary's designee.

#### § 406.10 Requirements for Certification.

(a) Subject to the provisions of Paragraph 406.30 of this Part governing mandatory applicability, each person who serves as Resident Manager of a HUD-related Multifamily Housing Project shall have obtained, as a prerequisite of that service, a certificate issued by the Secretary. The certificate must be in good order at the time the Resident Manager is selected and throughout his term of service. Any person whose certificate has been revoked pursuant to § 406.15 may no longer serve as a Resident Manager.

(b) To obtain the certificate, an applicant must submit evidence satisfactory to the Secretary of:

(1) Good character.

(2) Education. Successful completion of high school or equivalent level of training.

(3) Age. Having attained his or her 21st birthday.

(4) Experience. At least one year's service as a full-time Resident Manager or Assistant Resident Manager of a Multifamily Housing Project, with a minimum of two years' service in connection with the management of such project.

(5) Other. Such other qualifications as specialized training, additional education and employment experience so as to entitle the applicant to a minimum of thirty points in accordance with the point system set forth in the appendix to this part.

(c) The Secretary shall evaluate the evidence submitted by an applicant in accordance with paragraph (b) of this section and will determine in his discretion, on the basis of that evidence and such other material as may be relevant, the qualifications of the applicant in accordance with the criteria set forth in paragraph (b) of this section. If the qualifications are satisfactory, the Secretary shall issue the certificate.

(d) In the event the Secretary denies any application for certification, the notification to the applicant shall set forth the reasons for the Secretary's action in sufficient detail so as to enable the applicant to request reconsideration of the determination.

#### § 406.15 Revocation or Suspension of Certificate.

(a) Notice by Secretary. The Secretary may revoke any certificate for good cause pursuant to the procedure set forth in this paragraph. The Secretary shall serve a written notice on the certificate holder that revocation is being considered and shall set forth in the notice with reasonable specificity the reasons for the proposed action. Said notice shall also advise the certificate holder that he has 15 days from receipt of the notice to respond in writing or to request an informal hearing. If the certificate holder does not respond within this 15 day period, the Secretary may revoke the certificate and shall immediately so advise the certificate holder.

(b) Presentation of evidence by certificate holder and determination by the Secretary. The certificate holder may examine and, at his expense, copy all documents, records and regulations of the appropriate HUD office that are relevant to the matter. The certificate holder shall have the right to present evidence and arguments in opposition to the proposed revocation and to controvert evidence relied on by HUD and he may elect to do this in writing, or at the informal hearing, or both. Whenever the certificate holder requests an informal hearing, he shall be entitled to confront in a reasonable manner and cross-examine all witnesses on whose testimony or information the Secretary relies. Evidence pertinent to the issues raised in the Secretary's notice may be received and con-

sidered without regard to its admissibility under rules of evidence employed in judicial proceedings. Upon considering all evidence and arguments presented, the Secretary shall determine whether the certificate should be revoked and shall promptly advise the certificate holder of his determination. Whenever the Secretary's decision is to revoke the certificate, the notice shall set forth with reasonable specificity the Secretary's findings. The revocation shall be without prejudice to any other remedies or actions that may be taken against a previous certificate holder and it shall not preclude the Secretary from making any subsequent determination that a certificate holder should be reinstated.

(c) Suspension. The Secretary may for good cause suspend any certificate for a period not to exceed 10 days. Notification shall be given to the holder that the certificate is being suspended together with a statement of the reasons for the suspension.

#### § 406.20 Removal under a Regulatory Agreement.

Nothing herein shall be construed to limit in any way the authority of the Secretary under any Regulatory Agreement to terminate any management agreement or to otherwise enforce the obligation of a Project Mortgage to provide for satisfactory management.

#### § 406.25 Responsibility for Selection.

Any holder of a certificate in good order may serve as a Resident Manager. However, the selection of Resident Managers from among certificate holders is the responsibility of Project Mortgageors. This selection responsibility may be delegated to a Management Agent in accordance with a HUD approved Management Contract and Management Plan, but responsibility for the selection as well as the adequacy of management rests ultimately with the Project Mortgageor.

#### § 406.30 Effective Date.

This part shall apply to selection of Resident Managers effective as of the day two years following the date of publication of this regulation (September 16, 1977).

(a) Mandatory Applicability. On and after the effective date of this Part, no Project Mortgageor or Management Agent of a HUD-related Multifamily Housing Project consisting of 100 units or more shall select any person as a Resident Manager unless that person holds a certificate in good order as set forth by this Part: Provided, That any person who is employed as a Resident Manager in a HUD-related Multifamily Housing Project on the date this requirement becomes effective may continue to serve without certification for such period of time as that person continues in the same position or similar position without any significant break in employment.

(b) Recommended Applicability. (1) Applicability of this Part is optional for

## PROPOSED RULES

Project Mortgageors and Management Agents selecting Resident Managers during the two-year period following the date of publication, but prior to the date this Part becomes effective. Management Agents are encouraged to make strong efforts during this period prior

to the effective date of this Part to select persons who meet the stated requirements or who will qualify after completion of appropriate training.

(2) Applicability is also recommended for HUD-related Multifamily Housing Projects which contain 99 units or less.

### APPENDIX

#### POINT SYSTEM FOR CERTIFICATION OF RESIDENT MANAGERS

Activity	Points
1. Study at an institution of higher education, as evidenced by:	
a. Baccalaureate degree	10.
b. Junior college associate degree	5.
c. Successful completion of one or more courses. (Excluded if the courses are included in the credit under 1a, 1b or 4.)	1 point per course; maximum of 3 points allowed.
2. Successful completion of one of the following Resident Manager training programs conducted by real estate or housing management organizations or associations and award of the appropriate designation or certificate, or any other training program determined by HUD to be comparable:	25.
a. The Resident Apartment Manager (RAM) Program offered by the National Association of Home Builders, 1625 L Street, N.W., Washington, D.C. 20036.	
b. The Accredited Resident Manager (ARM) Program offered by the Institute of Real Estate Management, 155 East Superior Street, Chicago, Illinois 60611. (the management and training arm of the National Association of Realtors).	
c. The Certified Resident Manager (CRM) Program offered by the Real Estate Management Brokers Institute, 732 East 75th Street, Chicago, Illinois 60619. (the educational entity of the National Association of Real Estate Brokers).	
d. The Accredited Resident Manager (ARM) Program sponsored by the National Society of Professional Resident Managers, Inc., 1627 K Street, N.W., Washington, D.C. 20036.	
e. The Certified Apartment Manager (CAM) Program offered by the National Apartment Association, 1825 K Street, N.W., Washington, D.C. 20006.	
3. Successful completion of one of the following Property Manager training programs conducted by real estate or housing management organizations and award of the appropriate designation or certificate, or any other training program determined by the Secretary to be comparable:	80.
a. Training program offered by the Institute of Real Estate Management, 155 East Superior Street, Chicago, Illinois 60611, leading to the Certified Property Manager (CPM) designation.	
b. Training program offered by the Real Estate Management Brokers Institute, 732 East 75 Street, Chicago, Illinois 60619, leading to a Certified Real Estate Manager (CREM) designation.	
4. Other Courses and seminars. Attendance at HUD-sponsored housing management seminars or other courses or seminars related to housing management provided by colleges, universities or management institutes and approved by HUD.	(i) 2 points per course or seminar. (ii) Maximum of 10 points allowed.
5. Full-time employment in housing management (including the employment experience necessary to satisfy the requirement of Paragraph 406.10(b)(4)).	
a. Successful full-time Resident Manager of a Multifamily Housing Project:	(i) 7 points per year. (ii) 3 additional points per year if project is subsidized or public housing. (iii) Maximum of 30 points allowed.
b. Successful full-time Assistant Manager of a Multifamily Housing Project:	(i) 4 points per year. (ii) 2 additional points per year if project is subsidized or public housing. (iii) Maximum of 20 points allowed.

## PROPOSED RULES

6. Part-time employment in housing management or full-time (1) 3 points per year.

Safety Standard for Swimming Pool Slides," and volume 3 is "A History of the

## CONSUMER PRODUCT SAFETY COMMISSION

### [ 16 CFR Part 1207 ]

#### SWIMMING POOL SLIDES

##### Proposed Safety Standard

The purpose of this notice is to propose a consumer product safety standard for swimming pool slides pursuant to section 7(f) of the Consumer Product Safety Act (15 U.S.C. 2056(f)).

The proposed standard, 16 CFR Part 1207, prescribes safety requirements for the manufacture and construction of swimming pool slides for use in swimming pools only and recommends standards for the installation, maintenance, and intended use of such slides. The requirements and recommendations are designed to reduce or eliminate unreasonable risks of death or injury from accidents associated with swimming pool slides. All swimming pool slides manufactured in the U.S.A. or imported into the U.S.A. after the effective date of the standard, if promulgated, will have to meet its requirements and performance tests. The effective date proposed is 180 days after promulgation of the standard.

#### BACKGROUND

Consideration by the Commission of the need for a rule addressed to the hazards associated with swimming pool slides was initiated on May 30, 1973, by a petition by the National Swimming Pool Institute and the Aquaslide 'N' Dive Corporation, submitted pursuant to section 10 of the act (15 U.S.C. 2059), to commence a proceeding for the development of a consumer product safety standard for swimming pool slides. Thereafter the Commission preliminarily determined (1) that hazards associated with swimming pool slides present unreasonable risks of death or injury and (2) that one or more consumer product safety standards are necessary to eliminate or reduce those unreasonable risks of injury.

In the FEDERAL REGISTER of June 28, 1974 (39 FR 24428), the Commission commenced a proceeding to develop a consumer product safety standard applicable to swimming pool water slides pursuant to section 7 of the act. Offerors were invited to develop a proposed safety standard and the development period for this standard was set to end on November 25, 1974.

- (1) 3 points per year.
- (2) Maximum of 15 points allowed.

Safety Standard for Swimming Pool Slides," and volume 3 is "A History of the Swimming Pool Slides Standard Development Committee's Deliberation's and Actions During the Development of the Swimming Pool Slide Standard." Copies may be seen in the Office of the Secretary, Consumer Product Safety Commission, 10th floor, 1750 K Street NW., Washington, D.C. 20207.

At the time the Commission granted the petition to commence a proceeding for developing the standard for swimming pool water slides, it was in receipt of data from the National Electronic Injury Surveillance System (NEISS) indicating that there were a substantial number of injuries associated with swimming pools in general. The Commission had also received reports of injuries showing that some of the most severe injuries were associated with swimming pool water slides. On the basis of these data, the results of tests conducted at Nova University and the University of Utah, and outside reports of injuries received by the Commission, the Commission identified the nature of the risk of injury associated with swimming pool slides as hazards of quadriplegia and paraplegia resulting from headfirst slides, leg fractures resulting from feet-first entry, impact with other people in the pool, and falls off the slide ladder. The offeror was requested to address these hazards in a recommended standard.

The technical rationale submitted by the offeror, which forms the basis for the Commission's proposal of the standard and which may be seen in the Office of the Secretary, states that injuries resulting in quadriplegia and paraplegia occur when heavier, generally adult sliders enter, at too steep an angle, in water that is too shallow thereby striking the head on the pool bottom.

It is anticipated that the standard will significantly reduce the incidence of these injuries by specifying that slides impart a low angle of attack into the water; requiring that all slides, as sold for installation be accompanied by recommended slide height versus water depth relationships and by recommendations for certain other installation and intended use criteria; and requiring mandatory, permanent, and explicit signs on all slides to (a) restrict larger slide users from the use of slides placed for children in shallower water, (as well as restricting non-swimmers from the use of slides placed for larger users in deeper water), (b) inform users as to the proper body configuration to use as they go down the slide, and (c) to inform slide users of the injury potential that exists if slide use warnings are ignored.

The possibility of an increased number of child and nonswimmer drownings as a result of the location slides in deeper water was considered and, as noted above, supplementary provisions for appropriate warning signs have been included in the standard in order to minimize this possibility.

#### OFFEROR'S SUBMISSION

On May 30, 1975, the offeror submitted a package consisting of three volumes. Volume 1 is "A Safety Standard for Swimming Pool Slides," volume 2 is "A Technical Rationale In Support of a

(c) Ladders, steps, stairs, or ramps—

(1) General swimming pool slide lad-

Although further investigation showed that leg fractures may not be a significant problem in slides, the depth recommendations and lubrication requirements of the proposed standard that are intended to reduce the likelihood of quadriplegia and paraplegia should also tend to reduce the probability of leg fractures associated with slides.

The danger of impact of a slider with other people in the pool is addressed by including provisions for recommended installation instructions and for mandatory warning signs affixed to the slide.

Falls from the slide are intended to be reduced by the requirements relating to the slide's design and strength, materials of manufacture, ladders, steps, stairs, ramps, and handrails and by recommended installation and intend-use instructions and inspection producers.

The offeror used theoretical mathematical techniques to predict probable velocity of body components important in the use of slides. In order to arrive at the proper slide height to water depth ratio, the offeror subjectively balanced the decreased risk of striking the pool bottom in deeper water (based in part, on the limited theoretical models), against the potentially increased drowning risk to nonswimmers and arrived at recommended depths under pool slides that the Commission believes will provide an acceptable solution to the problem.

A written critique of the theoretical model and tape recorded transcripts of meetings on discussions of the technical details are available for inspection at the Office of the Secretary. Since the limited theoretical model was only a part of the judgment process as to the adequacy of the proposed standard to address the hazards identified, the Commission believes a rigorous verification of the theoretical models would not add significantly to the technical validity of the proposed standard. Thus, the Commission further believes that it would not be in the public interest to delay proposal of the standard, in order to pursue such verification.

On the basis of the information referred to above, the Commission believes that this proposed consumer product safety rule, and the proposed effective date, are reasonably necessary to reduce the unreasonable risk of injury associated with swimming pool slides, and that the proposed rule is in the public interest.

In considering the proposed standard, the Commission has taken into account the estimated economic impact of the standard on the slide industry, on consumers, and on other areas of the general economy to determine whether it would be a reasonable as well as an effective means of reducing the risks of injury in relation to slides.

The Commission has also determined that there is no potentially significant adverse environmental effect associated with the promulgation of the proposed standard. The factors leading to this determination are set forth in an environmental assessment of the proposed

standard which is available to be seen in the Office of the Secretary.

Section 9(d)(2) of the Act authorizes the Commission to prohibit, by rule, stockpiling by a manufacturer between promulgation of a standard and its effective date. Stockpiling is defined as manufacturing or importing of a product during this time period at a rate which is significantly greater than the rate at which the product was produced or imported during a base period set by rule ending prior to the promulgation date.

An anti-stockpiling rule is included as part of the proposed standard in order to insure that the purposes of any final consumer product safety standard will not be circumvented. The anti-stockpiling rule specifies that swimming pool slides that do not comply with the standard shall not be manufactured or imported between the date of promulgation of a consumer product safety standard and its effective date at a rate that is more than 5% greater than the rate at which swimming pool water slides were produced or imported during the base period, which is, at the option of the manufacturer or importer concerned, any period of 180 consecutive days beginning on or after January 2, 1974, and ending on or before December 31, 1974.

The Commission feels that it lacks statutory authority to promulgate as requirements certain provisions of the standard proposed by NSPI relating to installation and maintenance; therefore, those provisions are proposed as recommendations.

The Commission proposes that any final rule promulgated would become effective 180 days after its publication in the FEDERAL REGISTER and apply to all swimming pool slides manufactured on or after the effective date of the rule.

#### CONCLUSION AND PROPOSAL

Having considered NSPI's recommended safety standard for swimming pool slides, the supportive material submitted therewith, and other relevant information, the Commission concludes that the recommended standard, as modified by the Commission, should be proposed as a consumer product safety standard as set forth below.

Therefore, pursuant to provisions of the Consumer Product Safety Act (Sec. 7(f), Pub. L. 92-573, 86 Stat. 1215; 15 U.S.C. 2056(f)), the Commission proposes that Title 16, Chapter II, be amended by adding to Subchapter B a new Part 1207 as follows:

#### PART 1207—A SAFETY STANDARD FOR SWIMMING POOL SLIDES

- Sec. 1207.1 Scope and purpose.
- 1207.2 Effective date.
- 1207.3 Definitions.
- 1207.4 Recommended standards for materials of manufacture.
- 1207.5 Design.
- 1207.6 Installation.
- 1207.7 Intended-use instructions.
- 1207.8 Slide safety inspection items.
- 1207.9 Product certification.
- 1207.10 Handling, storage, and marking.

Sec. 1207.11 References.

1207.12 Stockpiling.

AUTHORITY: Secs. 7, 9, Pub. L. 92-573, 86 Stat. 1212-17 (15 U.S.C. 2056, 2058).

#### § 1207.1 Scope and purpose.

This Part 1207 sets forth the consumer product safety standard for the manufacture and construction of swimming pool slides for use in swimming pools only. The requirements are designed to reduce or eliminate unreasonable risks of death or injury from accidents associated with swimming pool slides. All swimming pool slides must meet the performance tests of this standard. This standard also makes certain recommendations regarding the installation, maintenance, and intended use of swimming pool slides that supplement the mandatory requirements. This standard is applicable to all swimming pool slides manufactured or constructed in the U.S.A. or imported into the U.S.A. after the effective date of this standard.

#### § 1207.2 Effective date.

This Part 1207 shall become effective 180 days after its promulgation in the FEDERAL REGISTER.

#### § 1207.3 Definitions.

- (a) As used in this Part 1207:
  - (1) "Aboveground pool slide ladder" means a slide ladder that is not anchored in the ground or support deck and can be removed from the slide or hinged and locked so that unauthorized or unsupervised use of the slide is prevented.
  - (2) "Abrasion hazard" means a sharp or rough surface of a swimming pool slide that would scrape the skin of a child upon casual contact.
  - (3) "Assembled product" means all parts, components, and fasteners as defined in and assembled according to the manufacturer's assembly and installation instructions.
  - (4) "Bracing" means members providing structural support to the assembled, installed slide.
  - (5) "Casual contact" means contact of any body part with the slide occurring by chance or nonchalant encounters.
  - (6) "Center of gravity" means the point that represents the mean position of the concentrated mass of a body.
  - (7) "Curved slide" means a slide whose runway curves out of the vertical plane at any point along the slide path.
  - (8) "Cutting hazard" means a slide surface that would cut the skin under casual contact.
  - (9) "Designated waterline" means the horizontal line through whichever of the following is applicable:
    - (i) The midpoint of the operating range of the skimmers.
    - (ii) On pools with overflow systems, the height of the overflow rim.
    - (iii) "Edge guards" means shields designed to cover sharp edges on slides.
    - (iv) "Exit lip height" means the height of the slide exit lip above the designated waterline.
    - (v) "Freestanding slide" means a slide designed for aboveground pools that

is not fastened to the pool deck, the § 1207.4 Recommended standards for

(c) Ladders, steps, stairs, or ramps—

(1) General swimming pool slide lad-

line connecting the user's feet and center of gravity. The tread and the foot shall block shall be 8 square inches to simulate the ball of the foot (reference (d) of

(2) Extent of handrails (maximum angle ladder). If ladder handrails for a

is not fastened to the pool deck, the ground, or the pool support walls. This slide may have attachments to the aboveground pool to prevent misalignment.

(13) "Friction" means the retarding force reducing the velocity of the slider on the slide.

(14) "Height over water" means the distance from top of the slide runway to the designated waterline measured along a plumbline.

(15) "Intended use" means behavior on swimming pool slides as disclosed by the manufacturer, as specified in this Part 1207, or to which the slide may be subjected by a reasonable user.

(16) "Ladder angle" means the angle of the ladder measured from a plumbline.

(17) "Ladder platform" means a platform built into the slide ladder.

(18) "Operation strength" means the strength of the slide and/or its components after installation according to the manufacturer's instructions.

(19) "Performance test" means a test to measure the functional or structural characteristics of the slide and may include:

(i) Observations and measurements of the slide's designed function in the "intended use" mode, installed according to the manufacturer's installation instructions.

(ii) Observations and measurements of the slide's response to dynamic and static loads.

(20) "Permanently installed" means a slide installed in a concrete or similar support deck from which the slide cannot be removed without damaging the support deck.

(21) "Pinching hazard" means any configuration of slide components that would pinch or entrap the fingers or toes of a child or an adult.

(22) "Puncture hazard" means any slide surface or protrusion that would puncture a child's skin under casual contact.

(23) "Runaway" means the surface on which the user slides in intended use of a slide.

(24) "Runway rail" means a raised edge or guard that keeps the slider on the runway.

(25) "Runway length" means the length of the runway measured along its centerline.

(26) "Slide width" means the width of the slide runway measured between the inside of the left and right runway rails.

(27) "Straight slide" means a slide whose runway curves only in the vertical plane.

(28) "Swimming pool slide" means any device used to enter a swimming pool by sliding down an inclined plane.

(29) "Tamperproof" means that tools are required to alter or remove portions of the slide such as guards, treads, etc.

(30) "Trajectory" means the path of a slider's center of gravity from start to finish.

(31) "Tread contact surface" means foot contact surfaces of ladder, step, stair, or ramp.

#### § 1207.4 Recommended standards for materials of manufacture.

(a) *General.* The materials used in swimming pool slides should be compatible with man and compatible with the environment in which they are installed. These materials should be capable of fulfilling the design, installation, and intended-use requirements prescribed by §§ 1207.5, 1207.6, and 1207.7.

(b) *Effects of environment.* The choice of materials for swimming pool slides should be such that the operational strength of the entire slide assembly, as defined by the performance tests in §§ 1207.5 and 1207.6, should not be adversely affected by exposure to rain, snow, ice, sunlight, local normal temperature extremes, local normal wind variations, expected local air pollution products, and the mechanical, electrical and chemical environment in and around swimming pools. For purposes of this Part 1207, "local normal" temperature extremes and wind variations are defined as the average annual recorded limits for the past 10 years at any slide installation point in the U.S.A. where such statistical information exists (see reference (a) in § 1207.11).

(c) *Materials selection.* The selection of all materials for swimming pool slides should be such that all parts with external surfaces and edges that may come in contact with the user are assembled, arranged, and/or finished (deburred, polished, etc.) so that they will not constitute a cutting, pinching, puncturing, or abrasion hazard under casual contact and intended use by children or adults.

(d) *Toxicity.* The selection of materials used in swimming pool slides should be such that the assembled and installed product should not be toxic to man or harmful to the environment under intended use and reasonably foreseeable abuse or disposal. All paints and finishes used on swimming pool slides shall be in compliance with 16 CFR 1500.17(a) (6) (i).

(e) *Chemical compatibility.* The selection of materials for swimming pool slides should be such that the assembled and installed product, and the parts, shall be chemically compatible with the materials and environment contacted under intended use and reasonably foreseeable abuse.

#### § 1207.5 Design.

(a) *Strength.* The strength of the assembled and installed swimming pool slide shall be such that no structural failure of any component part shall cause failure of any other component part of the slide as described in the performance tests in paragraphs (d) (4) and (f) (9) of this section.

(b) *Edges.* Edges of swimming pool slide runways, ladders, handrails, and deck anchor flanges shall be designed, finished (deburred, polished, etc.), or protected in such a manner as to prevent cutting human tissue on casual contact and intended use. If guards are used, they shall be permanently affixed to the structure in a tamper-proof fashion.

#### (c) Ladders, steps, stairs, or ramps—

(1) *General.* Swimming pool slide ladders, steps, stairs, or ramps shall have treads, not rungs, if the angle of the incline is 15° or greater from a plumbline.

(2) *Angle.* Swimming pool slide ladders shall be designed and installed in such a manner that the user's center of gravity will be approximately positioned directly over each step during the use of the ladder. When tread design ladders are used, the minimum installed angle shall be not less than 15° from a plumbline dropped from a ladder step as shown in figure A. If stairs or ramps are used to ascend to the top of the slide, they shall be designed in accordance with reference (c) of § 1207.11, pages 457-463 (see Fig. A).

(3) *Steps—(i) Dimensions.* Slide ladder treads may have flat or curved tread surfaces and shall be designed so that they have a minimum tread width of 2 inches and a minimum length of 12 inches (reference (c) of § 1207.11). The riser height of slide ladder tread shall be no more than 12 inches nor less than 7 inches and shall be constant over the entire height of the ladder (reference (c) of § 1207.11).

(ii) *Tread curvature.* If slide ladder tread surfaces are curved, they shall not have a radius of curvature less than seven times the tread width.

(iii) *Slip resistant surfaces.* The tread surface of all swimming pool slide ladders shall have a slip-resistant surface that is either an integral part or permanently attached. The performance test is designed to insure that all tread slip-resistant surfaces shall have the ability to maintain a barefooted 50 percentile adult (reference (d) of § 1207.11) at an angle of repose of 33°±1° without movement with a safety factor of 2.0. The angle of repose is the angle formed by the intersection of the ladder rails and the

(iv) *Fastener requirements.* Ladder treads shall be attached to the ladder rails in such a manner that continued intended use or reasonably foreseeable abuse shall not cause any fastener to loosen, crack or break. All attachment methods that are used to hold the ladder tread to the ladder rails shall be permanent and tamperproof. If fasteners are used for the tread-rail attachment, the number and placement of such fasteners shall not cause a failure of the tread under the ladder loading conditions specified in this paragraph (c) (3).

(v) *Aboveground pool ladders.* Aboveground pool slides equipped with swing-up ladders shall be designed so that the ladders may be fixed in the up position by a tamperproof lock.

(vi) *Ladder platforms.* Swimming pool slides whose height above the surface upon which the slide is mounted is greater than 7.5 feet shall have a platform built into the ladder. This platform

line connecting the user's feet and center of gravity. The tread and the foot shall be wet for this test.

(A) *Performance test.* A wooden block shall be prepared in accordance with figure C. The contact surface area of the

block shall be 8 square inches to simulate the ball of the foot (reference (d) of § 1207.11). It shall be covered with 1/4±1/8 inch of natural or silicone rubber sponge capped with porous soft leather as shown in figure C.

FIG. C

#### TEST BLOCK FOR SLIP-RESISTANCE MEASUREMENTS OF SLIDE LADDER TREADS

The tests shall be carried out on a slide assembled and installed according to the manufacturer's instructions. The block shall be soaked in pool water for at least 3 minutes and placed at the midpoint of the wet step with the centroid of load of the block on the longitudinal axis of the step. The block shall be loaded symmetrically on its upper bearing surface with a weight of 300±2 pounds. A controlled and measured force shall be applied at the tangential load ring of the block tangent to the horizontal and at a rate of no more than 20 pounds per second. If the block does not move at the point that the tangential load is equal to 105 pounds, the tread surface passes this performance test. Tests that utilize equivalent forces on the block may be substituted if they result in substantially identical slip resistance measurements.

(iv) *Fastener requirements.* Ladder treads shall be attached to the ladder rails in such a manner that continued intended use or reasonably foreseeable abuse shall not cause any fastener to loosen, crack or break. All attachment methods that are used to hold the ladder tread to the ladder rails shall be permanent and tamperproof. If fasteners are used for the tread-rail attachment, the number and placement of such fasteners shall not cause a failure of the tread under the ladder loading conditions specified in this paragraph (c) (3).

(v) *Aboveground pool ladders.* Aboveground pool slides equipped with swing-up ladders shall be designed so that the ladders may be fixed in the up position by a tamperproof lock.

(vi) *Ladder platforms.* Swimming pool slides whose height above the surface upon which the slide is mounted is greater than 7.5 feet shall have a platform built into the ladder. This platform

shall be located at least 6 feet above the deck and shall have minimum dimensions of 12 by 12 inches. The floor of the platform shall have a slip-resistant surface whose performance shall be qualified by the tests specified in paragraph (c) (3) (iii) (A) of this section. A minimum dimension of two times the riser height shall be maintained from the platform to the top of the slide runway. Transitional handrails shall be provided when a platform is used.

(d) *Handrails.* Swimming pool slide ladders shall be equipped with handrails to aid the slider in safely making the transition to the runway. The handrails shall extend no more than 18 inches above the top of the slide runway platform. (See Fig. D).

FIG. D<sub>1</sub>

#### TYPICAL TRANSITION HANDRAIL

(1) *Size.* The outside diameter of handrails shall be between 1.00 and 1.90 inches (references (c) and (d) of § 1207.11).

(2) *Extent of handrails (maximum angle ladder).* If ladder handrails for a ladder inclined 15 degrees or less from the vertical extend below the slide transition area, they shall be parallel to the ladder rails at a perpendicular distance of four to six inches above the ladder rails (see figure D<sub>2</sub>). The handrails shall begin three to five feet above the pool deck. Handrails shall not provide a means of entrapment. (See Fig. D<sub>2</sub>).

FIG. D<sub>2</sub>

MAXIMUM/MINIMUM DIMENSIONS FOR SLIDE LADDER HANDRAILS

(1) *Extent of handrails for ladders, steps, stairs, or ramps.* For slides not using the maximum angle ladder (15 degrees or less from the vertical), the distance "γ" in figure D<sub>2</sub> shall be defined as shown in table 1 that follows.

TABLE 1—VARIATIONS OF "γ"

Ladders	"γ"
15° < θ < 40°	l = (34.00θ <sub>rad</sub> - 3.86) ± 1"
40° < θ < 70°	l = 34" ± 1"
Ramps	
0 < 70°	l = 42" ± 1"

(3) *Bracing of handrails.* If handrail braces are used, they shall withstand intended use and reasonably foreseeable abuse.

(4) *Attachment and strength of handrails.* Handrails and their fasteners shall withstand allowable shear, bending, and cyclical loading in intended use and reasonably foreseeable abuse. All fasteners for handrail connections shall be vibrationproof, selflocking, and tamperproof. The fasteners shall be capable of withstanding a 1-foot-pound back-off torque.

(i) *Sockets.* If handrail sockets are used, the handrail end shall be permanently fixed in the socket so that it cannot be pulled out or bent at the socket by a moment of 233 foot-pounds applied clockwise around point A in figure E. The socket shall not permanently deform under the maximum applied loads. (See Fig. E.)

FIG. E APPLICATION OF HANDRAIL MOMENTS

MOMENT = FORCE x DISTANCE =  $F \times l = 233 \text{ ft. lbs.}$   
WHERE: PLC IS TAKEN AT THE MAXIMUM MOMENT AREA "A" FROM PLA.

(ii) *Side forces.* If the handrail is in a socket or attached to the side of the

(2) *Dynamic equilibrium.* (i) Swimming pool slide runways, whether

TABLE 2

Runway

(1) *Performance tests.* Measurement of the 50-percentile adult male (71 inches and 162 pounds) slider's angle

(8) (i) *Runway exit ramp lateral curvature and exit lip horizontal angle.* No net lateral force on the slider shall exist

cording to the manufacturer's instructions. Prepare a 20-square-inch load-bearing pallet according to figure K. The added pallet on the upper slide

(ii) *Side forces* If the handrail is in a socket or attached to the side of the slide runway rail, the attachment methods must be capable of withstanding all shear and bending forces induced by a 172-foot-pound moment counterclockwise around point A in figure F.

FIG. F  
APPLICATION OF HANDRAIL MOMENTS TRANSITION

$$\text{MOMENT} = F_2 \times d_2 = \text{FORCE} \times \text{DISTANCE} = 172 \text{ ft. lbs.}$$

(iii) *Performance tests—(A) Strength for climbing and falls.* (1) Attach a pull loop to point C of the upper handrail (figure E). Point C is the point where a perpendicular to the axis of the handrail passes through point A, the socket, or other attachment point. Attach a stranded steel cable or wire rope to point C. All cables and ropes shall have a 1,000-pound tensile capacity. Attach a 162-pound weight to this cable at least 4 feet below point C. Observe any permanent deformation or bending on the handrail at point A. If none exists, the handrail passes this performance test.

(2) Lift the weight one foot from its maximum static position and drop it. Observe any permanent deformation of the handrail or its attachments at point A. If each handrail will still support the 162-pound static load for a period of 15 minutes and has not been bent more than 45° from the vertical, the handrails pass this performance test.

(B) *Transition strength.* Rotate assembled slide into the horizontal position on its side on a loading dock or other platform. Move the slide into such a position that the total handrail level the slide. Fasten the slide firmly in this position and attach a 114-pound weight to point D, as shown in figure F, and observe and check for any major permanent deformation of the handrail at point A. If none exists, the handrails pass this performance test.

(e) *Lubrication.* Swimming pool slides shall be equipped with a method of lubrication so the slider has a smooth, continuous slide. If water is used, nozzles, piping, or hoses that deliver water to the runway shall be recessed or designed in such a fashion as not to interfere with a slider's progress down the slide and not to create tripping hazards on the slide.

(f) *Runways—(1) Curvature.* Slide runway curvature between the front and rear support legs of the slide shall be consistent with maintaining the slider safely on the slide during intended use and reasonably foreseeable abuse.

(2) *Dynamic equilibrium.* (i) Swimming pool slide runways, whether straight or curved, shall be designed as "balanced curves." On a balanced curve, the test fixture discussed in paragraph (f) (2) (ii) of this section shall stay on a trajectory that keeps it within a distance of  $\pm 41$  percent of the runway width to the runway centerline at all points along the runway without contacting the runway rails.

(ii) *Performance test.* (A) *Direct measurement.* Build a wooden pallet no larger than 5 by 5 inches, as shown in figure G. Securely attach a lead rod or bar on the pallet. Size the bar so that the weight-to-area ratio of the assembly is

$$\frac{W}{A} = 1.30 \pm 0.05$$

and the pallet does not tip over when in motion. Attach a felt pen or other suitable marking device to the pallet assembly as shown to mark the slide during descent. (See Fig. G).

FIG. G  
ASSEMBLY FOR MEASUREMENT OF RUNWAY EQUILIBRIUM

(B) *Test.* Lubricate the slide in accordance with the manufacturer's instructions. Center the pallet at the top of the slide runway and release. Observe the pallet's descent and note if it touches the slide's side rails. If it touches, check alignment and installation again. With water off and the slide dry, center the pallet at the top of the runway and release. Measure the distance from the felt pen marked line to the centerline of the runway. If within  $\pm 41$  percent of the width measured from the centerline along the entire path and if the pallet does not contact the runway rails, the slide is dynamically balanced and passes this performance test.

FIG. I

MEASUREMENT OF ANGLE OF ATTACK

TABLE 2

$\psi$ = Maximum slide-slope angle	Runway side-rail height (inches)
60°	2
65°	3
70°	3
75°	3 1/2

(3) *Runway side rails.* Swimming pool slide runways shall have permanent runway side rails of at least 2 inches height to prevent lateral discharge of the slider-off the slide under intended use and reasonably foreseeable abuse.

(4) *Runway side-rail heights.* Runway side-rail heights shall be designed as a function of the maximum slide-slope angle (as shown in figure H). Table 2 that follows shows side-rail height versus maximum slide-slope angle. If the maximum slide-slope angle is not shown in table 2 the next higher side-rail height must be used. Maximum slide-slope angles shall not exceed 75°. (See Fig. H).

FIG. H

MAXIMUM SLIDE SLOPE ANGLE  $\psi$

(5) *Runway radius of curvature in the vertical plane.* Swimming pool slide runways shall have a smooth transition section with sufficient radius of curvature such that the path of the center of gravity of the slider is no more than  $\pm 10^\circ$  from the horizontal at the center of gravity's exit off the slide and such that the slider's angle of attack (a) shown in figure I, shall be no less than  $+15^\circ$  when the slider's feet leave the slide. (See Fig. I).

(i) *Performance tests.* Measurement of the 50-percentile adult male (71 inches and 162 pounds) <sup>1</sup> slider's angle of attack at the point where his feet leave the slide shall be made using any of the following methods:

(A) Motion picture cameras (36 frames per second or more).

(B) Still cameras with strobe lights and reflectors on the head and hip of the slider.

(C) Still cameras with rotating shutters and lights on the head and hip of the slider.

(D) Video recorder with tape playbacks.

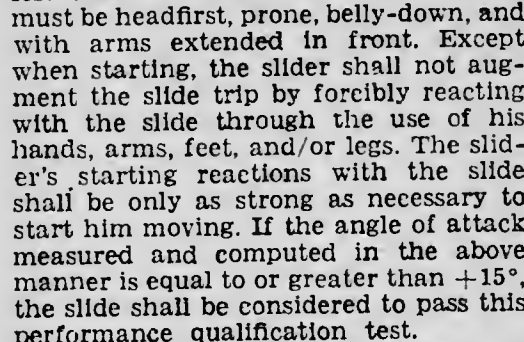

(ii) Measurements shall be made from those frames that show the water level as the local horizontal. Path angle shall be determined by measuring the angle between a tangent to the path of the center of gravity (line X) and the local horizontal taken through the center of gravity (line Y). At least five consecutive runs with the same subject shall be made to generate enough data for an average angle-of-attack computation. <sup>2</sup> Angle of attack shall be taken as the angle between the slider's longitudinal axis (Z) and the tangent to the path of his center of gravity (X). The slider's longitudinal axis shall be located by the vertical line that passes through his center of gravity when he stands erect. The slider shall wear usual swimming attire. The angle-of-attack measurement shall be made after the slider's feet have cleared the slide, the distance between the end of the slide and his feet being less than 8 inches. The slider's descent must be headfirst, prone, belly-down, and with arms extended in front. Except when starting, the slider shall not augment the slide trip by forcibly reacting with the slide through the use of his hands, arms, feet, and/or legs. The slider's starting reactions with the slide shall be only as strong as necessary to start him moving. If the angle of attack measured and computed in the above manner is equal to or greater than  $+15^\circ$ , the slide shall be considered to pass this performance qualification test.

(6) *Runway exit lips.* All runway exit lips of swimming pool slides shall be smoothly faired into the runway surface with a radius of curvature at the exit lip of the slide of at least 2 1/4 inches (see figure J).

(7) *Runway exit vertical angle.* The maximum allowable angle of the runway at exit of the slide (theta) shall be  $-3$  to  $-11$  degrees from the horizontal as shown in figure J.

FIG. J

RUNWAY EXIT ANGLE  $\theta$

(2) Fabricate a 45-pound billet of  $4.900 \pm 0.005$ -inch steel rod as shown in figure M, or equivalent, and load into the pipe above the trigger slot. The length of the pipe from the trigger slot to the impact pallet shall be  $9.5 \pm 0.1$  feet.

FIG. M  
TYPICAL BILLET FOR IMPACT TESTING

<sup>1</sup> See reference (f) of § 1207.11 for full discussion.  
<sup>2</sup> Maximum measurement variation of  $\pm 15$  percent.

(8) (i) *Runway exit ramp lateral curvature and exit lip horizontal angle.* No net lateral force on the slider shall exist in that portion of the runway exit ramp beyond the forward support points of the slide. All slides shall be designed and constructed so that the exit lip of the slide is level at all points along the width of the runway at the runway exit lip line drawn at the point where the radius "R" shown in figure J is tangent to the runway. The slide shall be designed so that any side forces on the user induced by prior lateral curvature will be reduced to zero upon exit from the slide runway.

(ii) *Performance tests.* Those tests described in paragraph (f) (2) (ii) of this section are also applicable to paragraph (f) (8) of this section, where the path of the test fixture must be parallel to the centerline of the slide at the exit lip and not touching the side rails of the runway.

(9) *Strength of slide runways and supports—(i) Static loads.* Properly assembled and installed slide runways shall be capable of supporting a static load of at least 350 pounds applied normal to the runway over an area of no more than 20 square inches at any point along their length or width.

(ii) *Dynamic loading.* Properly assembled and installed slide runways shall be capable of supporting, without structural failure, a dynamic load of at least 450 foot-pounds dropped on an area of 20 square inches at the midpoints of the upper runway platform and the lower runway exit ramp.

(iii) *Performance tests—(A) Static loads.* Assemble and install a slide according to the manufacturer's instructions. Prepare a 20-square-inch load-bearing pallet according to figure K. Place the loaded pallet on the upper slide platform, positioned between the runway rails, until the scale on the hoist line reads between 0 and 10 pounds. Keep the pallet in this position for 10 minutes. Remove the loaded pallet and observe the runway for any significant structural failure such as permanent deformations or cracks. If there is none, the slide is acceptable. Repeat the same test on the lower runway exit ramp.

(B) *Dynamic loads.* (1) Assemble and install a slide according to the manufacturer's instructions. Use the hardwood load pallet shown in figure K and set it up in the dynamic load guides fabricated as shown in figure L, or an equivalent commercially available impact-testing machine.

FIG. K  
STATIC LOAD TEST FOR SLIDE BED

W = WIDTH OF SLIDE RUNWAY MINUS 1/4"

FIG. L  
DYNAMIC LOAD TEST

(3) Drop the billet onto the pallet and observe the slide for any permanent deformation or crack. If the slide runway can still support a static load of 350 pounds without further crack propagation, it passes.

(4) Perform the experiment on the entrance and exit platforms of the slide runway.

§ 1207.6 Installation.

(a) *General.* The proper installation of a swimming pool slide concerning its position around the pool, its position relative to the manufacturer's instructions.

ative to the other pool equipment, and its attachment to the deck are of great importance for increased safety.

(b) *Placement dimensions—(1) An-*

Minimum depth at "D," (feet)

DE  
KEY

## PROPOSED RULES

ative to the other pool equipment, and its attachment to the deck are of great importance to the safety of the user. The position of the slide installation around the periphery of any pool should be selected on the basis of the water depth, the slope of the pool wall and floor at the installation point and along the centerline of the slide, the width of the pool, and the height and shape of the slide. For purposes of this section, the term "shall" is used in connection with mandatory requirements and the term "should" is used in connection with

recommendations for increased safety. (b) *Placement dimensions*—(1) *Anchoring*. All slides for in-ground pools should be permanently anchored in accordance with the manufacturer's installation instructions. All slides for above-ground pools should be fixed in a manner that prevents movement of the slide exit lip away from the edge of the above-ground pool.

(2) *Critical dimensions*. The critical dimensions of the slide and its placement are as shown in figure N.

FIG. N  
SLIDE PLACEMENT DIMENSIONS

(i) *Slide height*. Dimension "h" should be the height of the slide above the deck or ground on which the slide rests.

(ii) *Maintenance of minimum depth of water*. For all slides, except those described in paragraph (b) (2) (iv) (B) of this section, the dimension "A" is the recommended distance that the minimum depth of water "D<sub>1</sub>" should be maintained. A is measured along the extended centerline of the slide starting 4.5 feet from its exit lip (as shown in figure N). This minimum distance should be taken from table 3, below. For those slides described in paragraph (b) (2) (iv) (B) of this section, the dimension "B" is the recommended distance that the minimum depth of water "D<sub>2</sub>" should be maintained. B is measured along the extended centerline of the slide starting 3 feet from its exit lip. For slides higher than 15 feet, use the equations listed below for the design of distance "A".

## EQUATIONS

(iii) *Maintenance of minimum distance of water in front of slide*. Dimension "C" is the minimum distance of water that should be maintained in front of the exit of the slide. This distance should be taken from table 3.

(iv) *Depth of water*—(A) For depths less than 3 feet. No slide should be installed at a depth "D<sub>1</sub>" less than 3 feet.

(B) For depths from 3 to 4 feet. Installation of slides should be allowed at these depths only if they meet the following requirements:

(1) Slides should be restricted to use only by children under 13 years of age and are permanently so marked according to § 1207.7.

(2) Slides should have all other appropriate safety signs, as specified by § 1207.7, permanently attached.

(3) Slides should be no higher than h=6.5 feet off the pool deck (see figure N).

(C) *Unrestricted slides*. All slides shall be equipped with a ladder chain or other suitable device to keep unsupervised children off the slide. Minimum recommended installation depths "D<sub>1</sub>" of all slides not covered by the requirements of paragraph (b) (2) (iv) (A) and (B) of this section shall be obtained from table 4.

Height "h" (feet):	Minimum depth at "D <sub>1</sub> " (feet)
7.5 or less	4
8	5

Height "h" (feet):	Minimum depth at "D <sub>2</sub> " (feet)
8.5	5.5
9	5.5
10	5.5
11	5.5
12	6
13	6
14	6
15	6
20	7

For heights above 20 feet, minimum installation depths should be computed from the following equation:  $D_2 = 1.52 \sqrt{h} + 1.67$

## EQUATIONS

$$(I) A = \sqrt{X^2 - D_2^2}$$

$$(II) C = 0.90X + 4.5$$

$$(III) \frac{\ln(7.22\sqrt{h+d}) - 1.386}{0.169}$$

See Table 4 for values of D<sub>2</sub>.

(3) *Position of slide at edge of pool*—(i) *Water run-off*. Slides should be positioned at the edge of the pool so that any and all water flowing off the end of the slide runway drops into the pool.

(ii) *Clearance between slides and between slides and diving boards*. (A) Slides should be positioned so that the centerline of the slide does not intersect the centerline of any diving board for a minimum distance of 7 feet from point "A" shown in figure O. If two slides are used in the same pool, the minimum distance between their exits "CD" should be computed from the following equation:

$$CD = 0.3(h_1 + h_2) + 22$$

where h<sub>1</sub> = height of slide 1.

h<sub>2</sub> = height of slide 2.

CD = The recommended distance between their exits.

(B) Table 5 shows representative values from the equation in paragraph (b) (3) (ii) (A) of this section:

(h <sub>1</sub> + h <sub>2</sub> ) feet:	CD feet
10	25
15	27
20	28
30	30

(iii) *Clearance distances*. Slides should be positioned so that the slider cannot hit the pool edge, copings, diving boards, safety line, or other equipment with arms extended in any sliding position.

(A) *Pool walls and diving boards*. The minimum distance from the centerline of the slide runway to the edge of the pool or to a diving board should be 3 1/4 feet at a point at least 2 1/2 feet from the end of the slide.

(B) *Safety line*. The minimum distance between the centerline of a slide and a safety line when they are parallel should be not less than 3 1/4 feet. The intersecting distance along the centerline of the slide between a safety line and the runway exit lip should be not less than 10 feet. (See Fig. O).

FIG. P  
TYPICAL ILLUSTRATION FOR INSTALLATION INSTRUCTIONS

WHERE A = HEIGHT TO TOP OF TRANSITION HANDRAILS FROM DECK

B = HEIGHT TO TOP OF SLIDE RUNWAY PLATFORM FROM DECK

C = LENGTH FROM EXIT LIP OF SLIDE TO BASE OF LADDER

D = LENGTH FROM BASE OF LADDER TO LONG SUPPORT LEGS

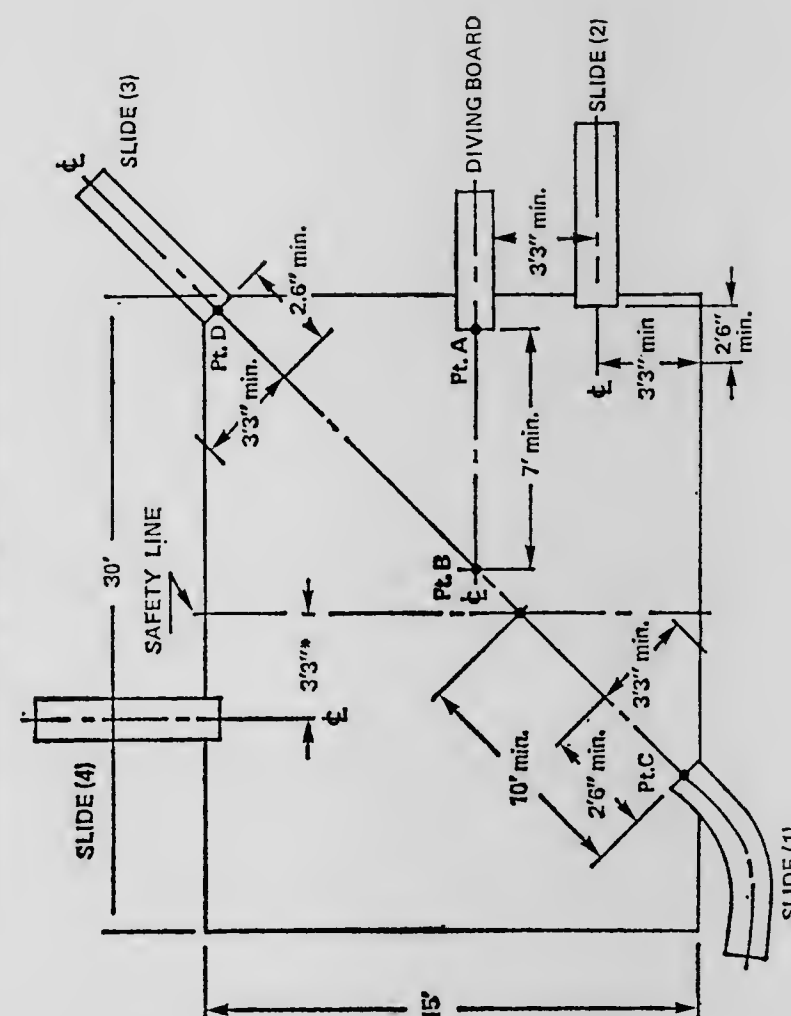

E = LENGTH BETWEEN LONG AND SHORT SUPPORT LEGS

F = LENGTH FROM SHORT SUPPORT LEG TO LIP OF SLIDE

G = WIDTH BETWEEN SUPPORT LEGS

ALL DIMENSIONS SHALL BE TAKEN BETWEEN THE CENTERLINES OF SLIDE COMPONENTS WHERE POSSIBLE. IF DIMENSIONS ARE NECESSARY OTHER THAN THOSE SHOWN ABOVE THEY SHALL BE SHOWN DIRECTLY ON THE DIAGRAM.

FIG. O  
TYPICAL IN-GROUND POOL EQUIPMENT CLEARANCE DISTANCES

\*IF SLIDE IS PREDOMINANTLY USED BY CHILDREN UNDER 13, THIS DISTANCE CAN BE REDUCED TO 23'.

(C) *Copings*. The minimum height of the slide above the deck to prevent striking the hands on raised copings shall be 14 inches. If copings are flush with the deck, minimum heights of 8 inches are allowable. A plumbline dropped from either edge of the slide runway exit should not intersect any portion of the pool deck or coping.

(c) (1) *Installation instructions*. Swimming pool slides shall be delivered to the user-installer with a set of de-

§ 1207.10

Handling, storage, and marking.

(2) *Parts list.* The parts list shall be printed directly on the slide installation instructions and shall give the quantity, name, and description of each part, including its identification or reorder number if appropriate.

(3) *Slide minimum installation depth.* The installation instructions for swimming pool slides shall include in a prominent place on the slide sketch (as shown in figure P) the specified minimum installation depth for the particular slide as specified in paragraph (b) (2) (iv) of this section.

(4) *Slide position installation.* The installation instructions for swimming pool slides shall include in a prominent place on the front or rear of the instruction sheet a reproduction of figures N and O and a summary of the information in paragraph (b) (2) (iv) of this section.

(5) *Special instructions.* The installation instructions sheet for swimming pool slides shall include the substance of the following special instructions:

(i) Choose the slide position carefully according to the depth guide (see paragraph (b) (2) (iv) of this section) and the location guide (see paragraph (b) (3) of this section).

(ii) Set the exit of the slide no more than 20 inches over the water and no lower than 14 inches off the pool deck, except as noted in paragraph (b) (3) of this section.

(iii) Inform the customer of the intended use and maintenance of the slide at the time of installation (see § 1207.7 for intended-use instructions).

(6) *Inspections.* The slide owner, manager, or custodian should inspect or have the slide inspected at least once a year by a qualified installer or professional.

(7) *Electrical bonding instructions.* Slides shall be bonded in accordance with the latest edition of "Article No. 680 of the National Electric Code, Swimming and Wading Pool Wiring."

(8) *Intended-use instructions.* Intended-use instructions shall be made an integral part of the installation instructions included with the packaged product (see § 1207.7).

#### § 1207.7 Intended-use instructions.

The following intended-use instructions and signs shall be included with the packaged slide in order to educate and warn each slider as to proper and safe behavior on swimming pool slides.

(a) *Position of signs.* Intended-use instruction signs shall be placed on the flange of the slide ladder tread or the transom facing the user as shown in figure Q.

FEDERAL REGISTER, VOL. 40, NO. 179—MONDAY, SEPTEMBER 15, 1975

(b) *Size of signs.* The overall size of these signs shall be not less than 12 inches by 1 inch. The lettering shall be not less than 1/4 inch in height.

(c) *Attachment of signs.* Intended-use instruction signs shall be permanent and tamperproof. Signs affixed to ladders shall be attached by the manufacturer of new slides. Signs affixed to transoms shall be attached in a permanent and tamperproof manner.

(d) *Color of signs.* Intended-use instruction signs shall have high contrast lettering and backgrounds. The following are examples of acceptable practice:

Color of lettering and pictures:	Background
Black	Yellow or White
Red	White
Green	White

(e) *Retrofit.* All intended-use instruction signs shall be manufactured so that they can be retrofitted on slides already sold by the manufacturer.

(f) *Content of signs.* (1) On the top step (see figure R).

(2) On the second step down: see figure S.

(3) On the third step down: see figure T.

(4) For slides placed in 4 feet or less of water, the sign shown in figure U shall be placed on the transom in a permanent tamperproof manner.

(5) For slides placed in 4 feet or more of water, transom signs shall be placed on the slide in a permanent and tamperproof manner. The sign shall read and look as shown in figure V.

FIG. R  
SIGN ON TOP STEP

FIG. S  
SIGN ON SECOND STEP DOWN

FIG. T  
SIGN ON THIRD STEP DOWN

FIG. U  
SIGN ON TRANSOM FOR SLIDES PLACED IN WATER LESS THAN 4 FT. DEEP

FIG. V  
SIGN ON TRANSOM FOR SLIDES PLACED IN 4 FT. OF WATER OR DEEPER

(g) *Intended-use instructions.* The following intended-use instructions shall be made part of the installation instructions enclosed with all packaged slides. They shall not be printed such that they could become separated from the main installation instruction sheet.

#### INSTRUCTIONS FOR THE INTENDED USE OF YOUR SLIDE

Your slide has been manufactured according to safety standards approved by the U.S. Consumer Product Safety Commission. It is important the slide be installed according to the recommendations of these standards (16 Code of Federal Regulations, Part 1207.7) in order to reduce the possible risk of injury in connection with your slide. Installed and used properly, the slide will give you, your family, your friends, and your guests many hours of enjoyment, but, like any other piece of recreational equipment, this slide can be misused in such a way as to cause injury, even serious and disabling injury. As the owner of a swimming pool slide, it is your responsibility to:

Read and follow the simple safety rules below.

Make sure that everyone who uses the slide knows these rules.

Enforce these rules.

1. Only one person allowed on the slide at any time.
2. Roughhousing or horseplay on the slide is strictly forbidden.
3. Do not use the slide as a diving platform. The slide is made for sliding—not for diving.
4. Before sliding, always be sure that the slide is properly lubricated.
5. Only two kinds of slides—sitting slides and belly slides—are allowed.

#### FIG. W SLIDING IN A SITTING POSITION

FIG. X  
SLIDING HEAD FIRST

In sitting slides, face forward on the slide holding the legs and arms forward with the palms of your hands forward and tilted up.

In belly slides, slide headfirst on your stomach with your head and arms straight ahead and with the palms of your hands tilted up. Do not drop your head or arms on entering the water.

6. Take your time in preparing to slide. Move forward slowly and get yourself positioned properly before starting your slide.
7. Look out for people or objects in the pool along the path of the slide.
8. Handicapped persons should use caution and may require supervision.
9. Young children and nonswimmers should be supervised at all times.
10. Do not use the slide if any part of it becomes damaged, weakened, or broken. Don't take chances. Have the slide inspected and repaired by a competent professional who is familiar with slides before using it again.

11. Teenagers and adults should not use slides placed in less than 4 feet of water. Serious injury could be incurred by striking the bottom.

#### § 1207.8 Slide safety inspection items.

The following tests and observations should be carried out in the field to assess the safety of swimming pool slides. These inspection items shall be part of the installation instructions, as follows:

##### INSTALLATION

All swimming pool slides should be installed according to specifications set forth in § 1207.8 of "A Safety Standard for Swimming Pool Slides" issued by the Consumer Product Safety Commission and published in Title 16, Code of Federal Regulations, Part 1207. Any measurements necessary to determine compliance can be made with a bubble level, a tape measure, and an 8 1/2-foot diprod calibrated in inches.

##### INSTALLED SLIDES' STRUCTURAL AND INSTALLATION DEFECTS

1. Inspect the runways for visual cracks or tears.
2. Inspect the edges of runways for sharpness, loose fiberglass, cracks, or tears.
3. Inspect all attachment flanges for loose or corroded fasteners.
4. Inspect the slide for general rigidity and stiffness.
5. Inspect all ladder-tread or step-attachment points for evidence of shear, bending, yield, or fatigue in the ladder steps, rails, or attachment methods. Yield is evidenced by crystallization or fine cracking of the ladder tread and/or surface.
6. Inspect the ladder handrails for rigidity and attachment. Can they be pulled out of their sockets?
7. Inspect the slide for sharp edges and protrusions on ladder, deck flanges and handles, and runways.
8. Measure the height of the slide runway off deck and compare to the manufacturer's installation instructions.
9. Measure the depth of water at the slide exit and compare to the manufacturer's installation instructions.
10. Measure the height of the slide above the water and compare to the manufacturer's installation instructions.
11. Measure the distance between the slide centerline and the edges of other pool equipment and compare to the manufacturer's installation instructions.
12. Observe the position of the exit of the slide as shown in Figures N and O of "A Safety Standard for Swimming Pool Slides," issued by the Consumer Product Safety Commission and published in Title 16, Code of Federal Regulations, Part 1207.

#### § 1207.9 Product certification.

(a) Certification shall be in accordance with section 14(a) (1) of the Consumer Product Safety Act (15 U.S.C. 2063(a) (1)).

(b) A certificate shall accompany the swimming pool slide in the form of a permanent label on the shipping container(s) or certificates shall otherwise accompany the slides to all distributors and retailers to whom the material is delivered up until the time the slides are removed from the shipping containers for distribution or sale to the ultimate consumers.

(c) Any certificate shall be based upon the test procedures and requirements specified in this Part 1207.

#### § 1207.10 Handling, storage, and marking.

(a) *Marking.* The manufacturer's or distributor's identification shall appear on the slide and shipping container. Such identification shall include the identity and address of the manufacturer or distributor. If a distributor's name is used, the marking shall include the manufacturer's identification mark.

(b) *Shipping, handling, and storage.* The slide shall be designed, constructed or packaged so that reasonably foreseeable shipping, handling, and storage will not cause defect in the slide that will prevent the slide from complying with requirements of this Part 1207.

#### § 1207.11 References.

#### § 1207.12 Stockpiling.

(a) *Definitions.* (1) "Base period" means, at the option of the manufacturer or importer concerned, any period of 180 consecutive days beginning on or after January 2, 1974, and ending on or before December 31, 1974.

(2) "Rate of production (or importation)" means the total number of swimming pool slides manufactured (or imported) during a stated time period; in determining whether a slide was manufactured (or imported) during a stated time period, the later of the two dates: the date on which the slide runway was manufactured (or imported) or the date on which the accompanying ladder and other support parts were manufactured (or imported), shall be used.

(b) Manufacturers and importers of swimming pool slides, as these products are defined in § 1507.3(28) shall not manufacture or import slides that do not comply with the requirements of a final swimming pool slide standard, between the date a final standard is issued and the date the standard becomes effective, at a rate which is greater than the rate of production or importation during the base period plus five percent of that rate.

(c) Manufacturers and importers shall maintain appropriate documentation to be able to substantiate to the Commission that they are in compliance with the provisions of this section.

Interested persons are invited to submit, on or before October 15, 1975, written comments regarding this proposal.

Any person interested in making an oral presentation of data, views, or arguments, the Development Document and economic study referred to above, and certain supplementary materials supporting

ments, in addition to the opportunity to make written comments must notify

ment of the Oil and Gas Extraction point source category by adding

standard of performance providing for the control of the discharge of pollutants

has determined that the same equipment used to determine the BPT standards, can be operated to achieve the BAT

Limitations Guidelines and New Source Performance Standards for the Offshore Segment of the Oil and Gas Extraction

reports, the Development Document and economic study referred to above, and certain supplementary materials supporting

ments, in addition to the opportunity to make written comments must notify Richard Danca of the Office of the Secretary (202) 634-7700, no later than close of business September 25, 1975. If an opportunity for an oral presentation is requested by any person, such an opportunity will be provided on October 10, 1975. A Federal Register notice announcing the time and place of any opportunity for an oral presentation and procedures governing that presentation will be published in the FEDERAL REGISTER prior to September 30.

Written submissions and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Comments may be accompanied by a memorandum or brief in support thereof. Received comments and other relevant material may be seen in the Office of the Secretary, 10th Floor, 1750 K Street, N.W., Washington, D.C., during working hours Monday through Friday.

It is hereby certified that the economic and inflationary impact of this proposed regulation is being carefully evaluated. The offeror has conducted an analysis of the possible effect of the standard on industry. Prior to the issuance of a final rule, the Commission will prepare the analysis required by section 9(c) of the Consumer Product Safety Act (15 U.S.C. 2058(c)). The Commission believes such an analysis will comply with the evaluation requirements of OMB Circular A-107.

Dated: September 9, 1975.

SADYE E. DUNN,  
Secretary,  
Consumer Product Safety Commission.

# ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 435]  
[EPA 430-8]

## OFFSHORE SEGMENT OF THE OIL AND GAS EXTRACTION POINT SOURCE CATEGORY

### Proposed Effluent Limitations for Existing Sources, Standards of Performance and Pretreatment Standards

Notice is hereby given that effluent limitations for existing sources, standards of performance and pretreatment standards for new sources and pretreatment standards for existing sources set forth in tentative form below are proposed by the Environmental Protection Agency (EPA). Simultaneously with this notice of proposed rulemaking, EPA is promulgating a regulation adding Part 435 to Chapter 40 of the Code of Federal Regulations. That regulation establishes effluent limitations and guidelines for existing sources based on the best practicable control technology currently available for the offshore segment of the oil and gas extraction point source category. The regulation proposed below will amend 40 CFR 435—Offshore Seg-

ment of the Oil and Gas Extraction point source category by adding §§ 435.13, 435.14, 435.15 and 435.16 to the near-offshore subcategory (Subpart A), and sections 435.23, 435.24, 435.25 and 435.26 to the far-offshore subcategory (Subpart B) pursuant to sections 301, 304 (b) and (c), 306(b) and 307 (b) and (c) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316(b) and 1317 (b) and (c), 86 Stat. 816 et seq.; (Pub. L. 92-500) (the Act). Simultaneously with this proposed rule making EPA is promulgating interim final regulations which establish the above listed subparts.

#### (a) Legal authority.

##### (1) Existing point sources.

Section 301(b) of the Act requires the achievement by not later than July 1, 1977, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of the best practicable control technology currently available as defined by the Administrator pursuant to section 304(b) of the Act. Section 301(b) also requires the achievement by not later than July 1, 1983, of effluent limitations for point sources, other than publicly owned treatment works, which require the application of best available technology economically achievable which will result in reasonable further progress toward the national goal of eliminating the discharge of all pollutants, as determined in accordance with regulations issued by the Administrator pursuant to section 304(b) of the Act.

Section 304(b) of the Act requires the Administrator to publish regulations providing guidelines for effluent limitations setting forth the degree of effluent reduction attainable through the application of the best practicable control technology currently available and the degree of effluent reduction attainable through the application of the best control measures and practices achievable including treatment techniques, process and procedural innovations, operating methods and other alternatives. The interim final regulation promulgated simultaneously with this proposed rule making sets forth effluent limitations and guidelines, pursuant to sections 301 and 304(b) of the Act, for the near-offshore subcategory (Subpart A), and the far-offshore subcategory (Subpart B) of the offshore segment of the oil and gas extraction point source category.

Section 304(c) of the Act requires the Administrator to issue to the States and appropriate water pollution control agencies information on the processes, procedures or operating methods which result in the elimination or reduction of the discharge of pollutants to implement standards of performance under section 306 of the Act. The report or "Development Document" referred to below provides, pursuant to section 304(c) of the Act, information on such processes, procedures or operating methods.

#### (2) New sources.

Section 306 of the Act requires the achievement by new sources of a Federal

standard of performance providing for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the Administrator determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

Section 306(b)(1)(B) of the Act requires the Administrator to propose regulations establishing Federal standards of performance for categories of new sources included in a list published pursuant to section 306(b)(1)(A) of the Act. Simultaneously with the appearance of the proposed rulemaking is a FEDERAL REGISTER notice titled "Addition to the List of Categories of Sources." This notice adds the offshore segment of the oil and gas extraction point source category and is in accordance with the provisions of section 306(b)(1)(A) of the Act. The regulations proposed herein set forth the standards of performance applicable to new sources for the near-offshore subcategory (Subpart A), and the far-offshore subcategory (Subpart B), of the offshore segment of the oil and gas extraction point source category.

Section 307(c) of the Act requires the Administrator to promulgate pretreatment standards for new sources at the same time that standards of performance for new sources are promulgated pursuant to section 306. Sections 435.16 and 435.26, proposed below, provide pretreatment standards for new sources within the near offshore subcategory (Subpart A), and the far-offshore subcategory (Subpart B) of the offshore segment of the oil and gas extraction point source category. Section 307(b) of the Act requires the establishment of pretreatment standards for pollutants introduced into publicly owned treatment works and 40 CFR 128 establishes that the Agency will propose specific pretreatment standards at the time effluent limitations are established for point source discharges. Sections 435.14 and 435.24 proposed below provide pretreatment standards for existing sources within the near-offshore subcategory (Subpart A), and the far-offshore subcategory (Subpart B) of the offshore segment of the oil and gas extraction point source category.

(b) Summary and basis of proposed standards of performance and pretreatment standards for new sources and pretreatment standards for existing sources.

The general methodology and summary of conclusions are discussed in considerable detail in the preamble of the interim final regulations for the near-offshore subcategory (Subpart A) and the far-offshore subcategory (Subpart B) which are being promulgated by EPA simultaneously with publication of this proposed regulation. The information contained in the preamble to the interim final regulation is incorporated herein by reference.

In the far-offshore subcategory, an additional economic consideration in the BAT standards involves the incremental cost of the BAT standards. The Agency

has determined that the same equipment used to determine the BPT standards, can be operated to achieve the BAT standards, due primarily to improvements in performance that are expected to result from greater experience. As such, the economic impact analysis assumes that no additional costs will be incurred in going to BAT from BPT; however, the Agency solicits comments on this point.

The proposed regulation set forth below proposes pretreatment standards for pollutants introduced into publicly owned treatment works. The proposal will establish for each subpart the extent of application of effluent limitations to existing sources and to new sources which discharge to publicly owned treatment works. This regulation is intended to be complementary to the general regulation for pretreatment standards for existing sources set forth in 40 CFR 128. The general regulation was proposed July 19, 1973 (38 FR 19236), and published in final form on November 8, 1973 (38 FR 30982). The regulation proposed below applies to users of publicly owned treatment works which fall within the description of the point source category to which the limitations and standards apply. However, the proposed pretreatment regulation applies to the introduction of pollutants which are directed into a publicly owned treatment works, rather than to discharges of pollutants to navigable waters.

The general pretreatment standard divides pollutants discharged by users of publicly owned treatment works into two broad categories; "compatible" and "incompatible." Compatible pollutants are generally not subject to specific numerical pretreatment standards. However, 40 CFR 128.131 (prohibited wastes) may be applicable to compatible pollutants. Additionally, local pretreatment requirements may apply (See 40 CFR 128.110). Incompatible pollutants are subject generally to pretreatment standards as provided in 40 CFR 128.133.

Sections 435.14 and 435.24 of the regulation proposed below are intended to implement the intent of section 128.133, by setting forth specific numeric limitations for particular pollutants subject to pretreatment requirements.

Questions were raised during the public comment period on the proposed general pretreatment standard (40 CFR 128) about the propriety of applying a standard based upon best practicable control technology currently available to all plants subject to pretreatment standards. In general, EPA believes the analysis supporting the effluent limitations and guidelines is adequate to make a determination regarding the application of those standards to users of publicly owned treatment works. However, to ensure that those standards are appropriate in all cases, EPA now seeks additional comments focusing upon the application of effluent limitations guidelines to users of publicly owned treatment works.

The report entitled "Development Document for Interim Final Effluent

Limitations Guidelines and New Source Performance Standards for the Offshore Segment of the Oil and Gas Extraction Point Source Category" details the analysis undertaken in support of the regulation being proposed herein and is available for inspection in the EPA Freedom of Information Center, Room 204, West Tower, Waterside Mall, Washington, D.C., at all EPA regional offices, and at State water pollution control offices. A supplementary analysis prepared for EPA of the possible economic effects of the proposed regulation is also available for inspection at these locations. Copies of both of these documents are being sent to persons or institutions affected by the proposed regulation or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460, Attention: Ms. Ruth Brown, A-107.

When this regulation is promulgated, revised copies of the Development Document will be available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the Economic Analysis will be available through the National Technical Information Service, Springfield, Virginia 22151.

(c) Summary of public participation. A full listing of participants and discussion of comments and responses is included in the preamble of the interim final regulation for the offshore segment of the oil and gas extraction category being simultaneously promulgated by EPA and are incorporated herein by reference.

Interested persons may participate in this rulemaking by submitting written comments in triplicate to the EPA Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460, Attention: Ms. Ruth Brown, A-107. Comments on all aspects of the proposed regulation are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which are available, or which may be relied upon by the Agency, comments should identify and, if possible, provide any additional data which may be available and should indicate why such data are essential to the development of the regulations. In the event comments address the approach taken by the Agency in establishing a standard of performance or pretreatment standard, EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of sections 306 and 307 (b) and (c) of the Act.

A copy of all public comments will be available for inspection and copying at the EPA Freedom of Information Center, Room 204, West Tower, Waterside Mall, 401 M Street, S.W., Washington, D.C. A copy of preliminary draft contractor

reports, the Development Document and economic study referred to above, and certain supplementary materials supporting the study of the industry concerned will also be maintained at this location for public review and copying. The EPA information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

All comments received on or before October 15, 1975, will be considered. Steps previously taken by the Environmental Protection Agency to facilitate public response within this time period are outlined in the advance notice concerning public review procedures published on August 6, 1973 (38 FR 21202).

Dated: August 29, 1975.

RUSSELL E. TRAIN,  
Administrator.

Part 435 is proposed to be amended as follows:

Subpart A is amended by adding §§ 435.13, 435.14, 435.15, and 435.16 and Subpart B is amended by adding §§ 435.23, 435.24, 435.25 and 435.26.

## PART 435—OFFSHORE SEGMENT OF THE OIL AND GAS EXTRACTION POINT SOURCE CATEGORY

### Subpart A—Near-Offshore Subcategory

- Sec. 435.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
- 435.14 Pretreatment standards for existing sources.
- 435.15 Standards of performance for new sources.
- 435.16 Pretreatment standards for new sources.

### Subpart B—Far-Offshore Subcategory

- 435.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.
- 435.24 Pretreatment standards for existing sources.
- 435.25 Standards of performance for new sources.
- 435.26 Pretreatment standards for new sources.

AUTHORITY: Secs. 301, 304 (b) and (c), 306 (b) and (c), 307(c), Federal Water Pollution Control Act, as amended (the Act); 33 U.S.C. 1251, 1311, 1314 (b) and (c), 1316 (b) and (c), 1317(c); 86 Stat. 816 et seq.; Pub. L. 92-500.

### Subpart A—Near-Offshore Subcategory

§ 435.13 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

The following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

## PROPOSED RULES

## Effluent limitations

Pollutant parameter waste source	Oil and grease		
	Maximum for any 1 d, milligram per liter	Average of daily values for 30 consecutive days shall not exceed, milligram per liter	Residual chlorine minimum for any 1 d, milligram per liter
Deck drainage.....	72	48	NA
Drilling muds.....	(1)	(1)	NA
Drill cuttings.....	(1)	(1)	NA
Well treatment.....	(1)	(1)	NA
Sanitary:			
M10.....	NA	NA	21
M91M.....	NA	NA	NA
Domestic.....	(1)	(1)	NA
Produced sand.....	(1)	(1)	NA
Produced water.....	No discharge of waste water pollutants to navigable waters. <sup>1</sup>		

<sup>1</sup> No discharge of free oil.

<sup>2</sup> Minimum of 1 mg/l and maintained as close to this concentration as possible.

<sup>3</sup> There shall be no floating solids as a result of the discharge of these wastes.

<sup>4</sup> In the event that a permit under sec. 142(b)(2) of the Safe Drinking Water Act is refused and there is no other reasonable means of disposal available that would comply with the BATEA standard for State waters, then the BATEA standard for Federal waters shall apply.

#### § 435.14 Pretreatment standard for existing sources.

The pretreatment standard under section 307(b) of the Act for a source within the near-offshore subcategory which is a user of a publicly owned treatment works and a major contributing industry as defined in 40 CFR 128 (and which would be an existing point source subject to section 301 of the Act, if it were to discharge pollutants to the navigable

waters), shall be the standard set forth in 40 CFR 128, except that, for the purpose of this section, 40 CFR 128.121, 128.122, 128.132 and 128.133 shall not apply. The following pretreatment standard establishes the quantity or quality of pollutants or pollutant properties controlled by this section which may be discharged to a publicly owned treatment works by a point source subject to the provisions of this subpart.

## Effluent limitations

Pollutant parameter waste source	Oil and grease		
	Maximum for any 1 d, milligram per liter	Average of daily values for 30 consecutive days shall not exceed milligram per liter	Residual chlorine minimum for any 1 d, milligram per liter
Produced water.....	No discharge of pollutants.	No discharge of pollutants.	No discharge of pollutants.
Deck drainage.....	do.	do.	Do.

<sup>1</sup> There shall be no floating solids as a result of the discharge of these wastes.

[FR Doc.75-24362 Filed 9-12-75;8:45 am]

## FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 89, 91]

[Docket No. 20149]

## LOCAL GOVERNMENT AND MANUFACTURERS RADIO SERVICES FOR TELEMETRY AND REMOTE CONTROL OPERATIONS

## Order Extending Time for Filing Comments

In the matter of amendment of Parts 2, 89, and 91 of the Commission's rules and regulations to make available four 173 MHz splinter frequencies to the Local Government and Manufacturers Radio Services for telemetry and remote control operations (40 FR 34155).

1. American Telephone and Telegraph Company (AT&T) has requested an extension of time until September 24, 1975, within which to file comments in the above entitled matter. It also requested that the date for filing reply comments be extended to October 24, 1975. Comments and reply comments are now due September 9, and September 23, 1975, respectively.

2. In support of its request petitioner argues that the interference questions raised in the Notice involve complex technical matters which require detailed study and analysis. An extension of time is needed to complete this study and prepare an appropriate response.

3. It appears that good cause has been shown and that the public interest would

be served by granting the additional period asked in order to afford the petitioner and other interested parties a full opportunity for the preparation and presentation of their views in this proceeding.

4. Accordingly, it is ordered, pursuant to §§ 0.331 and 1.46 of the Commission's Rules, That the time for filing statements in the above captioned proceeding is extended from September 9 to September 24, 1975, and for filing reply comments from September 23, to October 24, 1975.

Adopted: September 5, 1975.

Released: September 8, 1975.

[Docket No. 20521]

## CORPORATE OWNERSHIP REPORTING AND DISCLOSURE BY BROADCAST LICENSEES

## Order Extending Time for Filing Comments and Reply Comments

In the matter of corporate ownership reporting and disclosure by broadcast licensees (40 FR 32763).

1. On June 11, 1975, the Commission issued its Notice of Proposed Rule Making in this matter and called for the filing of responses by interested parties. The original deadline for comments was August 11, 1975, and for reply comments was August 26, 1975. In response to a request from Cox Broadcasting, et al., the Commission on July 25, 1975, extended these dates to September 11 and September 26, 1975, respectively. In so doing, the Commission indicated that it did not contemplate granting any further extensions.

2. Subsequent developments suggest the need for an additional period and the Commission, on its own motion, is extending these dates. There are two principal reasons for the Commission's decision. First, there is a need to coordinate the filing deadlines in this case with those of two related proceedings.<sup>1</sup>

Matters will be greatly simplified if a single set of deadlines obtains for all three proceedings. Even more importantly, an extension is required so that parties may have an opportunity to consider the significance in connection with this proceeding of the recent action by the Securities and Exchange Commission proposing new ownership disclosure requirements.<sup>2</sup> Although it will not be possible to await the completion of the SEC proceeding, which itself could well extend for some period of time, the Commission does wish to afford parties the opportunity to consider this closely related matter when formulating their response in this proceeding. The SEC proceeding, which deals with corporate ownership reporting and disclosure, is a matter of importance to this proceeding as it affects broadcast licensees. Accordingly, it is ordered, That the dates for filing comments and reply comments are extended to and including September 26, 1975, and October 13, 1975, respectively.

3. This action is taken pursuant to authority found in Sections 4(i), 5(d) (1) and 303(r) of the Communications Act of 1934, as amended, and Sections 0.281 and 1.46 of the Commission's Rules.

Adopted: September 4, 1975.

Released: September 8, 1975.

[SEAL]

FEDERAL COMMUNICATIONS  
COMMISSION,  
WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.

[FR Doc.75-24447 Filed 9-12-75;8:45 am]

<sup>1</sup> In Docket 20520, the Commission has proposed changes in the rules dealing with institutional ownership holdings in broadcast licensees and in Docket 20522 has proposed rules seeking more comprehensive information on common carrier corporate ownership. The latter has slightly different filing dates.

<sup>2</sup> The SEC action of August 25, 1975, covers (1) Securities Act of 1933, release 5609; (2) Securities Exchange Act of 1934, release 11616, and (3) Public Utilities Holding Company Act of 1935, release 19140.

[ 47 CFR Part 73 ]  
[ Docket No. 20550 ]

**NONDISCRIMINATION IN THE EMPLOYMENT POLICIES AND PRACTICES OF BROADCAST LICENSEES**

**Order for Extending Time for Filing Comments**

In the matter of nondiscrimination in the employment policies and practices of broadcast licensees (40 FR 33243).

1. On July 25, 1975, the Commission released a Notice of Inquiry and Notice of Proposed Rulemaking in the above captioned proceeding, and publication was made in the FEDERAL REGISTER on July 28, 1975, 40 FR 16967. Comments and replies thereto are scheduled to be filed on September 11, 1975, and October 1, 1975, respectively.

2. The Corporation for Public Broadcasting filed a Motion for Extension of Time in which to file comments in this proceeding on August 29, 1975. The motion is predicated on the corporation's participation in Docket No. 19816, "In the Matter of Ascertainment of Community Problems by Noncommercial Broadcast Applicants, etc., RM-1851, 1874," to which comments are due on September 15, 1975. The corporation makes reference to the Commission's statement in its Further Notice of Inquiry and Further Notice of Proposed Rulemaking in Docket No. 19816, released on August 14, 1975: "... we do not contemplate any extensions of time for comments beyond the date set out above [September 15, 1975]." Therefore, the corporation requests an extension of thirty (30) days of the filing dates for comments and reply comments in order to be able to meet the Commission's deadlines in other proceedings.

3. Accordingly, it is ordered, That the dates for filing comments and reply comments in this proceeding are extended to and including October 13, 1975, and October 31, 1975, respectively.

4. This action is taken pursuant to authority found in Section 4(i), 5(d) (1) and 303(r) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's rules.

Adopted: September 4, 1975.

Released: September 9, 1975.

ASHTON R. HARDY,  
General Counsel.

[FR Doc. 75-24448 Filed 9-12-75; 8:45 am]

**FEDERAL ENERGY ADMINISTRATION**

[ 10 CFR Part 213 ]

**SUPPLEMENTAL FEE PAYMENTS ORIGINALLY DUE AUGUST 31, 1975**

**Notice of Further Deferral**

On August 15, 1975, the President announced that he would indefinitely suspend supplemental fees on petroleum imports, effective July 1, 1975, if the Emergency Petroleum Allocation Act was not extended beyond August 31, 1975. In light of this announcement, the Federal

Energy Administration announced on August 15, 1975 that supplemental fee payments due August 31 for imports made during July were to be deferred for up to fifteen (15) days pending congressional action on an extension of the Act, 40 FR 35302 (August 20, 1975).

On September 10, 1975, the Senate sustained the President's veto of S. 1849, which would have extended the Emergency Petroleum Allocation Act for six months. However, because the Congress is now actively considering a short-term extension of the Act to allow time to reach agreement with the President on a gradual decontrol plan, it is still possible that the Act may be extended beyond August 31, 1975.

Since an extension is possible, the President has not yet determined whether to suspend the supplemental fees incurred with respect to imports made on or after July 1. Accordingly, pending resolution of this situation, FEA hereby announces that payment of supplemental fees incurred on imports in the month of July and originally due August 31 may be further deferred until September 30, 1975.

Issued in Washington, D.C., September 11, 1975.

ROBERT E. MONTGOMERY, JR.,  
General Counsel,  
Federal Energy Administration.

**INTERSTATE COMMERCE COMMISSION**

[ 49 CFR Part 1100 ]

**COMMISSION'S RULES OF PRACTICE**

**Comprehensive Review**

SEPTEMBER 9, 1975.

The Commission has appointed a Special Staff Committee on Rules to undertake a comprehensive review of its Rules of Practice as embraced in 49 CFR Part 1100 et seq. Principal objectives of the Committee are to improve the Rules of Practice and to consider the matter of establishing special rules to govern rule-making proceedings. In addition, the task force shall search out contradictions in the rules as well as the possibilities for simplification and clarification thereof.

It is anticipated that the subject matter of the Committee's study will generate widespread interest, particularly among those engaged in practice before the Commission. Public input in the form of statements setting forth suggested improvements and refinements of the Rules of Practice will be welcomed by the Committee. Such statements should be mailed so as to be received at the Offices of the Commission on or before October 15, 1975. They should be addressed to: Special Staff Committee on Rules, c/o Secretary, Interstate Commerce Commission, Washington, D.C. 20423. Each submission should include an original and five (5) copies, if possible.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[FR Doc. 75-24504 Filed 9-12-75; 8:45 am]

**PROPOSED RULES**

**VETERANS ADMINISTRATION**

[ 38 CFR Part 3 ]

**VETERANS BENEFITS**

**Evidence Submitted With Claims**

The following proposed changes to Part 3 of Title 38, Code of Federal Regulations amend provisions relating to evidence submitted with claims for benefits from the Veterans Administration. The change to § 3.203 provides that service department verification of 90 days' service creditable for pension purposes will not be required when evidence of record shows the veterans served for 4 months or more. The current provision is that verification will not be required when there is evidence of service of 9 months or more. The changes to §§ 3.205 and 3.206 delete the requirement for routinely questioning the validity of Mexican divorce decrees. Minor editorial changes, unrelated to the substantive changes, are being made in §§ 3.204, 3.205, 3.208 and 3.209 designed to reflect agency policy to avoid any appearance of seeming to preclude benefits for female veterans, dependents, or beneficiaries. No substantive change affecting benefits is involved in the editorial changes.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans' Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All relevant material received before October 15, 1975, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in room 132. Such visitors to any field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Notice is given that the amendments would be effective the date of final approval.

1. In § 3.203, paragraph (b) is revised to read as follows:

§ 3.203 Service records as evidence of service and discharge.

(b) The evidence enumerated in paragraph (a) of this section will be accepted as establishing the period of creditable wartime service of a veteran for pension purposes where case file evidence shows:

- (1) Service of 4 months or more;
- (2) Discharge for disability incurred in line of duty;
- (3) Ninety days creditable service based on records from the service department such as hospitalization for 90 days for a line of duty disability.

Where there is no such evidence, specific request will be made of the service department for a complete statement of

service showing the time spent on an industrial, agricultural, or indefinite furlough and time lost on absence without leave (without pay), under arrest (without acquittal), in desertion, and while undergoing sentence of court-martial.

2. In § 3.204, paragraph (b) (1) is revised to read as follows:

§ 3.204 Secondary evidence.

(b) *Marriage, birth, or death.* A certified copy or abstract of a record referred to in §§ 3.205, 3.209, and 3.211, which is not certified over the signature and official seal of the person having custody of the record, will be accepted nevertheless if:

(1) The person having custody of the record has no official seal, and the copy or abstract bears his or her signature and is either sworn to by such person or is on a blank printed especially for that purpose; or

3. In § 3.205, paragraphs (a) introductory, (a) (1), (b) and (c) are revised to read as follows:

§ 3.205 Marriage.

(a) *Proof of marriage.* The certified statement of a veteran as to the material facts of his (or her) marriage, solemnized in accordance with the laws of the jurisdiction, each party not having been previously married, will be accepted for this purpose in the absence of information to the contrary. The certified statement of a person claiming as widow (or widower), as to the material facts of the claimant's marriage to the veteran, solemnized in accordance with the laws of the jurisdiction, each party not having been previously married, will be accepted for this purpose if corroborated in a material part by a statement made by the veteran in connection with a claim for benefits and if uncontradicted by other information. In all other instances the marriage should be established by one of the following types of evidence:

(1) Copy of the public record of marriage, certified or attested, or by an abstract of the public record, containing sufficient data to identify the parties, the date and place of the marriage, and the number of prior marriages by either

party if shown on the official record, issued by the officer having custody of the record or one authorized to act for such officer bearing the seal of such office, or otherwise properly identified, or a certified copy of the church record of marriage.

(b) *Valid marriage.* In the absence of conflicting information, proof of marriage which meets the requirements of paragraph (a) of this section together with the claimant's certified statement concerning the date, place and circumstances of dissolution of any prior marriage may be accepted as establishing a valid marriage, provided that such facts, if they were to be corroborated by record evidence, would warrant acceptance of the marriage as valid. Where necessary to a determination because of conflicting information or protest by a party having an interest therein, proof of termination of a prior marriage will be shown by proof of death, or a certified copy or a certified abstract of final decree of divorce or annulment specifically reciting the effects of the decree.

(c) *Marriages deemed valid.* Where a widow or widower has submitted proof of marriage in accordance with paragraph (a) of this section and also meets the requirements of § 3.52, the claimant's signed statement that he or she had no knowledge of an impediment to the marriage to the veteran will be accepted, in the absence of information to the contrary, as proof of that fact.

4. In § 3.206, the introductory portion preceding paragraph (a) is revised to read as follows:

§ 3.206 Divorce.

The validity of a divorce decree regular on its face, will be questioned by the Veterans Administration only when such validity is put in issue by a party thereto or a person whose interest in a claim for Veterans Administration benefits would be affected thereby. In cases where recognition of the decree is thus brought into question:

5. Immediately following § 3.207, the cross reference is amended to read as

follows: "Effective dates, void or annulled marriage. See § 3.400 (u) and (v)."

6. Section 3.208 is revised to read as follows:

§ 3.208 Claims based on attained age.

In claims for pension where the age of the veteran or widow or widower is material, the statements of age will be accepted where they are in agreement with other statements in the record as to age. However, where there is a variance in such records, the youngest age will be accepted subject to the submission of evidence as outlined in § 3.209.

6. In § 3.209, the introductory portion preceding paragraph (a) is revised to read as follows:

§ 3.209 Birth.

The certified statement of a veteran as to the material facts of birth of a child of his or her marriage will be accepted as proof of age and relationship in the absence of information to the contrary. The certified statement of the other parent as to the material facts of birth of a child of a deceased veteran will be accepted as proof of age and relationship if uncontradicted by other information and if corroboration as to the child's identity or existence is supplied by a statement or assertion made by the veteran in connection with a claim for benefits. In all other cases the issues will be resolved by one of the types of evidence listed in paragraphs (a) through (g) of this section. Where the evidence submitted in proof of age or relationship indicates a difference in the name of the person as shown by other records the discrepancy will be reconciled by an affidavit or certified statement identifying the person having the changed name as the person whose name appears in the evidence of age and relationship:

Approved: September 10, 1975.

By direction of the Administrator.

[SEAL] ODELL W. VAUGHN,  
Deputy Administrator.

## NEW MEXICO

## Notice of Application

SEPTEMBER 8, 1975.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Transwestern Pipeline Company has applied for one 4 inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN,  
 NEW MEXICO

T. 23 S., R. 25 E.

Sec. 11, SE $\frac{1}{4}$ NE $\frac{1}{4}$ ;Sec. 12, SE $\frac{1}{4}$ NW $\frac{1}{4}$ .

This pipeline will convey natural gas across .24 miles of national resource land in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, PO Box 1397, Roswell, New Mexico, 88201.

## National Park Service

**ADVISORY BOARD ON NATIONAL PARKS,  
 HISTORIC SITES, BUILDINGS AND  
 MONUMENTS**

## Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that meetings of the Advisory Board on National Parks, Historic Sites, Buildings and Monuments will be held on October 6, 7 and 8 at the Department of the Interior, 18th and C Streets, N.W., Washington, D.C.

The purpose of the Advisory Board is to advise the Secretary of the Interior on matters relating to the National Park System and the administration of the Historic Sites Act of 1935.

The members of the Advisory Board are as follows:

Mr. Steven Rose (Chairman) La Canada, Calif.

Dr. Douglas W. Schwartz (Vice Chairman) Santa Fe, New Mexico

Dr. William G. Shade (Secretary) Bethlehem, Pa.

Hon. E. Y. Berry, Rapid City, South Dakota

Hon. Alan Bible, Reno, Nevada

Mr. Laurence W. Lane, Jr., Menlo Park, Calif.

Dr. A. Starker Leopold, Berkeley, Calif.

Mrs. Anne Jones Morton, Easton, Maryland

Mr. Linden C. Pettys, Ludington, Michigan

Mrs. Nancy Rennell, Greenwich, Connecticut

Dr. Edgar A. Topplin, Petersburg, Virginia

Meetings will be held in different locations as follows: October 6, 9 a.m., Room 5160. The Advisory Board will meet in

general session in regard to administrative matters pertaining to the Board and to receive reports on several topics including legislation affecting the National Park System; proposed urban parks; Alaska park proposals; land acquisition progress; NPS revised planning process; interpretation program; implementation of the Archeological & Historic Preservation Act of 1974; and Bicentennial in the National Parks.

October 7, 9 a.m., Room 5160, the History Areas Committee will meet to consider reports on two areas and to hear reports on various studies, including sub-themes or portions of subthemes on "Science and Invention," "Architecture," and "Role of Afro-Americans in U.S. History," and a special study on Kalaupapa (Father Damien's Leper Colony) Island of Molokai, Hawaii; and to receive a progress report on easement study recommendations.

October 7, 9 a.m., Room 8068, North Penthouse, the Natural Areas Committee will meet to receive reports on summaries of natural history theme studies completed since last Board meeting; status of Natural Landmarks program, and shall consider approximately 30 natural areas as potential additions to the National Registry of Natural Landmarks.

October 7, 8 a.m., Room 3119, the Oversight Committee will meet to consider reports on the budget hearings, and the public information office.

October 7, 1:30 p.m., Room 7000A, the Recreation Areas Committee and Special Committee on Concessions will meet to consider the Concessions Management Task Force Report and the NPS proposal for the implementation of specific recommendations.

October 8, 9:30 a.m., Room 5160, the Advisory Board will reconvene to hear a report on the Nature Conservancy Study on the Preservation of Natural Diversity; to receive reports from the committee meetings, and to formulate its comments and recommendations.

The meetings will be open to the public, but facilities and space to accommodate members of the public are limited, and it is expected that not more than 25 people will be able to attend.

Any member of the public may file with the Advisory Board a statement in writing concerning any of the matters to be discussed. Persons desiring further information concerning this meeting or who wish to file written statements may contact Miss Shirley Luikens, National Park Service, Washington, D.C. at 202-343-2012.

Minutes of the meeting will be available for public inspection 8 to 10 weeks after the meeting in Room 3123, Interior Building, Washington, D.C.

Dated: September 4, 1975.

ROBERT M. LANDAU,  
*Liaison Officer, Advisory Com-  
 missions, National Park Ser-  
 vice.*

**SOUTHEAST REGIONAL ADVISORY  
 COMMITTEE**

## Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Southeast Regional Advisory Committee will be held at 9:00 a.m., e.d.t., on October 16 and 17, 1975, at Holiday Inn, Airport Road, Jacksonville, Florida.

The purpose of the Southeast Regional Advisory Committee is to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems and programs pertinent to the Southeast Region of the National Park Service.

The members of the Advisory Committee are as follows:

Mrs. Ann Smith Bedsole (Chairman), Mobile, Alabama

Mr. T. S. Bradford, Maryville, Tennessee

Mr. Robert Gable, Frankfort, Kentucky

The Very Reverend Monsignor Michael V. Gannon, Gainesville, Florida

Mr. Alfredo Heres Gonzalez, Santurce, Puerto Rico

Dr. John King, Jackson, Mississippi

Mr. Charles Edward Lee, Columbia, South Carolina

Mrs. Jane Hurt Yarn, Atlanta, Georgia

The matters to be discussed at this meeting include: (1) Planning and Operation of Cumberland Island National Seashore, and (2) Guidelines for Planning in the National Park Service.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited and it is expected that not more than 25 persons will be able to attend. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting or who wish to submit written statements, may contact Paul C. Swartz, Chief, Cooperative Activities Division, Southeast Regional Office, at 404/526-7560. Minutes of the meeting will be available for public inspection approximately 4 weeks after the meeting at the office of the Southeast Region, 3401 Whipple Avenue, Atlanta, Georgia.

Dated: August 26, 1975.

ROGER J. ROGERS,  
*Acting Chief, Cooperative Ac-  
 tivities Division, Southeast  
 Region, National Park Ser-  
 vice.*

**NAVAL REGIONAL MEDICAL CENTER  
 Decision on Application for Duty-Free Entry**

**PHILADELPHIA COLLEGE OF  
 OSTEOPATHIC MEDICINE**

views with respect to the question of whether an instrument or apparatus of

tific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq. 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00585-56-54100. Applicant: U.S. Department of Commerce—NOAA, National Marine Fisheries Service, Office of Resource Research, Fishery Technology Group, 3300 Whitehaven Street, N.W., Washington, D.C. 20235. Article: Mark I Prototype Undulating Oceanographic Recorder. Manufacturer: The Blessey Co. Ltd., United Kingdom. Intended use of article: The article is intended to be used to replace a Continuous Plankton Recorder established in the North Atlantic and North Sea which will: (a) Sample the plankton over an extended range of depth (instead of the present single depth).

(b) Measure and record, in situ, a number of physical parameters of vital importance in marine ecology as well as in physical oceanography and meteorology.

The article will allow the progress from the descriptive to the interpretive and predictive phases of plankton research. When the UOR system becomes fully operational an orderly phase-in to the ongoing SPR survey will take place.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the capability of undulating in a pre-determined triangular pattern at depths ranging from 0 meters (m) to 100 m at a towed speed of up to 20 knots with continuous plankton sampling over an extended period of time. We find the capability described above is pertinent to the applicant's intended purposes. NBS advises in its memorandum dated August 20, 1975 that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,  
Acting Director, Special  
Import Programs Division.

[FR Doc. 75-24434 Filed 9-12-75; 8:45 am]

#### METHODIST HOSPITAL Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq. 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00563-33-90000. Applicant: The Methodist Hospital, 6516 Bertner Drive, Houston, Texas 77025. Article: EMI Scanner System. Manufacturer: EMI Limited, United Kingdom. Intended use of article: The article is intended to be used in studies of tumors of the brain in patients, in particular, the subtle absorption between normal and abnormal brain tissue will be determined and charted by the article. The article will also be used in the evaluation of patients with a wide variety of suspected central nervous system disease and the diagnosis will be related with current available techniques to understand the best diagnostic approach to patients. In addition, the article will be used for training residents in radiology, neuroradiology, neurosurgery and neuroradiology fellows in nuclear medicine, neuroradiology, radiation physics of the Methodist Hospital and clinicians and research scientists in the fields of Radiology, Neuroradiology and Neurosurgery.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States at the time the foreign article was ordered (April 29, 1975). Reasons: The foreign article is a newly developed system which is designed to provide precise transverse axial X-ray tomography of the human head. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated August 22, 1975 that the sensitivity and non-invasive methodology of the article is pertinent to the applicant's intended purposes. HEW also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article that was commercially available at the time the article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,  
Acting Director, Special  
Import Programs Division.

[FR Doc. 75-24435 Filed 9-12-75; 8:45 am]

#### MOUNT SINAI MEDICAL CENTER Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq. 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00539-33-28500. Applicant: Mount Sinai Medical Center, Fifth Avenue and 100th Street, New York, New York 10029. Article: Free Flow Electrophoresis Apparatus. Manufacturer: Garching Instrumente, West Germany. Intended use of article: The article is intended to be used for studies of membranes and cells from human and animal tissues to gain insight into the nature of the transition which normal cells undergo when they become cancerous; and to gain insight into the nature of the hormonal regulation of molecular transport across epithelial cell membranes.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated August 22, 1975 that the degree of resolution in separation of whole cells and subcellular organelles on the basis of slightly different electrical charge on their surface membranes provided by the article is pertinent to the intended purposes. HEW also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,  
Acting Director, Special  
Import Programs Division.

[FR Doc. 75-24436 Filed 9-12-75; 8:45 am]

#### NAVAL REGIONAL MEDICAL CENTER Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq. 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00520-33-46040. Applicant: Naval Regional Medical Center, Code 10, San Diego, California 92134. Article: Electron Microscope, Model EM 10. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for ultrastructural examination of heart, brain, muscle, kidney, and hematopoietic tissue. In addition, the article will be used for electron microscopic examination of reticuloendothelial neoplasms, both cultured and direct, of leukemia and lymphoma patients. The article will also be used in the training of pathologists and resident pathologists in the techniques and interpretation of electron microscopy.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article has a specified resolving capability of 3.5 Angstroms. The most closely comparable domestic instrument is the Model EMU-4C electron microscope manufactured by the Adam David Company. The Model EMU-4C has a specified resolving capability of 5 Angstroms. (The lower the numerical rating in terms of Angstrom units, the better the resolving capability.) The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated August 15, 1975 that the additional resolving capability of the foreign article is pertinent to the purposes for which the foreign article is intended to be used. We, therefore, find that the Model EMU-4C is not of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Acting Director, Special  
Import Programs Division.

[FR Doc. 75-24437 Filed 9-12-75; 8:45 am]

#### PHILADELPHIA COLLEGE OF OSTEOPATHIC MEDICINE

##### Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq. 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00536-33-29050. Applicant: Philadelphia College of Osteopathic Medicine, 4150 City Avenue, Philadelphia, Pa. 19131. Article: 24 Channel Electroencephalograph. Manufacturer: Fritz Schwarzer GmbH, West Germany. Intended use of article: The article is intended to be used to determine whether there are any EEG changes which occur early in cerebrovascular disease and to determine whether frequent EEG in early stages of cerebrovascular disease may indicate progression of the disease.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides a 24 channel capability. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated August 22, 1975 that the capability described above is pertinent to the applicant's intended purposes. HEW also advises that it knows of no domestic instrument that is commercially available that provides the pertinent characteristic.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

#### TAMPA GENERAL HOSPITAL, ET AL. Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897). Interested persons may present their

views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the Federal Register.

Amended regulations issued under cited Act, (40 FR 12253 et seq. 15 CFR 701, 1975) prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket number: 76-00085-33-90000. Applicant: Tampa General Hospital, Nuclear Medicine Department, Davis Islands, Tampa, Florida 33606. Article: EMI Scanner System with Magnetic Tape System. Manufacturer: EMI Limited, United Kingdom. Intended use of article: The article is intended to be used for research and experiments including phantom evaluations to increase diagnostic capabilities to provide better patient diagnostic services. Along with clinical evaluations will include comparison of other instruments and radiological procedures, such as, the anger camera, electroencephalography, ultrasound, cerebral angiography, and neuro-encephalography. Physicians residents, technologists and nurses will be given formal courses in theory and clinical methodologies of the EMI system. Application received by Commissioner of Customs: August 20, 1975.

Docket number: 76-00086-56-17500. Applicant: Dept. of Interior, U.S. Geological Survey, Water Resources Division, National Center, Stop 430, Reston, Virginia 22092. Article: Two (2) Recording Oceanographic Current Meters, RCM-4. Manufacturer: Ivar Aanderaa Instruments, Norway. Intended use of article: The article is intended to be used to measure and record in situ, precisely, long-term, flow-velocities, water-temperatures, and salinity (conductivity) values in the shallow waters of lakes, waterways, estuaries, and coastal embayments. The data are to be used, in conjunction with other data collected from surface vessels and from the ERTS satellites. These data will provide the input values used to initialize, calibrate, and otherwise verify large scale, mathematical/numerical computer models. The field data together with the data produced by the computer simulation model are used to quantitatively and qualitatively assess the environmental impact of existing features as well as alternative proposed changes to be introduced into the water body under study. Application received by Commissioner of Customs: August 20, 1975.

Docket number: 76-00087-33-07795. Applicant: Washington University School of Medicine, 660 South Euclid

Avenue, St. Louis, Missouri 63110. Arti-

(Catalog of Federal Domestic Assistance Pro-

Avenue, St. Louis, Missouri 63110. Article: Continuous Recording Camera, Model PC-2A. Manufacturer: Nihon Kohden Kogyo Co., Ltd., Japan. Intended use of article: The article is intended to be used in the study of nerve cells in the lamprey spinal cord in which experiments will be conducted to determine synaptic interactions of cells by stimulating one and recording from another. Application received by Commissioner of Customs: August 24, 1975.

Docket number: 75-00092-33-46040. Applicant: State University of New York, Health Sciences Center, Stony Brook, New York 11794. Article: Electron Microscope, Model EM 201 & goniometer stage. Manufacturer: Philips Electronic Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used in carrying out the following research:

(a) Application of the electron microscope heteroduplex method, which is a method to analyze sequence relationships between different nucleic acid elements, to physically map the position of sequences such as duplications, substitutions, deletion, inversions, and translocations.

(b) Investigation into aspects of ribosome function and structure, such as particle surface structure.

(c) Study of actin and myosin fibrils which are found as bundles of cables within the cell.

(d) Study of cellular production of immunoglobulin (Ig) to determine differences in ultrastructure between normal cells and mutants deficient in Ig production.

(e) Investigation of the adsorption process of the bacteriophage P22 using a variety of mutants of this phage and the electron microscope.

(f) Determination of the extent to which structural elements may direct the biological function of ribonucleic acids of mammalian viruses and cells.

(g) Study of the uptake of vaccinia virus in mammalian cells will be undertaken as part of a study of the synthesis and transport of messenger-RNA by vaccinia virus.

(h) Research concerned with the structure and synthesis of the nucleic, especially the properties of the circular DNA's.

In addition, the article is intended to be used in teaching medical, dental, allied health students in addition to graduate and undergraduate students in the Basic Health Sciences curriculum and students enrolled in the Division of Biological Sciences. These students will learn the methodology and techniques of using an electron microscope for visualization of extremely small cellular components, and will learn how to extend the results of these techniques to the solution of research problems. Application received by Commissioner of Customs: August 22, 1975.

UNIVERSITY OF CALIFORNIA,  
SANTA CRUZDecision on Application for Duty-Free Entry  
of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq., 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00523-33-46040. Applicant: University of California, Purchasing Office, Carriage House, Santa Cruz, California 95064. Article: Electron Microscope and accessories, Model JEM 100B/SEG. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used by biologists, chemists and earth scientists for the following investigations:

A. Inhibition of virion maturation by a Ca<sup>++</sup> limited medium; the addition of Ca<sup>++</sup> to the system will be investigated morphologically.

B. Osmotic and salt treatments.

C. Isolation and melting mapping of a fragment of the DNA containing the initiation and termination sites.

D. Observation of cell proliferation patterns; collagen synthetic interaction between epithelial and connective tissues; the influence of mammogenic hormones and structural changes during aging; growth span after transformation by a DNA-containing oncogenic virus.

E. Destruction of presumptive limb muscle tissue prior to differentiation; induction of changes in behavioral plasticity neurons.

F. *In vitro* influence of developmental pathways toward increased bryocytes and non-meliotic cells.

G. Parthenogenetic activation of eggs.

H. Brief heat treatments will be administered at various stages of the life cycle.

I. Induce senescence and place horizontally.

J. Ferritin label antibody to rhodopsin and to plant lectins; preparation of cone outer segments.

K. Observation of rock replicas.

L. Observation of high pressure and temperature deformation; germanate

analogs of the silicate minerals; remanent magnetization of sediments.

M. Observation of ion-thinned foils.

N. Investigation of domain structure in pigeonitic pyroxenes.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. REASONS: The foreign article has a specified resolving power of 3 Angstroms (Å) point to point and is equipped with an eucentric side entry goniometer stage with  $\pm 60^\circ$  tilt, quick change holder which has a guaranteed point to point resolution of 7Å. The most closely comparable domestic instrument is the Model EMU-4C electron microscope supplied by the Adam David Company. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated August 15, 1975 that the characteristics of the foreign article described above are pertinent to the applicant's research studies. HEW further advises that the EMU-4C does not have a scientifically equivalent goniometer stage nor resolution. We, therefore, find that the EMU-4C is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

## UNIVERSITY OF KENTUCKY

Decision on Application for Duty-Free Entry  
of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq., 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00516-96-11700. Applicant: University of Kentucky, Tobacco and Health Research Institute, 109

Kincaid Hall, Lexington, Kentucky 40506. Article: Smoking Machines (4) and Circumference Gauge. Manufacturer: Hehn, Borgwaldt, West Germany. Intended use of article: The article is intended to be used to study the smoke delivery of different types of smoking materials under various scientifically controlled smoking conditions. This work must involve comparisons of free and restricted smoking, changing puff sharps and volumes, and puff intervals and duration. Smoke deliveries from cigarette will be studied with the article.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. REASONS: The foreign article duplicates smoking parameters including puff duration (0.1 to 2.4 seconds) and frequencies. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated August 22, 1975 that the capabilities described above are pertinent to the applicant's intended uses. HEW also advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article that is commercially available for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

## UNIVERSITY OF PENNSYLVANIA

Decision on Application for Duty-Free Entry  
of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq., 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00529-33-86500. Applicant: University of Pennsylvania, 3451 Walnut Street, Philadelphia, Pa. 19174. Article: Microviscosimeter, Model MV-1. Manufacturer: Elscint Ltd., Israel.

Intended use of article: The article is intended to be used in measuring the microviscosity of cells and membranes by the use of fluorescence compounds. It

must be capable of dealing with cells in the living state, it will be used to access the membranes of cancer cells, blood cells, and certain biological fluids.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. REASONS: The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated August 22, 1975 that the applicant intends to use the article in the measurement of the microviscosity of living cell membranes by measuring the depolarization of fluorescence caused by rotation of probe molecules in the sample fluid. HEW advises this specific method of measurement provided by the article is pertinent to the applicant's intended use. HEW also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

## UNIVERSITY OF ROCHESTER

Decision on Application for Duty-Free Entry  
of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 FR 12253 et seq., 15 CFR 701, 1975).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00003-00-00500. Applicant: University of Rochester, Nuclear Structure Research Laboratory, 271 East River Road, Rochester, New York 14627. Article: Rebuilt Accelerator Tube. Manufacturer: Dowlish Developments, United Kingdom. Intended use of article: The article is an essential component to an existing Van de Graaff accelerator which is being used in a variety of nuclear studies.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for

such purposes as this article is intended to be used, is being manufactured in the United States. REASONS: The foreign article provides the specification of a spiral inclined field accelerator tube. The National Bureau of Standards (NBS) advises in its memorandum dated June 26, 1975 (relative to Docket No. 75-00423-00-00500 involving an identical article and the same purposes) that the specification described above is pertinent to the applicant's intended purposes. NBS also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

[File No. 28(74)-1; Case No. 478]

INFORMATION MAGNETICS INC. ET AL.  
Order Denying Export Privileges

In the matter of Information Magnetics, Inc. (Infomag), Goleta, California and Gresham-Infomag, Ltd. Weybridge, Surrey, England (Infomag-UK), respondents.

By charging letter of December 20, 1974, as amended by the letter of February 24, 1975, the above respondents were charged by the Director, Compliance Division, Office of Export Administration, Bureau of East-West Trade, with violations of the regulations issued under the Export Administration Act of 1969, as amended (50 U.S.C. App. §§ 2401-2413, 15 CFR Parts 368 et seq.). It was alleged in substance as follows: That during 1972 and 1973 the respondents made unauthorized exportations of disc heads, subassemblies of disc heads, testing devices, and other magnetic recording and reproducing equipment specially designed for electronic computers; that despite the fact that the respondents had knowledge of U.S. export regulations, these exportations of Commodity Control List items were made without the required export licenses; that the value of the items was in excess of \$800,000; further, that in March of 1974, subsequent to the disclosure of the unauthorized exportations in 1972 and 1973, and after assurances that the respondents would scrupulously observe the require-

<sup>1</sup> This Act has been amended by the Equal Export Opportunity Act, Public Law 92-412, 86 Stat. 644, approved August 20, 1972; and the Export Administration Amendments of 1974, Public Law 93-500, approved October 29, 1974.

be permitted to engage in business dis-

tration prior to the effective date of this

## NOTICES

ments of the Export Administration Regulations, respondent Information Magnetics Corporation ("Infomag") directed its British subsidiary, respondent Information Magnetics Limited ("Infomag-UK"), to make further deliveries of disc heads and other computer equipment valued at approximately \$108,000 to the Bulgarian Legation in London for the purpose of facilitating the ultimate delivery to Bulgaria; that this delivery was effected without the required authorization from the United States and United Kingdom export control authorities; and further, that in October 1974, respondent Infomag exported or caused to be exported from the United States to Poland a ferrite slicing machine and a ferrite dicing machine, having an approximate total value of \$31,000, without obtaining the required final approval from the Office of Export Administration to make such exportation.

On November 13, 1974, the Compliance Division of the Office of Export Administration submitted to the Hearing Commissioner under 15 CFR 388.11 a petition for the issuance of a temporary denial order against respondents Infomag and Infomag-UK. A temporary denial order was promulgated on December 2, 1974, and was extended several times to expire on September 12, 1975. Respondents appeared by Counsel. Upon request by respondents, a number of exceptions to the Temporary Denial Order were granted. Various informal hearings with respect to the Temporary Denial Order and exceptions thereto were held before the Hearing Commissioner.

Subsequently, on August 1, 1975, pursuant to Section 388.10 of the Export Administration Regulations, with the agreement of the Director of the Compliance division and a representative of the Office of General Counsel, there was submitted to the Hearing Commissioner a draft consent settlement proposal. On August 4 and 8, 1975, hearings were held and modifications made to the settlement proposal and draft order. In making the consent settlement proposal and agreeing to this Order, for purposes of this proceeding only, and without the consent settlement proposal or order or determinations stated therein constituting any evidence against or admission by respondents in any proceeding other than under the Export Administration Act the respondents (a) admitted jurisdiction of this forum and the validity of the Export Administration Regulations; (b) neither admitted nor denied that they violated valid export regulations as charged by the Office of Export Administration in the charging letter of December 20, 1974, as amended by the letter of February 24, 1975; (c) consented to the entering of this Order by the Director of the Office of Export Administration, and (d) waived all rights to a hearing on the merits before the Hearing Commissioner, and all rights of administrative appeal from and judicial review of these proceedings and this Order.

The Hearing Commissioner has reviewed the consent settlement proposal

and the material presented in this matter, and has submitted his report together with a recommendation that the revised consent settlement proposal be accepted and this Order issued. On the basis of the Hearing Commissioner's submission and the supporting material, I have determined:

(1) That respondents Infomag and Infomag-UK violated on at least fifty-five occasions §§ 387.2, 387.3, and 387.6 of the United States Export Administration Regulations in that they knowingly delivered or caused to be delivered, directly or via England to Bulgaria and/or other Eastern European countries, contrary to § 374.1 of the United States Export Administration Regulations, U.S.-origin commodities without having obtained the requisite validated export licenses;

(2) That respondents Infomag and Infomag-UK knowingly violated §§ 387.2, 387.3, 387.4, 387.5 and 387.6 of the United States Export Administration Regulations in that after having given assurances, through their attorneys, to the Office of Export Administration that they would scrupulously observe the requirements of the United States Export Administration Regulations, they made or arranged to make further deliveries of disc heads and other computer equipment to the Bulgarian Legation in London for the purpose of facilitating the ultimate delivery of the equipment to Bulgaria; and

(3) That respondent Infomag violated Section 387.6 of the United States Export Administration Regulations in that it knowingly exported or caused to be exported a U.S.-origin ferrite slicing machine and a ferrite dicing machine from the United States to Poland, without having obtained the required final approval for such shipment from the Office of Export Administration.

On consideration of the record in the case and the recommendation of the Hearing Commissioner, and in reliance upon the undertaking by respondents set forth in their consent settlement proposal letter dated July 25, 1975, I accept the consent settlement proposal and it is hereby ordered, That:

I. All outstanding validated export licenses in which the respondents appear or participate, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Administration for cancellation, except as provided in XIV below.

II. Except as otherwise specifically provided in this Order or as otherwise expressly authorized, for a period of five years from December 2, 1974, the respondents are hereby denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data other than purchases or "domestic sales" by respondent Infomag as defined below.

III. For purposes of this Order, the term "domestic sales" is defined for respondent Infomag to include only sales or transfers where:

(1) Title, possession and control pass in the United States to a purchaser other than a related party; and

(2) The purchaser is a domestic end user or is a United States exporter who is acting for his own account and in that transaction is not a broker, freight forwarder, or other party acting as an agent.

IV. Without limitation of the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (a) As a party or as a representative of a party to any validated export license application; (b) in the preparation or filing of any export license application or reexportation authorization, or any document to be submitted therewith; (c) in the obtaining or using of any validated or general export license or other export control document; (d) in the carrying on of negotiations, including the quotation of prices, with respect to or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data in whole or in part exported or to be exported from the United States; and (e) in the financing, forwarding, transporting, or other servicing of such commodities or technical data.

V. The denial of export privileges by this Order shall extend not only to the respondents, but also to their successors, assigns, agents, and employees, and to any person, firm, corporation, or other business organization with which they now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or services related thereto.

VI. On December 2, 1976, without further order of the Office of Export Administration, respondent Infomag shall have its privileges which were suspended pursuant to this Order restored conditionally, and thereafter for the remainder of the denial period said respondent shall be on probation. The basic condition of probation is that said respondent shall fully comply with all requirements of the Export Administration Act of 1969, as amended, and all regulations, licenses, and orders issued thereunder.

VII. Upon a finding by the Director, Office of Export Administration, or such other official as may be exercising the duties now exercised by him, that the respondent(s) have failed to comply with the requirements and conditions of this Order, with the undertaking by respondent Infomag in connection with the consent settlement proposal as set forth in respondents' letter of July 25, 1975 (which will remain in effect for the full five-year denial period), or with any condition of probation, said official, without notice when national security or foreign policy considerations are involved, or with notice if such considerations are not involved, by supplemental order may revoke the probation of respondent Infomag, may revoke all outstanding validated export licenses to which said respondent(s)

may be parties, and/or may deny to said respondent(s) all export privileges for the period of this Order. Such supplemental order shall not preclude the Office of Export Administration from taking such further action for any violation as it shall deem warranted. On the entry of a supplemental order revoking respondent Infomag's probation without notice, it may file objections and request that such order be set aside, and may request an oral hearing as provided in § 388.16 of the Export Administration Regulations, but pending such further proceeding the order of revocation shall remain in effect.

VIII. During the period(s) of denial to respondent(s) of export privileges under this Order, exports of commodities and technical data of any kind by respondent Infomag to Infomag Israel Limited or to its operation in Mexico, are authorized, subject to all OEA licensing requirements, only for the purposes of fabrication and return of a product to the United States. Exportation of tools and capital equipment necessary for the fabrication is authorized, subject to all licensing requirements of the Office of Export Administration. Each exportation by respondent Infomag under this Section will be achieved to the extent applicable under Items Provision 806.00 or 807.00 (or other Item providing comparable treatment) of the Tariff Schedules of the United States, as amended, and to the extent applicable the reimportation will be pursuant to Part 10 of the Customs Regulations (19 CFR 10). Further, each transaction will be handled under customary commercial terms through a reliable and established United States firm acceptable to the Office of Export Administration, and the Office of Export Administration may require respondent Infomag to obtain a certification from such firm as to the bona fide of a particular transaction should they deem it necessary. Further, authorization for export of commodities of any kind by respondent Infomag to Infomag Israel Limited shall be subject to prior receipt and acceptance by the Office of Export Administration of satisfactory assurances that the records and operations of Infomag Israel Limited will be supervised either by the Israeli Government or by a representative of the United States Government to assure full compliance with the Export Administration Regulations and this Order.

IX. During the period(s) of denial to respondent(s) of export privileges under this Order, no exports of commodities or technology of any kind between respondent Infomag and respondent Infomag-UK are authorized. Dissolution of respondent Infomag-UK will be undertaken as soon as possible, but no later than December 31, 1975. Further, respondent Infomag may not establish any new non-United States operations or subsidiaries until after probationary restoration of its export privileges without the prior approval of the Office of Export Administration.

X. After December 1, 1975, without further order of the Office of Export Administration, respondent Infomag shall

be permitted to engage in business discussions with the eight foreign companies specified in the respondent's consent settlement proposal letter of July 25, 1975. No exportations or reexportations of any commodities or technology to these companies, or taking orders from or entering into contracts with these companies for such exportations or reexportations, however, may be made by or on behalf of respondent Infomag until after probationary restoration of respondent Infomag's export privileges.

XI. Except as otherwise provided in this Order, during the period(s) of denial to respondent(s) of export privileges under this Order, no person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Administration, shall do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with the respondents, or whereby the respondents may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States, by, to, or for either respondent; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

XII. Recordkeeping and administrative requirements for respondents will be as stated in the Export Administration Regulations. In addition, respondent Infomag will keep a record of all sales (including date, name of the customer, commodity, quantity of items transferred, and price) made to its domestic customers where, by virtue of information received (such as the direction that the items be packed for export), it appears that the transferee's intention is to export the commodity or to transmit it for the export trade in the form purchased. The Office of Export Administration may from time to time by letter establish further recordkeeping requirements which are reasonably needed to assure compliance with this Order.

XIII. The above consent settlement and this Order are limited to and dispose of the violations of the Export Administration Regulations which: (a) were charged against respondents Infomag and/or Infomag-UK by the charging letter of December 20, 1974, as amended by the letter of February 24, 1975; (b) were admitted to the Office of Export Administration on behalf of respondents Infomag and Infomag-UK; or (c) with respect to the respondents, the officers directors and employees of Infomag except Mr. Daniel L. Gillum, were identified by the Office of Export Adminis-

tration prior to the effective date of this Order. This consent settlement does not include or dispose of any violations by Mr. Gillum personally or any other person or entity, nor does it dispose of any violations other than those specified in XIII A, B, or C above, whether or not charges are presently outstanding, and not action which the Government of the United States may decide to take against any such person or entity is precluded thereby.

XIV. This Order is effective immediately. The presently outstanding Temporary Denial Order in this matter is revoked effective immediately. A copy of this Order shall be served on respondents.

Dated: September 11, 1975.

RAUER H. MEYER,

Director,

Office of Export Administration.

National Institutes of Health

tional Commission on Diabetes, December 1 and 2, 1975 (times below) at the

**Food and Drug Administration**  
[Docket No. 75N-0157; DESI 9397;  
NDA 9-408]

**MEPHENTERMINE SULFATE FOR  
ORAL USE**

**Withdrawal of Approval of New Drug  
Application**

A notice (DESI 9397; Docket No. FDC-D-716 (now Docket No. 75N-0157)) was published in the FEDERAL REGISTER of March 21, 1975 (40 FR 12828) in which the Director of the Bureau of Drugs offered the opportunity for hearing on the proposal to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of NDA 9-408 providing for Wyamine Sulfate Tablets, containing mephentermine sulfate, formerly marketed by Wyeth Laboratories, Division American Home Products Corp., Post Office Box 4299, Philadelphia, PA 19101. The proposed action was not contested and approval of the new drug application is now being withdrawn.

The above notice also included Wyamine Sulfate Elixir (NDA 9-397) containing mephentermine sulfate. As stated in the notice, approval of that NDA had previously been withdrawn on the ground of failure to submit required reports under section 505(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)). The purpose of including Wyamine Sulfate Elixir in the notice of March 21, 1975 was to state that this drug lacks substantial evidence of effectiveness for its various labeled indications and to offer all interested persons the opportunity to request a hearing concerning all issues relating to its legal status.

All drug products which are identical, related, or similar to either Wyamine Sulfate (mephentermine sulfate) Tablets or Elixir, not the subject of an approved new drug application, are covered by the new drug applications reviewed and are subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD-310), 5600 Fishers Lane, Rockville, MD 20852.

Neither the holder of the application nor any other person filed a written appearance of election as provided by said notice. The failure to file such an appearance constitutes election by such persons not to avail themselves of the opportunity for a hearing.

The Director of the Bureau of Drugs, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended; 21 U.S.C. 355), and under authority delegated to him (21 CFR 2.121), finds that on the basis of new information before him with respect to the drug product, evaluated together with the evidence available to him when the application was ap-

proved, there is a lack of substantial evidence that the drug product will have the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in its labeling.

Therefore, pursuant to the foregoing finding, approval of new drug application No. 9-408, and all amendments and supplements applying thereto, is withdrawn effective September 25, 1975.

Shipment in interstate commerce of the above listed product or of any identical, related, or similar product, not the subject of an approved new drug application, will then be unlawful.

Dated: August 22, 1975.

J. RICHARD CROUT,  
Director, Bureau of Drugs.

[FR Doc.75-24423 Filed 9-12-75; 8:45 am]

[Docket No. 75N-0170; DESI 8173]

**MONOBENZONE TOPICAL LOTION**

**Withdrawal of Approval of New Drug  
Application**

A notice (DESI 8173; Docket No. FDC-D-710 (now Docket No. 75N-0170)) was published in the FEDERAL REGISTER of March 21, 1975 (40 FR 12829) in which the Director of the Bureau of Drugs offered an opportunity for hearing on his proposal to issue an order withdrawing approval of the new drug application described below for monobenzene topical lotion. The product has been used for treatment of skin disorders. The basis of the proposed action was the lack of substantial evidence that the product is effective for its labeled indications. The proposed action was not contested and approval of the new drug application is now being withdrawn.

NDA 10-253; Benquin Lotion containing 5% monobenzene; Paul B. Elder Co., 705 East Mulberry Street, P.O. Box 31, Bryan, OH 43506.

All drug products that are identical, related, or similar to the drug product named above, not the subject of an approved new drug application, are covered by the new drug application reviewed and are subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD-310), 5600 Fishers Lane, Rockville, MD 20852.

Neither the holder of the application nor any other person filed a written appearance of election as provided by said notice. The failure to file such an appearance constitutes election by such persons not to avail themselves of the opportunity for a hearing.

The Director of the Bureau of Drugs, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended; 21 U.S.C. 355), and under authority delegated to him (21 CFR 2.121), finds that on the basis of new information before him with respect to the drug product, evaluated

together with the evidence available to him when the application was approved, there is a lack of substantial evidence that the drug product will have the effects it purports or is represented to have under the conditions of use prescribed, recommended or suggested in the labeling.

Therefore, pursuant to the foregoing finding, approval of new drug application No. 10-253 and all amendments and supplements applying thereto, is withdrawn effective September 25, 1975.

Shipment in interstate commerce of the above product or any identical, related, or similar product, not the subject of an approved new drug application, will then be unlawful.

Dated: August 22, 1975.

J. RICHARD CROUT,  
Director, Bureau of Drugs.

[FR Doc.75-24424 Filed 9-12-75; 8:45 am]

[Docket No. 75N-0146; DESI 11470]

**PROTOKYL WITH PENTOBARBITAL  
TABLETS**

**Withdrawal of Approval of Part of New  
Drug Application**

A notice (DESI 11470; Docket No. FDC-D-717 (now Docket No. 75N-0146); NDA 11-469) was published in the FEDERAL REGISTER of March 21, 1975 (40 FR 12832), in which the Director of the Bureau of Drugs offered an opportunity for hearing on his proposal to issue an order withdrawing approval of that part of the new drug application described below pertaining to protokylol hydrochloride with pentobarbital tablets. The basis of the proposed action was the lack of substantial evidence that the product is effective for its labeled indications. The drug has been used in the treatment of bronchial spasm. The proposed action was not contested, and approval of the product is now being withdrawn.

NDA 11-469; Caytine with Pentobarbital Tablets, containing protokylol hydrochloride and pentobarbital; formerly marketed by Lakeside Laboratories, Inc., 1707 E. North Ave., Milwaukee, WI 53201.

All drug products which are identical, related, or similar to the drug named above, not the subject of an approved new drug application, are covered by the new drug application reviewed and are subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD-310), 5600 Fishers Lane, Rockville, MD 20852.

Neither the holder of the application nor any other person filed a written appearance of election as provided by said notice. The failure to file such an appearance constitutes election by such persons not to avail themselves of the opportunity for a hearing.

The Director of the Bureau of Drugs, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505,

**NATIONAL COMMISSION ON ARTHRITIS  
AND RELATED MUSCULOSKELETAL  
DISEASES**

**Notice of Meeting**

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of the National Commission on Arthritis and Related Musculoskeletal Diseases on October 13, 14, and 15, 1975 (places and times given below). All of the meetings will be open to the public.

On October 13 and 14, the Commission will meet at the Penn Harris Motor Inn, Taylor Bridge and U.S. Highway 11-15, Harrisburg, Pennsylvania. From 2:00 p.m. to 5:00 p.m. on October 13, the Commission will have a business and planning meeting. On October 14, from 9:30 a.m. to 1:30 p.m., the Commission will hear testimony from interested members of the public.

On October 15, from 9:30 a.m. to 1:30 p.m., the Commission will meet at the John Hancock Hall, Dorothy Quincy Suite, 180 Berkeley Street, Boston, Massachusetts, to hear public testimony.

Members of the public who wish to appear before the Commission during those times when the Commission is prepared to receive public testimony shall file a written statement or detailed summary of remarks with the Commission before 5:00 p.m. on October 3, 1975. Statements or summaries shall be sent or delivered to Mr. Victor Wartofsky, address below.

The time allotted to each participant will be determined by the Commission Chairman based upon the number of individuals who request an opportunity to make presentations.

Mr. Victor Wartofsky, Chief, Office of Scientific and Technical Reports, NIAMDD, National Institutes of Health, Building 31, Room 9A04, Bethesda, Maryland 20014, (301) 496-3583, will provide summaries of the meeting and rosters of the committee members.

#### WORKSHOP ON MOLECULAR BASIS OF HEPARIN ACTION

##### Notice of Meeting

Notice is hereby given of a meeting of the Workshop on Molecular Basis of Heparin Action, sponsored by the Division of Blood Diseases and Resources, National Heart and Lung Institute, October 30-31, 1975, Conference Center, Sheraton Reston Hotel, Reston, Virginia.

The meeting will be open to the public on October 30 from 8:30 a.m. to 9:00 p.m., and on October 31 from 9:00 a.m. to 4:30 p.m. The purpose of the meeting is to provide for the exchange of information among investigators in the fields of blood coagulation and polysaccharide biochemistry. Special attention will be given to research in the area of mechanism of action of anticoagulant drugs, such as heparin. Attendance by the public will be limited to space available.

Dr. Gary J. Nelson, Blood Diseases Branch, Division of Blood Diseases and Resources, National Heart and Lung Institute, National Institutes of Health, Building 31, Room 4A05, Bethesda, Maryland 20014, (301) 496-5911, will provide additional information.

#### DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration  
[Docket No. N-75-433]

##### CANDLEWOOD LAKES

##### Notice of Hearing

In the matter of Candlewood Lakes, OILSR No. 0-372-48-109, Doc. No. 75-109-IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) notice is hereby given that:

1. Candlewood Lakes, Randolph Holt, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued July 18, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Regis-

#### NOTICES

tration alleging that the Statement of Record and Property Report for Candlewood Lakes, located in Hardeman County, Tennessee, contain untrue statement of material fact or omit to state material facts required to be stated therein as necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 5, 1975, in response to the Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on October 8, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 30, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an ORDER Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: September 3, 1975.

By the Secretary.

##### HIWAN SUBDIVISION

##### Notice of Hearing

In the matter of Hiwan Subdivision, OILSR No. 0-1913-05-170(A) Doc. No. ED-75-11.

Pursuant to 15 U.S.C. 1706(b) and 24 CFR 1720.155(b) notice is hereby given that:

1. Jefferson Land Associates, Hiwan Subdivision, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701, et seq.), received a Notice of Suspension dated July 21, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(b) and 24 CFR 1710.45(a) informing the developer that its Statement of Record submitted June 23, 1975, for Jefferson Land Associates, located in Jefferson County, Colorado, was not effective pur-

suant to the Act, and the regulations contained in 24 CFR Part 1710.

2. The Respondent filed an Answer dated August 8, 1975, in answer to the allegations of the Notice of Suspension dated July 21, 1975.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Suspension.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(b) and 24 CFR 1720.155(b), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Suspension will be held before Judge James W. Mast, Administrative Law Judge, in Room 7146, Department of HUD Building, 451 7th Street, S.W., Washington, D.C., on September 12, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 10, 1975.

5. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the suspension of the Statement of Record, herein identified, shall continue until vacated by order of the Secretary, pursuant to 24 CFR 1720.155.

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: September 3, 1975.

By the Secretary.

##### JACKSONVILLE SOUTH

##### Notice of Hearing

In the matter of Jacksonville South, Unit One, OILSR No. 0-2653-09-794 Doc. No. 75-119 IS.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. Jacksonville South, Unit One, Anthony J. Trella, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1701 et seq.), received a Notice of Proceedings and Opportunity for Hearing issued August 4, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Jacksonville South, located in Miami, Florida, contain untrue statement of material fact or omit to state material facts required to be stated therein as necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 22, 1975 in response to the

#### NOTICES

Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on September 23, 1975, at 10:00 a.m.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before September 16, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an ORDER Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: September 3, 1975.

##### OUTDOOR RESORTS AT ORLANDO

##### Notice of Hearing

In the matter of Outdoor Resorts at Orlando, OILSR No. 0-1876-09-557 Doc. No. 75-88.

Pursuant to 15 U.S.C. 1706(d) and 24 CFR 1720.160(d) Notice is hereby given that:

1. Outdoor Resorts at Orlando, E. Randall Henderson, President, its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Pub. Law 90-448) (15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) of Proceedings and Opportunity for Hearing issued July 16, 1975, which was sent to the developer pursuant to 15 U.S.C. 1706(d), 24 CFR 1710.45(b)(1) and 1720.125 informing the developer of information obtained by the Office of Interstate Land Sales Registration alleging that the Statement of Record and Property Report for Outdoor Resorts at Orlando, located in the state of Florida, contain untrue statement of material fact or omit to state material facts required to be stated therein as necessary to make the statements therein not misleading.

2. The Respondent filed an Answer received August 5, 1975, in response to the

Notice of Proceedings and Opportunity for Hearing.

3. In said Answer the Respondent requested a hearing on the allegations contained in the Notice of Proceedings and Opportunity for Hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160(d), it is hereby ordered, That a public hearing for the purpose of taking evidence on the questions set forth in the Notice of Proceedings and Opportunity for Hearing will be held before Judge James W. Mast, in Room 7146, Department of HUD, 451 7th Street, S.W., Washington, D.C., on October 9, 1975 at 10:00 A.M.

The following time and procedure is applicable to such hearing: All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before October 2, 1975.

6. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an ORDER Suspending the Statement of Record, herein identified, shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

Dated: September 3, 1975.

**Materials Transportation Bureau  
GREAT LAKES CHEMICALS CORP. ET AL.  
Special Permits Issued**

Pursuant to 49 CFR 170.15 of the Department's Hazardous Materials Regulations, issued May 22, 1968 (33 FR 8277), following is a list of new DOT Special Permits upon which action was completed during August 1975.

Special Permit No.	Issued To—Subject	Mode or modes of transportation
SP 7010	Great Lakes Chemicals Corporation, West Lafayette, Ind., and others to ship 100 lbs. of lead in lead lined portable tanks built to DOT Specification 33 and 130 standards.	Cargo Vessel, Motor Vehicle
SP 7013	Garbord Cryogenics Division, Carpenter Technology Corporation, to ship liquid helium in a non-DOT specification nitrogen insulated, containerized portable tank having water capacity of 9,684 gallons.	Cargo Vessel, Motor Vehicle, Rail Freight
SP 7027	Horde Chemical, Columbus, Ohio, to ship certain Class B poisonous liquids in two ASME Code portable tanks, each having a capacity of 1,300 gallons and minimum design pressure of 250 psig.	Motor Vehicle
SP 7028	Misco Corporation, Baltimore, Maryland, to ship certain chloroformates in 5-gallon DOT Specification 34 polyethylene containers.	Cargo Vessel, Motor Vehicle
SP 7030	Shell Oil Company, Houston, Texas, to ship a Corrosive liquid in 30-gallon, tight-head steel drums complying with DOT Specification 17C except for marking.	Cargo Vessel
SP 7031	E. I. du Pont de Nemours & Co., Inc., Wilmington, Delaware, to ship High explosives in a fiberboard box having end holes and complying with DOT Specification 121 except joints are formed and flaps sealed by hot melt adhesive.	Cargo Vessel, Motor Vehicle, Rail Freight
SP 7032	Pollard Corporation, Needham Heights, Massachusetts, to ship a Corrosive solid in non-DOT specification removable lead drums made of 16-gauge stainless steel, having 55 gallon rated capacity, and enclosed with a plywood cover.	Cargo Only Aircraft
SP 7033	McDonnell Douglas Astronautics Co., to ship Nitrogen in a non-DOT specification pressure vessel (hydraulic accumulator) packed in a steel explosion-proof shelter.	Motor Vehicle
SP 7034	E. I. du Pont de Nemours & Co., Inc., Wilmington, Del., to ship Pentaborane, solid in DOT Specification 36 metal portable tanks.	Motor Vehicle
SP 7036	McDonnell Douglas Astronautics Co., Huntington Beach, Calif., to ship Anhydrous ammonia in non-refillable aluminum heat pipes.	Cargo Vessel, Motor Vehicle, Passenger-Carrying Aircraft, Cargo Only, Aircraft, Rail Freight

**ENVIRONMENTAL PROTECTION  
AGENCY**

[OPP-33000 317 & 318 & 319; FRL 430 61]

**NOTICE OF RECEIPT OF APPLICATIONS  
FOR PESTICIDE REGISTRATION**

**Data To Be Considered in Support of  
Applications**

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of Section 3(c) (1) (d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by each applicant will be available for examination at the Environmental Protection Agency, Room EB-31, East Tower, 401 M Street, SW, Washington, DC 20460.

On or before October 15, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under Section 3(c) (1) (D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street, SW, Washington, DC 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after October 15, 1975.

Dated: September 8, 1975.

JOHN B. RITCH, JR.,  
Director Registration Division.

#### WATER POLLUTION PREVENTION AND CONTROL

##### Addition to the List of Categories of Sources

Section 306(b)(1)(A) of the Federal Water Pollution Control Act, as amended October 18, 1972 (Pub. L. 92-500), directs the Administrator of the Environmental Protection Agency to publish, and from time to time revise a list of categories of sources which shall, at the minimum, include those listed in section 306(b)(1)(A). As soon as practicable, but in no case more than one year after the inclusion of a category of sources in such list, the Administrator is required to propose and publish regulations establishing Federal standards of performance for new sources within such categories. The original list of 27 source categories was published January 16, 1973 (38 FR 1624). Standards of performance have been promulgated for all 27 source categories.

The Administrator, after evaluating available information, has determined that oil and gas extraction is an additional category of point sources which meet the above requirements. Evaluation of other point source categories is in progress, and the list will be supplemented from time to time as the Administrator deems appropriate. Accordingly, notice is given that the Administrator, pursuant to section 306(b)(1)(A) of the Act amends the list of categories of sources as follows:

##### List of Categories of Sources

31. Oil and Gas Extraction

Proposed effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources applicable to the above point source categories appear

#### FEDERAL COMMUNICATIONS COMMISSION

##### INDUSTRY ADVISORY COMMITTEE

###### Meeting

SEPTEMBER 5, 1975.

A meeting of the Industry Advisory Committee to the Federal Communications Commission Steering Committee for the 1979 General World Administrative Radio Conference is scheduled to be held on Monday, September 29, 1975, at 10:00 A.M. in Room 8210 of the Commission's offices located at 2025 M Street, N.W., Washington, D.C.

This will be an organizational meeting of the Industry Advisory Committee wherein the Commission's conference preparatory structure will be explained to the Committee, as well as an outlining of the Advisory Committee's role in this structure. Membership on the Committee is limited to Commission invitation; however, attendance at this meeting will be open to the general public and any written comments will be accepted.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] VINCENT J. MULLINS,  
Secretary.

[FR Doc.75-24450 Filed 9-12-75; 8:45 am]

#### FEDERAL ENERGY ADMINISTRATION

##### ENVIRONMENTAL ADVISORY COMMITTEE

###### Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given that the Environmental Advisory Committee will meet Monday, September 29, 1975, at 9 a.m., Room 7132, 12th & Pennsylvania Avenue, N.W., Washington, DC.

The Committee was established to provide advice and information to FEA concerning the environmental aspects of FEA policies and programs.

The agenda for the meeting is as follows:

1. Status Report on PIES II. Updating the Project Independence Evaluation System
2. Reports and Recommendations from Subcommittees
  - a. Energy Conservation
  - b. OCS/Energy Facility Siting
  - c. Coal Utilization/Air Quality
  - d. Transportation
  - e. Coal Leasing and Mining

Subcommittees may meet informally in Washington, the preceding evening, at the discretion of the Subcommittee chairmen. Subcommittees will meet at 2 p.m., September 29, for background discussions with FEA officials. For further information on subcommittee activities, call Lois Weeks, Advisory Committee Management Officer at (202) 961-7022.

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Advisory Committee Management Officer, (202) 961-7022, at least 5 days before the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

Minutes of the meeting will be made available for public inspection at the Federal Energy Administration, Washington, D.C.

Issued at Washington, D.C. on September 9, 1975.

ROBERT E. MONTGOMERY, Jr.,  
General Counsel.

[FR Doc.75-24359 Filed 9-10-75; 8:56 am]

#### LP-GAS INDUSTRY ADVISORY COMMITTEE

##### Change in Meeting Place

This notice is given to advise of a change in the location of the meeting of the LP-Gas Industry Advisory Committee. The Committee will meet Friday, September 26, 1975, at 10:00 a.m. in Room 2105, 2000 M Street, N.W., Washington, D.C. rather than at 12th and Pennsylvania Avenue as previously announced. A Notice of Meeting was published in the issue of September 4, 1975 (40 FR 40877).

Issued at Washington, D.C. on September 9, 1975.

ROBERT E. MONTGOMERY, Jr.,  
General Counsel.

#### FEDERAL POWER COMMISSION

[Docket No. RP74-94-3]

##### ARKANSAS LOUISIANA GAS CO.

###### Order Granting Interim Relief Pendente Lite

AUGUST 20, 1975.

On June 27, 1975, the City of Winfield, Kansas (Winfield) filed in the above docket a petition pursuant to Section 1.7 of the Commission's Rules of Practice and Procedure which requested interim

relief *pendente lite* pertaining to its request concerning the shifting of gas volumes between Winfield's two municipal electric generating plants which are served by Arkansas Louisiana Gas Company (Arkla). In connection with this, Winfield had also filed on March 31, 1975 a petition for the transfer of natural gas from its less efficient generating plant (Plant No. 1) to its more efficient generating plant (Plant No. 2). That petition was set for hearing by our "Order Providing for Hearing, Granting Intervention, and Prescribing Procedures," issued June 10, 1975 in the instant docket. Hearings have been concluded on the permanent relief request and the proceeding is now in the briefing stage.

Following submission of Winfield's filing for interim relief, Arkla filed an answer thereto alleging that the granting of such interim relief would amount to a prejudgment of the issues in the permanent relief request. In support thereof, Arkla cites our order issued February 14, 1975, in *Tennessee Gas Pipe Line Company, et al.*, Docket No. RP74-42 pertaining to an interim relief request by Pennsylvania Gas and Water Company. In addition, Arkla alleges that because there is no showing of any emergency or irreparable injury to life or property, no interim relief should be granted, especially in light of noncompliance with Order No. 467-C.

Winfield's petition indicates that it has two municipal electric generating plants which each have a maximum daily entitlement of 3,000 Mcf. Winfield claims that because of this ceiling, it must sometimes use volumes in its less efficient plant on days when electric demand is high but that such use results in 50% more gas being burned to generate the same amount of electricity in the old plant. As a result, Winfield desires interim authorization to take its allocated volumes on any given day in a manner which permits the most efficient use of the gas it receives. However, Winfield takes the position that any permission it receives to pierce its contractual entitlement at the more efficient plant should be conditioned to permit its curtailment classification to remain as Priority 4, despite the fact that it would be taking volumes at the more efficient plant in amounts which would otherwise place it in Priority 5 of Arkla's currently effective curtailment plan.

Notwithstanding Arkla's response to Winfield's request for interim relief, we believe such relief is warranted on a *pendente lite* basis. It is this Commission's desire to promote the conservation of natural gas whenever and wherever possible and we believe Winfield's request would accomplish that result *vis a vis* the operation of its two power plants. We are mindful that this decision may appear as a prejudgment of this case, but we will indicate herein that the disposition of this interim relief petition shall in no way affect the ultimate determination of the factual and legal issues presented by the petition for permanent relief. Indeed, while we are permitting interim relief

without a change of the Priority 4 classification of Winfield's gas receipts from Arkla, it should be noted that the issue of whether or not relief should be granted while allowing Winfield's plant to remain in Priority 4 is a key issue in the permanent relief request. This order in no way affects our ultimate disposition of that issue. In addition, the actual facts of record developed in the now concluded hearing will form our basis for deciding whether, in fact, Winfield would be conserving gas by receiving transfer authorization. We are providing interim relief herein based on the allegations of gas savings by Winfield so that if ultimately, such a saving is found to be a matter of fact in the hearing record, Winfield will have been saving gas even during the pendency of the proceeding, which we consider desirable. Even if the saving is not borne out by the ultimate facts, the granting of relief herein does not affect Arkla's allocation of gas to Winfield and thus does not deprive other users on Arkla's system during the period covered by this order.

Finally, we do not consider Winfield's petition for interim relief as a petition for extraordinary relief *per se*. Winfield is not asking for additional volumes over and above its curtailment allocation or for firm assurance of certain volumes but is merely requesting authorization to take its curtailed volumes in whatever manner it desires. Therefore, no showing of emergency or irreparable injury must be made before relief is authorized. The "relief" request here is merely a device to minimize consumption of natural gas and is not intended to give Winfield additional volumes of gas to offset potential harm or meet emergencies.

##### The Commission finds:

(1) It is in the public interest to permit Winfield to transfer gas entitlements from its municipal power plant No. 1 to power plant No. 2, provided it takes, in the aggregate no more gas during the period of this relief than it was otherwise entitled to absent relief under the operation of Arkla's presently effective curtailment plan.

(2) It is in the public interest that the period for this interim relief commence with the issuance of this order and terminate with the issuance of a final order disposing of the issues raised in Winfield's petition for permanent transfer of volumes.

(3) It is not appropriate at this time to decide the proper priority classification the deliveries of gas under scrutiny here.

##### The Commission orders:

(A) Winfield is hereby permitted to transfer its gas entitlements from its municipal power plant No. 1 to its power plant No. 2, provided it takes, in the aggregate no more gas during the period of this relief than it was otherwise entitled to absent relief under the operation of Arkla's currently effective curtailment plan.

(B) The period for interim relief will commence with the issuance of this order and terminate with the issuance of a final order disposing of the issues

raised in Winfield's petition for permanent transfer of volumes.

(C) Winfield shall retain its Priority 4 status for the gas receipts to its municipal power plants during the period of this grant of relief.

By the Commission:

[SEAL] KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-24390 Filed 9-12-75; 8:45 am]

[Docket No. E-8302]

#### BANGOR HYDRO-ELECTRIC CO.

##### Order Granting Intervention

SEPTEMBER 3, 1975.

On June 19, 1975, Bangor Hydro-Electric Company (Bangor) tendered for filing a Rate Schedule for Wheeling Service and supporting material. Notice of Bangor's filing was issued by the Commission on July 30, 1975, with protests and petitions to intervene due on or before August 12, 1975.

A timely protest and petition to intervene was filed by Eastern Maine Electric Cooperative, Inc. Having reviewed the above petition to intervene, we believe that the petitioner has sufficient interest in the proceedings to warrant intervention.

##### The Commission finds:

It is desirable and in the public interest to allow the above-named petitioner to intervene.

##### The Commission orders:

(A) The above-named petitioner is hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission; *Provided, however*, that participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, that the admission of such intervenor shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission:

[SEAL] KENNETH F. PLUMB,  
Secretary.

#### CENTRAL HUDSON GAS & ELECTRIC CORP. ET AL.

##### Notice of Application

SEPTEMBER 4, 1975.

In the matter of Central Hudson Gas & Electric Corporation, Consolidated Edi-

#### NOTICES

son Company of New York, Long Island in accordance with the Commission's

[Docket No. CP76-74]

#### NOTICES

petition to intervene or a protest in accordance with the requirements of the

issuance of the notes will be used to reimburse Applicant's treasury and for

Any person desiring to be heard or to make any protest with reference to

son Company of New York, Long Island Lighting Company, New York State Electric & Gas Corporation, Orange & Rockland Utilities.

Take notice that on August 20, 1975, Central Hudson Gas & Electric Corporation, 284 South Avenue, Poughkeepsie, New York 12602; Consolidated Edison Company of New York, Inc., 4 Irving Place, New York, New York 10003; Long Island Lighting Company, 250 Old Country Road, Mineola, New York 11501; New York State Electric & Gas Corporation, 4500 Vestal Parkway East, Binghamton, New York 13902; and Orange and Rockland Utilities, Inc., 75 West Route 59, Spring Valley, New York 10977 ("Applicants") filed a Joint Application pursuant to Section 203 of the Federal Power Act (16 U.S.C. §243(b)), seeking authority to acquire up to the number of shares of the capital stock of Empire State Power Resources, Inc. (the "Company"), set forth opposite their respective names below at a price of \$1,000 per share:

Central Hudson Gas & Electric Corp.	110
Consolidated Edison Co. of New York, Inc.	400
Long Island Lighting Co.	400
New York State Electric & Gas Corp.	400
Orange and Rockland Utilities, Inc.	90

Empire State Power Resources, Inc. is a corporation organized and existing under the Transportation Corporations Law of the State of New York. The Company has been formed by seven electric utility companies in New York State to acquire, construct, own and operate large-scale electric generating facilities within the State of New York. The seven companies are the Applicants, Niagara Mohawk Power Corporation and Rochester Gas and Electric Corporation. The Company will be owned by the seven electric utility companies and will supply power to them for resale to their customers.

The shares of capital stock of the Company described above will be issued and sold to defray in part the costs of the organization of the Company, to finance expenditures for engineering, siting, planning, legal, financial and other studies, and to finance the preparation and filing of various regulatory applications with respect thereto, and to invest in short-term securities those proceeds which are not immediately required.

Any person desiring to be heard or to make any protest with reference to said Application should on or before September 26, 1975, file with the Federal Power Commission, 225 North Capitol Street, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Any person wishing to participate as a party in any hearing therein must file petitions to intervene

## NOTICES

in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-7523]

## CENTRAL TELEPHONE &amp; UTILITIES CORP.

## Notice of Fifth Supplement to Application

SEPTEMBER 4, 1975.

Take notice that on August 22, 1975, the Central Telephone & Utilities Corporation (Applicant) filed a fifth supplement to its application pursuant to Section 204 of the Federal Power Act seeking authority to extend to not later than December 31, 1977 the final maturity date of short-term unsecured promissory notes to be authorized to be issued not later than December 31, 1976 in an aggregate principal amount at any one time outstanding of \$85,000,000.

Applicant is incorporated under the laws of the State of Kansas, with its principal business office in Lincoln, Nebraska. It is engaged in electric utility operations in the southeastern part of Colorado and the central and western portions of the State of Kansas.

The proceeds from the issuance of short-term notes are to provide temporary funds for the construction, completion, extension or improvement of facilities of Applicant and for advances to an investment in subsidiaries of Applicant to be used for the construction and improvement of facilities of such subsidiaries pending permanent financing. The estimated construction programs for the above purposes for 1975, 1976 and 1977 are \$131,000,000, \$150,000,000 and \$171,000,000, respectively.

Any person desiring to be heard or to make any protest with reference to said fifth supplement to application should on or before September 22, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The fifth supplement to the application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-24376 Filed 9-12-75; 8:45 am]

[Docket No. CP76-74]

## COLUMBIA GAS TRANSMISSION CORP.

## Notice of Application

SEPTEMBER 4, 1975.

Take notice that on September 2, 1975, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, filed in Docket No. CP76-74 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Lukens Steel Company (Lukens) and Vistron Corporation (Vistron) from November 1, 1975, to April 1, 1976, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant requests authorization to transport up to 20,000 Mcf of gas per day for Lukens, to be received from Texas Eastern Transmission Corporation (Texas Eastern) at an existing interconnection in Warren County, Ohio, and to be delivered to Columbia Gas of Pennsylvania, Inc., at an interconnection in Chester County, Pennsylvania, which would deliver the gas to Lukens. Applicant further requests authorization to transport up to 40,000 Mcf of gas per day for Vistron from the aforementioned interconnection with Texas Eastern to a delivery point in Allen County, Ohio, for delivery to Columbia Gas of Ohio, Inc., which would deliver the gas to Vistron.

The proposed transportation service would be provided to Lukens pursuant to a gas transportation agreement dated August 29, 1975, and to Vistron pursuant to a gas transportation agreement dated September 2, 1975. Both contracts call for a charge by Applicant of 14.0 cents per Mcf at 14.73 psia for gas delivered to Applicant through December 14, 1975, and 22.05 cents per Mcf thereafter. Applicant would further retain for company use and unaccounted for gas 3.6 percent of the gas delivered by Texas Eastern.

The proposed service is stated to be subject to the limits of Applicant's pipeline capacity and its service obligations to its CD, WS, SGES, G and SGS customers. Lukens and Vistron have contracted with Mobil Oil Corporation for the purchase of the gas to be transported from non-federal domain sources. The amount of gas to be purchased is never to exceed the volume of high-priority gas that is being curtailed by the purchasers' suppliers. It is stated that all gas transported would be for high priority end uses. Lukens' gas is said to be used in the melting, rolling, and heat treating of carbon and low alloy steel plates, and Vistron's gas is said to be used in the production of ammonia for industrial and agricultural purposes.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 26, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a

petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-24377 Filed 9-12-75; 8:45 am]

[Docket No. ES76-6]

## COMMUNITY PUBLIC SERVICE CO.

## Notice of Application

SEPTEMBER 4, 1975.

Take notice that on August 15, 1975, Community Public Service Company (Applicant) filed an application pursuant to Section 204 of the Federal Power Act seeking authorization to issue short-term unsecured promissory notes to commercial banks and commercial paper dealers in the maximum principal amount of \$15,000,000 outstanding at any one time. All notes are to be issued on or before December 31, 1976, and bear final maturities of on or before December 31, 1977.

Applicant is incorporated under the laws of the State of Texas, with its principal business office at Fort Worth, Texas and is authorized to do business in the States of Texas and New Mexico. Applicant is engaged primarily in the generation, purchase, distribution and sale of electric energy and the distribution and sale of natural gas.

The short-term promissory notes proposed will bear interest at the rate in effect for such loans on the dates of issue in the localities of the lending banks. The notes issued to commercial paper dealers will bear interest at the best available rates for comparable commercial paper.

The proceeds to be derived from the

## NOTICES

issuance of the notes will be used to reimburse Applicant's treasury and for the construction, completion, extension and improvement of facilities.

Any persons desiring to be heard or to make any protest with reference to said Application should on or before September 19, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file and available for public inspection.

KENNETH F. PLUMB,  
Secretary.

## Notice of Application

SEPTEMBER 4, 1975.

Take notice that on August 22, 1975, the Kentucky Utilities Company (Applicant), filed an application pursuant to Section 204 of the Federal Power Act seeking authorization to issue short-term unsecured promissory notes to commercial banks and to commercial paper dealers in the aggregate principal amount not exceeding \$80 million outstanding at any one time. All notes are to mature on or before December 31, 1977.

Promissory notes issued to commercial banks will mature not more than twelve months from the date of issue and will bear interest at the prime rate at such bank on the date such borrowing is made or the applicable prime rate or rates of interest prevailing at such bank during the term of the notes.

Promissory notes issued to commercial paper dealers will have varying maturities of not more than nine months from the date of issue; and may be issued and sold in varying amounts or denominations of not less than \$50,000 each; and will be issued and sold at a discount which will not exceed the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and maturity sold by issuers thereof to commercial paper dealers.

Applicant is incorporated under the laws of the State of Kentucky, with its principal business office at Lexington, Kentucky, and is engaged in the electric utility business in central, southeastern and western Kentucky.

The proceeds from the issuance of the notes will be added to the general funds of the Applicant and used principally to finance, temporarily, a part of the Company's 1975, 1976, and 1977 construction expenditures.

Any person desiring to be heard or to make any protest with reference to said Application should on or before September 22, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,  
Secretary.

## MARATHON OIL CO. ET AL.

## Notice of Extension of Procedural Dates

SEPTEMBER 4, 1975.

In the matter of Marathon Oil Company, Docket No. CI75-641; Louisiana Land Offshore, Docket No. CI75-642; Exploration Company, Inc., Texas Eastern Exploration Co., Docket No. CI75-648; Texaco, Inc., Docket No. CI75-680; Tenneco Oil Company, Docket No. CI75-746 & CI75-747; Tenneco Exploration, Ltd., Docket No. CI75-748.

On August 25, 1975, Tenneco Oil Company (Tenn-Oil) and Tenneco Exploration (Tenn-Ex) filed a motion to extend the procedural dates set by order issued July 24, 1975, in the above-designated matter. On August 28, 1975, Tenn-Oil and Tenn-Ex filed a supplement to the above motion.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Testimony, September 22, 1975. Hearing, October 15, 1975 (10:00 a.m. EDT).

MARY B. KIDD,  
Acting Secretary.

## EL PASO NATURAL GAS CO.

## Notice of Modification of Date of Hearing

AUGUST 29, 1975.

On August 13 and 14, 1975, El Paso Natural Gas Company (El Paso) and Pennzoil Producing Company (Pennzoil) filed motions to extend the procedural dates fixed by order issued July 16, 1975, in the above matter. By notice issued August 18, 1975, the date for filing direct testimony was extended but action on the motion to extend the date of the hearing was deferred.

On August 21, 1975, Beren Corporation filed an answer to the above-designated

[Docket No. RP75-96]

**MICHIGAN-WISCONSIN PIPE LINE CO.  
Order Granting Interventions**

SEPTEMBER 3, 1975.

On April 30, 1975, Michigan Wisconsin Pipe Line Company (Mich Wis) tendered for filing proposed changes in its FPC Gas Tariff which would increase its rates to jurisdictional customers by \$65,992,505 per year, based on the test year ended January 31, 1975. Notice of Mich Wis' filing was issued May 8, 1975 with all comments, protests and petitions to intervene due on or before May 21, 1975.

On May 19, 1975 a timely petition to intervene was jointly filed on behalf of Wisconsin Michigan Power Company and Wisconsin Natural Gas Company.

On May 19, 1975 a timely petition to intervene filed on behalf of these petitioners, we find good cause exists to grant the petition to intervene.

**The Commission finds:**

Good cause exists to grant the petition to intervene filed on behalf of Wisconsin Michigan Power Company and Wisconsin Natural Gas Company.

**The Commission orders:**

(A) The petition to intervene filed on behalf of Wisconsin Michigan Power Company and Wisconsin Natural Gas Company is hereby granted and those parties are hereby permitted to intervene in this proceeding, subject to the Rules and Regulations of the Commission; *Provided, however*, that the participation of such intervenors shall be limited to matters affecting the rights and interests specifically set forth in the petition to intervene; and *Provided, further*, that the admission of such intervenors shall not be construed as recognition that they may be aggrieved by any order or order issued by the Commission in this proceeding.

(B) The Secretary shall cause prompt publication of this order to be issued in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

Secretary.

[FR Doc.75-24381 Filed 9-12-75;8:45 am]

[Docket Nos. RP68-17, RP69-36]

**NATURAL GAS PIPELINE CO. OF AMERICA**

**Notice of Refund Report**

SEPTEMBER 4, 1975.

On August 18, 1975, Natural Gas Pipeline Company of America (Natural) filed in the above-referenced dockets a verified report showing the distribution of refunds paid to jurisdictional customers on June 27, 1975. The refunds total \$3,763,303.45. In its report, Natural states as follows:

This refund was made as a result of Natural's recent settlement with the Internal Revenue Service for the tax years 1969 and 1970 under which depreciation on rights-of-way, construction damages, and clearing costs were held an allowable tax deduction. Since Natural's sales rates in effect during the period covered by the tax settlement were designed to protect against possible loss of these tax issues, the favorable settlement of that issue triggered refund obligations under specific rate settlement provisions, under FPC orders approving rate settlements, and through mutual understanding among the parties during the rate settlement negotiations. Rates in effect under approved settlements in Docket Nos. RP68-17 and RP69-36 span the refund period.

The refundable amounts, as shown on the enclosed supporting schedules, were computed on the basis of actual excess revenues collected. Interest was computed at an annual interest rate of 6% as specified in the applicable rate settlement agreements. The refunds due sales customers were calculated by multiplying the actual billed units by the unit reduction in rates attributable to the protection factor built into the rates charged.

Natural's S-1 Storage Service customers were billed during the period covered by the 1969-70 tax settlement under an actual cost of service basis which included accrued booked Federal income taxes with the tariff proviso that adjustments would reflect the actual income tax expense paid by Natural. The amount of the refunds paid to the S-1 Storage customers is the difference between the amounts billed the customers

for income taxes and the actual tax liability incurred by Natural as a result of the 1969-70 tax settlement, pyramided on a refund basis. Interest was computed at the same annual interest rate as that used in the refund to sales customers.

Any person desiring to be heard and to make any protest with reference to said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before September 24, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Natural's filing is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.75-24382 Filed 9-12-75;8:45 am]

[Docket No. RP74-88]

**NORTH PENN GAS CO.**

**Notice of Filing of Refund Report and Revised Tariff Sheet**

SEPTEMBER 3, 1975.

Take notice that on August 25, 1975, North Penn Gas Company (North Penn) tendered for filing the Twenty-Second Revised Sheet No. PGA-1 to its FPC Gas Tariff, First Revised Volume No. 1. The filing is made pursuant to the settlement agreement approved in the above-referenced docket. North Penn requests that the revised sheet be made effective August 1, 1975.

Also included in the filing was a summary of refunds and supporting computations which North Penn intends to pay its jurisdictional customers on September 15, 1975.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 22, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

**NOTICES**

[Docket Nos. RP71-119, RP74-31-25]

**PANHANDLE EASTERN PIPE LINE CO.  
(OKIE PIPE LINE COMPANY)**

**Order Approving Stipulation and Agreement in Settlement of Proceeding**

SEPTEMBER 3, 1975.

On January 8, 1975, Okie Pipe Line Company (Okie) filed a petition for extraordinary relief pursuant to § 1.7(b) of the Commission's rules of practice and procedure requesting relief from the natural gas curtailments imposed under the provisions of the presently effective 467-B interim plan which was filed by Panhandle Eastern Pipe Line Company (Panhandle) on November 6, 1973.

Okie owns and operates a gas liquids pumping station located at Liberal, Kansas. The station operates at stand-by natural gas powered engine used to pump liquids in the event of failure of primary electric pumps. Okie also owns homes at Liberal Station used by company employees, each of which relies upon natural gas for heating and cooking. Panhandle is the source of supply of Liberal Station.

Okie alleges that it was advised by Panhandle that pursuant to its effective curtailment plan that deliveries to the Liberal Station would be completely curtailed during the course of the winter months.

Okie asserts that the projected curtailment would present an emergency situation at its Liberal Station in the event of a power failure. If auxiliary power is needed, there would be no alternative source to turn to at this station. In addition, Okie's employees will have no source of heating during the winter.

A formal hearing with respect to this matter commenced and was terminated on April 23, 1975. During the course of this hearing, the participating parties tendered the following Stipulation and Agreement to the Presiding Administrative Law Judge for certification to the Commission as resolution to this proceeding:

1. The following natural gas requirements of the Okie Pipe Line Company for heating and other residential purposes at its Liberal Pumping Station shall be considered as Category 1 volumes and shall be subject to curtailment along with other Category 1 volumes: January 1000; February 800; March 800; April 600; May 500; June 300; July 300; August 300; September 450; October 450; November 450; December 700. (Volumes in Mcf)

2. The natural gas requirements of the Okie Pipe Line Company at its Liberal Pumping station for:

(a) Emergency standby pumping purposes in the event of actual failure of its primary electric pump or actual electrical power failure, and for

(b) Actual peak pumping periods shall be considered Category 2 deliveries. Category 2 volumes taken for emergency standby pumping purposes shall be made available by Panhandle Eastern Pipe Line Company in an amount not to exceed 100 Mcf per day for the duration of

each equipment failure or power failure. In respect to peak pumping volumes, Okie shall be limited to an amount not to exceed 100 Mcf per day for no more than 5 days in each of the months of December through March, provided, however, that such volumes shall be subject to curtailment along with all other Category 2 volumes.

3. To the extent that Okie invokes any part of the provisions of paragraph 2, gas shall be made available by Panhandle Eastern Pipe Line Company upon 24 hours notice by Okie Pipe Line Company of an equipment failure, power failure or peak pumping period.

4. The Okie Pipe Line Company shall file a semiannual report, verified by an officer of the Company, with the Federal Power Commission each April 1st and October 1st summarizing the gas taken as a result of each power or equipment failure and describing the nature of each such power failure or equipment failure and the volumes taken and repaid.

5. Okie shall be required to repay all volumes taken pursuant to the provisions of paragraph 2 hereof from the volumes of gas allocated to Okie under Panhandle's effective curtailment plan so that all extraordinary relief volumes are repaid annually by October 31st of each year except as to volumes taken in October which shall be repaid the following year.

6. This stipulation will be continued in effect as long as an interim plan established by a Commission Order of November 6, 1973, in Docket No. RP71-119 remains effective.

7. This stipulation shall not constitute a waiver of any party's rights in Docket No. RP71-119 to contest the categorization of any volumes.

8. This stipulation is made solely to settle issues raised in Okie Pipe Line Company's petition for extraordinary relief and is without prejudice to its rights to apply for extraordinary relief in any new or additional curtailment plan put into effect by Panhandle Eastern Pipe Line Company (Tr. 32-36).

The proposed Stipulation and Agreement offered in settlement of the above-styled proceeding was noticed on May 14, 1975, and provided any interested party with the opportunity of commenting with respect to the provisions proposed therein. Only two comments were filed relative to the proposed Stipulation and Agreement.

General Motors in its comments only partially opposed the proposed Stipulation and Agreement in that it indicated that it did not oppose paragraph (1) of the proposed agreement, which made provision to provide for the residential requirements of Okie's employees at its Liberal Compressor Station.

The City of Indianapolis while not opposing the aforementioned Stipulation and Agreement offered certain observations and comments. General Motors Corporation filed comments in opposition to the proposed Stipulation and Agreement.

The only opposition raised to the aforementioned Stipulation and Agreement appears to be restricted to the contentions urged by General Motors that relief for emergency standby pumping purposes and actual peak day pumping requirements should not be provided. However, the volumes involved are *de minimis* and the Stipulation and Agreement makes provisions for full pay-back of any of the small quantities of gas that might be required whenever Okie finds itself in an operational emergency of the nature set forth in the aforementioned Stipulation and Agreement. Accordingly, the objections raised by General Motors do not warrant denial of this portion of the settlement.

The City of Indianapolis in its comments notes that the proposed stipulation neglects to make specific provision requiring Okie to pay-back volumes taken under the aforementioned February 3, 1975, order prior to November 15, 1975. This course of action is consistent with the subject Stipulation and Agreement and is required by the record.

Our order provided that Okie should be required to repay any volumes determined to be appropriate in any determination rendered in this proceeding. We will require Okie to repay any volumes taken under the aforementioned February 3, 1975, order prior to November 15, 1975. This course of action is consistent with the subject Stipulation and Agreement and is required by the record.

**The Commission finds:**

The Stipulation and Agreement submitted by Okie Pipe Line Company and the participating parties in the above styled-proceeding is in the public interest and should be approved as herein-after ordered.

**The Commission orders:**

(A) The Stipulation and Agreement submitted by Okie Pipe Line Company and the participating parties in this proceeding is approved and is effective as of the date of the issuance of this order.

(B) This order is without prejudice to any findings or order which have been made or may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff or any other party or person effected by this order in any proceeding now pending or hereafter instituted by or against Okie Pipe Line Company or any other person or party to this proceeding.

(C) The Stipulation and Agreement noted in paragraph (A) is approved subject to the full pay back on or before November 15, 1975, of any volumes of gas that Okie Pipe Line Company may have received over and above its curtailment entitlement under our order of February 3, 1975, in this proceeding.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

**SOUTHERN NATURAL GAS CO.  
Order Granting Intervention**

SEPTEMBER 3, 1975.

On March 31, 1975, the Southern Natural Gas Company (Southern) tendered for filing proposed changes in its FPC Gas Tariff, Sixth Revised Volume No. 1. Notice of Southern's filing was issued by the Commission on April 7, 1975, with protests and petitions to intervene due on or before April 25, 1975.

An untimely protest and petition to intervene was filed by the Georgia Public Service Commission. Having reviewed the above petition to intervene, we believe that the petitioner has sufficient interest in the proceedings to warrant intervention.

**The Commission finds:**

It is desirable and in the public interest to allow the above-named petitioner to intervene.

**The Commission Orders:**

(A) The above-named petitioner is hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission; *Provided, however*, that participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, that the admission of such intervenor shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The interventions granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

Secretary.  
[FR Doc. 75-24373 Filed 9-12-75; 8:45 am]

[Project No. 2405; Docket No. DA-116-Alaska]  
**STATE OF ALASKA, DEPARTMENT OF  
HIGHWAYS**  
**Order Partially Vacating Land Withdrawal**  
SEPTEMBER 3, 1975.

Application has been filed by the State of Alaska, Department of Highways, for a highway right-of-way under the Act of August 27, 1958, (72 Stat. 885) covering the following described lands of the United States withdrawn for power purposes, thereby requiring Commission consideration under Section 24 of the Federal Power Act:

SEWARD MERIDIAN, ALASKA

T. 14 N., R. 2 W., sec. 13, those portions of the NW¼NE¼ and N¼NW¼ included in highway right-of-way application AA-9101 (Bureau of Land Management serial number).

(approximately 6.67 acres)

The subject lands lie near the Eagle River, about 12 miles northeast of the City of Anchorage, and are withdrawn pursuant to the filing on September 3, 1963, by the City of Anchorage, of an application for preliminary permit for Project No. 2405 (proposed Eagle River project). The preliminary permit issued for this project expired on April 30, 1967, and an application for license was not filed. Although development of this project is not presently scheduled, such development is being considered in the future planning for the Anchorage area.

As described in the application for Project No. 2405, the proposed Eagle River project would consist of an earth-fill dam across the Eagle River in the SE¼ of said section 13 creating a reservoir with a maximum elevation of 450 feet, a concrete lined saddle spillway, a steel penstock, a powerhouse at elevation 260 feet containing a 15,000 kw generating unit, and other necessary appurtenances and structures.

The subject 6.67 acres lie at the edge of the project area, a minimum of one-half mile from the proposed dam and reservoir, and have no significant power value.

**The Commission orders:**

The withdrawal pursuant to the application for Project No. 2405 is hereby vacated insofar as it pertains to the subject 6.67 acres.

By the Commission.

Secretary.  
[FR Doc. 75-24368 Filed 9-12-75; 8:45 am]

[Docket No. RP75-109]

**UNITED GAS PIPE LINE CO.  
Order Granting Late Interventions**

SEPTEMBER 3, 1975.

On May 30, 1975, United Gas Pipe Line Company (United) tendered for filing proposed changes in its FPC Gas Tariff, First Revised Volume No. 1 and Original Volume No. 2 which would increase jurisdictional revenues by \$38,870,504 annually based on the 12-month period ended March 31, 1975. United's filing was noticed on June 4, 1975 with all protests, comments or petitions to intervene due on or before June 23, 1975.

Late petitions to intervene have been filed on behalf of Southern Natural Gas Company, Florida Gas Transmission Company, and Alabama Gas Corporation.

Upon consideration of the late petitions to intervene filed on behalf of these petitioners, we find good cause exists to grant the petitions to intervene.

**The Commission finds:**

Participation by the above-named petitioners in these proceedings may be in the public interest and good cause exists for permitting such intervention.

**The Commission orders:**

(A) The above-named petitioners are hereby permitted to intervene in this proceeding as hereinbefore discussed, subject to the Rules and Regulations of the Commission; *Provided, however*, that the participation of such intervenors shall be limited to matters affecting rights and interests specifically set forth in the petitions to intervene; *Provided, further*, that the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.  
[FR Doc. 75-24374 Filed 9-12-75; 8:45 am]

[Docket No. RP72-142, PGA75-1]

**CITIES SERVICE GAS CO.  
Order Denying Application for Rehearing  
and Deferring Procedural Dates**

SEPTEMBER 5, 1975.

On August 7, 1975, Cities Service Gas Company (Cities) filed an application for rehearing of the Commission's order of July 16, 1975, setting date for hearing in this matter. Concurrently therewith, Cities filed a motion to defer the procedural dates herein until the validity of Order No. 491, as amended, is resolved on judicial review.<sup>1</sup>

On December 3, 1974, Cities tendered for filing alternative purchased gas cost adjustment (PGA) increases pursuant to its PGA clause. This filing was based in part on emergency 180-day purchases provided for pursuant to the Commission's Order No. 491, as amended, issued September 14, 1973, in Docket No. RM74-3 (50 FPC 742). By order issued January 22, 1975, the Commission allowed Cities' filing to become effective, except that it made certain portions of the increases based on 180-day emergency purchases effective subject to refund.

By order of July 16, 1975, the Commission set a date for hearing to determine the justness and reasonableness of the rates and refund obligations, if any, for the above-described 180-day emergency purchases insofar as such rates exceeded

<sup>1</sup> Commission Order Nos. 491, *et seq.*, were set aside by the United States Court of Appeals for the D.C. Circuit in *Consumer Federation of America v. F.P.C.*, 515 F.2d 347 (Mar. 13, 1975). The Commission has filed a petition for writ of certiorari with the United States Supreme Court.

the rate levels prescribed in Opinion No. 699-H.

Cities contends that the Commission's order of July 16, 1975, setting a date for hearing in this matter, should be vacated or held in abeyance until there is a final determination of the validity of Order No. 491, as amended, upon judicial review, and requests that the Commission defer the procedural dates herein pending the litigation. We decline to do so. The Commission has a continuing obligation under the Natural Gas Act to inquire into the justness and reasonableness of the rates charged by a pipeline company to its jurisdictional customers. However, we do believe it appropriate to reschedule the procedural dates as hereinafter ordered.

**The Commission finds:**

Cities' application for rehearing presents no new facts or principles of law which were not fully considered by the Commission in its July 16, 1975 order, or, which having now been considered, warrant any modification of that order.

**The Commission orders:**

(A) Cities' application for rehearing of the Commission's order setting date for hearing, filed August 7, 1975, is hereby denied.

(B) Cities' motion to defer procedural dates pending completion of judicial review of Order No. 491, as amended, filed August 7, 1975, is hereby denied.

(C) The public hearing previously scheduled herein is rescheduled to be held commencing on October 15, 1975, at 10:00 A.M. (EDT) in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

(D) The time for Cities and the respondents herein to file their direct testimony and evidence has been advanced to on or before September 24, 1975. All testimony and evidence shall be served upon the Presiding Administrative Law Judge, the Commission Staff, and all parties.

By the Commission.

[Docket No. RI76-22]

**DAMSON OIL CORP., ET AL.  
Petition for Special Relief**

SEPTEMBER 5, 1975.

Take notice that on August 29, 1975, Damson Oil Corporation (Operator), *et al.* (Petitioner), 1200 First City East Building, Houston, Texas 77002, filed a petition for special relief in Docket No. RI76-22, seeking a rate above the applicable area ceiling. Petitioner seeks a price of 92 cents per Mcf for the sale of gas to Texas Gas Transmission Corporation (Texas Gas) covering certain leases of lands located in the Wyandotte Field, St. Mary and Assumption Parishes, Louisiana. Petitioner states that Texas Gas is desirous of Petitioner's drilling two (2) additional wells in the area dedicated under the original contract dated July 30,

1969, and undertaking a drilling program in the Southern Louisiana area and selling all gas discovered thereby to Texas Gas for transmission in the interstate market.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 25, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,  
Secretary.

[Docket No. CP73-336]

**EAST TENNESSEE NATURAL GAS CO.  
Notice of Petition To Amend**

SEPTEMBER 2, 1975.

Take notice that on August 15, 1975, East Tennessee Natural Gas Company (Petitioner), P.O. Box 10245, Knoxville, Tennessee 37919, filed in Docket No. CP73-336 a petition to amend the order of January 4, 1974, in said docket issuing a certificate of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act, to authorize Petitioner to provide Supplemental Winter Service (SWS) that was authorized for the 1975-1976 winter season through the utilization of alternate arrangements instead of rendering such service through the full utilization of its own liquefied natural gas (LNG) facility, as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Petitioner states that it was authorized in the Commission's order of January 4, 1974, to construct and operate an LNG facility near Kingsport, Tennessee, and to render interim and long-term SWS to certain of its customers. Petitioner states further that operations of the authorized LNG facility were scheduled to commence in June 1975 but that delays in construction have delayed placing the entire operation in service.

Petitioner states that based on a July 1975 completion date, it estimated that it would be able to liquefy and store 439,500 Mcf of the 939,500 Mcf of gas authorized for SWS delivery to its customers during the 1975-1976 heating season. Petitioner states further that it requested that Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), provide a temporary natural gas storage service for the 1975-1976 winter season and that Tennessee agreed to use off-peak capacity to store up to 500,000 Mcf of gas

in the facilities of Consolidated Gas Supply Corporation for Petitioner. The proposed service by Tennessee is the subject of an application pending in Docket No. CP76-2.

Petitioner states that in the period following the application in Docket No. CP76-2 Petitioner learned that the completion of the LNG facilities had been further delayed and that a potential deficiency of 439,500 Mcf in SWS gas for the 1975-1976 heating season may be the result. Accordingly, Petitioner states, it has arranged with Chattanooga Gas Company to provide a liquefaction service for Petitioner of up to 439,500 Mcf of gas pursuant to a letter agreement between them dated August 14, 1975. It is stated that pursuant to this letter agreement Chattanooga would provide Petitioner with a liquefaction service and that Petitioner would provide Chattanooga with gas for liquefaction and fuel for the liquefaction process. The petition indicates that Chattanooga would increase its takes of natural gas from Petitioner by up to 559,747 Mcf to accomplish this purpose and that the difference between the quantity of gas so taken and that used as fuel would be returned to Petitioner as LNG. Petitioner would pay Chattanooga 95¢ per Mcf for the liquefaction service. Petitioner would transport the LNG from Chattanooga to its own LNG storage facilities near Kingsport, Tennessee by means of cryogenic tank trucks which it would provide. Petitioner alleges that the proposed arrangements would provide it with flexibility to deliver most, if not all, of the authorized SWS volumes to its customers.

Petitioner states that it does not propose to increase the SWS volumes authorized to be delivered during the 1975-76 winter nor to change the presently effective SWS rate. Petitioner states further that the instant proposal would not modify the curtailment period quantity entitlements of any of Petitioner's customers or affect the curtailment period quantity entitlement Petitioner receives from Tennessee. The petition further indicates that the volumes to be delivered to Chattanooga for liquefaction and fuel and to Tennessee for storage are the same volumes that would have been delivered to Petitioner's LNG facility for storage.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 24, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing

therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,  
Secretary.

[Docket No. CP66-110, etc.]

#### GREAT LAKES TRANSMISSION CO.

##### Notice of Petition To Amend

SEPTEMBER 5, 1975.

Take notice that on August 19, 1975, Great Lakes Transmission Company (Petitioner), 2100 Buhl Building, Detroit, Michigan 48226, filed in Docket Nos. CP66-110, et al., CP70-19, et al., CP70-100, et al., CP71-222, et al., and CP71-229 a petition to amend the orders of the Commission issued in the said dockets pursuant to Sections 3 and 7 of the Natural Gas Act to permit petitioner to continue to receive natural gas from TransCanada Pipelines Limited (TransCanada) at a delivery pressure of not less than 750 psig rather than at 550 psig called for in the original contracts between Petitioner and TransCanada, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Petitioner states that it presently purchases and imports approximately 110,000 million Mcf of natural gas annually from TransCanada at a point on the International Border near Emerson, Manitoba, for resale, and also transports approximately 318,000 million Mcf of gas for the account of third parties from the Emerson delivery point. Petitioner further states that all of its gas purchase and gas transportation contracts provide for delivery of gas at Emerson at 550 psig, but that Petitioner requires the gas at 750 psig to meet the delivery requirements of its customers.

To meet the requirements of these customers, Petitioner proposes to extend its current interim arrangement with TransCanada whereby TransCanada delivers gas to Petitioner at 750 psig. This arrangement is said to have been originally entered into on October 22, 1970, with two-year extensions by agreements dated June 11, 1971, and November 20, 1972. The Commission certificated the arrangement by its orders issued March 25, 1971, April 24, 1972, and March 4, 1974, in Docket No. CP70-19, et al. Petitioner states. The agreement to deliver gas at the higher pressure would terminate on October 31, 1975.

Petitioner states that in view of the impending termination it has considered again the advisability of installing and operating its own compression facilities. The continuation of the delivery by TransCanada is stated to be more economic than the construction and operation of a 20,000 h.p. compressor unit that Petitioner estimated would be necessary

(45 FPC 9), (45 FPC 1085) and (51 FPC —), respectively.

#### NOTICES

to compress the gas to the contracted delivery pressure. The petition to amend indicates that the cost for TransCanada to compress the gas would be approximately 0.578 cents (Canadian) per Mcf of gas, whereas the cost for Petitioner to install and operate its own compression facilities is estimated at approximately 0.721 cents per Mcf.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 25, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-9161]

#### MONOGAHELA POWER CO., ET AL.

##### Further Extension of Procedural Dates

SEPTEMBER 8, 1975.

On August 29, 1975, Monogahela Power Company, Potomac Edison Company, West Penn Power Company filed a motion to extend the procedural dates fixed by order issued March 10, 1975, as most recently modified by notice issued July 21, 1975, in the above-designated matter.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service Company  
Testimony, December 15, 1975.  
Service of Staff  
Testimony, January 8, 1976.  
Service of Intervenor  
Testimony, January 22, 1976.  
Service of Company  
Rebuttal, February 5, 1976.  
Hearing, February 16, 1976 (10:00 a.m. EST).

By direction of the Commission.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-24393 Filed 9-12-75; 8:45 am]

[Docket Nos. E-9136 and E-9140]

#### NEW ENGLAND POWER CO.

##### Tendered Rate Filing Revision

SEPTEMBER 5, 1975.

Take notice that on August 25, 1975, New England Power Company (NEPCO), tendered for filing a revised revenue comparison for Period II to reflect the effect of its revised fuel clause as or-

dered by this Commission on July 30, 1975, along with a rate redesign proposal. Such tendered filing would reduce the energy charge below the level of the current rate. Such a downward revision, according to NEPCO, is appropriate since, upon gathering the information pursuant to the Commission directive, it was discovered that the proposed rates with the new fuel clause would create a revenue increase of \$13 million more than the R-9 rate. According to NEPCO, the newly tendered rate redesign would leave the requested increase under Rate R-9 at the \$25,040,000 level.

NEPCO requests waiver of the necessary regulations to place the newly proposed rate design, with its rate reduction, into effect, subject to refund as of August 2, 1975.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 19, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-24394 Filed 9-12-75; 8:45 am]

[Docket No. E-9148]

#### NORTHERN STATES POWER CO.

##### Further Extension of Time

SEPTEMBER 8, 1975.

On August 20, 1975, Intervenor's filed a motion to extend the procedural dates fixed by order issued December 31, 1974, as most recently modified by notice issued July 21, 1975, in the above-designated matter. On August 28, 1975, Northern States Power Company (Minnesota) filed a response opposing the above motion. On September 2, 1975, Staff Counsel filed a response to Intervenor's motion supporting the extension of procedural dates but opposing a phased hearing.

Notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Intervenor Testimony, December 4, 1975.  
Service of Company Rebuttal, December 23, 1975.  
Hearing, January 12, 1976 (10:00 a.m. EST).

By direction of the Commission.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-24395 Filed 9-12-75; 8:45 am]

#### NOTICES

[Docket No. RP73-36 PGA75-2, et al.]

#### PANHANDLE EASTERN PIPE LINE CO.

##### Order Denying Application for Rehearing, Denying Request for Conference, and Deferring Procedural Dates

AUGUST 20, 1975.

On July 23, 1975, Panhandle Eastern Pipe Line Company (Panhandle) filed an application for rehearing of the Commission's order of July 7, 1975, setting date for hearing in this matter. Concurrently therewith, Panhandle filed a motion to defer the procedural dates herein until the validity of Order No. 491 is resolved on judicial review or alternatively, to convene a conference among all parties involved in 180-day emergency sales consummated at rate levels in excess of those established in Opinion No. 699-H prior to the date set by this Commission for the filing of Panhandle's direct testimony.

**Procedural background.** On December 13, 1974, Panhandle tendered for filing a proposed tariff sheet providing for a purchased gas cost adjustment (PGA) rate increase. This filing was based in part on emergency 180-day purchases provided for pursuant to the Commission's Order No. 491, as amended, issued September 14, 1973, in Docket No. RM74-3 (50 FPC 742). By order dated January 31, 1975, the Commission allowed this increase to become effective, except that it made certain portions of the amounts based on 180-day emergency purchases effective subject to refund.

By order of July 7, 1975, the Commission set a date for hearing to determine the justness and reasonableness of the rates and refund obligations, if any, for the above-described 180-day emergency purchases insofar as such rates exceeded the rate prescribed in Opinion No. 699-H (base rate of 50¢/Mcf at 14.73 psia, to increase 1 cent annually commencing January 1, 1975).

**Discussion.** In its application for rehearing Panhandle argues that the amount of the 180-day emergency rates above the 699-H rate is so small that it could not have resulted in any measurable change in Panhandle's rates. Furthermore, it contends that the 180-day emergency purchase program was instituted by the Commission on its own initiative, and therefore, Panhandle should not be exposed to possible penalties for its participation therein. Panhandle cites the number of pipelines purchasing gas under the provisions of Order No. 491 at rates in excess of the 699-H rate as conclusively establishing the prudence of Panhandle's 180-day emergency purchases.

We are not impressed by this line of argument. If Panhandle feels the amount of money involved in this proceeding is so small, then it should credit such amount to its Account Number 191, Unrecovered Purchase Gas Costs, which would have the effect of flowing it back to consumers. In such case, the Commission would terminate this proceeding.

Moreover, by directing Panhandle to establish on the record the justness and reasonableness of its rates for gas pur-

chased by it pursuant to 180-day emergency sales, we are not requiring it to do any more than that which is clearly contemplated by the explicit language contained in Order No. 491-A. Thus, Panhandle cannot now be heard to complain that it was unaware of the implications of making 180-day emergency gas purchases. Having elected to make such purchases, Panhandle bound itself to comply with the conditions outlined in Order No. 491. As a result, Panhandle must now demonstrate that the rates paid by it are just and reasonable.

Panhandle claims that the large number of purchases similar to its own which were made by numerous other pipelines is sufficient to support a finding of a just and reasonable rate in excess of the national rate. This contention is obviously without merit. In fact, the large number of sales merely points up the necessity for prompt Commission review of the rates to insure that consumers are not denied the rate protection to which they are entitled under Section 4 of the Natural Gas Act.

Panhandle requests that the Commission defer the procedural dates herein until the validity of Order No. 491, as amended, is determined on judicial review in the event that its application for rehearing is denied. We decline to do so. However, we do believe it appropriate to reschedule the procedural dates as hereinafter ordered.

Lastly, Panhandle asks that a conference be held in advance of the date set for its submittal of cost evidence. We can envision no useful purpose being served by convening such a conference. Our July 7 order clearly delineates the type of evidence which is to be presented in this proceeding by the respondents and Panhandle. Accordingly, Panhandle's request for a conference is denied.

**The Commission orders:**  
(A) Panhandle's application for rehearing of the Commission's order setting date for hearing, filed July 23, 1975, is hereby denied.

(B) Panhandle's motion to defer procedural dates pending completion of judicial review of Order No. 491, as amended, filed July 23, 1975, is hereby denied.

(C) Panhandle's request for a conference is hereby denied.  
(D) The public hearing previously scheduled herein is rescheduled to be held commencing on October 7, 1975, at 10:00 A.M. (EDT) in a hearing room of the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

(E) The time for Panhandle and the respondents herein to file their direct testimony and evidence has been advanced to on or before September 17, 1975. All testimony and evidence shall be

<sup>1</sup> In Order No. 491-A issued September 25, 1973, mimeo p. 11, we stated that any emergency purchases made pursuant to Order No. 491 "will be subject to our full regulatory review subject to Sections 4 and 5 of the Natural Gas Act."

served upon the Presiding Administra-

tive Law Judge, the Commission Staff, and all parties.

By the Commission.

#### SOUTHWEST GAS CORP.

##### Notice of PGA Filing

SEPTEMBER 8, 1975.

Take notice that on August 14, 1975, Southwest Gas Corporation tendered for filing the Eleventh Revised Sheet No. 3A, constituting Original PGA-1 in its FPC Gas Tariff, Original Volume No. 1. The tendered sheets reflect a decrease in the cost of purchased gas.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 26, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

5  
XUM

567 an application pursuant to Section 7(b) of the Natural Gas Act for authorization to abandon the sale of natural gas to Coastal States Gas Producing Company (Coastal) from the No. 1 Mary K. Withers gas well located in the Maguelitos Field, Webb County, Texas R.R. District No. 4, Gulf Coast Area, under a contract dated May 1, 1959. Coastal gathers the gas for resale to South Texas Natural Gas Gathering Company (So-TeX), who in turn resells the gas to Transcontinental Gas Pipe Line Corporation pursuant to a contract dated February 17, 1959, on file as So-TeX's Rate Schedule No. 2. At present the sale of the Maguelitos Field gas is being made pursuant to Trident's small producer certificate issued in Docket No. CS71-521.

Trident alleges that abandonment is necessary because the pressure from the subject well is not sufficient to enter the gathering line in accordance with the requirements of the contract, and that the cost of compression necessary to comply with the said contract, would greatly exceed the well's gross revenue, which at present is 20.0 cents per Mcf. Trident further alleges that since the well is uneconomical to produce it has been forced to shut the well in. Trident exhibits concern that should the well be shut in for any length of time, the well may become impossible to produce, resulting in the loss of the lease now held. Trident disclosed that it obtained one-half of the working interest in, and took over operation of the lease from R. W. Luker, who, we have been advised by letter dated June 20, 1975, has requested to be joined in the subject abandonment application.

Remaining reserves are estimated by Trident at 144,000 Mcf, which it claims may be fully recovered by installing compression over the remaining productive life of 3 years. By letters dated June 4 and 20, 1975, in reply to a Commission inquiry, Trident asserted that a rate of \$1.93 per Mcf is required to make it economically feasible to continue deliveries to Coastal and that it would be willing to continue deliveries at such price. Trident in its June 4, 1975, letter, alleges that if abandonment is granted it could sell the entire monthly production of 4,000 Mcf to Lo-Vaca Gas Gathering Company (Lo-Vaca) at a rate of \$1.85 per Mcf. It is noted that both So-TeX, the current buyer, and Lo-Vaca are subsidiaries of Coastal. Trident contends that the granting of the abandonment application will not reduce the supply of gas available to the general public since it will be able to sell the gas in an intrastate market to cover the cost of compression and keep the well in production, whereas if abandonment is denied it will be forced to shut in the well and lose the lease.

Inasmuch as the gas which is the subject of the application is currently dedicated to the interstate market under the existing contract and since Trident has indicated that the reservoir is not depleted, and the remaining gas will be sold intrastate, we believe that applicant has not adequately demonstrated that

the "available supply of gas is depleted to the extent that the continuance of service is unwarranted" as required by the Natural Gas Act. However, we believe that Trident has raised a sufficient enough factual issue with respect to the pressure problems alleged that a formal evidentiary hearing is required so as to give Trident an opportunity to demonstrate that the gas supply is indeed depleted to the extent that a discontinuance of service is warranted or that the present or future public convenience and necessity will permit such an abandonment of gas reserves to the intrastate market as Trident has proposed. Additionally, Trident should present all evidence necessary to substantiate its assertions as to what additional costs would be required to maintain the flow of the remaining producible gas to the interstate market with full documentation as to the unit price at which such undertaking would be feasible.

Although no protest or petition to intervene in opposition to the proposed abandonment has been filed, Trident has advised the Commission, by letter dated July 21, 1975, of Coastal and So-TeX's withdrawal of support for the proposed abandonment and Coastal's decision not to file an application to abandon its sale to So-TeX. Further Coastal indicated that should the Commission authorize a higher price for Trident's sale to Coastal pursuant to special relief procedures, it would be prepared to renegotiate its contract with Trident, provided it was permitted to pass through any higher incremental costs to So-TeX who in turn would be permitted to pass through any higher costs to its customer, Natural Gas Pipeline Company of America. In view of the foregoing, we believe that Coastal has raised certain factual and legal questions which should be resolved in an evidentiary hearing, through their participation as a party to this proceeding.

**The Commission finds:**  
(1) Good cause exists for setting for formal hearing the issues involved in the aforementioned pleadings and for establishing the procedures for that hearing all as hereinafter ordered.

(2) The questions raised by Coastal in this matter requires their joinder in this proceeding as a party to provide the opportunity for their resolution to the extent pertinent thereto, in an evidentiary hearing.

(3) Good cause exists for granting the request of R. W. Luker to be joined as a party to this proceeding.

**The Commission orders:**  
(A) Pursuant to the authority of the Natural Gas Act, particularly Sections 7 and 15 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act, a public hearing shall be held on November 6, 1975, at 10:00 a.m. (EST) in a hearing room at the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426 concerning the propriety of granting the abandonment authorization sought, as presently constituted in the abandonment application filed by Trident on March 24, 1975.

(B) R. W. Luker and Coastal are hereby joined as parties to this proceeding.

(C) The direct case of Trident, R. W. Luker and that of Coastal in regard to their respective positions on all issues in this proceeding, supplemented by the evidence hereinabove found required, shall be filed and served on all parties of record including the Commission Staff on or before October 16, 1975. Following the conclusion of cross-examination thereon, the Presiding Administrative Law Judge shall set such dates as are reasonable for the submission of answering and rebuttal cases, if any.

(D) An Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose. (See Delegation of Authority [18 CFR 3.5 (d)]), shall preside at the hearings in this proceeding and shall prescribe relevant procedural matters not herein provided.

By the Commission.

#### UTAH POWER & LIGHT CO.

##### Notice of Application

SEPTEMBER 4, 1975.

Take notice that on August 22, 1975, Utah Power & Light Company (Applicant) filed an application with the Federal Power Commission seeking an order pursuant to Section 204 of the Federal Power Act authorizing the issuance and sale of promissory notes to banks and dealers in commercial paper during the period October 1, 1975, through September 30, 1976, in an amount aggregating not more than \$105,000,000. The notes will be payable not more than nine months from the date thereof and shall bear interest from the date thereof until paid at the rate per annum which shall be the prime commercial rate in effect from time to time for unsecured loans at the bank to which the note is issued.

The proceeds from the sale of the new common stock will be applied to Applicant's construction program.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 19, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Persons wishing to become parties to a proceeding or to participate as a party in any hearing thereon must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Com-

mission and available for public inspection.

#### WESTERN MASSACHUSETTS ELECTRIC CO.

##### Certification of Settlement Agreement

SEPTEMBER 8, 1975.

Take notice that on August 29, 1975, the Presiding Administrative Law Judge (PALJ) in the above-referenced proceeding certified to the Commission a settlement agreement together with the record in the case. The PALJ noted that the parties feel that special circumstances require that prompt consideration should be given the agreement.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before September 26, 1975. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

#### WISCONSIN POWER AND LIGHT CO.

##### Further Extension of Procedural Dates

SEPTEMBER 4, 1975.

On August 14, 1975, Municipal Wholesale Power Group filed a motion to extend the procedural dates fixed by order issued February 19, 1975, as most recently modified by notice issued July 16, 1975, in the above-designated matter.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

[Docket No. RP71-100]

#### TRUNKLINE GAS CO.

##### Availability of Draft Environmental Impact Statement

SEPTEMBER 15, 1975.

Notice is hereby given in the above docket, that on September 15, 1975 a Draft Environmental Impact Statement prepared by the staff of the Federal Power Commission was made available. This draft statement deals with the environmental impact of alternative permanent curtailment plans proposed in Docket No. RP71-100 across the Trunkline Gas Company system.

This draft statement has been circulated to Federal, State and Local agencies, and has been placed in the public files of the Commission, and is available for public inspection both in the Commission Office of Public Information Room 1000, 825 North Capitol Street NE, Washington, D.C. 20426 and in its Regional Office located at 31st Floor, Federal Building, 230 S. Dearborn Street, Room 3140 B, Chicago, Illinois, 60604. Copies are also available in limited quantities from the Federal Power Commission's Office of Public Information, Washington, D.C. 20426.

[Docket Nos. E-8308, E-7206]

#### THE DETROIT EDISON CO. AND CONSUMERS POWER CO.

##### Availability of Environmental Impact Statement for Inspection

Notice is hereby given that on Aug. 1, 1975, as required by the Commission Rules and Regulations under Order 415-C, issued December 18, 1972, a final environmental impact statement prepared by the Commission's staff pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (Public Law 91-100) was placed in the public files of the Federal Power Commission. This statement deals with the environmental impact of (1) an application filed by the Detroit Edison Company in Docket No. E-8308 for a permit, pursuant to Executive Order No. 10485, dated September 3, 1953, authorizing the construction, operation, maintenance and connection at the international border between the United States and Canada of facilities for the transmission of electric energy between the United States and Canada, and (2) a joint application filed by the Detroit Edison Company and Consumers Power Company in Docket No. E-7206 for a supplemental order, pursuant to Section 202(e) of the Federal Power Act, authorizing the transmission of electric energy from the United States to Canada by means of certain existing facilities and the above-mentioned proposed facilities.

The proposed project is a joint undertaking by the Applicants and the Hydro-Electric Power Commission of Ontario (Ontario Hydro). Under the terms of the Application submitted to the Commission, Edison proposes to construct an overhead 345 kv transmission line approximately 2 miles in length from a point on its existing St. Clair-Jewel 345 kv line to the international border in the St. Clair River. Ontario Hydro will build a similar line about 0.8 miles in length from its Lambton Generating Station and interconnect with the Edison line at the international border.

This statement is available for public inspection both in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426 and its Chicago Regional Office located at 230 South Dearborn Street, 31st Floor Federal Building, Chicago, Illinois 60604. Copies may be ordered from the Commission's Office of Public Information, Washington, D.C. 20426.

# PASSENGER AUTOMOBILES FROM BELGIUM, CANADA, FRANCE, ITALY, JAPAN, SWEDEN, THE UNITED KINGDOM, AND WEST GERMANY

International Trade Commission Does Not Terminate Treasury Dumping Investigations

SEPTEMBER 8, 1975.

The U.S. International Trade Commission today notified the Secretary of the Treasury that, on the basis of its inquiry with respect to new, on-the-highway, four-wheeled, passenger automobiles from Belgium, Canada, France, Italy, Japan, Sweden, the United Kingdom, and West Germany, which were the subject of antidumping investigations initiated by the Department of the Treasury, it did not determine "there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States. Commissioners Leonard, Bedell, Parker, and Moore comprised the majority. Commissioner Ablondi joined the majority with respect to imports from Japan, West Germany, and Italy, but dissented with respect to imports from Belgium, Canada, France, Sweden, and the United Kingdom. Commissioner Minchew dissented with respect to the imports from all countries. As a result of the Commission's decision, the Department of the Treasury will not be required to terminate its investigations to determine whether the passenger automobiles concerned are being sold at less than fair value.

On August 7, 1975, the Treasury Department advised the Commission that, during the course of determining whether to institute investigations with respect to passenger automobiles from Belgium, Canada, France, Italy, Japan, Sweden, the United Kingdom, and West Germany it concluded from the information available to it that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of this merchandise into the United States. On receipt of Treasury's advice, the Commission, on August 8, 1975, instituted an inquiry to determine whether there is no reasonable

indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States from the eight named countries. A public hearing was held August 19, 1975.

Imported cars from the eight countries involved in the inquiry totalled \$7.5 billion in 1974 against \$20.8 billion in sales of domestic models. The sales figures make this case the largest antidumping proceeding ever handled by the U.S. International Trade Commission or its predecessor, the U.S. Tariff Commission.

The Commission's report contains Commissioners' statements of reasons for their determinations. Copies of the report (USITC Publication 739) are available upon request as long as the limited supply lasts. Requests should be addressed to the Secretary, U.S. International Trade Commission, 8th and E Sts., NW., Washington, D.C. 20436.

By order of the Commission.

Issued: September 8, 1975.

[SEAL] KENNETH R. MASON,  
Secretary.

[AA1921-Inq.-2]

# NEW, ON-THE-HIGHWAY, FOUR-WHEELED, PASSENGER AUTOMOBILES FROM BELGIUM, CANADA, FRANCE, ITALY, JAPAN, SWEDEN, THE UNITED KINGDOM, AND WEST GERMANY

Commission Does Not Determine "No Reasonable Indication of Injury"

SEPTEMBER 8, 1975.

On August 7, 1975, the United States International Trade Commission received advice from the Department of the Treasury that, in accordance with section 201(c) of the Antidumping Act of 1921, as amended, eight antidumping investigations were being initiated with respect to new, on-the-highway, four-wheeled, passenger automobiles from Belgium, Canada, France, Italy, Japan, Sweden, the United Kingdom, and West Germany, and that, pursuant to section 201(c) of the Act, information developed during the preliminary investigation led to the conclusion that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such automobiles into the United States. Accordingly, the Commission on August 8, 1975, instituted an inquiry, No. AA1921-Inq.-2, under section 201(c)(2) of the Act to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

A public hearing was held on August 19, 1975. Public notice of the institution of the inquiry and hearing was duly given by posting copies of the notice at the Secretary's Office in the Commission in Washington, D.C., and at the Commission's office in New York City, and by publishing the original notice in the FEDERAL REGISTER of August 13, 1975 (40 F.R. 34027).

The Treasury Department instituted its investigation after receiving a complaint on July 8, 1975, from Congressman John H. Dent of Pennsylvania. A complaint was also

received on July 11, 1975, from the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America-UAW. Treasury's notice of its antidumping proceeding was published in the FEDERAL REGISTER of August 11, 1975 (40 F.R. 33755-33-758).

On the basis of its inquiry with respect to imports of new, on-the-highway, four-wheeled, passenger automobiles from Belgium, Canada, France, Italy, Japan, Sweden, the United Kingdom, and West Germany—the subject of the antidumping investigations initiated by the Department of the Treasury—the Commission (Commissioners Leonard, Moore, Bedell, and Parker; and Commissioner Ablondi, in part) does not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

STATEMENT OF REASONS OF CHAIRMAN WILL E. LEONARD, IN INQUIRY NO. AA1921-Inq.-2

The United States International Trade Commission (Commission) instituted Inquiry No. AA1921-Inq.-2 under section 201(c)(2) of the Antidumping Act, 1921, on August 8, 1975. The inquiry was to determine whether there is "no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation" into the United States of certain new, on-the-highway, four-wheeled, passenger automobiles. Such merchandise from Belgium, Canada, France, Italy, Japan, Sweden, the United Kingdom, and West Germany is the subject of pending Department of Treasury (Treasury) investigations under section 201(c) of the Antidumping Act, 1921.

If, as a result of the inquiry, the Commission determines affirmatively, i.e., that there is no reasonable indication of the requisite injury to a domestic industry by reason of the importation of the class or kind of merchandise the subject of the inquiry, then the pending Treasury investigations will be terminated. If, on the other hand, the Commission's determination as a result of the inquiry is negative, i.e., that it does not determine there is no reasonable indication of the requisite injury to a domestic industry by reason of the requisite cause, then the pending Treasury investigations will continue.

## DETERMINATION

On the basis of the information available as a result of the inquiry, including the information received from the Treasury, I do not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or

<sup>1</sup> Commissioner Ablondi does not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States from Japan, West Germany, and Italy; but determines that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States from Belgium, Canada, France, Sweden, and the United Kingdom. Commissioner Minchew determines that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States from all of the named countries.

is prevented from being established, by reason of the importation into the United States of new, on-the-highway, four-wheeled, passenger automobiles which are the subject of the pending Treasury antidumping investigations.

## APPLICATION OF INFORMATION AVAILABLE TO THE STATUTORY CRITERIA

Under section 201(c)(2) of the Antidumping Act, 1921, as amended (the Act), the Commission must determine whether there is no reasonable indication that a domestic industry is being or is likely to be injured, or is prevented from being established, by reason of the importation into the United States of merchandise the subject of a Treasury investigation under the Act. Critical to such a determination is an evaluation of the underlined words in the preceding sentence in the light of the information obtained in the inquiry.

No reasonable indication . . . The first statutory phrase which needs to be examined is "no reasonable indication." It should be noted that the parties before the Commission in the inquiry have furnished varied interpretations of this statutory language. I am unable to subscribe to any of these interpretations completely.

It is necessary, of course, to be guided by the intent of Congress as to the meaning of the language employed in section 201(c)(2) of the Act, which sets out the responsibility of the Commission. In determining the meaning of specific statutory phrases by reference to Congressional intent, it is necessary to understand the purpose of Congress in enacting the statutory language and to understand the circumstances, of which Congress was aware, in which the Commission performs its functions as called for by the statutory language.

The legislative purpose in the enactment of section 201(c)(2) is stated at page 174 of Senate Finance Committee Report Number 93-1298, the report on the bill which became the Trade Act of 1974, as follows:

The amendment is designed to eliminate unnecessary and costly investigations which are an administrative burden and an impediment to trade.

The above quotation, while it sets out the purpose of section 201(c)(2), does not articulate the meaning to be given to the specific phrases employed by Congress within section 201(c)(2).

In order to better derive the meaning of the specific phrases, it is necessary to consider Congress' awareness of the extent and reliability of the information that would be available to the Commission. Congress indicated by the language in section 201(c)(2) that it is aware that the information transmitted from Treasury to the Commission will be "preliminary," the result of a brief investigation, and will include information of "possible" margins of dumping and the volume of trade. Indeed, Congress indicates an awareness that Treasury will not provide information of less than fair value sales, but rather only information as to "a preliminary indication . . . concerning possible" less than fair value sales. In short, Congress was aware that the Treasury usually will not be able to supply significant concrete information to aid the Commission in carrying out its function under section 201(c)(2). Further, in providing the Com-

mission only 30 days in which to conduct its inquiry, Congress was aware that such a time limit would necessarily restrict the volume of information which could be collected by the Commission, as well as the testing of the reliability of such information and its consideration for the purpose of making a determination.

It is also important to consider what Congress requires of the Treasury at the time a matter is referred to the Commission under section 201(c)(2). Treasury is in the process of determining, by a summary investigation of no more than 30 days, only whether to "institute" a formal antidumping investigation under section 201(a) of the Act. It is clear by the language used in section 201(c)(2) that the most that is required of the Treasury is that it have information of "possible" sales at less than fair value. This is a rather minimal requirement, and must be remembered when ascertaining what Congress intends by the specific phrases used in section 201(c)(2) with respect to the Commission's functions thereunder involving the "injury" aspect of the Act.

Further, one should keep in mind what Congress does not require of the Commission under section 201(c)(2). Congress does not require the Commission, under section 201(c)(2), to find the requisite injury to a domestic industry as a result of the requisite cause that is required under section 201(a) of the Act. Also, Congress does not require the Commission, under section 201(c)(2), to determine whether it has reason to believe that there exists injury to an industry as a result of the necessary cause required by section 201(a) of the Act. On the other hand, Congress does not require the Commission, under section 201(c)(2), to determine whether the complaint filed with Treasury has sufficient allegations concerning injury and causation on its face so as not to be subject to an attack on the basis that it fails to state a "cause of action."

It is also to be noted that section 201(c)(2) is phrased in terms of the Commission finding no reasonable indication of the requisite injury due to the requisite cause in order for the investigation of the Treasury to be terminated; it is not phrased in terms of the Commission finding reasonable indication of such injury and causation in order for the investigation of the Treasury to continue. Indeed, if the Commission were to do nothing or were unable to make any finding, Treasury's investigation would continue. This choice of words must be presumed to be a considered choice so that the emphasis placed by Congress in section 201(c)(2) is not on a positive justification for the continuance of an antidumping investigation, but in effect on a justification for its termination.

From the above, Congress was aware that in carrying out its functions under section 201(c)(2) the Commission would be conducting a severe operation with blunt instruments, not designed for precise application. Congress must have realized that the economic analysis which the Commission employs during the course of its investigations under section 201(a) of the Act simply cannot be employed under section 201(c)(2).

However, Congress intends the Commission to look at the normal indicators of injury and causation that it looks at when conducting an investigation under section 201(a) of the Act. After considering these indicators, Congress intends the Commission to find, before making a determination of "no reasonable indication," an affirmative determination under section 201(c)(2), that the allegations made by the complainant before the Treasury and the information available as a result of the Commission's inquiry reveal the issues of injury and causation to be so clearly lacking in substance that the resources of the Government should not be used to any

further extent in considering the matter, and that trade should not be disrupted further by such consideration.

Industry . . . "An industry in the United States" for the purposes of the determination in this case under section 201(c)(2) consists of the producing facilities in the United States engaged in the manufacture of new, on-the-highway, four-wheeled, passenger automobiles, of which facilities the workers are an integral part. Nothing indicates that by using the phrase "an industry in the United States" in section 201(c)(2) of the Act, Congress had any intention that the industry referred to should be any different from the industry to be considered under section 201(a) of the Act. With respect to what is meant by "an industry" in section 201(a), the House Ways and Means Committee Report on the Antidumping Act, 1921, stated that the interest to be protected by the Act includes:

our industries and labor against a now common species of commercial warfare of dumping goods on our markets at less than cost or home value. H.R. Rep. No. 1, 67th Cong., 1st Sess. 23 (1921). (Emphasis added.)

Then, moreover, on the Senate floor, Senator McCumber articulated the following: The purpose (of the Act) is to allow the manufacturers in the United States to continue in business . . . and to provide for the employment of American labor and American capital . . . 61 Cong. Record, part 1, page 1022 (1921). (Emphasis added.)

In the "Muriate of Potash Case,"<sup>1</sup> stated (at p. 3) along with Commissioner Sutton, that:

In protecting domestic industry, the Congress was concerned not only for the welfare of the owners of producing plants, but also for the welfare of the employees in such plants and the communities of which they are a part. These interests are inextricably tied together.

Moreover, Commissioners Clubb and Moore stated (at p. 23) in the same case that the Act protects various interests, including:

not just the interests of the stockholders of the multinational corporations involved, but the interests of the workers in the U.S. plants as well.

Injury . . . The "injury" requirement found in section 201(c)(2) is worded the same as the injury requirement found in section 201(a) of the Act, that is, that a domestic industry "is being or is likely to be injured, or is prevented from being established." There is no evidence that Congress intended such language used in section 201(c)(2) to be interpreted differently from the same language found in section 201(a). However, it is to be noted that the Commission's function under section 201(c)(2) is not to find such injury, but to determine if there is no reasonable indication of such injury.

The information available as a result of the inquiry is certainly sufficient, in my opinion, to negate at this time a determination that "there is no reasonable indication" of the injury requirement of the Act being satisfied. The share of the U.S. market of the merchandise in issue accounted for by imports from the countries which are the subject of the pending Treasury investigations and the Commission's inquiry in this matter, taking account of U.S. factory sales, imports for consumption, and exports of domestic merchandise, is significant, amounting in the

<sup>1</sup> Potassium Chloride (Muriate of Potash) From Canada, France and West Germany, U.S.T.C. Investigation Nos. AA1921-58, 59, and 60 (November, 1969).

aggregate to 26.5 percent for the period January-June, 1975. Furthermore, there is uncontroverted evidence that the United States

of causality is expressed by the use of the identical phrase in both sections. Since the Commission, however, under section 201(c)

application of the section that we gave in the first proceeding under it, and then give the reasons for our determination in the in-

## THE CASE AT HAND

This inquiry is before the Commission as

At the present early stage of the Treasury Department's antidumping investigation, information on the possible margins below

allegedly have been sold at LTFV. At the same time, I do not determine that there is no reasonable indication that an industry

aggregate to 26.5 percent for the period January-June, 1975. Furthermore, there is uncontested evidence that the United States industry being considered is suffering severe unemployment at present. There have been estimates that such unemployment amounted to some 300,000 members of the United Automobile Workers Union in early 1975. Also there is information which would indicate that production by United States manufacturers of new automobiles has dropped significantly beginning in November 1973, and that such decline has continued in 1975.

Before proceeding further, it is appropriate to comment on the issue of cumulating the impact on a domestic industry of the imports in issue. Senate Finance Committee Report Number 93-1298, cited above, states (at p. 180) with respect to this question:

A number of cases before the Commission have been concerned with the question of whether imports of comparable articles from different countries should be considered together or cumulated in making injury determinations. The issue arises in several different contexts, viz: (1) when Treasury determinations involving comparable imports from two or more different countries are simultaneously submitted to the Commission; (2) when Treasury determinations on comparable imports are submitted to the Commission at different times. Under consistent practice, affirmed by the U.S. Customs Court in *City Lumber Co. v. United States* (R.D., 11557, July 9, 1968; 64 Cust. Ct. 826 (1970); 311 F. Supp. 340 (1970); 457 F.2d 991 (1972)) the Commission has considered the combined impact of less-than-fair-value imports in making injury determinations when the facts and economic considerations so warrant. Such result does not follow as a matter of law, it follows, on a case by case basis, only when the facts and conditions of trade show its relevance to the determination of injury.

Information available, as a result of the inquiry, with respect to pricing and markets of the merchandise in issue is such as to indicate that cumulation may be appropriate during the course of any full investigation under section 201(a) of the Act that may be conducted in the future. In any event, I simply do not have enough information on the factors and conditions of trade to warrant, at this early stage, a non-cumulation of the impact, and am therefore cumulating impact for the purpose of this determination.

By Reason of . . . Section 201(c)(2) requires the Commission to determine, before the pending Treasury investigation may be terminated, that there is no reasonable indication that the injury referred to above is "by reason of" the importation of the merchandise in question into the United States. Under the terms of section 201(c)(2), the merchandise in question in this determination refers to the merchandise as to which Treasury has instituted formal antidumping investigations to determine whether such merchandise is being or is likely to be sold at less than fair value. The information provided by Treasury to the Commission indicates a wide range of possible margins of dumping, and does not indicate that any particular type of automobile from any particular country named is not subject to such possible dumping margins. Therefore, in this determination, the phrase "such merchandise" as used in section 201(c)(2) consists of all automobiles imported into the United States which the Treasury has considered in its summary investigation.

Turning to the phrase "by reason of" in section 201(c)(2), again there is no basis to conclude that Congress intended this phrase to have any meaning different from the one given to the same phrase employed in section 201(a) of the Act; that is, the same degree

of causality is expressed by the use of the identical phrase in both sections. Since the Commission, however, under section 201(c)(2) is dealing with only the merchandise the subject of Treasury's investigation, and is determining if there is "no reasonable indication" of the requisite causal relationship, as opposed to dealing under section 201(a) with merchandise actually found by Treasury to be, or likely to be, sold at less than fair value and determining if the requisite causal relationship actually exists, the distinct determinations under these sections are totally different.

Senate Finance Committee Report Number 93-1298, cited above, states (at p. 180) with respect to the requisite degree of causation required by section 201(a), and thus also by section 201(c)(2):

Moreover, the law does not contemplate that injury from less than fair value imports be weighed against other factors which may be contributing to injury to an industry. The words "by reason of" express a causation link but do not mean that dumped imports must be a (or the) principal cause, a (or the) major cause, or a (or the) substantial cause of injury caused by all factors contributing to overall injury to an industry.

That language, of course, does not mean that the Commission does not attempt to identify causes of injury to a domestic industry, but simply means that the cause attributable to imports sold at less than fair value, or possibly sold at less than fair value, need not be the principal cause, or major cause, or even substantial cause, but merely a cause.

Looking at the information available as a result of the inquiry, various possible causes of injury can be posited. These causes include at least the following: (a) the energy crisis; (b) the domestic industry's delayed reaction in responding to consumers' demands for fuel-efficient automobiles; (c) the recession; (d) ecological standards for automobiles; and (e) substantial penetration of the U.S. market by automobile imports the subject of Treasury antidumping investigations. At this point in time, it is impossible for me to quantify each of these causes. However, I am unable to say that there is no reasonable indication that the importation of the merchandise in question possibly sold at less than fair value is not a cause of injury to the domestic industry. The information available, which includes the coincidence of the possible less than fair value sales with possible injury to the domestic industry, is sufficient to negate a determination at this time that "there is no reasonable indication" of injury or likelihood of injury "by reason of" possible less-than-fair-value imports.

#### CONCLUSION

On the basis of the above, I do not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation into the United States of certain new, on-the-highway, four-wheeled, passenger automobiles, which merchandise is the subject of pending Treasury antidumping investigations.

#### STATEMENT OF REASONS OF COMMISSIONERS BEDELL AND PARKER

This inquiry is the second proceeding before the International Trade Commission under the provisions of section 201(c)(2) of the Antidumping Act, 1921, as amended. That section, which was added by section 321 of the Trade Act of 1974, entered into force earlier this year.

Since section 201(c)(2) has only recently become effective, we wish first to reiterate the views concerning the proper scope and

application of the section that we gave in the first proceeding under it,<sup>1</sup> and then give the reasons for our determination in the instant case.

#### THE STATUTORY PROVISIONS

Section 201(c)(2) of the Antidumping Act provides as follows:

(2) If, in the course of making a determination under paragraph (1), the Secretary concludes, from the information available to him, that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States, he shall forward to the Commission the reasons for such substantial doubt and a preliminary indication, based on whatever price information is available, concerning possible sales at less than fair value, including possible margins of dumping and the volume of trade. If within thirty days after receipt of such information from the Secretary, the Commission, after conducting such inquiry as it deems appropriate, determines there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States, it shall advise the Secretary of its determination and any investigation under subsection (b) then in progress shall be terminated. (Emphasis supplied.)

The foregoing section provides for an inquiry by the Commission early in the Governmental procedures that follow the filing of a dumping complaint with the Secretary of the Treasury. Within 30 days of such filing, the Secretary must decide both whether to institute an antidumping investigation and whether to take the action that triggers an inquiry by the Commission. The Commission's inquiry is thus conducted while the Treasury proceeds with the early stages of its investigation. Consequently, the end result of the Commission's determination is either to terminate an antidumping investigation in progress at the Treasury, or to permit it to continue. Since the determination to be made by the Commission (underscored above) is expressed in the negative, an affirmative determination that there is "no reasonable indication" of injury under the Act results in a termination of the proceedings before the Department of the Treasury, while a negative determination, i.e., the Commission does not determine that there is "no reasonable indication" of injury under the Act, permits the Treasury proceeding to continue.

In approaching the Commission's responsibility under section 201(c)(2), we are cognizant that the Senate Finance Committee desired to eliminate unnecessary and costly investigations which are an administrative burden and an impediment to trade. We do not believe, however, that by virtue of the amendment to the Antidumping Act there was any intent that the procedure being established be used to weaken—or to deny U.S. industry—the protection of the Antidumping Act, by aborting a full investigation in the absence of a clear and convincing showing that there is "no reasonable indication" that an industry in the United States is being or is likely to be injured by reason of the importation of merchandise possibly sold at less than fair value.

<sup>1</sup> United States International Trade Commission, *Butadiene Acrylonitrile Rubber from Japan* . . . , ITC Publication 727 . . . , April 1975, pp. 3-6.

#### THE CASE AT HAND

This inquiry is before the Commission as a result of advice received from the Treasury Department on August 7, 1975, that, during the course of determining whether to institute antidumping investigations with respect to new, on-the-highway, four-wheeled, passenger automobiles (hereinafter passenger automobiles) from Belgium, Canada, France, Italy, Japan, Sweden, the United Kingdom, and West Germany, it had concluded that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

In our judgment, the evidence before the Commission as a result of its inquiry does not provide a clear and convincing showing that there is "no reasonable indication" of injury or likelihood of injury to a U.S. industry by reason of the importation of passenger automobiles from the countries concerned. The domestic industry producing passenger automobiles is in distress as evidenced by recently decreased production, sales, and employment. Imported passenger automobiles from the eight countries that are now the subject of antidumping investigations by the Treasury Department have grown in volume and have supplied a rising share of the U.S. market. Finally, the alleged margins by which sales were below fair value, as identified in the communication from the Treasury Department to the Commission, were in ranges having high upper limits. These matters are discussed briefly in the following paragraphs.

The sale of domestically produced passenger automobiles has been in a severe decline for many months. Factory sales of such vehicles in 1974 were sharply below those in five of the previous six years; the sales in 1974 were about a fourth lower than in 1973 (which had been a record year) and about 15 percent lower than in 1971 and 1972. Factory sales in 1975 have been at an even lower rate than in 1974, being down nearly a fifth in the first six months of the year. Retail sales of domestically produced passenger automobiles reveal an identical decline; such sales dropped sharply in 1974 and thus far in 1975. Employment in the manufacture of passenger automobiles has fallen sharply during the period of lower sales. Assembly plants and other production facilities have shut down for varying periods, and some shifts have been cancelled.

U.S. imports of passenger automobiles—virtually all of which are from the eight countries now under investigation by the Treasury Department to determine whether their sales to the United States are or are likely to be at less than fair value—have risen in recent years both in absolute terms and relative to sales of domestically produced vehicles. Imports of new passenger automobiles into the United States aggregated 2.6 million vehicles in 1974, compared with 1.6 million vehicles in 1968. Imports of passenger automobiles in the first half of 1975 were about a third smaller than in the corresponding period of 1974, but retail sales of imported vehicles did not decline as inventories in the United States supported steady sales of imported vehicles in the face of declining demand and reduced sales of U.S.-made vehicles. Imported vehicles have significantly increased their market share in recent years. Based on sales at the retail level, imported vehicles from the eight countries under investigation for sales allegedly at less than fair value supplied 25 percent of the U.S. market in 1974 and 30 percent in the first half of 1975, while they had accounted for only 15 percent in 1968.

At the present early stage of the Treasury Department's antidumping investigation, information on the possible margins below fair value by which sales of passenger automobiles have been made by the countries concerned is highly imprecise and uncertain. The alleged margins reported by the Department in its communication to the Commission consisted of wide ranges. The upper limits of the ranges were high—from 20 percent for Canada to 73 percent for West Germany. Dumping margins approaching these levels, if found by the Treasury, would represent sales substantially below fair value.

#### CONCLUSION

In our view, from the evidence before the Commission, a determination is not warranted that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of imports of new, on-the-highway, four-wheeled, passenger automobiles from the countries now subject to antidumping investigations by the Treasury Department.

#### STATEMENT OF REASONS FOR COMMISSIONER ALONDI

On August 7, 1975, the Department of the Treasury advised the United States International Trade Commission that the Department of the Treasury was initiating eight antidumping investigations with respect to new, on-the-highway, four-wheeled, passenger automobiles from Canada, Japan, West Germany, Belgium, Italy, the United Kingdom, Sweden, and France, and that information developed during a preliminary investigation "has led to the conclusion that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of importation of this merchandise into the United States."

The relevant statutory language in section 201(c)(2) of the Antidumping Act of 1921, as amended by section 321 of the Trade Act of 1974, reads in part—

If, in the course of making a determination under paragraph (1), the Secretary concludes, from the information available to him, that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States, he shall forward to the Commission the reasons for such substantial doubt and a preliminary indication, based upon whatever price information is available, concerning possible sales at less than fair value, including possible margins of dumping and the volume of trade. If within thirty days after receipt of such information from the Secretary, the Commission, after conducting such inquiry as it deems appropriate, determines there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States, it shall advise the Secretary of its determination and any investigation under subsection (b) then in progress shall be terminated.

On the basis of the data available from the Department of the Treasury, the Commission hearing record, briefs filed by interested parties, and data obtained by our staff, I have determined that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of new, on-the-highway, four-wheeled, passenger automobiles from Canada, Belgium, the United Kingdom, Sweden, or France which

allegedly have been sold at LTFV. At the same time, I do not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of new, on-the-highway, four-wheeled, passenger automobiles from Japan, West Germany, or Italy which allegedly have been sold at LTFV.

The consideration of this case involves resolving a threshold question as to whether the eight investigations initiated by Treasury are to be considered individually or cumulatively.

The question of whether the Commission should weigh the impact on a domestic industry of LTFV imports of the same product from each of several countries individually or collectively under the Antidumping Act has been considered frequently, and the Commission has the discretion to examine the particular facts of each case in order to make a determination of whether cumulative injury should be considered.<sup>1</sup>

In the instant inquiry, the myriad of differences between automobiles as to price, style, quality, and performance, to name only a few, precludes my finding of factors and conditions to warrant cumulating the imports from all eight countries. I have accordingly concluded that the impact of alleged LTFV imports from Canada, Japan, West Germany, Belgium, Italy, the United Kingdom, Sweden, and France should be considered independently for each country. Under section 201(c)(2) we must assume, for the purpose of making our determination, the existence of LTFV sales. The Commission's jurisdiction is therefore limited solely to a determination of whether there is no reasonable indication of an injury or likelihood thereof to a domestic industry by reason of such sales from each of the countries.

Section 201(c)(2) of the Antidumping Act of 1921 is new legislation as a result of an amendment made by section 321 of the Trade Act of 1974. The instant case represents our second effort in discharging our responsibilities as set out in this new section.

The legislative intent in the enactment of section 201(c)(2) is clearly stated at page 171 of Senate Report No. 93-1298 as follows: The amendment is designed to eliminate unnecessary and costly investigations which are an administrative burden and an impediment to trade.

If we are to give meaningful effect to the expressed intent of the Congress, we should eliminate investigations under section 201(a) when such investigations clearly are unnecessary because there is no reasonable indication that a domestic industry is being or is likely to be injured.

I have concurred with the majority determination with regard to Japan, West Germany, and Italy.

#### JAPAN

Information available to the Commission from a variety of sources indicates that automobiles from Japan have been sold in the United States at prices lower than those for domestic automobiles. The proportion of Japanese automobiles underselling U.S. automobiles at this early stage of investigation

<sup>1</sup> See, for example, *Primary Lead Metal from Australia and Canada* . . . , Investigation Nos. AA1921-134 and 135, TC Publication 639, 1974; *Pig Iron from East Germany, Czechoslovakia, Romania, and the U.S.S.R.* . . . , Investigation Nos. AA1921-52, 53, 54, and 55, TC Publication 265, 1968; *Printed Vinyl Film from Brazil and Argentina* . . . , Investigation Nos. AA1921-117 and 118, TC Publication 565, 1973; and Senate Report No. 93-1298, p. 180.

V

has not been established. The volume of imports which Japan provides has steadily increased to the extent that in 1974, imports from Japan accounted for 5.5 percent of the quantity of apparent U.S. consumption of new passenger automobiles. In addition, the U.S. market penetration of imports from Japan increased by 3.1 percent from 1973 to 1974, and indications are that it has increased in 1975. The increased volume of imports, the evidence of underselling, and the degree of market penetration require that the antidumping investigation continue as regards Japan.

## WEST GERMANY

Information available to the Commission from a variety of sources indicates that at least some automobiles from West Germany have been sold in the United States at prices lower than those for domestic automobiles. Sales at less than fair value, when accompanied by evidence of underselling in the U.S. market and a volume of imports sufficient to possibly cause injury, preclude a finding of "no reasonable indication of injury." In 1974, imports from West Germany accounted for 6.7 percent of the quantity of apparent U.S. consumption of automobiles, and the U.S. market penetration in that year was higher than in many earlier years. The existence of the above factors requires the continuation of the investigation as regards West Germany.

## ITALY

Information available to the Commission from a variety of sources indicates that at least some automobiles from Italy have been sold in the United States at prices lower than those for domestic automobiles. In 1974, imports from Italy accounted for 1.15 percent of the quantity of apparent U.S. consumption of new passenger automobiles. The difference in degree of market penetration by Italy as distinguished from Sweden, the United Kingdom, Belgium, and France is slight. However, the U.S. market penetration of imports from Italy increased from 1973 to 1974, by an amount that was nearly equivalent to the entire market share of the next two smaller supplying countries. Total imports from Italy in 1974 were nearly 40 percent greater than total imports from the next largest supplying country in the same year. This increase, combined with some degree of underselling, precludes a determination of no reasonable indication of injury at this time. The antidumping investigation as regards Italy should accordingly continue.

I have dissented with the majority determination with regard to Canada, Belgium, the United Kingdom, Sweden, and France.

## CANADA

In considering the Trade Act of 1974, the Senate Finance Committee received proposals to include statutory language regarding the concept of "injury." The Committee did not accept any proposal for the reason that the criteria for injury were "... adequately treated under existing practices and are best left to individual case determinations without additional statutory guidance." However, the Committee went on to state: "... the Act is primarily concerned with the situation in which the margin of dumping contributes to underselling the U.S. product in the domestic market resulting in injury or likelihood of injury to a domestic industry."

\* Senate Report 93-1898, p. 179.

It would appear that underselling is an integral and necessary element of injury. The Commission has, in a number of instances, found that imports at less than fair value have not been injurious to the domestic industry when prices of the imported product are equal to or higher than prices for comparable domestic products.<sup>1</sup> In its decision on *Technical Vanillin from Canada*, Investigation No. AA1921-26, the statement of reasons for the Commission's determination of no injury or likelihood thereof reads in part: The importation of an article sold "at less than fair value" is not *ipso facto* injurious. The sole exporter of Canadian technical vanillin has sold its product ... to U.S. consumers at delivered prices equal to or higher than the delivered (or their equivalent) prices by the predominant U.S. producer of technical vanillin. ... The importation of Canadian technical vanillin under such circumstances cannot be considered as injurious or likely to injure an industry in the United States.<sup>2</sup>

No evidence presented to the Commission during the course of this inquiry indicates any degree of underselling of domestic automobiles by automobiles imported from Canada, nor has such underselling been alleged. On the contrary, all evidence available to the Commission indicates that the overwhelming majority of automobiles from Canada are imported into the United States by the four largest automobile manufacturers in the United States, are identical to automobiles produced in the United States by the same manufacturers, and are identically priced to U.S. consumers.

In the case at hand, therefore, I am of the opinion that there is no reasonable indication of injury or likelihood thereof by reason of imports from Canada.

BELGIUM, THE UNITED KINGDOM, SWEDEN, AND FRANCE

In considering the individual imports from Belgium, the United Kingdom, Sweden, and France I have assumed for the purpose of this determination that injury is manifested by all indicators except market penetration.

In the past the Commission has held that imports sold at less than fair value in the United States in insignificant quantities compared with the quantity of domestic consumption have not caused injury to a domestic industry.<sup>3</sup> In expressing their views as

<sup>1</sup> See, for example, *Pocket Pencil Sharpeners*, Tariff Commission Investigation under the Antidumping Act, 1921, as amended, August 29, 1955; *Rayon Staple Fiber from Belgium*, Investigation No. AA1921-18, TC Publication 19, 1961; *Rayon Staple Fiber from Cuba*, Investigation No. AA1921-20, TC Publication 23, 1961; *Rayon Staple Fiber from West Germany*, Investigation No. AA1921-21, TC Publication 24, 1961; *Technical Vanillin from Canada*, Investigation No. AA1921-26, TC Publication 88, 1963; *Plastic Baby Carriers from Japan*, Investigation No. AA1921-41, TC Publication 141, 1964; *Brosa Key Blanks from Canada* ... Investigation No. AA1921-71, TC Publication 392, 1971; and *Hand Pallet Trucks from France* ... Investigation No. AA1921-95, TC Publication 498, 1972.

<sup>2</sup> *Technical Vanillin from Canada*, Investigation No. AA1921-26, TC Publication 88, 1963.

<sup>3</sup> See *Cast Iron Soil Pipe from Australia*, Investigation No. AA1921-35, TC Publication 124, 1964.

part of the majority in the case of *White Portland Cement from Japan*, Investigation No. AA1921-38, Commissioners Dorfman and Talbot stated "The imports that entered at 'less than fair value' (LTFV), at no time amounted to as much as 1 percent of domestic consumption and could not in any circumstance have caused more than de minimis injury to the industry." In a number of other investigations under the Antidumping Act, 1921, as amended, the Commission has found no injury or likelihood thereof when imports sold at less than fair value constituted less than 1 percent of apparent U.S. consumption.<sup>4</sup> While each case must be examined according to the individual facts peculiar to each, as regards automobiles, I have determined that import penetration by any one country of less than 1 percent of apparent U.S. consumption on a national basis is insignificant and could not warrant an injury determination. I am therefore of the opinion that there is no reasonable indication of injury or likelihood thereof from imports from Belgium, the United Kingdom, Sweden, or France.

## STATEMENT OF REASONS FOR AFFIRMATIVE DETERMINATION OF VICE CHAIRMAN MINCHIEV

In accordance with new provisions of the Antidumping Act of 1921, the United States Department of the Treasury (Treasury) notified the United States International Trade Commission (Commission) on August 7, 1975, that it had "substantial doubt whether" the U.S. automobile industry "is being or is likely to be injured, or is prevented from being established, by reason of the importation" into the United States of automobiles from Belgium, Canada, France, Italy, Japan, Sweden, the United Kingdom, and West Germany. On August 8 the Commission instructed

<sup>4</sup> *White Portland Cement from Japan*, Investigation No. AA1921-38, TC Publication 129, 1964.

<sup>5</sup> See, for example, *Welded Wire Mesh from Belgium* ... Investigation No. AA1921-94, TC Publication 497, 1972; and *Titanium Dioxide from Japan* ... Investigation No. AA1921-47, TC Publication 174, 1966.

<sup>6</sup> 19 U.S.C. 160. The relevant amendment to the Antidumping Act was made in section 321 of the Trade Act of 1974, 88 Stat. 2043, amending section 201 of the Antidumping Act. The relevant language reads as follows:

(2) If, in the course of making a determination under paragraph (1), the Secretary concludes, from the information available to him, that there is substantial doubt whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States, he shall forward to the Commission the reasons for such substantial doubt and a preliminary indication, based upon whatever price information is available, concerning possible sales at less than fair value, including possible margins of dumping and the volume of trade. If within thirty days after receipt of such information from the Secretary, the Commission, after conducting such inquiry as it deems appropriate, determines there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States, it shall advise the Secretary of its determination and any investigation under subsection (b) then in progress shall be terminated.

Since this is only the second summary investigation and determination by the Commission under the amended statute, a working definition of the term "no reasonable indication" still is being developed. The standard of evidence clearly is different from that required for a full investigation. However, a very low standard for what constitutes "no reasonable indication" could lead to a negative finding in virtually every thirty-day investigation. Consequently, the standard must be considerably higher than a finding that new evidence added to present evidence possibly would show injury caused by LTFV imports.

The legislative intent of this section of the Antidumping Act, as stated at page 171 of the Senate Report No. 93-1298, must also be considered. The Senate Finance Committee said: "The amendment is designed to eliminate unnecessary and costly investigations which are an administrative burden and an impediment to trade." In order to give meaningful effect to the expressed intent of Congress, the Commission, in cases where a substantial administrative burden and an impediment to trade are involved, should carefully scrutinize the evidence and the conclusions and inferences that may legitimately be drawn from it. Congress apparently felt that complainants must present sufficient evidence to support sustaining an investigation, not that respondents must establish reasons why the investigation should not go forward. Raising the standard of evidence to support the complainants' case accomplishes the Congressional purpose.

In the present case there are several prominent factors other than possible competition from LTFV imports which have contributed to the downturn now evident in the domestic automobile industry. A very important factor, which needs no elaboration, is the national economic recession, which has reduced the demand for virtually all consumer goods, including automobiles. A gradual shift in consumer preferences to smaller and more fuel-efficient automobiles was accelerated by the 1973 petroleum crisis, which brought gasoline shortages, sharp increases in the price of gasoline, and consumer uncertainty about future supplies and prices of fuel. During 1970-72, small cars (compacts and subcompacts) accounted for approximately 36 percent of apparent U.S. consumption; during the first half of 1975, they accounted for more than 51 percent of U.S. consumption. Domestic manufacturers, meanwhile, were slow in accommodating the public's changing preferences. From time to time, the U.S. manufacturers have developed small cars, but those models have grown larger over the years to the point that they no longer meet the demand for small economy cars. Small cars comprised less than 25 percent of domestic sales of domestic automobiles before 1973.

These factors alone are sufficient to account for the economic downturn in the domestic automobile industry and for the present volume of imports of foreign automobiles. In order to justify the continuation of this massive investigation, therefore, the Commission should have before it some direct evidence showing that the injury is occurring "by reason of" imports alleged to have been sold at less than fair value. In this case the Commission has before it no direct evidence from which one could legitimately conclude or infer that the alleged injury is occurring by reason of possible LTFV sales of imported automobiles. Circumstantial evidence does exist, but circumstantial evidence in a case such as this should not be sufficient. There may be cases in which, because of the limited resources of the complaining party or the smaller administrative burden and impact on trade involved, circumstantial evidence would be sufficient. That is not the case before us.

Determining causation requires a determination of the impact of sales of foreign cars on sales of domestic cars. Since the foreign cars compete in two fairly distinct classes, the Commission should examine these two classes separately to determine whether any domestic injury is occurring "by reason of" imports.

The specific industry under investigation, as described by the Treasury, is "new, on-the-highway, four-wheeled, passenger automobiles." This opinion will refer to them as simply "automobiles."

\* By supporting the holding of a hearing as a part of this investigation, I did not intend to shift the burden of establishing the minimum threshold of evidence of injury from the complainants.

The legislative intent of this section of the Antidumping Act, as stated at page 171 of the Senate Report No. 93-1298, must also be considered. The Senate Finance Committee said: "The amendment is designed to eliminate unnecessary and costly investigations which are an administrative burden and an impediment to trade." In order to give meaningful effect to the expressed intent of Congress, the Commission, in cases where a substantial administrative burden and an impediment to trade are involved, should carefully scrutinize the evidence and the conclusions and inferences that may legitimately be drawn from it. Congress apparently felt that complainants must present sufficient evidence to support sustaining an investigation, not that respondents must establish reasons why the investigation should not go forward. Raising the standard of evidence to support the complainants' case accomplishes the Congressional purpose.

In the present case there are several prominent factors other than possible competition from LTFV imports which have contributed to the downturn now evident in the domestic automobile industry. A very important factor, which needs no elaboration, is the national economic recession, which has reduced the demand for virtually all consumer goods, including automobiles. A gradual shift in consumer preferences to smaller and more fuel-efficient automobiles was accelerated by the 1973 petroleum crisis, which brought gasoline shortages, sharp increases in the price of gasoline, and consumer uncertainty about future supplies and prices of fuel. During 1970-72, small cars (compacts and subcompacts) accounted for approximately 36 percent of apparent U.S. consumption; during the first half of 1975, they accounted for more than 51 percent of U.S. consumption. Domestic manufacturers, meanwhile, were slow in accommodating the public's changing preferences. From time to time, the U.S. manufacturers have developed small cars, but those models have grown larger over the years to the point that they no longer meet the demand for small economy cars. Small cars comprised less than 25 percent of domestic sales of domestic automobiles before 1973.

These factors alone are sufficient to account for the economic downturn in the domestic automobile industry and for the present volume of imports of foreign automobiles. In order to justify the continuation of this massive investigation, therefore, the Commission should have before it some direct evidence showing that the injury is occurring "by reason of" imports alleged to have been sold at less than fair value. In this case the Commission has before it no direct evidence from which one could legitimately conclude or infer that the alleged injury is occurring by reason of possible LTFV sales of imported automobiles. Circumstantial evidence does exist, but circumstantial evidence in a case such as this should not be sufficient. There may be cases in which, because of the limited resources of the complaining party or the smaller administrative burden and impact on trade involved, circumstantial evidence would be sufficient. That is not the case before us.

Determining causation requires a determination of the impact of sales of foreign cars on sales of domestic cars. Since the foreign cars compete in two fairly distinct classes, the Commission should examine these two classes separately to determine whether any domestic injury is occurring "by reason of" imports.

\* By supporting the holding of a hearing as a part of this investigation, I did not intend to shift the burden of establishing the minimum threshold of evidence of injury from the complainants.

LTFV imports. Virtually all of the evidence presented to the Commission by both sides of this issue involved the impact of imported small cars, which account for at least 75 percent of the imports and which are more directly competitive with domestic models. Many of the imported luxury cars have characteristics that distinguish them from domestic models and that make price a less important consideration for domestic buyers. With so little evidence presented on the impact of these luxury cars, it seems clear that there is "no reasonable indication" of injury "by reason of" the importation of these luxury automobiles.

As for the likelihood of injury, there again is no indication of its existence by reason of LTFV imports. The domestic industry has been increasingly capable of meeting the demand for small vehicles. Domestic sales of domestic small cars in 1974 were higher than in any other year except 1973, a record year, and the U.S. share of the small car market has increased substantially in recent years from 46 percent in 1970 to 58 percent in 1974. The introduction of new domestic subcompact models and recent indications that a growing number of domestic automobiles are in the same fuel-economy class as many of the more popular imports for all practical purposes eliminate the likelihood of injury to the domestic industry by reason of LTFV imports.

For these reasons, I determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

[Notice (75-62)]

NASA AD HOC ADVISORY SUBCOMMITTEE  
OF THE SPACE SCIENCE STEERING  
COMMITTEE

## Notice of Date and Place of Meeting

The NASA Ad Hoc Advisory Subcommittee of the Space Science Steering Committee to evaluate proposals for Participation in the Scientific Investigations for the Mariner Jupiter/Uranus 1979 mission will meet at the Goddard Space Flight Center, Greenbelt, Maryland, on 1, 2, 3 October 1975. The meetings will be held in Room 200 of Building 26 from 8:30 a.m. to 5:00 p.m. on all three days.

The Subcommittee section will discuss, evaluate, and categorize proposals for participation in scientific investigations to be performed on the Mariner Jupiter/Uranus 1979 mission. Throughout the Subcommittee session the professional qualifications of the proposers, the merits of their proposed flight investigations and the associated instrumentation, and the potential scientific contribution of the proposers to the mission will be candidly discussed and appraised. Discussion of these matters in a public session would invade the privacy of the proposers and the other individuals involved. The meeting will be closed to members of the public.

Since the Subcommittee sessions will be concerned throughout with matters listed in 5 U.S.C. 522(b) (6), it is hereby determined that the sessions should be closed to the public.

For further information please contact Dr. M. A. Mitz at 202/755-3790.

EDWARD L. CROW,  
Assistant Administrator for  
DOD and Interagency Affairs.

SEPTEMBER 9, 1975.

#### NATIONAL SCIENCE FOUNDATION ADVISORY PANEL FOR METABOLIC BIOLOGY

##### Notice of Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Metabolic Biology.  
Date: October 2 and 3, 1975.  
Time: 9:00 a.m. each day.  
Place: Rm. 321, National Science Foundation, 1800 G Street, NW, Washington, D.C.

Type of meeting: Closed.  
Purpose of advisory panel: To provide advice and recommendations concerning support for research in Metabolic Biology.

Agenda: To review, discuss, and evaluate individual research proposals.

Reason for closing: The proposals being reviewed contain information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals.

Authority to close meeting: These matters are within the exemptions of 5 U.S.C. 552(b), (4), (5), and (6). The closing of this meeting is in accordance with the determination by the Director of the National Science Foundation, dated February 21, 1975, pursuant to the provisions of Section 10(d) of Public Law 92-463.

FRED K. MURAKAMI,  
Committee Management Officer.

#### OFFICE OF MANAGEMENT AND BUDGET

##### CLEARANCE OF REPORTS

###### List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 9, 1975 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

###### NEW FORMS

###### NATIONAL SCIENCE FOUNDATION

Termination of Activity Questionnaire, single-time, OIP supported scientists, Lowry, R. L., 395-3772.

###### DEPARTMENT OF COMMERCE

Bureau of Census, Air and Water Pollution Control Energy Requirements, OEA-1, single-time, fossil fuel steam electric plants, Lowry, R. L., 395-3772.

###### DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary, Household Panel—Runaway Youth Survey, single-time, households with children 10-17, Reese, B. F., 395-3211.

###### DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Policy Development and Research, Effectiveness of Congregate Housing for the Elderly, single-time, congregate housing managers, financiers and service providers, Community and Veterans Affairs Division, Sunderhauf, M. B., 395-3532.

###### REVISIONS

###### DEPARTMENT OF DEFENSE

Department of the Air Force: Maintenance Data Collection Record, and Repairable Item Processing Tag, AFPO 349, 349-3, 350, on occasion, manufacturing and maintenance contractors, Harry B. Sheftel.

###### EXTENSIONS

###### DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education: Fiscal Report-Institutes for Training in Librarianship, Title II—Part B, Sections 221, 222, 223, Higher Education Act, OE 3164, annually, institutions of higher education, Marsha Traynham, 395-4529.

###### DEPARTMENT OF THE TREASURY

Bureau of Customs: Declaration of Owner, 3347, on occasion, brokers, Marsha Traynham, 395-4529.

PHILLIP D. LARSEN,  
Budget and Management Officer.

#### HAMILTON FUNDS, INC. ET AL.

##### Filing of Application

SEPTEMBER 11, 1975.

Notice is hereby given that Hamilton Funds, Inc., Hamilton Growth Fund, Inc., and Hamilton Income Fund, Inc., 7400 South Alton Court, Denver, Colorado 80201 (hereafter collectively referred to as "Applicants", all Delaware corporations registered as open-end, diversified management companies, filed an application on July 3, 1975, and an amendment on September 5, 1975, pursuant to Section 6(c) of the Act for an order of the Commission declaring that Robert M. Kirchner ("Kirchner") shall not be deemed an "interested person", as that term is defined in Section 2(a) (19) of the Act, of Applicants and Applicants' investment adviser, Hamilton Management Corporation ("HMC"), solely by reason of his status as a director and nominal employee of Kirchner, Moore & Company (hereinafter, "Kirchner, Moore"), a registered broker-dealer under the Securities Exchange Act of 1934. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

All of the outstanding voting securities of HMC are owned by the International Telephone and Telegraph Corporation ("ITT"). On March 10, 1975, ITT entered into a preliminary agreement with Oppenheimer Management Corporation (hereafter "Oppenheimer") providing for the sale by ITT to Oppenheimer of all the outstanding capital stock of HMC. Although ITT denies that the transaction includes any element of profit, ITT and Applicants, nevertheless, state that the transaction could be viewed by some as including an element of profit.

Section 15(f) of the Act permits an affiliated person of an investment adviser to a registered investment company to receive any amount in connection with a sale of the securities of, or any other interest in, such investment adviser provided that for a period of three years thereafter, at least 75% of the board of directors of such investment company are not interested persons of either the predecessor or successor investment adviser.

Applicants intend, therefore, to restructure their Boards of Directors in accordance with the requirements of Section 15(f) of the Act. In this connection, they seek an order that Kirchner shall not be deemed to be an interested person of HMC either under its present ownership by ITT or after the sale to Oppenheimer.

Section 2(a) (19) of the Act provides that the term "interested person" of an investment company, or an investment adviser thereof includes any person who is an "affiliated person" of any broker or dealer registered under the Securities Exchange Act of 1934.

Section 2(a) (3) of the Act defines the term "affiliated person" of another person to include any officer, director or employee of such other person.

As a director and employee of Kirchner, Moore, Kirchner is thus an affiliated person of a broker-dealer registered under the Exchange Act, and therefore an interested person of HMC and of the Applicants.

Howard T. Cohn, presently Chairman of the Boards of Directors of the Applicant Funds and an ITT Vice President, has indicated that, upon consummation of the sale, he intends to resign as a Director. Applicants' Boards of Directors will then consist of six "non-interested" directors and three "interested" directors (counting Mr. Kirchner) for a total of nine directors. If the Commission enters an order holding Mr. Kirchner not to be an "interested person" within the meaning of Section 2(a) (19) of the Act, the Boards will then consist of two directors who are "interested persons" of HMC, and seven who are not. This will satisfy the 25%/75% ratio set forth in Section 15(f) of the Act and will allow Kirchner to remain a director of Applicants.

Kirchner, one of the founders of Kirchner, Moore, determined to retire from the business and, accordingly, in February, 1975, sold all of his stock in the firm. Applicants indicate that other than rendering services in connection with

an occasional financial project, Kirchner is no longer active in the firm's business or affairs, and that he has no other connections with Kirchner, Moore. Applicants state that the essence of Kirchner's relationship to Kirchner, Moore as an employee is that he makes himself available for consultation with other members of the firm in connection with various matters, including the underwriting of debt issues of municipalities. Kirchner, who works no set hours, and comes and goes as he wishes, spends approximately 25% of his working hours on the affairs of Kirchner, Moore. For his services, he receives a salary, together with office space and secretarial services which he utilizes in connection with his other business pursuits. Applicants represent that Kirchner's activities on behalf of Kirchner, Moore are nominal and for all practical purposes he has retired. The only reason for his continued status as an "employee" is to secure the benefits of the firm's pension and profit sharing plans and the office space and secretarial services which are provided him in recognition of his former position as founder of the firm. Applicants believe that the affiliation of Kirchner with Kirchner, Moore as a director and employee has not and will not impair his independence in acting on behalf of Applicants.

Applicants represent that Kirchner, Moore is engaged solely in a municipal securities business and that neither Applicants nor HMC have had any prior business dealings with Kirchner, Moore. Applicants own no municipal securities and represent that they will not invest in municipal securities in the future if the purchase or sale of such bonds would involve, directly or indirectly, Kirchner, Moore.

Applicants have agreed that if the Commission issues an order that Kirchner shall not be deemed an interested person of HMC, such order may be conditioned upon HMC not having any direct or indirect future business dealings with Kirchner, Moore so long as Kirchner has any connection with that firm.

Section 6(c) of the Act provides that the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provision of the Act or of any rule or regulation under the Act if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than 5:30 p.m. on September 29, 1975, submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should

**INDIANA & MICHIGAN ELECTRIC CO.**  
**Proposed Acquisition of Coal Cars by Lease**

SEPTEMBER 9, 1975.

NOTICE IS HEREBY GIVEN that Indiana & Michigan Electric Company ("I&M"), 2101 Spy Run Avenue, Fort Wayne, Indiana 46801, an electric utility subsidiary company of American Electric Power Company, Inc., a registered holding company, has filed with this Commission an application-declaration pursuant to applicable provisions of the Public Utility Holding Company Act of 1935 ("Act") regarding the acquisition by lease of coal cars. I&M requests approval of these transactions unless advised by the Commission that approval thereof under the Act is not required. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

I&M states that it has entered into an agreement with Bethlehem Steel Corporation ("Bethlehem") for the manufacture of 600 triple hopper cars ("cars") and the delivery of same to I&M for a purchase price of approximately \$30,000 per car, aggregating approximately \$18,000,000. I&M has also entered into negotiations with The Connecticut Bank and Trust Company ("lessor") pursuant to which it is proposed that the lessor purchase the cars (releasing I&M's obligation to Bethlehem to that extent) and that the lessor then lease such cars to I&M. The lessor will be acting as trustee for three beneficiaries ("beneficiaries") and I&M proposes to enter into three

separate leases with the lessor in respect of each beneficiary's interest in the cars.

Each of the leases is a net lease pursuant to which I&M shall pay the lessor all rents and other amounts payable thereunder unless such obligation to pay is extinguished or terminated pursuant to the respective lease terms. I&M will pay the lessor under each of the leases an initial interim installment of rent on March 15, 1976, computed on a daily rate equal to .02916% of the purchase price of each car, using 30-day months, and thereafter pay in 30 semi-annual rental payments an amount equal to 5.2920% of such purchase price (approximately \$1,587.60 per car per payment), commencing with a payment on September 15, 1976.

Terms of each lease also provide, among other things, that I&M may sublease the cars and that I&M has an option to purchase the cars from the lessor at a fair market sales value at the end of the lease term (including extensions thereof). It is also provided in the leases that in the event the beneficiaries are not allowed certain federal tax treatment of the proposed transactions, the rentals to be paid by I&M will be adjusted upward to assure that the beneficiaries' net return on the transaction would be the same as if the tax treatment had been allowed.

It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction. Fees and expenses to be incurred in connection with the proposed transaction are estimated at \$20,000, including legal fees of \$17,500.

Notice is further given that any interested person may, not later than October 6, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

[70-5733]

**PENNSYLVANIA ELECTRIC CO.**

**Proposed Issue and Sale of Cumulative Preferred Stock at Competitive Bidding**

SEPTEMBER 9, 1975.

Notice is hereby given that Pennsylvania Electric Company ("Penelec"), 1001 Broad Street, Johnstown, Pennsylvania 15907, an electric utility subsidiary company of General Public Utilities Corporation, a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Section 6(b) of the Act and Rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

Penelec proposes to issue and sell for cash, subject to the competitive bidding requirements of Rule 50 under the Act, up to 320,000 shares of its cumulative preferred stock, % Series K ("new preferred stock"). Terms of the new preferred stock will include a mandatory redemption provision, commencing not later than October 1, 1980, to retire annually 5% of the number of shares of the new preferred stock that are originally issued. Terms of the new preferred stock will also provide that Penelec shall not refund the new preferred stock by the issuance of either new debt securities at a lower interest cost or other preferred stock at a lower dividend cost within five years of the issuance of the new preferred stock.

The dividend rate and the optional redemption prices will be determined by the competitive bidding. The bidding procedure will require that (1) the price per share (and the price at which each share shall be initially re-offered by the underwriters to the public) shall be \$100, which is the par value of the new preferred stock, (2) the dividend rate for the new preferred stock be specified in such bids and be a multiple of 1/25th of 1% and (3) the underwriting commission per share to be paid by Penelec to the successful bidders be specified in the bids. The bidding procedure will not establish a minimum or maximum dividend rate or commission within which bids may be considered.

The proceeds to be realized from the sale of the new preferred stock will be used to pay a portion or all of Penelec's short-term bank loans expected to be outstanding at the date of sale or to reimburse Penelec's treasury for funds previously expended therefrom for construction purposes. Penelec expects to have approximately \$28,000,000 of bank

**DEPARTMENT OF LABOR**

Office of the Secretary

[TA-W-79]

**AMBAC INDUSTRIES, INC.**

**Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance**

On September 4, 1975, the Department of Labor received a petition filed under Section 221(a) of the Trade Act of 1974 ("the Act") by the International Union of Electrical, Radio and Machine Workers on behalf of the workers and former workers of American Bosch Division, Springfield, Massachusetts of Ambac Industries, Incorporated, Garden City, Long Island, New York (TA-W-132). Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with fuel injection systems produced by Ambac Industries, Incorporated or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than 10 days after this notice is published in the FEDERAL REGISTER.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

**ROYAL PROPERTIES INC.**

**Suspension of Trading**

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock of Royal Properties Incorporated being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities otherwise than on a national securities exchange is suspended, for the period from September 10, 1975 through September 19, 1975.

Signed at Washington, D.C. this 4th day of September 1975.

By the Commission.  
[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc. 75-24494 Filed 9-12-75; 8:45 am]

[TA-W-79]

**ELECTRO MOTIVE CORP.**

**Notice of Certification Regarding Eligibility To Apply for Worker Adjustment Assistance**

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-79; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 223 of the Act.

The investigation was initiated on July 10, 1975 in response to a worker petition received on July 9, 1975 which was filed by workers formerly producing variable capacitors at the Willimantic, Connecticut plant of the Electro Motive Corporation, a subsidiary of International Electronics Corporation, Melville, New York.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 30334) on July 18, 1975. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Electro Motive Corporation, its customers, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

**Significant Total or Partial Separations**

A significant number or proportion of production workers at the Willimantic plant became totally or partially separated in the first half of 1975. Average monthly employment declined 34 percent in the first half of 1975 compared to the same period in 1974.

**Sales or Production, or Both, Have Decreased Absolutely**

Production at the Willimantic plant declined 50 percent from 1973 to 1974. Production declined 14 percent in the first half of 1975 compared to the first half of 1974.

Increased Imports Contributed Importantly.

absolute decline in sales or production, or both, of such firm or subdivision and to

bility requirements of Section 222 of the Act will be certified as eligible to apply

No. 35957, Southern Clay Products, Inc. v. Southern Pacific Transportation Company, Et al. now assigned October 29, 1975 at

tive date of the order in that proceeding pending its disposition. The matters re-

ing, Inc., Bloomfield, New Jersey, of Certificate No. MC-76328 issued November 9,

### Increased Imports Contributed Importantly

Imports of articles like or directly competitive with those produced at Willimantic increased from 120 million units in 1972 to 161 million units in 1974. The ratios of imports to domestic consumption and production increased from 79.0 percent and 100.0 percent, respectively in 1972 to 89.9 percent and 111.8 percent in 1974.

The evidence developed by the Department's investigation indicates that the separation of workers engaged in employment related to the production of variable capacitors was caused by the increase of competitive imports. The company ceased its variable capacitor production at its Willimantic plant and transferred it to its other facility at Florence, South Carolina because it could not compete at a profitable level with imports.

### Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with variable capacitors produced at the Willimantic plant contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

"All hourly, piecework, and salaried workers engaged in employment related to the production of variable capacitors at the Willimantic, Connecticut plant of Electro Motive Corporation who became totally or partially separated from employment on or after December 2, 1974 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974."

Signed at Washington, D.C. this 8th day of September 1975.

GLORIA G. PRATT,  
Director, Office of  
Foreign Economic Policy.

[FR Doc. 75-24454 Filed 9-12-75; 8:45 am]

### GLOBE UNION, INC.

### Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On September 4, 1975, the Department of Labor received a petition filed under Section 221(a) of the Trade Act of 1974 ("the Act") by the Industrial Union Department, on behalf of the workers and former workers of Centralab Division of Globe Union, Inc., Los Angeles, California (TA-W-131). Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with electronic components produced by Globe Union, Inc. or an appropriate subdivision thereof have contributed importantly to an

### NOTICES

absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 25, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 4th day of September 1975.

MARVIN M. FOOKS,  
Acting Director, Office of  
Trade Adjustment Assistance.

[TA-W-131]

### SERVCO HEEL FACTORY

### Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On September 4, 1975, the Department of Labor received a petition filed under Section 221(a) of the Trade Act of 1974 ("the Act") by the United Shoe Workers on behalf of the workers and former workers of Servco Heel Factory, Bonne Terre, Missouri (TA-W-131). Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with heels for women's footwear produced by Servco Heel Factory or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligi-

bility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than September 25, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave. NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 4th day of September 1975.

MARVIN M. FOOKS,  
Acting Director, Office of  
Trade Adjustment Assistance.

### INTERSTATE COMMERCE COMMISSION

[Notice No. 854]

### ASSIGNMENT OF HEARINGS

SEPTEMBER 10, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

No. 35940, Investigation into the Lawfulness of Interchange Arrangements Between the Bangor and Aroostook Railroad and CP Rail at Brownville Junction, Maine; No. 35987, Maine Central Railroad Company V. Bangor and Aroostook Railroad Company and No. 36013 Sub 1, Boston and Maine Corporation, Robert W. Meserve and Benjamin H. Lacy, Trustees V. Bangor and Aroostook Railroad Company, has been continued to October 21, 1975 at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 99493 Sub 4, Central Storage & Transfer Co. of Harrisburg, now assigned October 20, 1975 at Harrisburg, Pennsylvania; will be held in the Penn-Liquor Control Board, Capital & Forester Streets.

MC-P-12304, Mid States Trucking Co.—Investigation of Control—Govan Express, Inc., and Denton Produce Inc.; now assigned November 3, 1975, at Dallas, Texas will be held in Room 5A15 New Federal Bldg., 1100 Commerce Street.

MC 121281 Sub 10, Big Mac Trucking Co., now assigned November 5, 1975, at Dallas, Texas will be held in Room 5A15, New Federal Bldg., 1100 Commerce Street.

### NOTICES

No. 35957, Southern Clay Products, Inc. v. Southern Pacific Transportation Company. Et al, now assigned October 29, 1975, at Dallas, Tex., will be held in Room 5A15, New Federal Bldg., 1100 Commerce Street.

No. 36160, Sikes Corporation v. Southern Pacific Transportation Company now assigned October 29, 1975, at Dallas, Texas will be held in Room 5A15, New Federal Bldg., 1100 Commerce Street.

MC-C-8568, Oscar C. Radke, d/b/a Radke Transit—Investigation and Revocation of Certificates, now assigned September 18, 1975 at Chicago, Illinois, is canceled.

MC 138141 Sub 3, Louis Santora, Jr., d/b/a AAA—United Limousine Service and MC 139886 Sub 2, A-ABC Sky View Taxi Cab, Inc., now assigned October 14, 1975 at Somerville, New Jersey, will be held at the Holiday Inn, Route 22.

MC 140724, Burning Bar Sales Co., Inc., now assigned October 29, 1975, at Chicago, Ill., is postponed indefinitely.

MC 200 Sub 273, Rise International Corporation, MC 10761 Sub 276, Transamerica Freight Lines, Inc., MC 95540 Sub 923, Watkins Motor Lines, Inc., MC 108207 Sub 414, Frozen Food Express, Inc.

MC 111231 Sub 191, Jones Truck Lines, Inc., MC 113678 Sub 584, Curtis, Inc., MC 114569 Sub 115, Shaffer Trucking, Inc., MC 119789 Sub 236, Caravan Refrigerated Cargo, Inc., MC 133655 Sub 82, Trans-National Truck, Inc., MC 134323 Sub 69, Jay Lines, Inc., and MC 134755 Sub 51, Charter Express, Inc., now assigned October 29, 1975 at the International Revenue Service Building, Rooms 118 & 120, 1412 South Main Street.

MC 117815 Sub 238, Pulley Freight Lines, Inc., now assigned September 30, 1975 at Chicago, Illinois; will be held in Room 204A Everett McKinley Dirksen Building, 219 S. Dearborn St.

MC 124004 Sub 28, Richard Dahn, Inc., now assigned October 1, 1975 at Chicago, Illinois; will be held in Room 1119 Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 110420 Sub 719, Quality Carriers, Inc., now assigned October 6, 1975 at Chicago, Illinois; will be held in Room 1086A Everett McKinley Dirksen Building, 219 South Dearborn Street.

### MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

SEPTEMBER 15, 1975.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 C.F.R. Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before October 6, 1975. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective

date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-75950. By order of September 9, 1975, the Motor Carrier Board on reconsideration approved the transfer to Capital Transit, Inc., doing business as Concord Coach Lines, Concord, N.H., of the operating rights in Certificate No. MC-110213 issued February 14, 1968, to Edmunds Bus Line, Inc., New London, N.H., authorizing the transportation of passengers and their baggage, in the same vehicle with passengers, in round trip charter operations, beginning and ending at New London, N.H., and points within 10 miles of New London, and extending to points in Maine, Vermont, Massachusetts, Connecticut, Rhode Island, and New York. William R. Joslin, 16 Centre Street, Concord, N.H. 03301, Attorney for applicants.

No. MC-FC-75987. By order of September 8, 1975, the Motor Carrier Board approved the transfer to Jacobson's Moving and Storage, Inc., La Crosse, Wisconsin, of Permit No. MC-114097 (Sub-No. 1), issued April 30, 1975, authorizing the transportation of such commodities as are dealt in by retail department stores and mail order houses from La Crosse, Wisconsin to certain specified counties in the States of Minnesota, Iowa, and Wisconsin. Roger W. Hafner, 324 Exchange Building, La Crosse, Wisconsin, Attorney for Transferee and Transferor.

No. MC-FC-76009. By order of September 8, 1975, the Motor Carrier Board approved the transfer to Seaboard Freight Lines, Inc., South Boston, Massachusetts, of Certificate of Registration No. MC-57412 (Sub-No. 2) issued October 7, 1970, to Charles F. Hayes, d/b/a Astro Freightways, Norwood, Massachusetts, evidencing a right to engage in transportation in interstate commerce corresponding in scope to Irregular Route Common Carrier Certificate No. 1073 dated May 3, 1956, issued by the Massachusetts Department of Public Utilities. Frank J. Weiner, 15 Court Square, Boston, Mass. 02108, Attorney for Applicants.

No. MC-FC-76005. By order of September 8, 1975, the Motor Carrier Board approved the transfer to Harry Mahally, Jr., doing business as Mahally Trucking Service, Wilkes-Barre, Pennsylvania of Certificate No. MC-24060, issued August 12, 1965, to Harry Mahally, Jr., and Lawrence P. Mahally, doing business as Mahally Trucking Service, Wilkes-Barre, Pennsylvania, authorizing the transportation of household goods, between Wilkes-Barre, Pa., and points within ten miles thereof, on the one hand, and, on the other, points in Connecticut, Ohio, New York, New Jersey, Maryland, West Virginia, Michigan, Virginia, South Carolina, and the District of Columbia. Louis Shaffer, Esquire, 666 United Penn Bank Bldg., Wilkes-Barre, Pennsylvania 18702, Attorney for applicants.

No. MC-FC-76006. By order of September 8, 1975, the Motor Carrier Board approved the transfer to V. Ann Truck-

ing, Inc., Bloomfield, New Jersey, of Certificate No. MC-76328 issued November 9, 1970, to The Big (M) Trucking Co., Inc., Bloomfield, New Jersey, authorizing the transportation of paper and other specified commodities between New York, N.Y., on the one hand, and, on the other, points in New Jersey within 25 miles of New York, N.Y. Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, New Jersey 08904, Applicants Representative.

No. MC-FC-76048. By order entered September 8, 1975, the Motor Carrier Board approved the transfer to Wilson Rapid Transit Lines, Inc., Belen, N. Mex., of Certificate of Registration No. MC-30478 (Sub-No. 3), issued December 15, 1964, to H. L. Wilson, doing business as Wilson's Rapid Transit Lines, Belen, N. Mex., evidencing a right to engage in transportation in interstate or foreign commerce, of general commodities, between specified points in New Mexico. O. Russell Jones, P.O. Box 2228, Santa Fe, N. Mex. 87501, attorney for applicants.

### LIST OF INTERMEDIARIES

SEPTEMBER 9, 1975.

The provision of the Canons of Conduct of the Interstate Commerce Commission relating to Intermediaries (49 CFR 1000.735-23) reads as follows:

*Intermediaries.* Members and employees of the Commission shall not recommend or suggest the use of any non-governmental intermediary (individual, firm, corporation, or other entity) offering any service as consultant, agency representative, attorney, expeditor, or specialist for the purpose of assisting in any negotiations, transactions, or other business with or before this Commission: *Provided, however,* that making available general reference lists of such nongovernmental intermediaries, the use of which is authorized by the Secretary of the Commission shall not be deemed to be in violation of this section.

The following is a general reference list of nongovernmental intermediaries in the Washington area who regularly utilize the Commission's records in the Public Tariff File Room of its Bureau of Traffic and who engage in rate work, the preparation of tariff material, etc.

The list has been prepared solely for the information and convenience of the public. It does not constitute an endorsement by the Commission, nor is any responsibility for the services rendered assumed by the Bureau, its officers, supervisors or employees. Without designating any intermediary listed of the specialized qualifications of any, the entire list must be made available.

Changes and additions to the list will be considered upon request to the Director of the Bureau of Traffic, subject to authorization by the Secretary of the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

**Title 33—Navigation and Navigable Waters**  
**CHAPTER II—CORPS OF ENGINEERS,**  
**DEPARTMENT OF THE ARMY**

[ER 1105-2-81]

**PART 265—PLANNING ASSISTANCE**  
**TO STATES**

**Policies and Procedures**

On 5 February 1975, the Secretary of the Army, acting through the Chief of Engineers, proposed a regulation providing policies and general guidance for Corps of Engineers' participation in a planning assistance program authorized by Section 22 of the Water Resources Development Act of 1974, Public Law 93-251. Interested persons and organizations were given until 24 March 1975 in which to submit comments and suggestions on the proposed regulation.

Comments were received from several Corps of Engineers field offices and the following:

Delaware River Basin Commission  
 United States Environmental Protection Agency  
 State of Illinois, Department of Transportation  
 State of Georgia, Department of Natural Resources  
 State of Tennessee, Office of Urban and Federal Affairs  
 Environmental Defense Fund  
 National Resources Defense Council, Inc.

All comments were given careful consideration, and as a result, the following changes were made to the proposed regulation:

1. Section 265.14(a). The word "land" has been inserted between the words "related" and "resources" in the fourth and eighth lines. The penultimate sentence has been revised to read as follows: "It is anticipated that such effort will normally be in one of the areas of Corps expertise in comprehensive planning in which the Corps has legislative authority."

2. Section 265.14(b). The following has been added to the first sentence: "... it means, for that portion of the drainage basin within the State."

3. Section 265.14(c). "Will prepare" has been changed in the second sentence to "is authorized to prepare." The second sentence has been revised to read: "If prepared, the Corps report will be processed. . . ." The following sentence has been added to the end of the paragraph: "If funds are not available, normal survey report funding and authorization procedures must be followed."

4. Section 265.15(b). The following sentence has been added to the paragraph: "Section 22 funds can be used to review and update areas previously covered by authorized studies or projects, provided this review is needed by a State for its planning effort, and provided these are not currently funded activities." In the second sentence of the proposed regulation, the words "flood plain information programs" have been changed to "flood plain management services."

5. Section 265.15(c). The last four sentences in Section 265.13(b) have been revised and redesignated as § 265.15(c).

**RULES AND REGULATIONS**

The remaining paragraphs have been redesignated § 265.15 (d), (e), (f), and (g) from § 265.15 (c), (d), (e), and (f), respectively.

6. Section 265.15(e). The following has been added to the end of the paragraph: "An example of this would be in providing planning assistance to interstate agencies when such a request is concurred in by the member States involved."

7. Section 265.17. Specific instructions for submittal of budgetary data and funding requests from Corps field offices to the Office of the Chief of Engineers have been deleted. These instructions will be included in other Corps directives published annually to obtain funding requirements from Corps field offices.

8. Section 265.18 added. "Effective date. This regulation is effective September 15, 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 265."

9. Appendix A. Lead coordinating Division for Illinois changed from "NPD" to "NCD." In three cases, Coastal Zone Management activities are to be managed by other than the lead coordinating Division, to facilitate coordination in coastal matters.

With the above changes, and several other editorial revisions, the proposed regulation is adopted as set forth below.

Effective date. This regulation is effective September 15, 1975.

Dated: September 3, 1975.

RUSSELL J. LAMP,  
 Colonel, Corps of  
 Engineers Executive.

Part 265 reads as follows:

Sec. 265.10 Purpose.  
 265.11 Applicability.  
 265.12 References.  
 265.13 Legislative provisions.  
 265.14 Basic policies.  
 265.15 General guidelines.  
 265.16 Program management.  
 265.17 Funding.  
 265.18 Effective date.

AUTHORITY: Sec. 22, Pub. L. 93-251, Water Resources Development Act of 1974, (88 Stat. 20).

**§ 265.10 Purpose.**

This regulation provides basic policies and general guidelines for Corps of Engineers' participation in the program authorized by section 22 of the Water Resources Development Act of 1974 (Pub. L. 93-251).

**§ 265.11 Applicability.**

This regulation is applicable to all OCE elements and all field operating agencies having Civil Works responsibilities.

**§ 265.12 Reference.**

(a) Section 22, Public Law 93-251, Water Resources Development Act of 1974, 7 March 1974.

(b) Public Law 92-583, Coastal Zone Management Act of 1972, 27 October 1972.

(c) Section 214, Public Law 89-298, Flood Control Act of 1965, 27 October 1965.

(d) Section 204, Public Law 91-611, Flood Control Act of 1970, 31 December 1970.

**§ 265.13 Legislative provisions.**

(a) Specifically, section 22 provides for the following:

(1) The Secretary of the Army, acting through the Chief of Engineers, is authorized to cooperate with any State in the preparation of comprehensive plans for the development, utilization and conservation of the water and related resources of drainage basins located within the boundaries of such State and to submit to Congress reports and recommendations with respect to appropriate Federal participation in carrying out such plans.

(2) There is authorized to be appropriated not to exceed \$2,000,000 annually to carry out the provisions of this section except that not more than \$200,000 shall be expended in any one year in any one State.

(b) Both Congressional Committees on Public Works reported to their respective bodies of Congress prior to enactment of the measure, that

"[I]n view of the success of the previous (section 214) program, the Committee feels that it is now desirable and proper to extend the same assistance to all of the States. This legislation is particularly desirable in view of the provisions of the Water Resources Planning Act of 1965 which provides for increased participation by the States in water resources planning and in the formulation of comprehensive river basin plans in connection with the River Basin Commissions established under that Act. The cooperative program authorized by this section will constitute a valuable complement to the program being carried out under the Water Resources Planning Act." (House Report No. 93-541, p. 94 and Senate Report No. 93-615, p. 119).

(c) Stripped of connecting language Section 22 provides authority for the Secretary of the Army, acting through the Chief of Engineers " . . . to cooperate with any State in the preparation of comprehensive plans for . . . drainage basins located within the boundaries of such State and to submit to Congress reports and recommendations with respect to appropriate Federal participation in carrying out such plans."

**§ 265.14 Basic policies.**

(a) The first phrase "to cooperate with any State in the preparation of comprehensive plans" is taken to mean the following: (1) The State must have a planning program for the development, utilization or conservation of the water and related land resources underway or laid out in sufficient detail so that the relationship of a State's request for Corps input for some particular aspect of the program may be appraised. All Corps input must be an integral part of the State program for developing their plans for water and related land resources of drainage basins located in the State. (2) The input from the Corps is to be on an effort or service sharing basis in lieu of an outright grant basis. It is anticipated that such effort will normally be in one of the areas of Corps' expertise in comprehensive planning in which the Corps

normally has legislative authority. However, other areas may be investigated on a case by case basis if they are necessary in the State's decision making process.

(b) "Drainage basins located within the boundaries of such State" does not mean that the drainage basin must fall entirely within the State; it means, for that portion of the drainage basin within the State. For the purpose of this Act, Coastal zone areas may also be included in the general heading of "drainage basins."

(c) The third aspect of the authorizing language pertains to the reporting process. Under this process, upon completion of the pertinent portion of the State's planning effort and with the concurrence of the State, the Corps is authorized to prepare a report of survey type scope on those aspects of the study for which there is a Federal interest. If prepared, the Corps' report will be processed to Congress following the customary survey report procedures including sponsorship requirements, cost-sharing, etc., and will include recommendations for authorization as appropriate. Funds for preparing the Corps report should come from Section 22 funds. If funds are not available, normal survey funding and authorization procedures must be followed. If no Federal interest is found to exist, no Corps report is required.

(d) The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands. However, in the case of New York and Puerto Rico, specific legislative authorities have been previously provided, consistent with Section 22. Funding requests for these States should be submitted under either the previous (Section 214, PL 89-298 for New York State and Section 204, PL 91-611 for Puerto Rico) authorities or Section 22, but not both in the same year.

**§ 265.15 General guidelines.**

(a) Mutually understood goals will be agreed upon with the State before the Corps enters into a cooperative planning effort.

(b) In determination of eligibility, the Section 22 program is to furnish information to States for their planning purposes as outlined in Sec. 265.14(a). Section 22 funds can be used to review and update areas previously covered by authorized studies or projects, provided this review is needed by a State for its planning effort, and provided these are not currently funded activities. Duplication of effort must be avoided. This authority is not to be used to insert additional funds into ongoing or pending Federal programs such as comprehensive studies, regular surveys, flood plain management services, small projects under continuing authorities or other specific authorizations.

(c) Studies may be conducted, or data and information furnished, under the Section 22 program to assist States under the Coastal Zone Management (CZM) Act of 1972 (reference § 265.12(b)),

**RULES AND REGULATIONS**

normally has legislative authority. However, other areas may be investigated on a case by case basis if they are necessary in the State's decision making process.

(b) "Drainage basins located within the boundaries of such State" does not mean that the drainage basin must fall entirely within the State; it means, for that portion of the drainage basin within the State. For the purpose of this Act, Coastal zone areas may also be included in the general heading of "drainage basins."

(c) The third aspect of the authorizing language pertains to the reporting process. Under this process, upon completion of the pertinent portion of the State's planning effort and with the concurrence of the State, the Corps is authorized to prepare a report of survey type scope on those aspects of the study for which there is a Federal interest. If prepared, the Corps' report will be processed to Congress following the customary survey report procedures including sponsorship requirements, cost-sharing, etc., and will include recommendations for authorization as appropriate. Funds for preparing the Corps report should come from Section 22 funds. If funds are not available, normal survey funding and authorization procedures must be followed. If no Federal interest is found to exist, no Corps report is required.

(d) The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands. However, in the case of New York and Puerto Rico, specific legislative authorities have been previously provided, consistent with Section 22. Funding requests for these States should be submitted under either the previous (Section 214, PL 89-298 for New York State and Section 204, PL 91-611 for Puerto Rico) authorities or Section 22, but not both in the same year.

**§ 265.15 General guidelines.**

(a) Mutually understood goals will be agreed upon with the State before the Corps enters into a cooperative planning effort.

(b) In determination of eligibility, the Section 22 program is to furnish information to States for their planning purposes as outlined in Sec. 265.14(a). Section 22 funds can be used to review and update areas previously covered by authorized studies or projects, provided this review is needed by a State for its planning effort, and provided these are not currently funded activities. Duplication of effort must be avoided. This authority is not to be used to insert additional funds into ongoing or pending Federal programs such as comprehensive studies, regular surveys, flood plain management services, small projects under continuing authorities or other specific authorizations.

(c) Studies may be conducted, or data and information furnished, under the Section 22 program to assist States under the Coastal Zone Management (CZM) Act of 1972 (reference § 265.12(b)),

when the primary purpose of such work is to complement comprehensive State Planning for effective management of its coastal zone. Requests for funding under Section 22 shall be made in accordance with the provisions of § 265.17 of this regulation. Corps participation under Section 22 may not be used to offset the required State contribution to the National Oceanic and Atmospheric Administration (NOAA)-administered grant program. Under the NOAA grant program, the State must finance at least one-third the annual costs of work under CZM.

(d) Inter-agency disputes must be avoided, as for example, those which might arise from diversions of activities to Section 22 from the comprehensive studies being handled under coordinated budget procedures with full State participation.

(e) Corps activities under Section 22 within one State should not extend to areas which clearly involve the interests of other States, unless all States involved agree that the activities reflect coordinated response to the needs of those States. An example of this would be in providing planning assistance to interstate agencies when such a request is concurred in by the member States involved.

(f) All Corps-State activities are to be conducted through the lead Corps Division for each state as noted in Appendix A. The responsibility may be delegated by the Division Engineer to a District office to act as lead Corps contact for that State. Division Engineers will insure the adequacy of support of the lead office in their coordinating role, for those States that fall within two or more Corps Districts or Divisions, extra effort will be required by the lead office. This is especially critical due to the nature of funding for the program. All affected Divisions and Districts should be regularly represented and be permitted to participate in activities concerning areas within their Division or District.

(g) The lead office will contact each State for which the office is responsible to advise them of the program and to obtain an expression of interest. If interest is expressed, a meeting should be encouraged to discuss potential areas of assistance with the State representatives and appropriate representatives of other affected Corps Districts and Divisions. Based on these contacts and meetings, the State should submit a request for assistance to the lead office for transmittal through appropriate channels to OCE. Upon transmittal of the request to OCE, an information copy should be furnished to affected Divisions and/or Districts if different from the lead office. OCE will review and approve all requests and allocate funds to the lead Division with an information copy to all affected Divisions and Districts.

**§ 265.16 Program management.**

Program management and budget formulation will be the responsibility of Planning Division, DAEN-CWP. Plan-

ning matters will be submitted in triplicate to HQDA (DAEN-CWP-E, C or W, as appropriate) WASH DC 20314, as required. Division Engineers are to designate an individual within the Division Office to manage and coordinate the activities under this program. Overall OCE program coordination and selection of studies to be undertaken, when funding requests exceed available funds, will be by DAEN-CWP-A.

**§ 265.17 Funding.**

Annual budget requests will be submitted as required by appropriate budget circulars and regulations, under the general title of "Coordination Studies with Other Agencies".

**§ 265.18 Effective date.**

This regulation is effective 15 September 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 265.

## PART 266—PROJECT DEAUTHORIZATION REVIEW PROGRAM

### Policies and Procedures

On 2 April 1975, the Secretary of the Army acting through the Chief of Engineers, proposed a regulation prescribing policies and procedures to implement Section 12, Public Law 93-251, Water Resources Development Act of 1974. Interested persons and organizations were given until 15 May 1975 to submit comments and suggestions on the proposed regulation.

Comments were received from several Corps of Engineers field offices; the Fish and Wildlife Service, Department of the Interior; the National Audubon Society; the National Resources Defense Council, Inc.; the Port of Green Bay, Wisconsin; and the Committee on Allerton Park. All comments received careful consideration and, as a result, the following changes were made to the proposed regulation:

1. In § 266.13, the first sentence was amended to indicate that a project modification separately authorized by Congress, or an element of a project identified as a separate project, are eligible for review.

2. Section 266.13(c) was amended by adding the words: "that will affect the deauthorization review."

3. Section 266.13(e) was added to clarify the use of the Section 12 deauthorization review program for recommending abandonment of Federal maintenance of completed projects and elements of projects.

4. In Section 266.14(a), the last sentence was changed to indicate that listings "are to" be made available to the public rather than "may" be made available.

5. In § 266.14(b) (3), the word "legitimate" was deleted.

6. Section 266.14(d) was amended to indicate minimum procedures for informing the public of projects under review.

7. In § 266.14(e), an additional reason for deauthorization was included: "The project has significant and unacceptable adverse environmental impacts."

8. In § 266.14(e) (5), previously § 266.14(e) (4), the phrase "for any other reason" was clarified.

9. In § 266.14(f), the last sentence was clarified.

10. Section 266.15(a) was amended to indicate that Division and District Engineers will be notified of deauthorization recommendations made by the Chief of Engineers, and that DAEN-CWP will

keep listings of projects eligible for deauthorization, projects recommended for deauthorization, and projects deauthorized.

11. Section 266.16(b) was amended to state that the minimum procedure set forth in Section 266.14(d) would be employed by reporting officers.

12. Section 266.16(c) was amended by clarifying that Division Engineers review Project Information Sheets on projects reviewed, but not recommended for deauthorization.

13. In § 266.16, paragraph (d) was added to indicate that OCE will issue a press release when recommendations of the Chief of Engineers are submitted to Congress by the Secretary of the Army.

14. In § 266.16, paragraph (e) was added to indicate that DAEN-CWP will determine the date projects are deauthorized under Section 21, notify Division and District Engineers of deauthorizations, and remove deauthorized projects from the eligibility listing.

15. Section 266.17 was added to indicate the effective date and applicability of the regulation.

With the above changes, and other editorial revisions, the proposed regulation is adopted as set forth below.

Effective date. This regulation is effective September 15, 1975.

Dated: September 3, 1975.

RUSSELL J. LAMP,  
Colonel, Corps of  
Engineers Executive.

Part 266 reads as follows:

Sec.	Purpose.
266.10	Applicability.
266.11	References.
266.12	Program eligibility.
266.13	Program policies.
266.14	Program management responsibilities.
266.15	Program procedures.
266.16	Effective date.

AUTHORITY: Section 12, Pub. L. 93-251, Water Resources Development Act of 1974 (88 Statute 16), dated 7 March 1974.

### § 266.10 Purpose.

This regulation provides policies and procedures for implementation of section 12, Pub. L. 93-251, which directs the Chief of Engineers to submit annually to Congress a list of projects which have been authorized for at least eight years, have received no funds in the last eight years, and which should be no longer authorized.

### § 266.11 Applicability.

This regulation is applicable to all OCE elements and all field operating agencies having civil works responsibilities.

### § 266.12 References.

(a) Section 12, Pub. L. 93-251, "Water Resources Development Act of 1974," (88 Stat. 16), dated 7 March 1974 (Appendix A).<sup>1</sup>

<sup>1</sup> Text of sec. 12, Pub. L. 93-251 (88 Stat. 16) filed as part of the original document.

(b) ER 1105-2-502, "Public Meetings," (33 CFR 209.405).

### § 266.13 Program eligibility.

The following criteria are applicable to determine if an authorized project, a project modification separately authorized by Congress, or an element that has been administratively identified as a separate project by the Corps of Engineers, as shown in the Civil Works Information System, is eligible for review under this program; assume that recommendations will be submitted on 1 January each year:

(a) The project must have been authorized for at least eight years prior to submission of a recommendation to Congress.

(b) The project must have received no funds for advanced engineering and design or construction in the successive eight years prior to submission of a recommendation to Congress. (Funds include those which have been appropriated by Congress or allotted with specific Congressional approval.)

(c) The project is not being reviewed under another Corps program that will affect the deauthorization review.

(d) Projects which have been automatically deauthorized due to the expiration of the 5-year limitation for receipt of local assurances (33 U.S.C. 701c) are not eligible for review under this program.

(e) Pending Congressional action on the legislation proposed by the Chief of Engineers to amend Section 12 (H. Doc. 94-192), the following are not eligible for review under this program and shall not be recommended under the provisions of § 266.16(e):

(1) Deauthorization (or abandonment) of Federal maintenance of completed projects, where such maintenance has been authorized by Congress.

(2) Deauthorization of an element of a project if another element of that project, authorized by the same Act of Congress, has received funds in the last eight years.

### § 266.14 Program policies.

(a) A list of projects eligible for deauthorization will be maintained by OCE. Division and District Engineers will maintain those portions of the list for States within their respective areas of jurisdiction. Such listings are to be made available to the public upon request.

(b) Within the capability for implementation of this program, and within available funds, projects eligible for deauthorization should be reviewed under Section 12 in the order of priority given in this subparagraph. Reporting officers may release information regarding which projects are scheduled for review in the next fiscal year, following release of the President's budget for that year.

(1) Projects for which a deauthorization review has been requested by a Congressional resolution adopted pursuant to section 12(e), P.L. 93-251.

(2) Completion of deauthorization reviews previously started.

(3) Projects for which a deauthorization review has been requested by local interests (i.e., governmental or non-

governmental entities in the project area), or national organizations having an interest in the project area.

(4) Projects considered by the reporting officer as suitable for a recommendation of deauthorization without further study.

(5) Projects requiring further study in order to make a recommendation concerning deauthorization.

(c) Review under section 12 should be conducted to the extent necessary to determine whether the project as authorized, should continue to be authorized based on the criteria in § 266.14e. The review is not intended to affirm the viability of the project as authorized or to reformulate the authorized project to meet current needs. These objectives are to be reserved for Phase I Advanced Engineering and Design, should the project become funded by Congress, for the Deferred for Restudy Program if the project was deferred due to lack of economic justification, or for a review specifically authorized by Congress.

However, a review conducted under section 12 may provide sufficient information to recommend reclassification of the project.

(d) Reporting officers shall solicit views from the public that would be affected by, or interested in, the authorized project and coordinate their review with other agencies, as part of their formulation of recommendations to Division Engineers on deauthorization. The procedures by which views are solicited are to be determined by the reporting officer, and may include public meetings, public notices, news releases and others. As a minimum, the reporting officer shall issue a public notice, and mail such notice to known interested and affected parties, announcing the Corps interest in obtaining the public's views on projects under deauthorization review and informing the public that the Corps will hold a public meeting if deemed necessary by the public response. A list of projects under review, together with pertinent information, should be provided in the public notice.

(e) In addition to the eligibility criteria given in § 266.13, a recommendation for deauthorization must be supported by one or more of the following reasons:

(1) The project lacks economic justification, and it is apparent that a restudy would not develop an economically justified plan.

(2) The project, as authorized, is not adequate to meet current or prospective needs, and to obtain an adequate improvement would require such substantial modifications and involves such increased costs that the Corps could not proceed without new authorization from Congress.

(3) The project has significant and unacceptable adverse environmental impacts.

(4) The project is generally opposed by local interests or there is little or no prospect that the required local cooperation will be forthcoming.

(5) The project, or part thereof, is no longer required because it has been accomplished by local interests or an-

other agency, or has been superseded by another project, or is no longer required for any other reason.

(f) Recommendations of reporting officers and Division Engineers regarding project deauthorizations are considered internal staff recommendations to the Chief of Engineers and are not to be released to the public until the Chief of Engineers list of projects proposed for deauthorization is transmitted to States and Federal agencies for comment. Information, other than the recommendation, obtained during the deauthorization review process is to be made available to the public on request.

(g) The Chief of Engineers will formulate his list of projects proposed for deauthorization based on the recommendations of Division Engineers. The Chief of Engineers will coordinate this list with Governors of affected States and Federal department, agency and instrumentality heads, as prescribed by section 12.

### § 266.15 Program management responsibilities.

(a) Office of the Chief of Engineers. Planning Division (DAEN-CWP) has primary responsibility for management of the program, to include providing guidance to field operating agencies, formulating recommendations for the Chief of Engineers based on inputs from Division Engineers, notifying Division and District Engineers of recommendations made by the Chief of Engineers, and formulating program budgetary submissions and work allowances. DAEN-CWP will also keep listings of projects eligible for deauthorization, projects recommended for deauthorization by the Chief of Engineers, and projects deauthorized under Section 12. All funding and budgetary matters will be coordinated with DAEN-CWP, which will issue work allowances to field operating agencies.

(b) Division Engineers. Division Engineers are responsible for reviewing budgetary requests submitted by District Engineers and for recommending project deauthorizations to the Chief of Engineers in accordance with the procedures in § 266.16.

(c) District Engineers/Operating Division Engineers. Reporting officers are responsible for conducting reviews of projects in accordance with the policies and procedures contained in this regulation. Reporting officers are encouraged to annually conduct the maximum number of reviews possible within their capability and funding limitations.

### § 266.16 Program procedures.

(a) Maintenance of eligibility listing. A listing of projects eligible for deauthorization will be revised as necessary by DAEN-CWP-A. Division Engineers will submit changes together with recommendations, as provided in § 266.16c below, or at other times as they deem appropriate. A project will be removed from the listing:

(1) If funds are appropriated for advanced engineering and design or construction for the project,

(2) If deauthorized under section 12 or other appropriate legislation, or

(3) If either Committee on Public Works adopts a resolution stating that

(d) Submittal of Chief of Engineers' Recommendations to Congress. Upon

ests may decide they do not want a project. Yet, in all of these cases, unless the time-consuming process of obtaining

## RULES AND REGULATIONS

(3) If either Committee on Public Works adopts a resolution stating that the project shall continue to be authorized.

(b) *Conduct of deauthorization review.* Pursuant to the policies stated in § 266.14, reporting officers shall prepare project information sheets and other appropriate data for the purposes of public involvement, coordination, and documenting a determination on the appropriateness of deauthorization at the conclusion of the review. The reporting officer shall conduct those studies and analyses, and initiate public involvement and coordination activities, as deemed necessary, but shall include the minimum procedure set forth in § 266.14(d), to achieve the objective of this program and the Corps public involvement objectives. Public meetings, if held, will be generally in accordance with guidelines in ER 1105-2-502.

(c) *Submittal of deauthorization recommendations to the Chief of Engineers (RCS DAEN-CWP-13).* Division Engineers will submit annually to the Chief of Engineers the following information. Submissions are to be sent to HQDA (DAEN-CWP-A) WASH DC 20314 by 1 September.

(1) Recommendations (in 3 copies) on projects for which reviews have been conducted since the previous annual submission, in accordance with the format given in Appendix B.<sup>2</sup> Negative responses are required.

(2) Project information sheets for all projects recommended for deauthorization, in accordance with the format given in Appendix C. A map which can be reproduced in black-and-white, 8" x 10½" in size, should be attached whenever possible, to clearly indicate the project to be deauthorized. Project information sheets are to be typed in 12-pitch elite, with margins as shown, and are to be submitted as an original and one copy. The original shall be signed by the reporting officer.

(3) Appropriate pages from the last published listing of projects eligible for deauthorization with changes noted by typing in the new data.

(4) Division Engineers shall review Project Information Sheets on all projects for which a deauthorization review was conducted in the preceding year. Information sheets on projects not recommended for deauthorization need not be submitted to OCE.

<sup>2</sup> Appendices B and C filed as part of the original document.

(d) *Submittal of Chief of Engineers' Recommendations to Congress.* Upon submittal of the Chief of Engineers' recommendations to Congress by the Secretary of the Army, OCE will issue a press release. Press releases may also be issued by Division and District Engineers.

(e) *Determination of Deauthorization.* DAEN-CWP will determine the date of deauthorization of recommended projects due to the elapse of 180 days without action by the Secretary of the Army or by either Committee on Public Works, as prescribed by Section 12; will notify Division and District Engineers of these deauthorizations; and will remove deauthorized projects from the eligibility listing as provided under § 266.16(a).

#### § 266.17 Effective date.

This regulation is effective September 15, 1975, as published in the FEDERAL REGISTER on that date and codified as 33 CFR 266. The regulation is fully applicable to deauthorization reviews conducted after the effective date.

#### APPENDIX A

DISCUSSION OF SECTION 12, PUBLIC LAW 93-251 CONTAINED IN THE REPORTS OF THE COMMITTEES ON PUBLIC WORKS

Many water resources development projects become, after they are authorized, inappropriate for one reason or another. Changing economic conditions may render them uneconomic. Population and industrial growth may make them inadequate to serve new needs. The local inter-

ests may decide they do not want a project. Yet, in all of these cases, unless the time consuming process of obtaining specific Congressional deauthorization through an Act of Congress is followed, the project remains authorized, is considered part of the backlog of authorized but unconstructed projects, and continues to discourage homeowners and landowners in the project area from maintaining, much less improving, their property.

It should be clearly noted that this section is not intended to be used as a vehicle for the abandonment by the Federal Government of maintenance of completed projects.

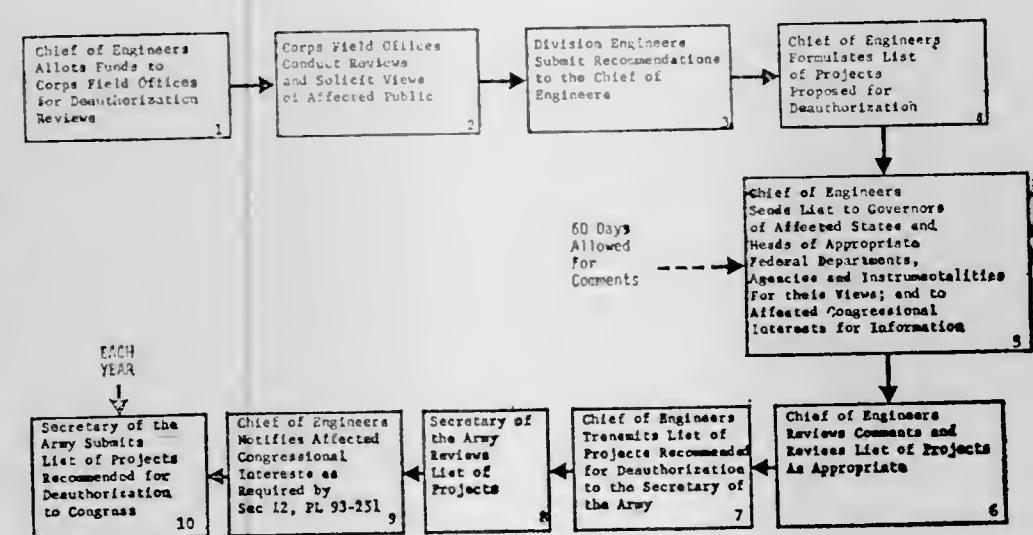

This section fulfills a very real need for a means to remove from the books projects which are not needed or justified, while at the same time providing ample congressional review and final decision-making authority.

## Notice of Proposed Rulemaking

On August 14, 1975, the Secretary of the Department of Health, Education, and Welfare published in the FEDERAL REGISTER, 40 FR 34292, an Advance Notice of Proposed Rule Making inviting public participation in the development of proposed regulations with respect to contracts and grants pursuant to sections 103 and 104(b) of the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638. As of August 30, 1975, no comments were received.

The Indian Self-Determination Act, Title I of Pub. L. 93-638 (January 4, 1975), authorizes the Secretary of Health, Education, and Welfare to enter into contracts with any tribal organization pursuant to section 103 of the Act to carry out any or all of the Secretary's functions, authorities and responsibilities under the Act of August 5, 1954 (68 Stat. 674), 42 U.S.C. 2001, as amended, and to make grants to Indian Tribes or Tribal organizations pursuant to section 104(b) of the Act for the development, construction, and operations of facilities and services and for planning, training, and evaluation projects to improve the capacity of tribal organizations to contract.

The proposed grant and contract regulations have been drafted in a manner calculated not only to implement the specific provisions of the Act but also to give meaning to the Declaration of Policy set forth in section 3 of the Act and to reflect the commitment of the Secretary of Health, Education, and Welfare to the achievement of those goals. Nothing in the proposed regulations is intended to impair the Secretary's trust responsibilities to any Indian tribe or individuals. Nor are the regulations intended to affect, modify diminish or otherwise impair the sovereign immunity from suit enjoyed by an Indian tribe or to authorize or require the termination of any existing trust responsibility of the United States with respect to the Indian people.

The proposed grant and contract regulations are also designed, to the extent feasible, to make available to Indian tribes and tribal organizations funds appropriated by Congress to meet the health needs of Indians and Alaska Natives in accordance with the spirit of the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638. Accordingly, the proposed regulations have been drafted in general language so as to provide the Department and eligible applicants the greatest flexibility in developing programs and projects to be conducted by tribes and tribal organizations. Nevertheless, the funds appropriated by Congress to meet the health needs of the Indians are finite and not sufficient to pay for all the health needs of the Indian people. Therefore, in ap-

## PROPOSED RULES

propriating funds Congress has in effect established priorities by appropriating sums to be utilized for designated purposes. In awarding grants and contracts pursuant to Pub. L. 93-638, the Indian Health Service will be guided by these priorities, and to be funded an application will not only have to be compatible with the categories for which funds have been appropriated, but also will have to be within the funding limits for that category. Additionally, funds appropriated to carry out the Indian Health Service programs are allocated among the various area offices. Applications for Federal financial assistance which propose to serve Indians in an area will compete against other applications from that area and funding will be commensurate with the amount of money available for that area for the particular program to be supported.

It is the intention of the Secretary periodically to announce in the FEDERAL REGISTER the funding categories for which grants and contracts are available as well as the amount and Area allocation of such funds. The proposed regulations, like the Advance Notice of Proposed Rulemaking, reflect the contributions of Indian people garnered through the extensive consultation process undertaken in the initial development of regulations. Inasmuch as Indian tribes may be dealing with both the Bureau of Indian Affairs and the Indian Health Service, the two agencies have attempted to develop similar regulations consistent with the differences in respective statutory authorities, policies, and style.

While there have been no major changes in the proposed grant regulations set forth in subpart H, the contract regulations proposed herein have been substantially altered. The general contract provisions which had been set out as Appendix A and Appendix B to subpart I have been deleted from these proposed regulations. The general contract clauses and procurement provisions are to be published concurrent with these regulations, as a Notice of Proposed Rulemaking amending 41 CFR (the Department's basic Procurement Regulations) by the addition of a new subpart .60 to Part 3-4.

In the proposed regulations, the word Secretary is defined as the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated. On July 3, 1975, the Secretary delegated his authority under Title I of the Act to the Assistant Secretary for Health who in turn delegated his authority to the Administrator of the Health Services Administration. Those delegations of authority were published in the FEDERAL REGISTER, 40 FR 29319, on July 11, 1975. The Administrator, Health Services Administration has delegated his authority under Title I of the Act to the Director of the Indian Health Service contemporaneously with this Notice. A Notice reflecting such delegations appears elsewhere in this issue of the FEDERAL REGISTER. It is the intention of the Director of the Indian Health Service to

redelegate his authority to Area and Program Directors and measures have already been taken to effectuate such further delegations.

Interested persons are invited to participate in the rulemaking process by submitting such written data, views and arguments as they may desire. Inquiries may be addressed and data, views and arguments related to the proposed regulations may be presented in writing to the Director, Indian Health Service, Health Services Administration, Public Health Service, Room 5A-55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852. Section 107(b)(4) of the Act requires publication of rules and regulations to implement the provisions of this title by November 4, 1975. All relevant material received within 30 days will be considered in the promulgation of such rules and regulations. All comments received in response to this notice will be available for public inspection in such office on weekdays (Federal holidays excepted) between 9 a.m. and 5 p.m.

It is therefore proposed to amend 42 CFR Part 36 by adding a new subpart H—Grants for Development, Construction, and Operations of Facilities and Services and a new subpart I—Contracts under the Indian Self-Determination Act as set forth below.

Issued in Washington, D.C. in September 1975.

Dated: September 10, 1975.

DAVID MATTHEWS,

Secretary.

Subpart H—Grants for Development, Construction,  
and Operations of Facilities and Services

- Sec.
- 36.101 Applicability.
- 36.102 Definitions.
- 36.103 Eligibility.
- 36.104 Application.
- 36.105 Project elements.
- 36.106 Grant award and evaluation.
- 36.107 Use of project funds.
- 36.108 Funding duration.
- 36.109 Availability of appropriations.
- 36.110 Facilities construction.
- 36.111 Interest.
- 36.112 Additional conditions.
- 36.113 Fair and uniform provision of services.

- 36.114 Application of Part 74.
- 36.115 Resumption of Control, Hearing.
- 36.116 Reports.
- 36.117 Amendment of Regulations.
- 36.118 Effect of Existing Rights.
- 36.119 Penalties.

## APPENDIX: Minimum standards of construction and equipment.

## Subpart H—Grants for Development, Construction, and Operations of Facilities and Services

AUTHORITY: Secs. 104, 107, 25 U.S.C. 450h (b), 450k; Sec. 3, Pub. L. 93-638, 42 USC 2003, 2003.

## § 36.101 Applicability.

The regulations of this subpart are applicable to grants awarded pursuant to section 104(b) of Pub. L. 93-638, 25 U.S.C. 450h(b) for (a) projects for development including feasibility studies, construction and operation of services and facilities provided to Indians and,

(b) for projects for planning, training, evaluation or other activities designed to improve the capacity of a tribal organization to enter into a contract or contracts pursuant to section 103 of the Act. Such grants may include the cost of training personnel to perform grant related activities.

## § 36.102 Definitions.

As used in this Subpart:

(a) "Act" means Title I of the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638 (88 Stat. 2203).

(b) "Indian" means a person who is a member of an Indian tribe.

(c) "Indian tribe" means any Indian tribe, band, nation, rancheria, pueblo, colony, or community including any Alaska Native Village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act, Pub. L. 92-203 (85 Stat. 688) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(d) "Tribal organization" means:

(1) The recognized governing body of any Indian tribe; or

(2) Any legally established non-profit organization of Indians which is:

(i) Controlled, sanctioned or chartered by such governing body or bodies; or

(ii) Democratically elected by the adult members of the Indian community to be served by such organization and which includes the maximum participation of Indians in all phases of its activities.

(e) "Secretary" means the Secretary of the Department of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

(f) "Grantee" means the tribe or tribal organization that receives a grant under section 104(b)(1) of the Act and this subpart and assumes the legal and financial responsibility for the funds awarded and for the performance of the grant supported activity in accordance with the Act and these regulations.

(g) "Indian owned economic enterprise" means any commercial, industrial, or business activity established or organized for the purpose of profit which is not less than 51 percent Indian owned.

## § 36.103 Eligibility.

Any Indian tribe or tribal organization is eligible to apply for a grant under this subpart.

## § 36.104 Application.

(a) An application for a grant under this subpart shall be submitted to the Secretary at such time and in such manner as the Secretary may prescribe.

(b) The application shall be executed by an individual or individuals authorized to act for the applicant and to assume on behalf of the applicant the obligations imposed by the Act, the regu-

lations of this subpart and the terms and conditions of any grant award.

(c) In addition to such other pertinent information as the Secretary may require, the application for a grant under this subpart shall contain the following:

(1) A description of the applicant including an indication whether the applicant is a Tribe or tribal organization, and if the latter:

(i) The legal and organizational relationship of the applicant to the Indians in the Area to be served or effected by the project.

(ii) A description of the current and proposed participation of Indians in the activities of applicant.

(iii) Whether applicant is controlled, sanctioned or chartered by the governing body of the Indians to be served, and if so, evidence of such fact.

(iv) If elected, a description of the election process, voting criteria, and extent of voter participation in the election designating the organization.

(2) A narrative description of the project including its goals and objectives and the manner in which the proposed project is compatible with published Indian Health Service statements of availability of funds, the manner in which those goals and objectives are to be attained, and a work and time schedule which will be utilized to accomplish each goal and objective.

(3) A description of applicant's staff, present or proposed, including their qualifications, academic training, responsibilities and functions.

(4) A description of the manner in which the staff is or will be organized and supervised to carry out proposed activities.

(5) A description of training to be provided as part of the proposed project.

(6) A description of the administrative, managerial, and organizational arrangements and resources to be utilized to conduct the proposed project.

(7) A budget for the entire period of the project for which support is sought.

(8) The intend financial participation, if any, of the applicant, specifying the type of contributions such as cash or services, loans of full or part-time staff, equipment, space materials or facilities, or other contributions.

(9) Where services are to be provided, a description of the nature of the services to be provided and the population to be served.

(10) A description of the Federal property, real and personal, equipment, facilities and personnel which applicant proposes to utilize and a description of the arrangements which applicant has made or will make to assume responsibility for the operation and management of those facilities.

(d) The application shall contain assurances satisfactory to the Secretary that the applicant will:

(1) Obtain adequate liability insurance coverage or an explanation of why such insurance cannot or should not be obtained. Such insurance shall provide that prior to cancellation the Secretary must be notified and must further provide

that each such policy of insurance carrier shall waive any right it may have to raise as a defense the tribe's sovereign immunity from suit but such waiver shall extend only to claims the amount and nature of which are within the coverage and limits of the policy and shall not authorize or empower such insurance carrier to waive or otherwise limit the tribe's sovereign immunity outside or beyond the coverage and limits of the policy of insurance.

(2) Where applicant is providing services, provide such services at a level and range which is not less than that provided by the Indian Health Service or that identified by the Service as an appropriate level, range and standard of care.

(3) Where providing services, provide services in accordance with law and applicable Indian Health Service policies and regulations regarding eligibility for health services.

(4) Where providing services, provide services in a fair and uniform manner, consistent with medical need, to all Indian people.

## § 36.105 Project elements.

A project supported under this subpart must:

(a) Have sufficient, adequately trained staff in relation to the scope of the project.

(b) Provide services in a fair and uniform manner consistent with medical need.

(c) Maintain a mechanism for dealing with complaints regarding the delivery of health services or performance of project activities.

(d) Hold confidential all information obtained by the personnel of the project from participants in the project related to their examination, care, and treatment, and shall not release such information without the individuals' consent except as may be required by law, as may be necessary to provide service to the individual, or as may be necessary to monitor the operations of this program or otherwise protect the public health. Information may be disclosed in a form which does not identify particular individuals.

(e) Utilize appropriate bookkeeping and accounting procedures and mechanisms to assure accountability for grant funds and resources.

(f) Operate with the approval, support, and involvement of the tribe, tribes, or Indian communities in the area served by the local facility and program.

(g) Provide Indians, to the extent feasible, opportunities for training and employment in connection with the administration of the project and also provide preference to Indians and Indian owned economic enterprises in the award of subcontracts in connection with the administration of the project.

(h) Keep in force adequate liability insurance in accordance with the approved application unless the Secretary, for good cause shown, determined that such insurance was not obtainable or appropriate or has determined that such in-

insurance may be permitted to expire or

of his estimate of the sum necessary for

advertising with award of the contract

ing painting or decorating of building or other facilities in connection with

## § 36.112 Additional Conditions.

The Secretary may with respect to any

§ 36.115 Suspension and Termination of Grants.

insurance may be permitted to expire or lapse.

(i) Perform the project in accordance with the provisions of the Act and the regulations of this part.

(j) Provide services at a level and range which is not less than that provided by the Indian Health Service or that identified by the Service as an appropriate level, range, and standard of care.

#### § 36.106 Grant Award and Evaluation.

(a) Within the limits of funds determined by the Secretary to be available for such purpose, the Secretary may award grants under this subpart to applicants whose project will, in the judgment of the Secretary, best promote the purposes of the Act, and the regulations of this subpart, taking into account:

(1) The apparent capability of the applicant to organize and manage the proposed project successfully considering, among other things the adequacy of staff, management systems, equipment and facilities.

(2) The soundness of the applicant's plan for conducting the project and for assuring effective utilization of grant funds.

(3) The adequacy of the budget in relation to the scope of the project and available funds.

(4) The extent of applicant's financial participation in or contribution to the project, if any.

(5) The relative effectiveness of the applicant's plan, as set forth in the application, to carry out each of the requirements § 36.105.

(6) The compatibility of the proposed project with the published goals and responsibilities of the IHS in carrying out its statutory mission.

(b) All grant awards shall be in writing, shall set forth the amount of funds granted, and the period for which support is provided.

(c) Neither the approval of any project nor any grant award shall commit the United States in any way to make additional, supplemental, continuation or other awards with respect to any approved project or portion thereof.

#### § 36.107 Use of Project Funds.

(a) Any funds granted pursuant to this subpart shall be expended solely for carrying out the approved project in accordance with section 104(b) of the Act, the regulations of this subpart, and the terms and conditions of award.

(b) The provisions of any other Act notwithstanding, any funds made available to a tribal organization under grants pursuant to section 104(b) of the Act may be used as matching shares for any other Federal grant programs which contribute to the purposes for which grants under this section are made.

#### § 36.108 Funding.

The amount of any award shall be determined by the Secretary on the basis

of his estimate of the sum necessary for project costs and the availability of funds.

#### § 36.109 Availability of Appropriations.

The Secretary shall from time to time publish a notice in the FEDERAL REGISTER indicating by areas the allotment of funds and categories of activities for which awards may be made under this Subpart. The Secretary reserves the right to revise such allotments and categories from time to time by further publication in the FEDERAL REGISTER.

#### § 36.110 Facilities construction.

In addition to other requirements of this subpart:

(a) An applicant for a construction grant to build, renovate, modernize, or remodel a hospital, clinic, health station or quarters for housing personnel associated with such facilities, must in its application:

(1) Provide its assessment of the environmental impact of the project as called for by section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(c)).

(2) Furnish its evaluation of the project site in accordance with the terms and conditions of E.O. 11296, 31 FR 10663 (August 10, 1966) relating to the evaluation of flood hazards in locating federally owned or financed facilities.

(b) Each applicant for construction grant to build, renovate, modernize, or remodel a hospital, clinic, health station or quarters for housing personnel associated with such facilities, in addition to any other requirements imposed by the Act or determined by the Secretary to be reasonably necessary with respect to particular projects to fulfill the purpose of the grant, shall be subject to the condition that the applicant shall furnish and comply with the following assurances:

(1) *Title.* (i) That applicant has a fee simple or such other estate or interest in the site for construction, including necessary easements and rights-of-way, sufficient to assure for a period of not less than the estimated useful life of the facility undisturbed use and possession for the purpose of the construction and operation of the facility: *Provided, however,* That where the construction is to take place on land owned by the United States, applicant need not comply with this provision.

(2) *Competitive bids.* (i) That the approval of the Secretary shall be obtained before the project is advertised or placed on the market for bidding and that such approval shall include a determination by the Secretary that the final plans and specifications conform to the minimum standards of construction and equipment as set forth in Appendix A of this subpart.

(ii) That all contracting for construction (including the purchase and installation of built-in equipment) shall, except as provided in paragraph (b)(2)(iii) of this section or as provided in the regulations of this subpart or the Act be on a lump sum fixed-price basis, and contractor will be awarded on the basis of competitive bidding obtained by public

advertising with award of the contract to the lowest responsive and responsible bidder. The giving of preference to local contractors or suppliers, except as otherwise provided in these regulations is not authorized.

(iii) A substitute bidding procedure of selective solicitation with response from three or more bidders may be used if:

(A) The applicant requests and justifies the use of the procedure;

(B) The procedure is not inconsistent with applicable State or local laws; and

(C) The Secretary determines that it is necessary to limit bidding to contractors of proven competence due to the complexity or specialty of the project or that the time element is of primary consideration. When this bidding procedure is used the applicant shall establish reasonable bid prequalification standards for contractors. The applicant shall then accept and consider bids from any contractor who requests permission to bid and who is determined by applicant to meet these prequalification standards. Adequate time shall be allowed for contractors to prepare bids, and award of construction contracts shall be made to the lowest qualified and responsible bidder whose bid is considered fully responsive to the bid invitation.

(D) Use of the Buy-Indian Act, 25 U.S.C. 47, is authorized.

(3) *Approval of estimated cost.* That the applicant will enter into no construction contract or contracts with respect to the project or any portion thereof where the cost exceeds the estimates in the application for such work, without prior approval of the Secretary.

(4) *Relocation assistance.* That in the case of an applicant with an approved project which involves the displacement of persons or businesses whose real property has or will be taken, the applicant will comply with the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601 and applicable regulations issued thereunder. (45 CFR Part 15).

(5) *Completion responsibility.* The applicant will construct the project, or cause it to be constructed, to final completion in accordance with the grant application and the plans and specifications.

(6) *Progress reports.* That applicant shall furnish progress reports and such other information as the Secretary may require.

(7) *Construction supervision.* That applicant shall provide and maintain competent and adequate architectural and engineering supervision and inspection at the construction site to insure that the completed work conform to the plans and specifications.

(8) *Authorized uses.* That the facility is intended and will be used only for the purposes for which the application has been made.

(9) *Wage rate standards.* That all laborers and mechanics employed by contractors or subcontractors in the construction, alteration, or repair, includ-

ing painting or decorating of building or other facilities in connection with contracts or grants entered into pursuant to the Act, shall be paid wages at not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with the Davis-Bacon Act of March 3, 1931, as amended.

(10) *Accessibility by handicapped.* That the applicant shall require the facility to be designed to comply with the "American Standard Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped," Number A 117.1—1961 as modified by other standards prescribed by the Secretary.

(11) *Minimum standards of construction and equipment.* That the plans and specifications for the project will conform to the minimum standards of construction and equipment as set forth in Appendix A of this subpart.

(12) *Construction contract requirements.* That the following conditions and provisions must be included in all construction contracts let by grantee:

(i) The provisions set forth in "DHEW Requirements for Federally Assisted Construction Contracts Regarding Labor Standards and Equal Employment Opportunities," Form DHEW 514 (April 1969) (issued by the Office of Grants Administration Policy, United States Department of Health, Education, and Welfare) pertaining to the Davis-Bacon Act, the Contract Work Hours Standards Act, and the Copeland Act (Anti-Kickback) Regulations, except in the case of contracts in the amount of \$2,000 or less; and pertaining to Executive Order 11246, 30 FR 12319 (September 24, 1965), as amended, relating to nondiscrimination in construction contract employment, except in the case of contracts in the amount of \$10,000 or less: *Provided, however,* That nothing required herein shall be in contravention of the requirements of section 7 of Pub. L. 93-638, 25 U.S.C. 450e.

(ii) The contractor shall furnish performance and payment bonds, each of which shall be in the full amount of the contract price, and shall maintain, during the life of the contract, adequate fire, workmen's compensation, public liability, and property damage insurance: *Provided, however,* That in the case of an Indian tribe or tribal organization entering into a construction contract of less than \$100,000, State or local provisions with respect to performance and payment bonds shall be deemed to meet the requirements of this paragraph.

(iii) The Secretary shall have access at all reasonable times to work wherever it is in preparation or progress, and the contractor shall provide proper facilities for such access and inspection.

§ 36.111 Interest.

Tribes and Tribal organizations shall not be held accountable for interest earned on grant funds, pending disbursement by such organization.

§ 36.112 Additional Conditions.

The Secretary may with respect to any grant award impose additional conditions prior to or at the time of any award when in his judgment such conditions are necessary to assure or protect advancement of the approved project, the interests of public health, or the conservation of grant funds.

§ 36.113 Fair and Uniform Provision of Services.

Services provided pursuant to a grant under this subpart shall be provided by the Grantee in a fair and uniform manner to all participants in the project consistent with their medical need, the policies and regulations of the Indian Health Service, and the Act.

§ 36.114 Applicability of 45 CFR Part 74.

The following provisions of 45 CFR Part 74, establishing uniform administrative requirements and cost principles shall apply to all awards under this subpart:

(a) Subpart A "General", except that for purposes of this subpart the definition of "local government" in § 74.3 shall also include Indian tribes and tribal organizations.

(b) Subpart B, "Cash Depositories".

(c) Subpart C, "Bonding and Insurance" except as otherwise specifically provided in this subpart.

(d) Subpart D, "Retention and Custodial Requirements for Records".

(e) Subpart F, "Grant-Related Income", except for § 74.42.

(f) Subpart H, "Standards for Grantee and Subgrantee Financial Management Systems".

(g) Subpart I, "Financial Reporting Requirements".

(h) Subpart J, "Monitoring and Reporting of Program Performance".

(i) Subpart K, "Grant Payment Requirements", except that the references in § 74.94 to § 74.113 shall be deemed to be references to § 36.115 of this subpart.

(j) Subpart L, "Budget Revision Procedures".

(k) Sections 74.110 and 74.111 of Subpart M, "Grant Closeout, Suspension, and Termination".

(l) Subpart N, "Forms for Applying for Grants".

(m) Subpart O, "Property".

(n) Subpart P, "Procurement Standards" provided, however, that to the greatest extent feasible preferences and opportunities for training and employment in connection with the administration of grants and contracts pursuant to this Act shall be given to Indian Organizations and Indian-owned economic enterprises.

(o) Sections 74.140 and 74.171 of Subpart Q, "Cost Principles," and Appendix C to such subpart, except for Paragraph J (4) of Part I of such Appendix.

ing painting or decorating of building or other facilities in connection with contracts or grants entered into pursuant to the Act, shall be paid wages at not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor in accordance with the Davis-Bacon Act of March 3, 1931, as amended.

(10) *Accessibility by handicapped.* That the applicant shall require the facility to be designed to comply with the "American Standard Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped," Number A 117.1—1961 as modified by other standards prescribed by the Secretary.

(11) *Minimum standards of construction and equipment.* That the plans and specifications for the project will conform to the minimum standards of construction and equipment as set forth in Appendix A of this subpart.

(12) *Construction contract requirements.* That the following conditions and provisions must be included in all construction contracts let by grantee:

(i) The provisions set forth in "DHEW Requirements for Federally Assisted Construction Contracts Regarding Labor Standards and Equal Employment Opportunities," Form DHEW 514 (April 1969) (issued by the Office of Grants Administration Policy, United States Department of Health, Education, and Welfare) pertaining to the Davis-Bacon Act, the Contract Work Hours Standards Act, and the Copeland Act (Anti-Kickback) Regulations, except in the case of contracts in the amount of \$2,000 or less; and pertaining to Executive Order 11246, 30 FR 12319 (September 24, 1965), as amended, relating to nondiscrimination in construction contract employment, except in the case of contracts in the amount of \$10,000 or less: *Provided, however,* That nothing required herein shall be in contravention of the requirements of section 7 of Pub. L. 93-638, 25 U.S.C. 450e.

(ii) The contractor shall furnish performance and payment bonds, each of which shall be in the full amount of the contract price, and shall maintain, during the life of the contract, adequate fire, workmen's compensation, public liability, and property damage insurance: *Provided, however,* That in the case of an Indian tribe or tribal organization entering into a construction contract of less than \$100,000, State or local provisions with respect to performance and payment bonds shall be deemed to meet the requirements of this paragraph.

(iii) The Secretary shall have access at all reasonable times to work wherever it is in preparation or progress, and the contractor shall provide proper facilities for such access and inspection.

§ 36.111 Interest.

Tribes and Tribal organizations shall not be held accountable for interest earned on grant funds, pending disbursement by such organization.

§ 36.112 Additional Conditions.

The Secretary may with respect to any grant award impose additional conditions prior to or at the time of any award when in his judgment such conditions are necessary to assure or protect advancement of the approved project, the interests of public health, or the conservation of grant funds.

§ 36.113 Fair and Uniform Provision of Services.

Services provided pursuant to a grant under this subpart shall be provided by the Grantee in a fair and uniform manner to all participants in the project consistent with their medical need, the policies and regulations of the Indian Health Service, and the Act.

§ 36.114 Applicability of 45 CFR Part 74.

The following provisions of 45 CFR Part 74, establishing uniform administrative requirements and cost principles shall apply to all awards under this subpart:

(a) Subpart A "General", except that for purposes of this subpart the definition of "local government" in § 74.3 shall also include Indian tribes and tribal organizations.

(b) Subpart B, "Cash Depositories".

(c) Subpart C, "Bonding and Insurance" except as otherwise specifically provided in this subpart.

(d) Subpart D, "Retention and Custodial Requirements for Records".

(e) Subpart F, "Grant-Related Income", except for § 74.42.

(f) Subpart H, "Standards for Grantee and Subgrantee Financial Management Systems".

(g) Subpart I, "Financial Reporting Requirements".

(h) Subpart J, "Monitoring and Reporting of Program Performance".

(i) Subpart K, "Grant Payment Requirements", except that the references in § 74.94 to § 74.113 shall be deemed to be references to § 36.115 of this subpart.

(j) Subpart L, "Budget Revision Procedures".

(k) Sections 74.110 and 74.111 of Subpart M, "Grant Closeout, Suspension, and Termination".

(l) Subpart N, "Forms for Applying for Grants".

(m) Subpart O, "Property".

(n) Subpart P, "Procurement Standards" provided, however, that to the greatest extent feasible preferences and opportunities for training and employment in connection with the administration of grants and contracts pursuant to this Act shall be given to Indian Organizations and Indian-owned economic enterprises.

(o) Sections 74.140 and 74.171 of Subpart Q, "Cost Principles," and Appendix C to such subpart, except for Paragraph J (4) of Part I of such Appendix.

§ 36.115 Suspension and Termination of Grants.

(a) When the Secretary determines that the performance of a grantee under these regulations involves (1) the violation of the rights or endangerment of the health, safety, or welfare of any person, or (2) gross negligence or the mismanagement in the handling or use of funds under the grant, including any material failure to comply with the terms and conditions of the grant, the Secretary will, in writing, notify the grantee of such determination and will request that the grantee take such corrective action, within such period of time, as the Secretary may prescribe.

(b) When the Secretary determines, after making a determination described in paragraph (a) of this section, that suspension is necessary to protect grant funds which will otherwise be expended contrary to the best interests of the Indians to be served or is otherwise necessary to protect the health or welfare of the Indian population, he may, pending the prompt initiation and resolution of termination proceedings and after reasonable written notice to the grantee, suspend, in whole or in part, Federal assistance under the grants. No obligations incurred by the grantee during the period of suspension shall be allowable under the suspended grant (or portion of the grant), except that the Secretary may at his discretion allow necessary and proper costs which the grantee could not reasonably avoid during the period of suspension or which he determines may be necessary to preserve the project or best interests of the Indians to be served: *Provided,* that such costs would otherwise be allowable under this subpart. Appropriate adjustments to the payments under the suspended grant (or portion of the grant) will be made, either by withholding the payments or by not allowing the grantee credit for disbursements which it may make in liquidation of unauthorized obligations it incurs during the period of suspension. Suspensions shall remain in effect until the grantee has taken corrective action to the satisfaction of the Secretary, or given assurances satisfactory to the Secretary that corrective action will be taken, or until the Secretary terminates the grant.

(c) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(d) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(e) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(f) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(g) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(h) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(i) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(j) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(k) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(l) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(m) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(n) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(o) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(p) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(q) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(r) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(s) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(t) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(u) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(v) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(w) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(x) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(y) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(z) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(aa) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(aj) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

(ak) When the Secretary determines that a grantee has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after providing the grantee an opportunity for a hearing in accordance with paragraph (d) of this section, terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved.

(al) When the Secretary has made a determination described in paragraph (c) of this section, he shall in writing notify the grantee of such determination and of the grantee's right to request a review of such determination (and of the determination described in paragraph (a) of this section) under the

## PROPOSED RULES

Public Health Service Grant Appeals Procedure (42 CFR Part 50, Subpart D). Such notification by the Secretary shall set forth the reasons for the determination in sufficient detail to enable the grantee to respond and shall inform the grantee of its opportunity for review under such Subpart D. If the review held under Subpart D results in a response adverse to the grantee's position, the grantee shall be informed of its right to have a hearing before the Department Grant Appeals Board, pursuant to 45 CFR Part 16.

(e) Where the Secretary determines that a grantee's performance under a grant awarded under this subpart poses an immediate threat to the safety of any person, he may immediately terminate the grant in whole or in part and if appropriate assume or resume control or operation of the program, activity, or service involved. In such case, the Secretary shall designate three officers or employees of the Department to serve as a hearing panel, one of whom shall be designated as chairman. No officer or employee from the office of the official who made the decision to terminate the grant under this paragraph may be designated to serve on the hearing panel.

(1) The hearing shall be commenced within 10 days after the termination of the grant and shall afford each party to the proceeding:

(i) Sufficient notice of the issues to be considered (where such notice has not previously been afforded);

(ii) An opportunity to be represented by counsel;

(iii) An opportunity to make a record of the proceedings;

(iv) An opportunity to present witnesses on grantee's behalf; and

(v) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(2) The hearing panel shall, within 25 days after the conclusion of the hearing, notify all parties in writing of its decision.

(3) Such decision shall not be subject to further hearing under 42 CFR Part 50, subpart D or 45 CFR Part 16.

(f) In any case where the Secretary has terminated a grant under paragraphs (c) or (e) of this section, he may decline to enter into a new grant agreement with the terminated grantee until such time as he is satisfied that the basis for the termination has been corrected. Nothing in this section shall be construed as contravening the Occupational Safety and Health Act of 1970 (84 Stat. 1590), as amended (29 U.S.C. 651).

(g) In any case where the Secretary has suspended or terminated a grant for the delivery of health services under this subpart, the grantee shall, upon the request of the Secretary, transfer to the Secretary all medical records compiled in the operation of the supported project.

## § 36.116 Reports.

In addition to the reporting and information requirements provided in Subpart J of 45 CFR Part 74 made applicable to grants under this subpart by § 36.114,

each recipient of Federal financial assistance shall make such reports and information available to the Indian people served or represented by such recipient as and in a manner determined by the Secretary to be adequate.

## § 36.117 Amendment of regulations.

Before revising or amending the regulations in this subpart, the Secretary shall take the following actions:

(a) Consult with Indian Tribes and national and regional Indian organizations to the extent practicable about the need for revision or amendment and consider their views in preparing the proposed revision or amendment.

(b) Present the proposed revision or amendment to the Committees on Interior and Insular Affairs of the United States Senate and House of Representatives.

(c) Publish the proposed revisions or amendments in the FEDERAL REGISTER as proposed rulemaking to provide adequate notice to receive comments from, all interested parties.

(d) After consideration of all comments received, publish the regulations in the FEDERAL REGISTER in final form not less than 30 days before the date they are made effective.

## § 36.118 Effect on existing rights.

The regulations in this Part are not meant to and do not:

(a) Affect, modify, diminish, or otherwise impair the sovereign immunity from suit enjoyed by an Indian tribe;

(b) Authorize, require or permit the termination of any existing trust responsibility of the United States with respect to the Indian people;

(c) Permit significant reduction in services to Indian people as a result of this subpart.

## § 36.119 Penalties.

Whoever, being an officer, director, agent, or employee of, or connected in any capacity with, any recipient of a contract, subcontract, grant, or subgrant pursuant to this Act or the Act of April 16, 1934 (48 Stat. 596), as amended, embezzles, willfully misapplies, steals, or obtains by fraud any of the money, funds, assets, or property which are the subject of such a grant, subcontract, contract, or subcontract, shall be fined not more than \$10,000 or imprisoned for not more than two years, or both, but if the amount so embezzled, misapplied, stolen, or obtained by fraud does not exceed \$100, he shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

## APPENDIX A—MINIMUM STANDARDS OF CONSTRUCTION AND EQUIPMENT

The minimum standards of construction and equipment set forth below have been established by the Secretary pursuant to section 107 of the Act (25 U.S.C. 450k). In accordance with 5 U.S.C. 542(a)(1), the publications to which reference is made in this Appendix A, unless otherwise indicated, are hereby incorporated by reference and made a part hereof. These documents are available for inspection at the Department's and Regional Offices' Information Centers listed in

45 CFR 5.31 and copies of such documents may be purchased as specified. These standards are applicable to all projects approved for construction grants under section 104(b)(1) of the Act; in addition, hospitals and outpatient facilities must comply with the requirements of "General Standards of Construction and Equipment for Hospital and Medical Facilities" (DHEW Publication No. 74-4000) which document is incorporated by reference in § 53.101(a) of this chapter. Said document will be provided to all applicants with a need therefor, and is available to any interested person whether or not affected by the provisions of this subpart, upon request to the Regional Office of the Department of Health, Education, and Welfare or the Public Inquiries Branch, Public Health Service, Washington, D.C.

(a) General. The structural design, construction, and fire safety provisions of all project facilities shall comply with the standards of the National Building Code, 1967 (available from American Insurance Association Engineering and Safety Department, 85 John Street, New York, NY 10038, or 120 South La Salle Street, Chicago, IL 60603, or 455 California Street, San Francisco, CA 94104) or with applicable State, local codes and ordinances, whichever is more restrictive.

(b) Mechanical. All installations of fuel burning equipment, steam, heating, air conditioning and ventilation, plumbing and other piping systems and boilers shall comply with the following standards:

(1) Handbook of Fundamentals: American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) 1972; United Engineer Center, 345 East 47th Street, New York, NY 10017.

(2) National Standard Plumbing Code 1955; American Society of Mechanical Engineers (ASME); United Engineer Center, 345 East 47th Street, New York, NY 10017.

(3) Boiler and Pressure Vessel Code, 1971 edition, with current addenda, section 8, Division I. American Society of Mechanical Engineers (ASME); United Engineer Center, 345 East 47th Street, New York, NY 10017.

(c) Fire and safety. The fire-resistant design criteria for the facility will be governed by the criteria necessary for that portion of the facility which is subject to the most severe usage. Remodeled structure shall be upgraded, in total, unless it is feasible to isolate the improved portion of the building with fire walls and fire doors. Fire-resistant design shall be in accordance with the standards of Fire Safety Code Number 101, 1070, National Fire Protection Association, International, 60 Batterymarch Street, Boston, MA 02110.

(d) Emergency electrical service. Fire alarm systems and other electrical service shall conform to the standards as specified in Life Safety Code Number 101, 1970, National Fire Protection Association, International, 60 Batterymarch Street, Boston, MA 02110.

(e) Electrical. All electrical installations and equipment shall be in accordance with State and local codes and applicable sections of National Electric Code, NFPA Bulletin No. 70 HC, 1971, National Fire Protection Association, International, 60 Batterymarch Street, Boston, MA 02110.

(f) Radiation protection. All areas in which X-ray, gamma-ray, beta-ray producing and similar equipment is located shall be protected from radiation in accordance with the standards which are in the handbook reports No. 33, 1968; 34, 1970; 35, 1970, and 36, 1970, of the National Council on Radiation Protection and Measurement, Box 4867, Washington, DC 20008.

(g) All facilities shall be designed and constructed in accordance with the standard

specified in the Uniform Building Code, 1970, International Conference of Building Officials, 50 South Los Robles, Pasadena, CA 91101, unless more restrictive State and local codes govern.

(h) Zoning. Applicable State and local codes shall apply.

## Subpart I—Contracts Under the Indian Self-Determination Act

Sec. 36.201 Applicability.  
36.202 Effect on existing rights.  
36.203 Amendment of regulations.  
36.204 Definitions.

## CONTRACT PROPOSALS, REVIEW, AND APPEAL

36.205 Eligibility and Application.  
36.206 Tribal clearances—initial contracts.  
36.207 Tribal clearances—renewal contracts.  
36.208 Evaluation criteria.  
36.209 Government property.  
36.210 Submitting contract proposals.  
36.211 Contract proposal approval officials.  
36.212 Review.  
36.213 Processing time.  
36.214 Tribal appeals to proposal decisions.

## PROCUREMENT

36.215 Applicability of Regulations.  
36.216 Waivers.  
36.217 Fair and equal treatment of Indian people.  
36.218 Types of contracts.  
36.219 Term of contract.  
36.220 Indian preference in subcontracting.  
36.221 Indian preference in training and employment.  
36.222 Indemnity and Insurance.  
36.223 Exemption from bonds.  
36.224 Wage and labor standards—construction contracts.  
36.225 Performance of personal services.  
36.226 Advance payments.  
36.227 Record keeping, reporting and audit.  
36.228 Availability of Information.  
36.229 Penalties.  
36.230 Contract revisions or amendments.  
36.231 Retrocession of contract programs.  
36.232 Contractor assistance.  
36.233 Assumption and reassumption of contract programs.  
36.234 Operation of retroceded or reassumed contracts.  
36.235 Contract funds.  
36.236 Unexpended funds under contract.  
36.237 Contract funding and renegotiation.

## Subpart I—Contracts Under the Indian Self-Determination Act

AUTHORITY: Secs. 103, 107, 25 U.S.C. 450g, 450k; sec. 3, Pub. L. 93-638, 42 U.S.C. 2003.

## § 36.201 Applicability.

The regulations of this subpart are applicable to contracts awarded pursuant to section 103 of P.L. 93-638, 25 USC 450g to carry out any or all of the functions, authorities, and responsibilities of the Secretary of Health, Education, and Welfare under the Act of August 5, 1954 (68 Stat. 674), as amended, 42 USC 2001 et seq.

## § 36.202 Effect on existing rights.

The regulations in this subpart are not meant to and do not:

(a) Affect, modify, diminish, or otherwise impair the sovereign immunity from suit enjoyed by an Indian tribe;

(b) Authorize, require or permit the termination of any existing trust responsibility of the United States with respect to the Indian people;

## PROPOSED RULES

(c) Permit significant reduction in services to Indian people as a result of this subpart.

## § 36.203 Amendment of regulations.

Before revising or amending the regulations in this subpart, the Secretary will take the following actions:

(a) Consult with Indian tribes and national and regional Indian organizations to the extent practicable about the need for revision or amendment and consider their views in preparing the proposed revision or amendment.

(b) Present the proposed revision or amendment to the Committees on Interior and Insular Affairs of the United States Senate and House of Representatives.

(c) Publish the proposed revisions or amendments in the FEDERAL REGISTER as proposed rulemaking to provide adequate notice to receive comments from, all interested parties.

(d) After consideration of all comments received, publish the regulations in the FEDERAL REGISTER in final form not less than 30 days before the date they are made effective.

## § 36.204 Definitions.

(a) "Act" means Title I of the Indian Self-Determination and Education Assistance Act, Public Law 93-638 (25 USC 450f et seq.).

(b) "Secretary" means the Secretary, of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

(c) "Director" means the Director, Indian Health Service, Health Services Administration, Public Health Service, Department of Health, Education, and Welfare (IHS) who is the official to whom the Secretary has delegated full responsibility and authority to implement and administer those aspects of the Act related to the health and well-being of the Indian people.

(d) "Area Director" means the official in charge of an Indian Health Service Area, or Program Office. Area Directors are the immediate representatives of the Director, IHS in their respective geographical jurisdictions and have been delegated authorities and responsibilities related to the Act.

(e) "Contracting Officer" means the person executing the contract on behalf of the Government and any other officer or employee who is properly designated Contracting Officer; and the term includes, except as otherwise provided in the contract, the authorized representative of the Contracting Officer acting within the limits of his authority.

(f) "Project Officer" means the person representing the Government for the purpose of technical direction of contract performance. The Project Officer is not authorized to issue any instructions or directions which effect any increase or decrease in the cost of the contract or which change the period of the contract.

(g) "Indian" means a person who is a member of an Indian tribe.

(h) "Indian Tribe" means any Indian tribe, band, nation, rancheria, Pueblo, colony or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 638) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(i) "Tribal Organization" means the recognized governing body of any Indian tribe; any legally established organization of Indians which is controlled, sanctioned, or chartered by each governing body or which is democratically elected by the adult members of the Indian community to be served by such organization and which includes the maximum participation of Indians in all phases of its activities.

(j) "An Indian Owned Economic Enterprise" means any commercial industrial, or business activity established or organized for the purpose of profit which is not less than 51 percent Indian owned.

(k) An "Indian Self-Determination Contract Proposal" is the name of the document to be utilized by Indian Tribal organizations to forward to the Indian Health Service, their requests to enter into contracts for health programs or services. It is to be distinguished from the unsolicited proposals defined in 41 CFR 3-4.52 in that it is utilized in the pursuit of the Indian Self-Determination objectives of this subpart.

(l) "Trust Resources" means land, water, minerals, funds, or property, asset, or claim, and any right or interest in any of the foregoing, which is held by the United States in trust for any Indian tribe or any Indian individual or which is held by any Indian tribe or Indian individual subject to a restriction on alienation imposed by the United States.

(m) "Trust Responsibility" means any discretionary right or power vested by law in the United States, or any official or employee thereof, to approve or otherwise regulate the alienation, encumbrance, management, development or use of trust resources.

(n) "Retrocession" is the voluntary return of a contracted program, or portion thereof, to the Indian Health Service pursuant to section 106(d) of the Act.

(o) The Contract Proposal Declination Appeals Board (CPDAB) is a body established to review Indian Self-Determination Contract Proposals which have been disapproved.

## CONTRACT PROPOSALS, REVIEW, AND APPEAL

## § 36.205 Eligibility and application.

(a) Any tribal organization of any Indian tribe upon the request of such Indian tribe may contract with the Secretary to carry out any or all of the functions, authorities and responsibilities of the Secretary under the Act of August 5, 1954.

(b) All such contracts shall be based upon Indian Self-Determination Contract proposals which will be specific and, as a minimum, include the following:

## PROPOSED RULES

(1) Date Submitted.

(2) Full name and address of the Insurance coverage or an explanation of

(16) Evidence of adequate liability insurance coverage or an explanation of

subject to the specific terms, conditions and limitations of the resolution and approval of the long range and regula-

zation is not the governing body of the tribe. Submission shall be made to the governing body at least 75 calendar days

sharing or other suitable arrangements will be reflected in the contract.  
(2) Bookkeeping and accounting pro-

health service activity of the Indian Health Service.  
(11) The contractor's proposal will be

- (1) Date Submitted.
- (2) Full name and address of the Indian tribal organization submitting the proposal.
- (3) Full name and tribe(s) which the tribal organization is affiliated with.
- (4) Narrative description of the functions, IHS programs, or portions thereof which the tribal organization wants to contract for.
- (5) Type of contract proposed (cost reimbursement, fixed price, etc.).
- (6) Proposed contract starting and completion dates.
- (7) Equipment and facilities needed to carry out the contract and how the tribal organization intends to obtain such.
- (8) Narrative indicating the tribal organization's knowledge of the program part of the program or function to be contracted for. Where tribal organizations have already been involved in a contract effort for such programs, this narrative may be in the form of an updated version of the scope of work under that contract. In any case, the following items should be described in the narrative:
  - (i) Experience and training of personnel performing under the contract;
  - (ii) Familiarity with Federal Regulations and procedures involved;
  - (iii) Experience in operating a similar or related tribal program;
  - (iv) Extent of subcontracting contemplated and identification of proposed subcontractors;
  - (v) Identification of Federal employee transfers contemplated;
  - (vi) Personnel system and key personnel;
  - (vii) The work plan for carrying out the contract.
- (9) Evidence of community support for or lack of opposition to the contract.
- (10) Information concerning training to be given to personnel who will perform under the contract.
- (11) Estimate of the number of Indians to be served.
- (12) A budget, including separate cost estimates for salaries and wages, equipment, supplies, services, travel, subcontracts, other direct costs and overhead.
- (13) Justification and request for advance payments.
- (14) Names and telephone numbers of the tribal organization's business and technical personnel who may be contacted during the evaluation and negotiation process.
- (15) A description of the tribal organization including:
  - (i) The legal and organizational relationship of the tribal organization to the Indians in the area to be served or effected by the contract.
  - (ii) A description of the participation of Indians in all phases of the tribal organization.
  - (iii) Whether the tribal organization is controlled, sanctioned or chartered by the governing body of Indians to be served, and, if so, evidence of such fact.
  - (iv) And, if elected, a description of the election process, voting criteria, and extent of voter participation.

- (16) Evidence of adequate liability insurance coverage or an explanation of why such insurance cannot or should not be obtained. Such insurance shall provide that prior to cancellation the Secretary must be notified and must further provide that each such policy of insurance shall contain a provision that the insurance carrier shall waive any right it may have to raise as a defense the tribe's sovereign immunity from suit but such waiver shall extend only to claims the amount and nature of which are within the coverage and limits of the policy and shall not authorize or empower such insurance carrier to waive or otherwise limit the Tribe's sovereign immunity outside or beyond the coverage and limits of the policy of insurance.
- (17) The intended financial participation, if any, of the tribal organization or the tribes to be served specifying the type of contributions such as cash or services, loans of full or part-time staff, equipment, space, materials, or facilities, or other contributions.
- (c) The Indian Self-Determination Contract Proposal shall be executed by a person or persons authorized to act on behalf of the tribal organization and shall be accompanied by evidence that such person or persons are authorized to bind the tribal organization.
- (d) The Indian Self-Determination Contract Proposal should be addressed to the Area Director of the appropriate Indian Health Service Area. Such proposals should be submitted, in 5 copies, well in advance of the desired beginning of support.
- (e) Tribal organizations may obtain assistance in preparing Indian Self-Determination contract proposals from the IHS Area Offices. The Area Directors shall make any information available to the tribal organization which is needed in the preparation of its proposal except as may be exempt from disclosure by the Freedom of Information Act, 5 U.S.C. 552(b) and the Department of Health, Education, and Welfare regulations thereunder, 45 CFR, Part 5.

#### § 36.206 Tribal clearances—initial contract.

- (a) Before the IHS may enter into a contract with a tribal organization, it must be requested to do so by the tribe. The tribe's request shall be in the form of a resolution by the tribal governing body. If the tribal organization is applying for a contract to perform services benefiting more than one tribe, an authorizing resolution from each tribal governing body must be obtained before submitting the application to IHS for approval. A tribal governing body may pass a single resolution authorizing a tribal organization to apply for, negotiate, and execute more than one contract if the resolution specifies for each contract the same information required in paragraphs (b) and (c) of this section.
- (b) The resolution of the tribal governing body shall authorize the applicant tribal organization to apply for, negotiate and contract with the IHS Area Office,

subject to the specific terms, conditions and limitations of the resolution and applicable tribal laws, codes, and regulations. The resolution shall include the date the resolution was approved, and signature of the person authorized to certify the accuracy of the information contained in the resolution.

(c) The tribal governing body's request (resolution) should include the following:

- (1) When the tribal organization is the tribal governing body:
  - (i) A brief statement of the contract scope.
  - (ii) The tribal official authorized to negotiate the contract and any amendments thereto.
  - (iii) The tribal official authorized to execute the contract and any amendments thereof.
  - (iv) The expiration date of the authorities granted by the resolution.
  - (v) The extent and procedure, if any, for review of the contract and any amendments thereto by the tribal governing body before execution.
  - (vi) The proposed date for contract commencement.
  - (vii) The proposed term of the contract.
- (2) When the tribal organization is other than the tribal governing body:
  - (i) The name of the tribal organization.
  - (ii) A brief statement of the contract scope.
  - (iii) The extent and procedure for review by the tribal governing body of the contract and any amendments thereto prior to execution by the tribal organization.
  - (iv) The tribal office or official to which the IHS should send copies of contract documents and correspondence.
  - (v) The proposed term of the contract.
  - (vi) The proposed date for contract commencement.
  - (vii) Any limitations on authorities granted the tribal organization.
  - (d) Any procedures specified in this section concerning the manner in which a tribal governing body passes a tribal resolution shall apply except where inconsistent with tribal constitution, law, code, ordinance, or other similar document. In such cases, the tribal law or procedures shall be cited in the resolution and shall take precedence.

#### § 36.207 Tribal clearances—contract renewals.

The Secretary may renew a contract for the same function(s) or programs as the original contract at the written request of the tribal organization designated in the tribal resolution. Requests for contract renewals shall be made as follows:

- (a) If the original contract provided services to only one Indian tribe, written applications for renewal shall be sent by the tribal organization to the Area Office as follows:
  - (1) Directly, when the tribal organization involved is the governing body of the tribe.
  - (2) Through the governing body of the tribe for review when the tribal organi-

zation is not the governing body of the tribe. Submission shall be made to the governing body at least 75 calendar days before the original contract expires. The tribal organization shall promptly notify the IHS Area Office in writing of the date the tribal governing body received the application. If, within 45 calendar days after receiving the application, the tribal governing body does not provide the IHS Area Director with a formal resolution objecting to the application for renewal, the absence of receipt of such a resolution shall constitute the tribe's request for renewal of the contract.

(b) If the original contract provided services to more than one Indian tribe, the tribal organization must give a copy of the written application for renewal to each tribal governing body at least 75 calendar days before the original contract expires. The tribal organization shall promptly notify the IHS Area Office where the application is to be submitted in writing, of the date the tribal governing bodies received copies of the application. If, within 45 calendar days after receiving copies of the application none of the tribal governing bodies provide the appropriate IHS Area Office with a formal resolution objecting to the application for renewal, the absence of receipt of such resolutions shall constitute the tribes' request for renewal of the contract. If one or more of the tribal governing bodies involved object to the renewal, the contract will not be made until all the tribal governing bodies have approved the request or the matter is otherwise resolved.

#### § 36.208 Evaluation criteria.

(a) Indian Self-Determination Contract Proposals will be evaluated to determine: (i) If the service to be rendered to Indian people by the proposed contract will be satisfactory; (ii) if the proposed contract will assure that trust resources are protected; and (iii) if the proposed contract will ensure proper completion and maintenance of the project or function involved. Failure to meet any of the above, may be cause for denial of the Indian Self-Determination Contract Proposal.

(b) To determine if an Indian Self-Determination Contract Proposal meets the above criteria, the Area Director and his staff will consider whether the tribal organization would be deficient in performance under the contract with respect to the factors listed in this paragraph.

(1) Equipment, buildings and facilities. No higher standards with regard to buildings, facilities, or equipment shall be applied to tribal organizations than have previously been applied to IHS. The Indian Health Service shall make available the use of all equipment which has been allocated to the operation of the program by the IHS in the past, unless the IHS determines that the provision of such equipment will seriously interfere with the IHS's ability to provide services to Indian people in noncontracted programs. Where equipment is shared by the programs to be contracted and other non-contracted programs, equipment-

sharing or other suitable arrangements will be reflected in the contract.

(2) Bookkeeping and accounting procedures. It must be clearly established by the Indian Health Service that the tribal organization which will undertake the contract does have an adequate accounting and bookkeeping system. IHS may assist the contractor in establishing an acceptable bookkeeping and accounting system.

(3) Substantive knowledge of the program to be contracted. The tribal organization shall be presumed to have substantive knowledge of the program to be contracted if it meets one or more of the following conditions:

- (i) The tribal organization has successfully managed a similar program before through grant or contract for which standards have been established.
- (ii) The members of the tribal organization have been consumers of such services in the past and have developed an understanding of the program sufficient to enable the tribal organization to effectively carry out the contract operation.
- (iii) The tribal organization has made arrangements to obtain and to develop its knowledge of the program.

(4) Lack of community support. Before the IHS can enter into a contract there must be a request made in accordance with § 36.206. The tribal governing body's resolution under § 36.206 shall be presumed to demonstrate that there is community support for the proposed contract. Any assertion of a lack of community support by persons to be served under the contract, is subject to exhaustion of tribal remedies by those making such assertions.

(5) Adequacy of trained personnel. The adequacy of trained personnel available to the tribal organization to carry out the proposed contract will be presumed if any of the following conditions exists:

- (i) If the tribal organization has a personnel system that prescribes minimum occupational qualification standards, which shall be not less than minimum Civil Service standards where applicable and procedures for the selection of personnel on the basis of such qualifications, and the personnel to be used under the proposed contract are to be employed under the personnel system.
- (ii) If there is no tribal personnel system, it will be assumed that the personnel to be employed under the proposed contract are adequately trained if the tribal organization has established position descriptions for key personnel to be employed under the contract and will establish within a reasonable time a personnel system similar to the one described in paragraph (c) (5) (i) of this section.

(6) Other necessary components of contract performance.

(i) The contractor's proposal must demonstrate the capacity to meet minimum health program and professional standards established by IHS for each major health service activity of the IHS. The Director will establish and make available to any prospective contractor the minimum standards for each major

health service activity of the Indian Health Service.

(ii) The contractor's proposal will be evaluated to determine the contractor's ability to meet the Uniform Administrative Standards published as a Notice of Proposed Rulemaking in February 10, 1975 40 F.R. 6304.

(iii) The ability of the contractor to carry out the contract in accordance with IHS policy, the applicable regulations of this Part, and the Act.

(iv) No other components shall be prescribed as a basis for declaration unless such components are added to the regulations in this subpart by revision or amendment of regulations.

(7) Tribes may pursuant to section 36.216 request a waiver of Federal Contracting Laws and Regulations for a specific contract.

(8) IHS officials may not decline to enter into a contract with a tribal organization because of any objection that would be overcome through the contract.

#### § 36.209 Government property.

(a) In carrying out a contract made under this Part, the Director shall, wherever possible, permit a tribal contractor to use existing buildings, facilities, and related equipment and other personal property owned by the IHS within his jurisdiction. Arrangements on the use of IHS property shall be provided for in the contract or other agreement as appropriate. In determining whether real or personal property can be provided, he shall determine whether the IHS can provide comparable services for any of the uncontracted part of the program.

(b) Requests for the use of IHS property which arise after signing of the contract shall be submitted to the relevant IHS official by the tribal organization. Such requests should be granted unless such a use would seriously interfere with the administration of existing IHS programs. The property must conform to the minimum standards established pursuant to the Occupational Safety and Health Act of 1970 (29 U.S.C. 651).

#### § 36.210 Submitting contract proposals.

(a) When services under the proposed contract will be provided to one or more tribes within the jurisdiction of a single Area Office, the completed contract proposal with documentation of the tribal request(s) and approvals of each such tribe effected shall be delivered or mailed to the Area Director of that Area Office.

(b) When services will be provided to tribes within the jurisdiction of more than one IHS Area Office, a copy of such proposals and documentation shall be forwarded to each of the Area Offices affected. Area Directors will then forward their recommendations to the Deputy Director, IHS.

#### § 36.211 Contract proposal approval officials.

Each Area Director is authorized to approve proposals for contract under which a tribal organization will provide services to a tribe or tribes within the jurisdiction of his Area Office. When a tribal organization applies for a contract

under which services will be provided to tribes within the jurisdiction of more

has been disapproved by the appropriate approving official, the tribal organization

- (4) The intended effect of the waiver;
- (5) The length of time for which it can be anticipated that the waiver will be

(b) Cost sharing contracts may be used where the tribe contributes to the cost of a program and may specify a

clause, which is also set forth in 41 CFR 3-4.60:

- (a) The Contractor shall indemnify

side or beyond the coverage and limits of the policy of insurance.

#### § 36.223. Exemption from bonds.

under which services will be provided to tribes within the jurisdiction of more than one Area Office or for a contract which is national in scope, the proposal must be submitted to the Deputy Director, IHS for approval.

#### § 36.212 Review.

Upon receiving a contract application, the approving official will:

(a) Notify the tribal organization in writing that the proposal has been received. This notice will be made within five (5) calendar days after receipt of the proposal.

(b) Review the proposal for completeness and promptly request additional information from the tribal organization or from the requesting tribe which will be needed to reach a decision.

(c) Notify Area Office subordinate activities serving the tribe(s) which will receive services under the contract and obtain any needed information and/or relevant recommendations on the contract.

(d) Assess the contract proposal to determine if it is feasible and if it complies with the appropriate requirements of the Act and of the regulations in this Subpart.

(e) Notify the tribal organization of deficiencies in the proposal and provide to the extent practicable technical assistance, as requested, to overcome such deficiencies.

(f) Approve or disapprove the proposal after fully reviewing and assessing it and any additional information submitted by the tribal organization provided, however, that no action to disapprove shall be taken during the period of provision of technical assistance.

(g) Promptly notify the tribal organization in writing of the decision to approve or disapprove the proposal. If the proposal is disapproved, the notice shall contain but need not be limited to the following:

(i) Specific objections, which are based on failures to meet applicable program or administrative standards or fund restrictions, which preclude acceptance of the Indian Self-Determination Contract Proposal;

(ii) Guidance to the tribe regarding the steps which need to be taken to overcome the stated objections;

(iii) Identification of assistance which can practically be made available to the tribe upon request to overcome the stated objections;

(iv) Notification to the tribal organization of its right to appeal.

#### § 36.213 Processing time.

The approving official will except as otherwise provided approve or disapprove a contract proposal within sixty (60) calendar days after receipt. The (60) calendar day deadline may be extended only after obtaining the written consent of the tribal organization.

#### § 36.214 Tribal appeals to proposal decisions.

(a) On being advised that an Indian Self-Determination Contract Proposal

has been disapproved by the appropriate approving official, the tribal organization may file a written appeal to the Contract Proposal Declaration Appeals Board within thirty (30) days after receipt of the Declaration Notice and may request a hearing. The appeal should either refute or overcome the objections stated as a basis for disapproval. The Contract Proposal Declaration Appeals Board shall consider such an appeal, conduct any requested hearing thereon, and recommend a decision to the Director, Indian Health Service, whose decision shall be final.

(b) Hearings at which tribal organizations are represented shall be conducted within thirty (30) calendar days from receipt of written request for a hearing as follows:

(1) The tribal organization and the Indian tribe or tribes affected shall be notified, in writing, of the hearing. The notice should give the date, time, place, and purpose of the hearing. The IHS will authorize payment of transportation costs and per diem to allow adequate representation of the applicant, if the meeting is more than 50 miles from the office of the applicant.

(2) A written record of the hearing should be made. The record should include written statements submitted at the hearing or within 5 calendar days following the hearing.

(c) Decisions of the Director, IHS, regarding hearing or written appeals shall be rendered within (15) calendar days from the date of the Board's recommendation.

(d) The Contract Proposal Declaration Appeals Board shall be composed of 5 members appointed by the Director, Indian Health Service, one of whom shall be designated to serve as Chairman.

#### PROCUREMENT

#### § 36.215 Applicability of regulations.

Contracts with tribal organizations resulting from the submission of Indian Self-Determination Contract Proposals as authorized in Public Law 93-638 shall be in accordance with Chapter 1 and 3 of 41 CFR.

#### § 36.216 Waivers.

(a) The Secretary may, for good cause shown, waive for the purposes of a specific contract any federal contracting laws and regulations which he determines are not appropriate for the purposes of the contract involved or are inconsistent with the Act.

(b) Requests for waivers may be initiated by tribal organizations or IHS contracting officers. Such requests will be forwarded to the Director, IHS for decision or further processing to the Secretary as required.

(c) A waiver request shall set forth clearly and precisely the following:

(1) The nature and basis of the needed waiver;

(2) Identification of the procurement regulation provision from which the waiver is needed;

(3) The circumstances under which the waiver would be used;

(4) The intended effect of the waiver;

(5) The length of time for which it can be anticipated that the waiver will be required;

(6) Reasons which will contribute to complete understanding and support of the requested waiver;

(7) Copies of pertinent background papers such as forms, contractor requests, etc.

#### § 36.217 Fair and equal treatment of Indian people.

Contracts awarded to tribal organizations pursuant to the Indian Self-Determination Act shall incorporate the following clause:

The Contractor agrees, consistent with medical need, to make no discriminatory distinctions among Indian patients or beneficiaries of this contract. For the purpose of this contract discriminatory distinctions include but are not limited to the following:

(a) Denying a patient any service or benefit or availability of a facility;

(b) Providing any service or benefit to a patient which is different, or is provided in a different manner or at a different time from that provided to other patients under this contract; subjecting a patient to segregation or separate treatment in any manner related to his receipt of any service; restricting a patient in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service benefit; treating a patient differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility membership, or other requirements or condition which individuals must meet in order to be provided any service or benefit; the assignment of times or places for the provision of services on the basis of discriminatory distinctions which may be made of the patients to be served.

#### § 36.218 Types of contracts.

Cost-reimbursement type contracts provide for payment to the contractor of allowable costs incurred in the performance of the contract, to the extent prescribed in the contract. This type of contract establishes an estimate of total cost for the purpose of obligation of funds, and a monetary ceiling which the contractor may not exceed. Except as provided below, cost reimbursement contracts will be used for all contracts made pursuant to this subpart. In addition to such other provisions as The Secretary may from time to time require, a negotiated cost reimbursement contract shall contain the terms set out in section 3-4.6013 of 41 CFR except when it can be shown that one of the types listed below would be more appropriate.

(a) Fixed-price contracts may be used in those instances where costs can be precisely established. In addition to such other provisions as The Secretary may from time to time require, a negotiated fixed-price contract shall contain the terms set out in section 3-4.6014 of 41 CFR.

(b) Cost sharing contracts may be used where the tribe contributes to the cost of a program and may specify a percentage of cost or fixed amount to be funded by the government.

#### § 36.219 Term of contract.

(a) The term of contracts awarded under the Act shall not exceed one year except that contracts may be made for a longer term up to three years subject to the availability of appropriations under the following circumstances:

(1) The services provided under the contract can reasonably be expected to be continuing in nature and, as a result, a longer contract term would be advantageous.

(2) The Indian tribe or tribes to be served by the contract request that the term be more than one year. The tribal organization will indicate the desired term of the contract in the Self-Determination Contract Proposal.

(b) Contracts made for a term of more than one year may be renegotiated annually to reflect factors which include, but need not be limited to, cost increases beyond the control of the tribal contractor. Proposed changes in the services provided under the contract which reflect changes in program emphasis may be considered during the annual renegotiation if the changes fall within the general scope of the contract.

#### § 36.220 Indian preference in subcontracting.

Contracts awarded under authority of the Act shall incorporate the following clause, which is also set forth in 41 CFR 3-4.60:

##### INDIAN PREFERENCE IN SUBCONTRACTING

The contractor agrees to give preference in purchasing and subcontracting to Indian organizations and Indian owned economic enterprises to the maximum extent that is consistent with the efficient performance of this contract.

#### § 36.221 Indian preference in training and employment.

Contracts awarded under authority of the Act shall incorporate the following clause, which is also set forth in 41 CFR 3-4.60:

##### INDIAN PREFERENCE IN TRAINING AND EMPLOYMENT

It is the policy of the Government to give preference and opportunities for training and employment, under contracts and subcontracts awarded pursuant to the Indian Self-Determination Act, to Indians.

The Contractor agrees to give such preference and opportunity to Indians for training and employment under this contract to the extent that such is consistent with the efficient performance of this contract.

The Contractor further agrees to comply with any rules, regulations and reporting requirements which may be imposed by the DHEW Office for Civil Rights for purposes of insuring the proper exercise of this authority.

The Contractor agrees to insert this clause in all subcontract(s) under this contract.

#### § 36.222 Indemnity and insurance.

Contracts awarded under authority of the Act shall incorporate the following clause, which is also set forth in 41 CFR 3-4.60:

(a) The Contractor shall indemnify and save and keep harmless the Government against any or all loss, cost, damage, claim, expense or liability whatsoever, because of accident or injury to persons or property or others occurring in connection with any program included as a part of this contract, by providing where applicable, the insurance described below.

(b) The Contractor shall secure, pay the premium for, and keep in force until the expiration of this contract, or any renewal period thereof, insurance as provided below. Such insurance policies shall specifically include a provision stating the liability assumed by the Contractor under this contract.

(1) Workmen's compensation insurance as required by laws of the State.

(2) Owner's, landlord's and tenant's bodily injury liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(3) Property damage liability insurance with limits not less than \$25,000 for each accident.

(4) Automobile bodily injury liability insurance with limits of not less than \$50,000 for each person, and \$500,000 for each accident and property damage liability insurance with a limit of not less than \$5,000 for each accident.

(5) Food products liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(6) Professional malpractice insurance where medical, dental or other health professional services are involved.

(7) Other liability insurance not specifically mentioned when required.

(c) Each policy of insurance shall contain an endorsement providing that cancellation by the insurance company shall not be effective unless a copy of the cancellation is mailed (registered) to the Contracting Officer 30 days prior to the effective date of cancellation.

(d) A certificate of each policy of insurance, and any change therein, shall be furnished to the Contracting Officer immediately upon receipt from the insurance company.

(e) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance company is not satisfactory for reasons that will be stated, the Contractor shall provide insurance through companies that are satisfactory to the Contracting Officer.

(f) Each policy of insurance shall contain a provision that the insurance carrier waives any rights it may have to raise as a defense the tribe's sovereign immunity from suit, but such waiver shall extend only to claims the amount and nature of which are within the coverage and limits of the policy of insurance. The policy shall contain no provision, either express or implied, that will serve to authorize or empower the insurance carrier to waive or otherwise limit the tribe's sovereign immunity out-

side or beyond the coverage and limits of the policy of insurance.

(a) The Contractor shall indemnify and save and keep harmless the Government against any or all loss, cost, damage, claim, expense or liability whatsoever, because of accident or injury to persons or property or others occurring in connection with any program included as a part of this contract, by providing where applicable, the insurance described below.

(b) The Contractor shall secure, pay the premium for, and keep in force until the expiration of this contract, or any renewal period thereof, insurance as provided below. Such insurance policies shall specifically include a provision stating the liability assumed by the Contractor under this contract.

(1) Workmen's compensation insurance as required by laws of the State.

(2) Owner's, landlord's and tenant's bodily injury liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(3) Property damage liability insurance with limits not less than \$25,000 for each accident.

(4) Automobile bodily injury liability insurance with limits of not less than \$50,000 for each person, and \$500,000 for each accident and property damage liability insurance with a limit of not less than \$5,000 for each accident.

(5) Food products liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(6) Professional malpractice insurance where medical, dental or other health professional services are involved.

(7) Other liability insurance not specifically mentioned when required.

(c) Each policy of insurance shall contain an endorsement providing that cancellation by the insurance company shall not be effective unless a copy of the cancellation is mailed (registered) to the Contracting Officer 30 days prior to the effective date of cancellation.

(d) A certificate of each policy of insurance, and any change therein, shall be furnished to the Contracting Officer immediately upon receipt from the insurance company.

(e) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance company is not satisfactory for reasons that will be stated, the Contractor shall provide insurance through companies that are satisfactory to the Contracting Officer.

(f) Each policy of insurance shall contain a provision that the insurance carrier waives any rights it may have to raise as a defense the tribe's sovereign immunity from suit, but such waiver shall extend only to claims the amount and nature of which are within the coverage and limits of the policy of insurance. The policy shall contain no provision, either express or implied, that will serve to authorize or empower the insurance carrier to waive or otherwise limit the tribe's sovereign immunity out-

side or beyond the coverage and limits of the policy of insurance.

(a) A performance bond with a surety or sureties satisfactory to the approving official, and in an amount he deems adequate, for the protection of the United States.

(b) A payment bond with a surety or sureties satisfactory to the approving official for the protection of all persons supplying labor and material in carrying out the contract the use of each person. Whenever the total amount payable by the terms of the contract is not more than \$1,000,000 the payment bond shall be one-half the total amount payable by the terms of the contract. Whenever the total amount payable by the terms of the contract is more than \$1,000,000 but not more than \$5,000,000, the payment bond shall be 40 percent of the total amount payable by the terms of the contract. Whenever the total amount payable by the terms of the contract is more than \$5,000,000 the payment bond shall be \$2,500,000.

(c) A wage and labor standard—construction contracts.

All laborers and mechanics employed by tribal contractors or subcontractors in constructing, altering or repairing buildings or other facilities in connection with contracts under this Subpart shall be paid wages not less than those on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act of March 3, 1931 (46 Stat. 1494), as amended. However, this requirement does not apply where the tribal contractor is the recognized governing body of the tribe and the construction, alteration, or repair work is being performed by the tribal organization or the tribe with its own regular employees.

(d) Performance of personal services.

Any contract made under this subpart may include provisions for the performance of personal services which would otherwise be performed by Federal employees. Such services include, but are not limited to, performing the following functions in connection with the contract and applicable rules and regulations:

(a) Determining the eligibility of applicants for assistance, benefits, or services.

(b) Determining the extent or amount of assistance, benefits, or services to be provided.

(c) Contract revisions or amendments.

(a) Any contract made under this

(c) Providing such assistance, benefits or services.

thereof may be withdrawn from the Special Bank Account by checks payable to

favor of the Government by virtue of any provision of this contract in such a

§ 36.230 Contract revisions or amendments. (a) Any contract made under this

(c) Providing such assistance, benefits, or services.

#### § 36.226 Advance payments.

Contracts awarded under the authority of the Act shall incorporate the following clause, which is also set forth in 41 CFR 3-4.60.

(a) *Amount of Advance.* At the request of the contractor, and subject to the conditions hereinafter set forth, the Government shall make an advance payment, or advance payments from time to time, to the Contractor. No advance payment shall be made (1) without the approval of the officer administering advance payments hereinafter called the "Administering Office" and designated in paragraph (k) (4) hereof as with all advance payments theretofore made, shall exceed the amount stated in paragraph (k) (1) hereof; and (3) without a properly certified invoice or invoices.

(b) *Special Bank Account.* Until all advance payments made hereunder are liquidated and the Administering Office approves in writing the release of any funds due and payable to the Contractor, all advance payments and all other payments under the contract shall be made by check payable to the Contractor, and be marked for deposit only in a Special Bank Account with the bank designated in paragraph (k) (2) hereof. No part of the funds in the Special Bank Account shall be mingled with other funds of the contractor prior to withdrawal thereof from the Special Bank Account as hereinafter provided. Except as hereinafter provided, each withdrawal shall be made only by check of the Contractor countersigned on behalf of the Government by the Contracting Officer or such other person or persons as he may designate in writing (hereinafter called the "Countersigning Agent"). Until otherwise determined by the Administering Office, countersignature on behalf of the Government will not be required.

(c) *Use of Funds.* The funds in the Special Bank Account may be withdrawn by the Contractor solely for the purposes of making payments for items of allowable cost or to reimburse the Contractor for such items of allowable cost, and for such other purposes as the Administering Office may approve in writing. Any interpretation required as to the proper use of funds shall be made in writing by the Administering Office.

(d) *Return of Funds.* The Contractor may at any time repay all or any part of the funds advanced hereunder. Whenever so requested in writing by the Administering Office, the Contractor shall repay to the Government such part of the unliquidated balance of advance of advance payments as shall in the opinion of the Administering Office be in excess of current requirements, or (when added to total advance previously made and liquidated) in excess of the amount specified in paragraph (k) (1) hereof. In the event the Contractor fails to repay such part of the unliquidated balance of advance payments when so requested by the Administering Office, all or any part

thereof may be withdrawn from the Special Bank Account by checks payable to the Treasurer of the United States signed solely by the Countersigning Agent and applied in reduction of advance payments then outstanding hereunder.

(e) *Liquidation.* If not otherwise liquidated, the advance payments made hereunder shall be liquidated as herein provided. When the sum of all payments under this contract, other than advance payments, plus the unliquidated amount of advance payments are equal to the total estimated cost for the work under this contract or such lesser amount to which the total estimated cost under this contract may have been reduced, plus increases, if any, in this total estimated cost not exceeding, in the aggregate (including, without limitation, reimbursable costs incident to termination for cause and retrocession as estimated by the Contracting Officer), the Government shall thereafter withhold further payments to the Contractor and apply the amounts withheld against the Contractor's obligation to repay such advance payments until such advance payments shall have been fully liquidated. If upon completion, termination, or retrocession of the contract all advance payments have not been fully liquidated, the balances therefore shall be deducted from any sums otherwise due or which may become due to the Contractor from the Government, and any deficiency shall be paid by the Contractor to the Government upon demand.

(f) *Bank Agreement.* Before an advance payment is made hereunder, the Contractor shall transmit to the Administering Office, in the form prescribed by such office, an Agreement in triplicate from the bank in which the Special Bank Account is established, clearly setting forth the special character of the account and the responsibilities of the bank thereunder. Wherever possible, such bank shall be a member bank of the Federal Reserve System, or an "insured" bank within the meaning of the Act creating the Federal Deposit Insurance Corporation Act of August 23, 1935, 49 Stat. 685, as amended (12 U.S.C. 264).

(g) *Lien on Special Bank Account.* The Government shall have a lien upon any balance in the Special Bank Account paramount to all other liens, which lien shall secure the repayment of any advance payments made hereunder.

(h) *Lien on Property under Contract.* Any and all advance payments made under this contract shall be secured, when made, by a lien in favor of the Government, paramount to all other liens, upon the supplies or other things covered by this contract and on all material and other property acquired for or allocated to the performance of this contract, except to the extent that the Government by virtue of any other provision of this contract, or otherwise, shall have valid title to such supplies, materials, or other property as against other creditors of the Contractor. The Contractor shall identify, by marking or segregation, all property which is subject to a lien in

favor of the Government by virtue of any provision of this contract in such a way as to indicate that it is subject to such lien and that it has been acquired for or allocated to the performance of this contract. If for any reason such supplies, materials, or other property are not identified by marking or segregation, the Government shall be deemed to have a lien to the extent of the Government's interest under this contract on any mass of property with which such supplies, materials, or other property are commingled. The Contractor shall maintain adequate accounting control over such property on his books and records. If at time during the progress of the work on the contract it becomes necessary to deliver any item or items and materials upon which the Government has a lien as aforesaid to a third person, the Contractor shall notify such third person of the lien herein provided and shall obtain from such third person a receipt, in duplicate, acknowledging, inter alia the existence of such lien. A copy of each receipt shall be delivered by the Contractor to the Contracting Officer. If this contract is terminated in whole or in part and the Contractor is authorized to sell or retain termination inventory acquired for or allocated to this contract, such sale or retention shall be made only if approved by the Contracting Officer, which approval shall constitute a release of the Government's lien hereunder to the extent that such termination inventory is sold or retained, and to the extent that the proceeds of the sale, or the credit allowed for such retention on the Contractor's termination claim, is applied in reduction of advance payments then outstanding hereunder.

(i) *Insurance.* The Contractor represents and warrants that he is now maintaining with responsible insurance carriers, (1) insurance upon his own plant and equipment against fire and other hazards to the extent that like properties are usually insured by others operating plants and properties of similar character in the same general locality; (2) adequate insurance against liability on account of damage to persons or property; and (3) adequate insurance under all applicable workmen's compensation laws. The Contractor agrees that, until work under this contract has been completed and all advance payments made hereunder have been liquidated, he will (1) maintain such insurance; (2) maintain adequate insurance upon any materials, parts, assemblies, subassemblies, supplies, equipment and other property acquired for or allocable to this contract and subject to the Government lien hereunder; and (3) furnish such certificates with respect to his insurance as the Administering Office may from time to time require.

(j) *Prohibition against Assignment.* Notwithstanding any other provision of this contract, the Contractor shall not transfer, pledge, or otherwise assign this contract, or any interest therein, or any claim arising thereunder, to any party or parties, bank, trust company, or other financing institution.

#### (k) Designations and Determinations.

(1) *Amount.* The amount of advance payments at any time outstanding hereunder shall not exceed \$-----.

(2) *Depository.* The bank designated for the deposit of payments made hereunder shall be:

(3) *Interest Charge.* No interest shall be charged for advance payments made hereunder. The Contractor shall charge interest at the rate of 6 percent per annum on subadvances or down payments to subcontractors, and such interest will be credited to the account of the Government. However, interest need not be charged on subadvances on non-profit subcontracts with nonprofit educational or research institutions for experimental, research or development work.

(4) *Administering Office.* The office administering advance payments shall be the office designated as having responsibility for awarding the contract.

(l) *Other Security.* The terms of this contract shall be considered adequate security for advance payments hereunder, except that if at any time the Administering Office deems the security furnished by the Contractor to be inadequate, the Contractor shall furnish such additional security as may be satisfactory to the Administering Office, to the extent that such additional security is available.

#### § 36.227 Recordkeeping, reporting and audit.

(a) The standard clauses regarding "Accounts, Audit, and Records" and "Examination of Records" as set forth in 41 CFR 3-4.60 apply to contracts awarded under the Act. Further, Recordkeeping will be in accordance with uniform Administrative Standards.

(b) In addition, where Federal financial assistance is involved in the contract effort, the following clause, which is also set forth in 41 CFR 3-4.60, will be incorporated as a special provision of such contracts:

#### REPORTS TO THE INDIAN PEOPLE

The contractor, as a recipient of Federal financial assistance, shall make reports and information available to the Indian people served or represented by the contractor. Such reports will reflect how the Federal assistance funds were utilized to the benefit of the Indian people served or represented as follows: (Insert specific reporting requirements formats and method of distribution to the Indian people as may be prescribed in the scope of the contract and the Uniform Administrative Standards).

(c) *Annual Reporting.* (1) For each fiscal year during which a tribal organization receives or expends funds pursuant to a contract under this subpart, the tribe which requested the contract must submit a report to the Area Director. The report shall include, but need not be limited to, an accounting of the amounts and purposes for which the contract funds were expended and information on the conduct of the program or services involved. The report shall include any other information requested by

the Area Director and may be submitted as follows:

(1) When the contract is with the governing body of an Indian tribe, the tribe shall submit the report to the Area Director.

(ii) When the contract is with a tribal organization other than the governing body of the tribe, the tribe has the option of having the tribal organization prepare the report and submit it to the tribe for review and approval before the tribe submits it to the Area Director.

(iii) When the contract benefits more than one tribe, the tribal organization shall prepare and submit the report to each of the tribes benefiting under the contract. Each tribe shall endorse the report before submitting it to the Area Director.

(2) The annual report shall be submitted to the Area Director within 60 days of the end of the fiscal year in which the contract was performed. However, the period for submitting the report may be extended if there is just cause for such extension.

(3) In addition to the yearly reporting requirement given in paragraphs (a) and (b) of this section, the tribal contractor shall furnish other reports required by the Area Director.

#### § 36.228 Availability of information.

(a) Except as otherwise provided herein and so long as the release of information does not constitute an unwarranted invasion of personal privacy, a tribal contractor under this subpart shall make all reports and information concerning the contract available to the Indian people served or represented by the contractor.

(b) A contractor shall hold confidential all information obtained by personnel under the contract from persons receiving services under the contract related to their examination, care, and treatment, and shall not release such information without the individual's consent except as may be required by law, as may be necessary to provide service to the individual, or as may be necessary to monitor the operations of the program or otherwise protect the Public Health. Information may be disclosed in a form which does not identify particular individuals.

#### § 36.229 Penalties.

Whoever, being an officer, director, agent, or employee of, or connected in any capacity with, any recipient of a contract or subcontract pursuant to this Act or the Act of April 16, 1934 (48 Stat. 596), as amended, embezzles, willfully misapplies, steals, or obtains by fraud any of the money, funds, assets, or property which are the subject of such a contract, or subcontract, shall be fined not more than \$10,000 or imprisoned for not more than two years, or both, but if the amount so embezzles, willfully misapplies, steals, or by fraud does not exceed \$100, he shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

#### § 36.230 Contract revisions or amendments.

(a) Any contract made under this Subpart may be revised or amended as deemed necessary to carry out the purposes of the program, project, or function being contracted. Those changes initiated by the Government shall be subject to the applicable contract Standard Change Clauses prescribed in 41 CFR 3-4.60.

(b) However, a tribal contractor may make a written request for a revision or amendment of a contract to the Contracting Officer. Such requests will be treated in the same manner as initial Self-Determination Proposals and evaluated in accordance with the criteria specified in § 36.208 of this Subpart. If the contracting officer declines revision or amendment of the contract as requested, he shall notify the tribal organization in writing within 30 days after receiving the request. Thereafter, an appeal to the Contracting Officer's decision to amend the contract will follow the same processing and procedures outlined in § 36.214 of this Subpart.

#### § 36.231 Retrocession of contract programs.

(a) Whenever an Indian tribe requests retrocession for any contract or portion thereof entered into under this Subpart, retrocession shall be effective upon a date specified by the Contracting Officer but no later than 120 days after the date of the request from the tribe, except when the tribe and the Contracting Officer mutually agree on a later date.

(b) Immediately after a request for retrocession, representatives of the tribe and the Contracting Officer shall meet and take the following actions:

(1) Mutually agree on a plan for orderly transfer of responsibilities.

(2) Mutually agree on a plan for inventorying materials and supplies on hand.

(3) Establish an accounting of funds, current and anticipated obligations, and costs of operation until the retrocession date.

(4) Identify all records relating to the contract and to the contracted function.

(c) On the date of retrocession, the tribal contractor will deliver to the Contracting Officer all property, materials, supplies and records of whatever nature which have been identified as necessary for the continuation of the program, project or function.

(d) Within 30 calendar days after retrocession, the tribe will furnish the Contracting Officer with a report including but not limited to an accounting of the amounts and purposes for which Federal funds were expended, a description and evaluation of program accomplishments, and reasons why retrocession was requested.

(e) Retrocession of a contract by an Indian tribe shall be without prejudice to:

(1) Any other contract to which it is a party.

(2) Any other contracts it may request.

(3) Any future request to contract for the programs or services covered by the retroceded contract.

tion to the satisfaction of the contracting officer and the Area Director, or given assurances satisfactory to the contract-

or operation of the program, activity, or service involved. In such case, the Director, Indian Health Service, shall design-

Government in regard to such funds unless and until they are appropriated. Funds appropriated during the fiscal year in which the contract commenced that are included in the

## PROPOSED RULES

(3) Any future request to contract for the programs or services covered by the retroceded contract.

(f) Tribal assumption of retroceded contracts. Whenever an Indian tribe chooses to retrocede a contract operated by a tribal organization other than the tribal governing body, the tribal governing body may request to contract for the program. In such a case, the tribal governing body shall submit a contract proposal pursuant to this subpart.

#### § 36.232 Contractor assistance.

To the extent practicable, the Director, Indian Health Service, may, at the request of a tribal organization, provide technical assistance to the contractor in attempting to resolve problems or deficiencies among in the performance of the contract.

#### § 36.233 Assumption, reassumption of contract programs.

(a) When the contracting officer with the concurrence of the Area Director determines that the performance of a contractor under these regulations involves (1) the violation of the rights or endangerment of the health, safety, or welfare of any person, or (2) gross negligence or the mismanagement in the handling or use of funds under the contract, including any material failure to comply with the terms and conditions of the contract, the contracting officer will, in writing, notify the contractor of such determination and will request that the contractor take such corrective action within such period of time as the Secretary may prescribe.

(b) When the contracting officer determines, after making a determination described in paragraph (a) of this section, that such action is necessary to protect contract funds which will otherwise be expended contrary to the best interests of the Indians to be served or is otherwise necessary to protect the health or welfare of the Indian population, he may, pending the prompt initiation and resolution of rescission proceedings and after reasonable written notice to the contractor, suspend, in whole or in part, federal assistance under the contract. No obligations incurred by the contractor during the period of suspension shall be allowable under the suspended contract (or portion of the contract), except that the contracting officer may, with the concurrence of the Area Director, allow necessary and proper costs which the contractor could not reasonably avoid during the period of suspension or which he determines may be necessary to preserve the project or best interests of the Indians to be served. *Provided*, that such costs would otherwise be allowable under this subpart. Appropriate adjustments to the payments under the suspended contract (or portion of the contract) will be made, either by withholding the payments or by not allowing the contractor credit for disbursements which it may make in liquidation of unauthorized obligations it incurs during the period of suspension. Suspensions shall remain in effect until the contractor has taken corrective ac-

tion to the satisfaction of the contracting officer and the Area Director, or given assurances satisfactory to the contracting officer and the Area Director that corrective action will be taken, or until the contract is rescinded.

(c) When the contracting officer with the concurrence of the Area Director determines that a contractor has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after the contractor has been provided an opportunity for a hearing in accordance with paragraph (d) of this section, rescind the contract in whole or in part and, if appropriate, assume or resume control or operation of the program, activity, or service involved.

(d) (1) When the contracting officer has made a determination described in paragraph (c) of this section, he shall in writing notify the contractor of such determination and of the contractor's right to request a review of such determination and of the determination described in paragraph (a) of this section. Such notification by the contracting officer shall set forth the reasons for the determination in sufficient detail to enable the contractor to respond and shall inform the contractor of its right to a hearing before a Contract Appeals Board described in paragraph (d) (2) of this section.

(2) Contract Appeals Board shall be composed of 3 persons appointed by the Director, Indian Health Service. Such persons may not be selected from people in the immediate office of any person participating in the determinations at issue. The Board shall meet as often and for so long as necessary to render a prompt initial decision consistent with providing the contractor with a fair hearing. The Board may operate with informal rules which must at a minimum assure the following:

(i) Sufficient notice of the issues to be considered (where such notice has not previously been afforded);

(ii) An opportunity to be represented by counsel;

(iii) An opportunity to make a record of the proceedings;

(iv) An opportunity to present witnesses on contractor's behalf; and

(v) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

The Contract Appeals Board shall make an initial written recommended decision which shall become final within 20 days unless the Director, Indian Health Service determines that a contrary decision is warranted. Any such decision by the Director of the Indian Health Service will be in writing and will be specific as to the reasons for his decision.

(e) Where the contracting officer, with the concurrence of the Area Director, determines that a contractor's performance under a contract awarded under this subpart poses an immediate threat to the safety of any person, he may immediately rescind the contract in whole or in part and, if appropriate the Area Director may assume or resume control

or operation of the program, activity, or service involved. In such case, the Director, Indian Health Service, shall designate three officers or employees of the Department to serve as a hearing panel, one of whom shall be designated as chairman. No officer or employee from the immediate office of any of the officials who had a part in the decision to terminate the contract under this paragraph may be designated to serve on the hearing panel.

(1) The hearing shall be commenced within 10 days after the rescission of the contract and shall afford each party to the proceeding:

(i) Sufficient notice of the issues to be considered (where such notice has not previously been afforded);

(ii) An opportunity to be represented by counsel;

(iii) An opportunity to make a record of the proceedings;

(iv) An opportunity to present witnesses on contractor's behalf; and

(v) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(2) The hearing panel shall, within 25 days after the conclusion of the hearing, notify all parties in writing of its decision.

(3) Such decision shall not be subject to further hearing in accordance with 42 CFR Part 50, subpart D or with 45 CFR Part 16.

(f) In any case where the contracting officer has rescinded a contract under paragraphs (c) or (e) of this section, he may decline to enter into a new contract agreement with the contractor until such time as he is satisfied that the basis for the rescission has been corrected.

Nothing in this section shall be construed as contravening the Occupational Safety and Health Act of 1970 (84 Stat. 1590), as amended (29 U.S.C. 651).

#### § 36.234 Operation of retroceded or reassumed contracts.

(a) The IHS shall endeavor to provide to the tribe(s) and Indians served by a retroceded or reassumed contract not less than the same quantity and quality of service it would have provided if there had been no contract.

(b) The IHS shall endeavor to provide to the tribe(s) and Indians served by a retroceded or reassumed contract not less than the same quantity and quality of permanent and temporary personnel that meet the U.S. Civil Service qualifications, it would have provided if there has been no contract.

(c) IHS officials cannot decline to accept a retroceded contract or to reassume a contract because they are unable to provide the quality and quantity of service and personnel required in paragraphs (a) and (b) of this section.

#### § 36.235 Contract funds.

The tribal organization shall be entitled to be funded for direct and indirect costs at a level which is not less than would have been provided if the IHS had operated the program or portion thereof during the contract period.

#### § 36.236 Unexpended funds under contract.

(a) If it becomes apparent during the contract term that the estimated amount of a contract under this subpart will be in excess of actual expenditures under the contract, the identified unexpended funds will be used to provide additional services or benefits within the scope or limitations of the contract.

(b) When both the tribal organization and the IHS agree that it is not practicable to spend all contract funds during the contract term, to the extent authorized by law unexpended funds may be carried over into the succeeding fiscal year contract. Unexpended funds carried

over into a succeeding fiscal year shall be added to the contract amount for that fiscal year.

#### § 36.237 Contract funding and renegotiation.

The following clause shall be included in contracts awarded under the Act which have a term of more than one year:

##### CONTRACT FUNDING AND RENEGOTIATION

Funds other than those appropriated during the fiscal year in which the contract commenced, that are included in the contract amount are subject to the availability of appropriations from Congress and there shall be no legal liability on the part of the

Government in regard to such funds unless and until they are appropriated. Funds appropriated during the fiscal year in which the contract commenced that are included in the contract amount but not expended at the end of such fiscal year may be carried over and used for contract purposes in the succeeding fiscal year of the contracts operation or, may be used to provide additional services upon modification of the contract to include such services therein.

Each succeeding year of the contract may be renegotiated prior to the end of the then current fiscal year in order to reflect changes that have taken place beyond the control of the contractor since the contract was originally negotiated or last renegotiated as is applicable.

## SPECIAL TYPES AND METHODS OF PROCUREMENT

### Contracts Under Indian Self-Determination Act

Notice is hereby given that The Secretary of Health, Education, and Welfare proposes to amend the Department's procurement regulations, Chapter 3 of 41 CFR, by the addition of a new subpart, entitled Contracts Under the Indian Self-Determination Act, to Part 3-4 Special Types and Methods of Procurement.

Section 103 of the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638, 25 U.S.C. 450g, authorizes The Secretary of Health, Education, and Welfare to contract at the request of a tribe with a tribal organization to carry out any or all of his functions, authorities, or responsibilities under the Act of August 5, 1954, as amended, 42 U.S.C. 2001. Program regulations to implement this authority have been developed and are published today as a Notice of Proposed Rulemaking at 40 FR 42657. The regulations proposed below contain the special contract clauses and procurement instructions applicable to contracts under the Act.

Interested persons are invited to participate in the rulemaking process by submitting such written data, views, and arguments as they may desire. Inquiries may be addressed to data, views, and arguments related to the proposed regulations may be presented in writing to the Director, Indian Health Service, Health Services Administration, Public Health Service, Room 5A55 Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852. All relevant material received on or before October 15, 1975, will be considered. All comments received in response to this notice will be available for public inspection in such office on weekdays between 9 a.m. and 5 p.m.

It is therefore proposed to amend 41 CFR Part 3-4 by adding a new subpart .60 as set forth below.

Issued in Washington, D.C. in September, 1975.

Dated: September 10, 1975.

DAVID MATHEWS,  
Secretary.

## PROPOSED RULES

- Sec. 3-4.6011 Special provisions of Indian Self-Determination contracts.  
3-4.6012 General provisions.  
3-4.6013 General provisions for Cost Reimbursement Contracts under the Indian Self-Determination Act.  
3-4.6014 General provisions for Fixed Cost contracts under the Indian Self-Determination Act.

AUTHORITY: Secs. 103, 107 of P.L. 93-638, 25 U.S.C. 450g, 450k; sec. 3, Pub. L. 83-568, 42 U.S.C. 2003.

### Subpart 3-4.60—Contracts Under the Indian Self-Determination Act

#### § 3-4.6000 Scope of subpart.

This subpart prescribes procedures for contracting by the Department of Health, Education, and Welfare under the Indian Self-Determination Act (25 U.S.C. 405f).

#### § 3-4.6001 Applicability of regulations.

Contracts with tribal organizations resulting from the submission of Indian Self-Determination Contract Proposals as authorized in Public Law 93-638 shall be in accordance with 41 CFR Chapter 1 and 3.

#### § 3-4.6002 Waivers.

(a) The Secretary waives Federal contract clauses that are normally contained in the General Provisions of a contract to the extent that they are omitted from the General Provisions prescribed for such contracts in this subpart.

(b) The Secretary may waive for the purpose of a specific contract such other provisions of Federal contracting laws or regulations as he determines are not appropriate in view of, or are inconsistent with, the provisions of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.). Requests for such waivers shall be in accordance with 42 CFR 36.216.

(c) While it is DHEW's policy to obtain competition whenever possible, any contract award to a tribal organization resulting from the submission of an Indian Self-Determination Contract Proposal will be effected without competition unless competing tribal entities have submitted independent proposals for the same program requirements.

(d) Proposed contracts under section 103 of the Indian Self-Determination Act are exempted from the requirements of § 1-1.1003—although subcontracts are subject under section 7(b) of that act to a preference to Indian organizations and to Indian-owned economic enterprises. Opportunities to so subcontract may be publicized by contracting officers as provided for in § 1-1003-4.

#### § 3-4.6003 Negotiating authority.

(a) Contracts entered into pursuant to section 103 of the Indian Self-Determination Act (25 U.S.C. 450g) will cite as the negotiating authority 41 U.S.C. 252 (c) (15) and 25 U.S.C. 450g.

#### § 3-4.6004 Definitions.

The definitions prescribed in 42 CFR 36.204 are applicable to this subpart.

#### § 3-4.6005 Types of contracts.

(a) Cost reimbursement contracts will be used for all contracts made pursuant to this subpart. In addition to such other provisions as the Secretary may from time to time require, such cost reimbursement contracts shall contain the terms set out in 3-4.60.

(b) Fixed-price contracts may be used in only these instances where costs can be precisely established. In addition to such other provisions as the Secretary may from time to time require, such fixed-price contracts shall contain the terms set out in 3-4.60.

(c) Cost sharing contracts may be used where the tribe contributes to the cost of a program and may specify a percentage of cost or fixed amount to be funded by the government.

#### § 3-4.6006 Term of contract.

(a) The term of contracts awarded under the Act shall not exceed one year except that contracts may be made for a longer term up to three years subject to the availability of appropriations under the following circumstances:

(1) The services provided under the contract can reasonably be expected to be continuing in nature and, as a result, a longer contract term would be advantageous.

(2) The Indian tribe or tribes to be served by the contract request that the term be more than one year. The tribal organization will indicate the desired term of the contract in the Self-Determination Contract Proposal.

(b) Contracts made for a term of more than one year may be renegotiated annually to reflect factors which include, but need not be limited to, cost increases beyond the control of the tribal contractor. Proposed changes in the services provided under the contract which reflect changes in program emphasis may be considered during the annual renegotiation if the change fall within the general scope of the contract.

#### § 3-4.6007 Exemption from bonds.

A tribal organization is not required to furnish performance and payment bonds before carrying out a contract under this Part for the construction of public buildings or works as required by the Miller Act of August 24, 1935 (49 Stat. 793), as amended. However, the tribal organization shall require each of its subcontractors other than tribal organizations, to furnish both performance and payment bonds as follows:

(a) A performance bond with a surety or sureties satisfactory to the approving official, and in an amount he deems adequate, for the protection of the United States.

(b) A payment bond with a surety or sureties satisfactory to the approving official for the protection of all persons supplying labor and material in carrying out the contract the use of each person. Whenever the total amount payable by the terms of the contract is not more than \$1,000,000 the payment bond shall be one-half the total amount payable by

the terms of the contract. Whenever the total amount payable by the terms of the contract is more than \$1,000,000 but not more than \$5,000,000, the payment bond shall be 40 percent of the total amount payable by the terms of the contract. Whenever the total amount payable by the terms of the contract is more than \$5,000,000 the payment bond shall be \$2,500,000.

#### § 3-4.6008 Wage and labor standards—construction contracts.

(a) All laborers and mechanics employed by tribal contractors or subcontractors in constructing, altering or repairing buildings or other facilities in connection with contracts under this Subpart shall be paid wages not less than those on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act of March 3, 1931 (46 Stat. 1494), as amended. However, this requirement does not apply where the tribal contractor is the recognized governing body of the tribe and the construction, alteration, or repair work is being performed by the tribal organization or the tribe with its own regular employees.

#### § 3-4.6009 Performance of personal services.

Any contract made under this subpart may include provisions for the performance of personal services which would otherwise be performed by Federal employees. Such services include, but are not limited to, performing the following functions in connection with the contract and applicable rules and regulations:

(a) Determining the eligibility of applicants for assistance, benefits, or services.

(b) Determining the extent or amount of assistance, benefits, or services to be provided.

(c) Providing such assistance, benefits, or services.

#### § 3-4.6010 Use of General Services Administration supply sources.

Indian tribal organizations who are awarded cost reimbursement type contracts under this subpart, may be authorized to utilize GSA supply sources. Such authorization will conform with the policy and procedural requirements of 41 CFR 3-5.9.

#### § 3-4.6011 Special Provision of Indian Self-Determination Contracts.

Contracts entered into pursuant to Section 103 of the Act must incorporate special clauses which are consistent with those prescribed in subpart I of Part 36 of 42 CFR on the following subjects:

(a) Fair and Equal Treatment of Indian People.

(b) Utilization of Indian Business Concerns.

(c) Indian Preference in Training and Employment.

(d) Indemnity and Insurance.

(e) Reports to the Indian People.

(f) Penalties.

## PROPOSED RULES

- (g) Retrocession.  
(h) Assumption and Reassumption of Contract Programs.

#### § 3-4.6012 General Provisions.

General Provisions are published in this regulations in order to respond to the expressed desire of the Indian people, to have published in one place, all of the terms and conditions applicable to contracts awarded under the Act. These General Provisions incorporate the special clauses whose titles are listed in 3-4.6011 above as well as applicable standard contract clauses.

Clause No. 1—Definitions.  
As used throughout this contract, the following terms shall have the meaning set forth below:

(a) The term "Secretary" means the Secretary, the Under Secretary, or any Assistant Secretary of the Department of Health, Education, and Welfare; and the term "his duly authorized representative" means any person, persons, or board (other than the Contracting Officer) authorized to act for the Secretary.

(b) The term "Contracting Officer" means the person executing this contract on behalf of the Government, and any other officer or employee who is properly designated Contracting Officer; and the term includes, except as otherwise provided in this contract, the authorized representative of the Contracting Officer acting within the limits of his authority.

(c) The term "Project Officer" means the person representing the Government for the purpose of monitoring of contract performance. The Project Officer is not authorized to issue any instructions or directions which effect any increase or decrease in the cost of this contract or which change the period of this contract.

(d) The term "Department" means the Department of Health, Education, and Welfare.

(e) Except as otherwise provided in this contract, the term "subcontract" includes purchase orders under this contract.

Clause No. 2—Disputes.

(a) Except as otherwise provided in this contract, any dispute concerning a question of fact arising under this contract which is not disposed of by agreement shall be decided by the Contracting Officer, who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the Contractor. The decision of the Contracting Officer shall be final and conclusive unless within 30 days from the date of receipt of such copy, the Contractor mails or otherwise furnishes to the Contracting Officer a written appeal addressed to the Secretary. The decision of the Secretary or his duly authorized representative for the determination of such appeals shall be final and conclusive unless determined by a court of competent jurisdiction to have been fraudulent, or capricious, or arbitrary, or so grossly erroneous as necessarily to imply bad faith, or not supported by substantial evidence. In connection with any appeal proceeding under this clause, the Contractor shall be afforded an opportunity to be heard and to offer evidence in support of its appeal. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the contract and in accordance with the Contracting Officer's decision.

(b) This "Disputes" clause does not preclude consideration of law questions in connection with decisions provided for in paragraph (a) above. Provided, That nothing in this contract shall be construed as making final the decision of any administrative official, representative, or board on a question of law.

Clause No. 3—Limitation of cost.

(a) It is estimated that the total cost to the Government for the performance of this contract will not exceed the estimated cost set forth in this contract and the Contractor agrees to use its best efforts to perform all work and all obligations under this contract within such estimated costs. If at any time the Contractor has reason to believe that the costs which it expects to incur in the performance of this contract in the next succeeding sixty (60) days, when added to all costs previously incurred, will exceed seventy-five percent (75%) of the estimated cost set forth in the contract, or, if at any time the Contractor has reason to believe that the total cost to the Government, for the performance of this contract, will be substantially greater or less than the esti-

## PROPOSED RULES

mated cost thereof, the Contractor shall final rate. (2) the bases, to which the rates such refunds, rebates, credits, or other the Contractor for the purpose of securing

allowable cost, and for such other purposes as the Administering Office may approve in writing. Any interpretation required as to the

title to such supplies, materials, or other property as against other creditors of the Contractor. The Contractor shall identify, by

and such interest will be credited to the account of the Government. However, interest need not be charged on subadvances

## PROPOSED RULES

## PROPOSED RULES

mated cost thereof, the Contractor shall notify the Contracting Officer in writing to that effect, giving its revised estimate of such total cost for the performance of this contract.

(b) The Government shall not be obligated to reimburse the Contractor for costs incurred in excess of the estimated cost set forth in the contract and the Contractor shall not be obligated to continue performance under the contract or to incur costs in excess of such estimated cost unless and until the Contracting Officer shall have notified the Contractor in writing that such estimated cost has been increased and shall have specified in such notice a revised estimated cost which shall thereupon constitute the estimated cost of performance of this contract. When and to the extent that the estimated cost set forth in this contract has been increased by the Contracting Officer in writing, any costs incurred by the Contractor in excess of such estimated cost prior to the increase in estimated cost shall be allowable to the same extent as if such costs had been incurred after such increase in estimated cost.

Clause No. 4—Allowable cost.

(a) Compensation for Contractor's performance. Payment for the allowable cost, as herein defined and as actually incurred by the contractor shall constitute full and complete compensation for the performance of the work under this contract.

(b) Allowable cost. The allowable cost of performing the work under this contract shall be the cost actually incurred by the Contractor, either directly incident or properly allocable to the contract, in the performance of this contract in accordance with its terms. The allowable cost, direct and indirect, including acceptability of cost allocation methods, shall be determined by the Contracting Officer in accordance with:

(1) (i) "A Guide for Nonprofit Institutions Establishing Indirect Cost Rates for Research Grants and Contracts with the Department of Health, Education, and Welfare, DHEW Publication OASCI-5," or (ii) "A Guide for Hospitals, Establishing Indirect Cost Rates for Research Grants and Contracts with the Department of Health, Education, and Welfare, DHEW Publication OASCI-3," or (iii) Subpart 1-15.7 of the Federal Procurement Regulations (41 CFR 1-15.7) if the contract is with a state or local government agency.

(2) The terms of the contract.

Clause No. 5—Negotiated overhead rates.

(a) Notwithstanding the provisions of the clause of this contract entitled, "Allowable Cost," the allowable indirect costs shall be obtained by applying negotiated overhead rates to bases agreed upon by the parties, as specified below.

(b) The Contractor, as soon as possible, but not later than six (6) months after the expiration of each of the Contractor's financial years or such period as may mutually be agreed upon by the Government and the Contractor, shall submit to the Contracting Officer, with a copy to the cognizant audit agency, a proposed final overhead rate or rates for that period based on the Contractor's cost experience during that period, together with supporting cost data. Negotiation of final overhead rates by the Contractor and the Contracting Officer shall be undertaken as promptly as practicable after receipt of the Contractor's proposal.

(c) Allowability of costs and acceptability of cost allocation methods shall be determined in accordance with the applicable cost principles set forth in paragraph (b) (1) of Clause 4, as in effect on the date of this contract, and the same hereby incorporated herein by reference.

(d) The results of each negotiation shall be set forth in an amendment to this contract, which shall specify (1) the agreed

final rate, (2) the bases to which the rates apply, and (3) the periods for which the rates apply.

(e) Pending establishment of final overhead rates for any period, the Contractor shall be reimbursed either at negotiated provisional rates as provided in this contract or at billing rates acceptable to the Contracting Officer, subject to appropriate adjustment when the final rates for that period are established. To prevent substantial over or under payment, the provisional or billing rates may, at the request of either party, be revised by mutual agreement, either retroactively or prospectively. Any such revision of negotiated provisional rates provided in this contract shall be set forth in an amendment to this contract.

(f) Any failure by the parties to agree on any final rate or rates under this clause shall be considered a dispute concerning a question of fact for decision by the Contracting Officer within the meaning of the clause of this contract entitled "Disputes."

(g) Submission of proposed provisional and/or final overhead rates, together with appropriate data in support thereof, to the Secretary or his duly authorized representative, and agreements on provisional and/or final overhead rates entered into between the Contractor and the Secretary or his duly authorized representative, as evidenced by Negotiated Overhead Rate Agreements signed by both parties, shall be deemed to satisfy the requirements of (b), (d) and (e) above.

Clause No. 6—Payment.

(a) Payment on account of allowable costs. Once each month (or at more frequent intervals if approved by the Contracting Officer) the Contractor may submit to the Contracting Officer, in such form and reasonable detail as may be required, an invoice or voucher supported by a statement of costs incurred by the Contractor in the performance of this contract and claimed to constitute allowable costs. Promptly after receipt of each invoice or voucher the Government shall, subject to the provisions of (b) below, make payment thereon as approved by the Contracting Officer.

(b) Audit adjustments. At any time or times prior to settlement under this contract the Contracting Officer may have invoices or vouchers and statements of cost audited. Each payment theretofore made shall be subject to reduction for amounts included in the related invoice or voucher which are found by the Contracting Officer, on the basis of such audit, not to constitute allowable cost. Any payment may be reduced for overpayment, or increased for underpayments on preceding invoices or vouchers.

(c) Completion voucher. On receipt and approval of the invoice or voucher designated by the Contractor as the "completion invoice" or "completion voucher" and upon compliance by the Contractor with all the provisions of this contract (including without limitation, the provisions relating to patents and provisions of (d) below) the Government shall promptly pay to the Contractor any balance of allowable cost. The completion invoice or voucher shall be submitted by the Contractor promptly following completion of the work under this contract but in no event later than 6 months (or such longer period as the Contracting Officer may in his discretion approve in writing) from the date of such completion.

(d) Applicable credits. The Contractor agrees that any refunds, rebates, credits, or other amounts (including any interest thereon) accruing to or received by the Contractor or any assignee under this contract shall be paid by the Contractor to the Government, to the extent that they are properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract. Reasonable expenses incurred by

the Contractor for the purpose of securing such refunds, rebates, credits, or other amounts shall be allowable costs hereunder when approved by the Contracting Officer.

(e) Financial settlement. Prior to final payment under this contract, the Contractor and each assignee under this contract whose assignment is in effect at the time of final payment under this contract shall execute and deliver:

(1) An assignment to the Government in form and substance satisfactory to the Contracting Officer, of refunds, rebates, credits, or other amounts (including any interest thereon) properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract; and

(2) A release discharging the Government, its officers, agents, and employees from all liabilities, obligations, and claims arising out of or under this contract, subject only to the following exceptions:

(i) Specified claims in stated amounts or in estimated amounts where the amounts are susceptible to exact statement by the Contractor;

(ii) Claims, together with reasonable expenses incidental thereto, based upon liabilities of the Contractor to third parties arising out of the performance of this contract: Provided, That such claims are not known to the contractor on the date of the execution of the release: And provided further, That the Contractor gives notice of such claims in writing to the Contracting Officer not more than 6 years after the date of the release or date of any notice to the Contractor that the Government is prepared to make final payment, whichever is earlier; and

(iii) Claims for reimbursement of costs (other than expenses of the Contractor by reason of its indemnification of the Government against patent liability). Including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of this contract relating to patents.

Clause No. 7—Advance Payments.

(a) Amount of Advance. At the request of the contractor, and subject to the conditions hereinafter set forth, the Government shall make an advance payment, or advance payments from time to time, to the Contractor. No advance payment shall be made (1) without the approval of the officer administering advance payments (hereinafter called the "Administering Officer" and designated in paragraph (k) (4) hereof) as with all advance payments theretofore made, shall exceed the amount stated in paragraph (k) (1) hereof; and (3) without a properly certified invoice or invoices.

(b) Special Bank Account. Until all advance payments made hereunder are liquidated and the Administering Officer approves in writing the release of any funds due and payable to the Contractor, all advance payments and all other payments under the contract shall be made by check payable to the Contractor, and be marked for deposit only in a Special Bank Account with the bank designated in paragraph (k) (2) hereof. No part of the funds in the Special Bank Account shall be mingled with other funds of the Contractor prior to withdrawal thereof from the Special Bank Account as hereinafter provided. Except as hereinafter provided, each withdrawal shall be made only by check of the Contractor countersigned on behalf of the Government by the Contracting Officer or such other person or persons as he may designate in writing (hereinafter called the "Countersigning Agent"). Until otherwise determined by the Administering Officer, countersignature on behalf of the Government will not be required.

(c) Use of Funds. The funds in the Special Bank Account may be withdrawn by the Contractor solely for the purposes of making payments for items of allowable cost or to reimburse the Contractor for such items or

allowable cost, and for such other purposes as the Administering Officer may approve in writing. Any interpretation required as to the proper use of funds shall be made in writing by the Administering Officer.

(d) Return of Funds. The Contractor may at any time repay all or any part of the funds advanced hereunder. Whenever so requested in writing by the Administering Officer, the Contractor shall repay to the Government such part of the unliquidated balance of advance payments as shall in the opinion of the Administering Officer be in excess of current requirements, or (when added to total advance previously made and liquidated) in excess of the amount specified in paragraph (k) (1) hereof. In the event the Contractor fails to repay such part of the unliquidated balance of advance payments when so requested by the Administering Officer, all or any part thereof may be withdrawn from the Special Bank Account by checks payable to the Treasurer of the United States signed solely by the Countersigning Agent and applied in reduction of advance payments then outstanding hereunder.

(e) Liquidation. If not otherwise liquidated, the advance payments made hereunder shall be liquidated as herein provided. When the sum of all payments under this contract, other than advance payments, plus the unliquidated amount of advance payments are equal to the total estimated cost under this contract or such lesser amount to which the total estimated cost under this contract may have been reduced, plus increases, if any, in this total estimated cost not exceeding, in the aggregate, (including, without limitation, reimbursable costs incident to termination for cause and retrocession as estimated by the Contracting Officer), the Government shall thereafter withhold further payments to the Contractor and apply the amounts withheld against the Contractor's obligation to repay such advance payments until such advance payments shall have been fully liquidated.

If upon completion, termination, or retrocession of the contract all advance payments have not been fully liquidated, the balances therefore shall be deducted from any sums otherwise due or which may become due to the Contractor from the Government, and any deficiency shall be paid by the Contractor to the Government upon demand.

(f) Bank Agreement. Before an advance payment is made hereunder, the Contractor shall transmit to the Administering Officer, in the form prescribed by such office, an Agreement in triplicate from the bank in which the Special Bank Account is established, clearly setting forth the special character of the account and the responsibilities of the bank thereunder. Wherever possible, such bank shall be a member bank of the Federal Reserve System, or an "insured" bank within the meaning of the Act creating the Federal Deposit Insurance Corporation Act of August 23, 1935, 49 Stat. 685, as amended (12 U.S.C. 264).

(g) Lien on Special Bank Account. The Government shall have a lien upon any balance in the Special Bank Account payable to all other liens, which lien shall secure the repayment of any advance payments made hereunder.

(h) Lien on Property Under Contract. Any and all advance payments made under this contract shall be secured, when made, by a lien in favor of the Government, paramount to all other liens, upon the supplies or other things covered by this contract and on all material and other property acquired for or allocated to the performance of this contract, except to the extent that the Government by virtue of any other provision of this contract, or otherwise, shall have valid

title to such supplies, materials, or other property as against other creditors of the Contractor. The Contractor shall identify, by marking or segregation, all property which is subject to a lien in favor of the Government by virtue of any provision of this contract in such a way as to indicate that it is subject to such lien and that it has been acquired for or allocated to the performance of this contract. If for any reason such supplies, materials, or other property are not identified by marking or segregation, the Government shall be deemed to have a lien to the extent of the Government's interest under this contract on any mass of property with which such supplies, materials, or other property are commingled. The Contractor shall maintain adequate accounting control over such property on his books and records. If at any time during the progress of the work on the contract it becomes necessary to deliver any item or items and materials upon which the Government has a lien as aforesaid to a third person, the Contractor shall notify such third person of the lien herein provided and shall obtain from such third person a receipt, in duplicate, acknowledging, *inter alia*, the existence of such lien. A copy of each receipt shall be delivered by the Contractor to the Contracting Officer. If this contract is terminated in whole or in part and the Contractor is authorized to sell or retain termination inventory acquired for or allocated to this contract, such sale or retention shall be made only if approved by the Contracting Officer, which approval shall constitute a release of the Government's lien hereunder to the extent that such termination inventory is sold or retained, and to the extent that the proceeds of the sale, or the credit allowed for such retention on the Contractor's termination claim, is applied in reduction of advance payments then outstanding hereunder.

(i) Insurance. The Contractor represents and warrants that he is now maintaining with responsible insurance carriers, (1) insurance upon his own plant and equipment against fire and other hazards to the extent that like properties are usually insured by others operating plants and properties of similar character in the same general locality; (2) adequate insurance against liability on account of damage to persons or property; and (3) adequate insurance under all applicable workmen's compensation laws. The Contractor agrees that, until work under this contract has been completed and all advance payments made hereunder have been liquidated, he will (1) maintain such insurance; (2) maintain adequate insurance upon any materials, parts, assemblies, sub-assemblies, supplies, equipment and other property acquired for or allocable to this contract and subject to the Government lien hereunder; and (3) furnish such certificates with respect to his insurance as the Administering Officer may from time to time require.

(j) Prohibition Against Assignment. Notwithstanding any other provision of this contract, the Contractor shall not transfer, pledge, or otherwise assign this contract, or any interest therein, or any claim arising thereunder, to any party or parties, bank, trust company, or other financing institution.

(k) Designations and Determinations. (1) Amount. The amount of advance payments at any time outstanding hereunder shall not exceed \$.....

(2) Depository. The bank designated for the deposit of payments made hereunder shall be:

(3) Interest Charge. No interest shall be charged for advance payments made hereunder. The Contractor shall charge interest at the rate of 6 percent per annum on subadvances or down payments to subcontractors,

## PROPOSED RULES

and such interest will be credited to the account of the Government. However, interest need not be charged on subadvances on nonprofit subcontracts with nonprofit educational or research institutions for experimental, research or development work.

(4) Administering Office. The office administering advance payments shall be the office designated as having responsibility for awarding the contract.

(i) Other Security. The terms of this contract shall be considered adequate security for advance payments hereunder, except that if at any time the administering office deems the security furnished by the Contractor to be inadequate, the Contractor shall furnish such additional security as may be satisfactory to the administering office, to the extent that such additional security is available.

Clause No. 8—Examination of records.

(a) This clause is applicable if the amount of this contract exceeds \$2,500 and was entered into by means of negotiation including small business restricted advertising, but is not applicable if this contract was entered into by means of formal advertising.

(b) The Contractor agrees that the Comptroller General of the United States and the Secretary, or any of their duly authorized representatives, shall until expiration of 3 years after final payment under this contract or of the time period for the particular records in Part 1-20 of the Federal Procurement Regulations (41 CFR Part 1-20), whichever expires earlier, have access to and the right to examine any directly pertinent books, documents, papers, and records of the Contractor involving transactions related to this contract.

(c) The Contractor further agrees to include in all his subcontracts hereunder a provision to the effect that the subcontractor agrees that the Comptroller General of the United States, or his duly authorized representatives shall, until expiration of 3 years after final payment under the subcontract, or of the time periods for the particular records specified in Part 1-20 of the Federal Procurement Regulations (41 CFR Part 1-20), whichever expires earlier, have access to and the right to examine any directly pertinent books, documents, papers, and records of such subcontractor, involving transactions related to the subcontract. The term "subcontract" as used in this clause excludes (1) purchase orders not exceeding \$2,500 and (2) subcontracts or purchase orders for public utility services at rates established for uniform applicability to the general public.

(d) The periods of access and examination described in (b) and (c) above, for records which relate to (1) appeals under the "Disputes" cause of this contract, (2) litigation or the settlement of claims arising out of the performance of this contract, or (3) costs and expenses of this contract as to which exception has been taken by the Comptroller General or any of his duly authorized representatives, shall continue until such appeals, litigation, claims, or exceptions have been disposed of.

Clause No. 9—Inspection and reports.

(a) Inspection of work. The Government shall have the right to inspect the work and activities under this contract, including, without limitation, premises where any Government property may be located at such reasonable times and in such manner as it may deem appropriate and the Contractor shall afford the Government proper facilities and assistance for such inspection.

(b) Reports. The Contractor shall furnish such progress reports, schedules, financial and cost reports, and other reports concerning the work under this contract as specified elsewhere in this contract. Cost and other financial data and projections furnished pursuant to this paragraph (b) shall not relieve

## PROPOSED RULES

the Contractor of the requirements for furnishing notice specified in the clause of this contract entitled "Limitation of Cost."

(c). In addition, where Federal Financial

the purchase or rental of items of personal property having a unit acquisition cost of less than \$200 or for subcontracts in a total amount less than \$1,000 unless otherwise

(B) litigation or the settlement of claims arising out of the performance of this contract, or (C) costs and expenses of this contract to which exception has been taken by

paragraph, are subject to the provisions of this clause and are hereinafter collectively referred to as "Government property."

(2) Title to the Government property

tractor shall require the subcontractor to assume the risk of and be responsible for any loss or destruction of or damage to Government property while in the latter's possession or control, and the subcontract shall contain

(2) Upon completion or expiration of this contract, or at such earlier date as may be fixed by the Contracting Officer, the Contractor shall render an accounting, as prescribed by the Contracting Officer, of all Gov-

## PROPOSED RULES

the Contractor of the requirements for furnishing notice specified in the clause of this contract entitled "Limitation of Cost."

(c) In addition, where Federal Financial assistance is involved in the contract effort, the following clause will apply:

**Reports to the Indian People**

The contractor, as a recipient of Federal financial assistance, shall make reports and information available to the Indian people served or represented by the contractor. Such reports will reflect how the Federal assistance funds were utilized to the benefit of the Indian people served or represented as follows: (specific reporting requirements, formats and methods of distribution to the Indian people will be prescribed in the scope of the contract.)

**(d) Annual Reporting.**

(1) For each fiscal year during which a tribal organization receives or expends funds pursuant to a contract under this Part, the tribe which requested the contract must submit a report to the Contracting Officer. The report shall include, but not be limited to, an accounting of the amounts and purposes for which the contract funds were expended and information on the conduct of the program or services involved. The reports shall include any other information requested by the Contracting Officer and may be submitted as follows:

(i) When the contract is with the governing body of an Indian tribe, the tribe shall submit the report to the Contracting Officer.

(ii) When the contract is with a tribal organization other than the governing body of the tribe, the tribe has the option of having the tribal organization prepare the report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(iii) When the contract benefits more than one tribe, the tribal organization shall prepare and submit the report to each of the tribes benefiting under the contract. Each tribe shall endorse the report before submitting it to the Contracting Officer.

(2) The annual report shall be submitted to the Contracting Officer within 60 days of the end of the fiscal year in which the contract was performed. However, the period for submitting the report may be extended if there is just cause for such extension.

(3) In addition to the yearly reporting requirement given in paragraphs (a) and (b) of this section, the tribal contractor shall furnish other reports when and as required by the Contracting Officer.

**Clause No. 10—Subcontracting.**

(a) Prior approval required. Except as provided in (c) below, the Contractor shall not enter into any subcontract or purchase order not otherwise expressly authorized elsewhere in this contract without the prior written approval of the Contracting Officer and subject to such conditions as the Contracting Officer may require.

(b) Request for approval. The Contractor's request for approval to enter into a subcontract pursuant to this clause shall include: (1) a description of the supplies or services to be called for by the subcontract; (2) identification of the proposed subcontractor and an explanation of why and how the proposed subcontractor was selected, including the degree of competition obtained; (3) the proposed subcontract price, together with the Contractor's cost or price analysis thereof; (4) identification of the type of subcontract to be used; (5) a copy or draft of the proposed subcontract, if available; and (6) any other information which the Contracting Officer may require.

(c) Certain purchases of property and services. Prior written approval shall not be required for firm fixed-price subcontracts for

the purchase or rental of items of personal property having a unit acquisition cost of less than \$200 or for subcontracts in a total amount less than \$1,000 unless otherwise specified elsewhere in this contract. Provided, however, That advance notification shall be given by the Contractor of any subcontract which exceeds in dollar amount 5 percentum of the total estimated cost of this contract.

(d) Contractor's procurement system. The Contractor shall use methods, practices or procedures in subcontracting or purchasing (hereinafter referred to as the Contractor's "procurement system") acceptable to the Contracting Officer. The Contracting Officer may, at any time during the performance of this contract, require the Contractor to provide information concerning its procurement system.

(e) Effect of subcontracting. Subcontracts shall be made in the name of the Contractor and shall not bind nor purport to bind the Government. The making of subcontracts hereunder shall not relieve the Contractor of any requirement under this contract (including, but not limited to, the duty to properly supervise and coordinate the work of subcontracts, and the duty to maintain and account for property pursuant to the clause of this contract entitled "Government Property"). Approval of the provisions of any subcontract by the Contracting Officer shall not be construed to constitute a determination of the allowability of any cost under this contract, unless such approval specifically provides that it constitutes a determination of the allowability of such cost. In no event shall approval of any subcontract by the Contracting Officer be construed as effecting any increase in the estimated cost set forth in this contract. No subcontract placed under this contract shall provide for payment on a cost-plus-a-percentage-of-cost basis.

(f) Procurements from contractor-controlled sources. Procurement or transfer of equipment, materials, supplies, or services from contractor-controlled source (any division or other organizational component of the prime contractor, exclusive of the contracting component, and any subsidiary or affiliate of the Contractor under a common control) shall be considered a subcontract for the purpose of this clause.

Clause No. 11—Accounts, audit, and records.

(a) The Contractor shall maintain books, records, documents, and other evidence, accounting procedures, and practices, sufficient to reflect properly all direct and indirect costs of whatever nature claimed to have been incurred and anticipated to be incurred for the performance of this contract. The foregoing constitutes "records" for the purposes of this clause.

(b) The Contractor's facility(ies), or such part thereof as may be engaged in the performance of this contract, and his records shall be subject at all reasonable times to inspection and audit by the Contracting Officer or his authorized representative.

(c) The Contractor shall preserve and make available his records (1) until the expiration of 3 years from the date of final payment under this contract, or the time periods for the particular records specified in 41 CFR Part 1-20, whichever expires earlier and (2) for such longer period, if any, as is required by applicable statute, or by other clause of this contract, or by (i) or (ii) below.

(1) If this contract is completely or partially terminated, the records relating to the work terminated shall be preserved and made available for a period of 3 years from the date of any resulting final settlement.

(ii) Records which relate to (A) appeals under the "Disputes" clause of this contract,

(B) litigation or the settlement of claims arising out of the performance of this contract, or (C) costs and expenses of this contract to which exception has been taken by the Contracting Officer or any of his duly authorized representatives, shall be retained until such appeals, litigation, claims, or exceptions have been disposed of.

(d) The Contractor shall insert the substance of this clause, including this paragraph (d), in each subcontract hereunder that is not firm fixed-price or fixed-price with escalation. When so inserted, changes shall be made to designate the higher-tier subcontractor at this level involved in place of the Contractor; to add "of the Government prime contract" in place of "this contract" in (B) of subparagraph (c) (ii) above.

Clause No. 12—Government property.

(a) Government furnished property. (1) The Government reserves the right to furnish any property or services required for the performance of the work under this contract.

(2) The Government shall deliver to the Contractor, for use in connection with and under the terms of this contract, the property described elsewhere in this contract, together with such related data and information as the Contractor may request and as may reasonably be required for the intended use of such property (such property to be referred to as "Government furnished property").

In the event that Government furnished property is not delivered to the contractor by such time or times as stated, or if not stated, in sufficient time to enable the contractor to meet such delivery or performance dates under this contract, the Contracting Officer shall, upon timely written request made by the Contractor, make a determination of the delay occasioned the Contractor and make appropriate equitable adjustments to any contractual provisions affected by any such delay in accordance with the provisions of the clause of this contract entitled "Changes."

In the event that Government furnished property is received by the Contractor in a condition not suitable for the intended use, the contractor shall, immediately upon receipt thereof, notify the Contracting Officer of such fact, and, as directed by the Contracting Officer either (1) return or otherwise dispose of such property, or (ii) effect repairs or modification thereto. Upon completion of (i) or (ii) above, the Contracting Officer, upon timely written request of the Contractor, shall make appropriate equitable adjustments to any contractual provisions affected thereby in accordance with the provisions of the clause of this contract entitled "Changes." The foregoing provisions for adjustment are exclusive and the Government shall not be liable to suit for breach of contract by reason of any delay in delivery of Government furnished property or delivery of such property in a condition not suitable for its intended use.

(b) Title. (1) Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor, the cost of which the Contractor is entitled to be reimbursed as a direct item of cost under this contract, shall pass to and vest in the Government upon delivery of such property by the vendor. Title to other property, the cost of which is reimbursable to the Contractor under this contract, shall pass and vest in the Government upon (1) issuance for use of such property in the performance of this contract, or (ii) commencement of processing or use of such property in the performance of this contract, or (iii) reimbursement of the cost thereof by the Government in whole or in part, whichever first occurs. All Government furnished property, together with all property acquired by the Contractor, title to which vests in the Government under this

contract, are subject to the provisions of this clause and are hereinafter collectively referred to as "Government property."

(2) Title to the Government property shall not be affected by the incorporation or attachment thereof to any property now owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity or personality by reason of affixation to any realty.

(c) Use of Government property. Government property shall, unless otherwise provided herein or approved by the Contracting Officer, be used only for the performance of this contract.

(d) Property management and control. The Contractor shall maintain and administer in accordance with sound business practice a program for the maintenance, repair, protection, and preservation, control of and accountability for Government property, so as to assure its full availability and usefulness for the performance of this contract.

The Contractor agrees to promptly receipt for all Government property in a form and manner as prescribed by the Contracting Officer. The Contractor further agrees to take all reasonable steps to comply with all directions or instructions which the Contracting Officer may prescribe regarding the management and control of Government property.

(e) Risk or loss. (1) The Contractor shall not be liable for any loss of or damage to Government property, or for expenses incidental to such loss or damage, except that the Contractor shall be responsible for any such loss or damage (including expenses incidental thereto):

(i) Which results from willful misconduct or lack of good faith on the part of any of the Contractor's directors or officers, or on the part of any of its managers, superintendents, or other equivalent representatives, who have supervision or direction of (A) all or substantially all of the Contractor's operations at any one plant, laboratory or separate location in which this contract is being performed or (B) a separate and complete major organization, industrial or otherwise in connection with the performance of this contract;

(ii) Which results from a failure on the part of the Contractor, due to willful misconduct or lack of good faith on the part of any of its directors, officers, or other representatives mentioned in subparagraph (i) above, (A) to maintain and administer, in accordance with sound business practice, the program for maintenance, repair, protection, and preservation of Government property as required by paragraph (d) hereof, or (B) to take all reasonable steps to comply with any appropriate written directions of the Contracting Officer under paragraph (4) hereof;

(iii) For which the Contractor is otherwise responsible under the express terms of this contract;

(iv) Which results from a risk expressly required to be insured under this contract, but only to the extent of the insurance so required to be procured and maintained, or to the extent of insurance actually procured and maintained, whichever is greater; or

(v) Which results from a risk which is in fact covered by insurance or for which the Contractor is otherwise reimbursed, but only to the extent of such insurance or reimbursement; Provided That, if more than one of the above exceptions shall be applicable in any case, the Contractor's liability under any one exception shall not be limited by any other exception.

(2) If the Contractor transfers Government property to the possession and control of a subcontractor the transfer shall not affect the liability of the Contractor for loss or destruction of or damage to Government property as set forth in (1) above. The Contractor shall require the subcontractor to assume the risk of and be responsible for any loss or destruction of or damage to Government property while in the latter's possession or control, and the subcontract shall contain appropriate provisions requiring the return of all Government property in as good condition as when received (except for reasonable wear and tear or for the utilization of the property in accordance with the provisions of this contract). Provided, however, That the subcontractor may be relieved from such liability only to the extent that the subcontract, with the prior approval of the Contracting Officer, so provides.

(3) The Contractor shall not be reimbursed for, and shall not include as an item of overhead, the cost of insurance, or any provisions for a reserve, covering the risk of loss or damage to the Government property, except to the extent that the Government may have required the Contractor to carry such insurance under any other provision of this contract.

(4) Upon the happening of loss or destruction of or damage to the Government property, the Contractor shall notify the Contracting Officer thereof, and shall take all reasonable steps to protect the Government property from further damage, separate the damaged and undamaged Government property, put all the Government property in the best order, and furnish to the Contracting Officer a statement of:

(i) The lost, destroyed, and damaged Government property;

(ii) The time and origin of the loss, destruction or damage;

(iii) All known interests in commingled property of which the Government property is a part; and

(iv) The insurance, if any, covering any part of or interest in such commingled property.

The Contractor shall make repairs and renovation of the damaged Government property, or take such other action as the Contracting Officer directs.

(5) In the event the Contractor is indemnified, reimbursed, or otherwise compensated for any loss or destruction of or damage to the Government property, it shall use the proceeds to repair, renovate, or replace the Government property involved, or shall credit such proceeds against the cost of the work covered by the contract, or shall otherwise reimburse the Government, as directed by the Contracting Officer. The loss, destruction or damage and, upon the request of the Contracting Officer, shall, at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including assistance in the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining recovery. In addition, where a subcontractor has not been relieved from liability for any loss or destruction of or damage to Government property, the Contractor shall enforce the liability of the subcontractor for such loss or destruction of or damage to the Government property for the benefit of the Government.

(6) Disposition of Government property. (i) During the period of performance of this contract, the Contractor shall promptly and regularly report to the Contracting Officer, in such form and manner as the Contracting Officer may direct, concerning the status of Government property under the contract, including all Government property in the Contractor's possession which is not in use or which is excess to the needs of the contract. The Contractor shall make such disposition of Government property as the Contracting Officer may direct. The Contractor shall in no way be relieved of responsibility for Government property without the prior written approval of the Contracting Officer.

(2) Upon completion or expiration of this contract, or at such earlier date as may be fixed by the Contracting Officer, the Contractor shall render an accounting, as prescribed by the Contracting Officer, of all Government property which had come into the possession or custody of the Contractor under this contract. Such accounting shall include inventory schedules covering all items of Government property not consumed in the performance of this contract, or not theretofore delivered to the Government, or for which the Contractor has not otherwise been relieved of responsibility. The Contractor shall deliver or make such other disposition of Government property covered in such inventory schedules as the Contracting Officer may direct.

(3) The net proceeds of any disposition of Government property, in accordance with (1) and (2) above, shall be credited to the cost of the work covered by the contract or shall be paid in such manner as the Contracting Officer may direct.

(g) Restoration of premises. Unless otherwise provided herein, the Government shall not be under any duty or obligation to restore or rehabilitate, or to pay the costs of the restoration or rehabilitation of the Contractor's facility or any portion thereof which is affected by removal of any Government property.

Clause No. 13—Changes.

The Contracting Officer may at any time, by a written order, and without notice to the sureties, if any, make changes, within the general scope of this contract, in any one or more of the following: (a) Drawings, designs, or specifications; (b) method of shipment or packing; (c) place of inspection, delivery, or acceptance; and (d) the amount of Government furnished property. If any such change causes an increase or decrease in the estimated cost of, or the time required for performance of this contract, or otherwise affects any other provisions of this contract, whether changed or not by any such order, an equitable adjustment shall be made (a) in the estimated cost or delivery schedule, or both, and (b) in such other provisions of the contract as may be so affected, and the contract shall be modified in writing accordingly. Any claim by the Contractor for adjustment under this clause must be asserted within thirty (30) days from the date of receipt by the Contractor of the notification of change. Provided, however, That the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim asserted at any time prior to final payment under this contract. Where the cost of property made obsolete or excess as a result of a change is included in the Contractor's claim for adjustment, the Contracting Officer shall have the right to prescribe the manner of disposition of such property. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled, "Disputes." However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

Clause No. 14—Notice to the Government of delays.

Whenever the Contractor has knowledge that any actual or potential situation, including, but not limited to, labor disputes, is delaying or threatens to delay the timely performance of the work under this contract, the Contractor shall immediately give written notice thereof, including all relevant information with respect thereto, to the Contracting Officer.

Clause No. 15—Retraction.

(a) The Indian tribe that initially requested this contract may also request its retraction, notwithstanding the fact that

paragraph, are subject to the provisions of this clause and are hereinafter collectively referred to as "Government property."

(2) Title to the Government property shall not be affected by the incorporation or attachment thereof to any property now owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity or personality by reason of affixation to any realty.

(c) Use of Government property. Government property shall, unless otherwise provided herein or approved by the Contracting Officer, be used only for the performance of this contract.

(d) Property management and control. The Contractor shall maintain and administer in accordance with sound business practice a program for the maintenance, repair, protection, and preservation, control of and accountability for Government property, so as to assure its full availability and usefulness for the performance of this contract.

The Contractor agrees to promptly receipt for all Government property in a form and manner as prescribed by the Contracting Officer. The Contractor further agrees to take all reasonable steps to comply with all directions or instructions which the Contracting Officer may prescribe regarding the management and control of Government property.

(e) Risk or loss. (1) The Contractor shall not be liable for any loss of or damage to Government property, or for expenses incidental to such loss or damage, except that the Contractor shall be responsible for any such loss or damage (including expenses incidental thereto):

(i) Which results from willful misconduct or lack of good faith on the part of any of the Contractor's directors or officers, or on the part of any of its managers, superintendents, or other equivalent representatives, who have supervision or direction of (A) all or substantially all of the Contractor's operations at any one plant, laboratory or separate location in which this contract is being performed or (B) a separate and complete major organization, industrial or otherwise in connection with the performance of this contract;

(ii) Which results from a failure on the part of the Contractor, due to willful misconduct or lack of good faith on the part of any of its directors, officers, or other representatives mentioned in subparagraph (i) above, (A) to maintain and administer, in accordance with sound business practice, the program for maintenance, repair, protection, and preservation of Government property as required by paragraph (d) hereof, or (B) to take all reasonable steps to comply with any appropriate written directions of the Contracting Officer under paragraph (4) hereof;

(iii) For which the Contractor is otherwise responsible under the express terms of this contract;

(iv) Which results from a risk expressly required to be insured under this contract, but only to the extent of the insurance so required to be procured and maintained, or to the extent of insurance actually procured and maintained, whichever is greater; or

(v) Which results from a risk which is in fact covered by insurance or for which the Contractor is otherwise reimbursed, but only to the extent of such insurance or reimbursement; Provided That, if more than one of the above exceptions shall be applicable in any case, the Contractor's liability under any one exception shall not be limited by any other exception.

(2) If the Contractor transfers Government property to the possession and control of a subcontractor the transfer shall not affect the liability of the Contractor for loss or destruction of or damage to Government property as set forth in (1) above. The Contractor shall require the subcontractor to assume the risk of and be responsible for any loss or destruction of or damage to Government property while in the latter's possession or control, and the subcontract shall contain appropriate provisions requiring the return of all Government property in as good condition as when received (except for reasonable wear and tear or for the utilization of the property in accordance with the provisions of this contract). Provided, however, That the subcontractor may be relieved from such liability only to the extent that the subcontract, with the prior approval of the Contracting Officer, so provides.

(3) The Contractor shall not be reimbursed for, and shall not include as an item of overhead, the cost of insurance, or any provisions for a reserve, covering the risk of loss or damage to the Government property, except to the extent that the Government may have required the Contractor to carry such insurance under any other provision of this contract.

(4) Upon the happening of loss or destruction of or damage to the Government property, the Contractor shall notify the Contracting Officer thereof, and shall take all reasonable steps to protect the Government property from further damage, separate the damaged and undamaged Government property, put all the Government property in the best order, and furnish to the Contracting Officer a statement of:

(i) The lost, destroyed, and damaged Government property;

(ii) The time and origin of the loss, destruction or damage;

(iii) All known interests in commingled property of which the Government property is a part; and

(iv) The insurance, if any, covering any part of or interest in such commingled property.

The Contractor shall make repairs and renovation of the damaged Government property, or take such other action as the Contracting Officer directs.

(5) In the event the Contractor is indemnified, reimbursed, or otherwise compensated for any loss or destruction of or damage to the Government property, it shall use the proceeds to repair, renovate, or replace the Government property involved, or shall credit such proceeds against the cost of the work covered by the contract, or shall otherwise reimburse the Government, as directed by the Contracting Officer. The loss, destruction or damage and, upon the request of the Contracting Officer, shall, at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including assistance in the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining recovery. In addition, where a subcontractor has not been relieved from liability for any loss or destruction of or damage to Government property, the Contractor shall enforce the liability of the subcontractor for such loss or destruction of or damage to the Government property for the benefit of the Government.

(6) Disposition of Government property. (i) During the period of performance of this contract, the Contractor shall promptly and regularly report to the Contracting Officer, in such form and manner as the Contracting Officer may direct, concerning the status of Government property under the contract, including all Government property in the Contractor's possession which is not in use or which is excess to the needs of the contract. The Contractor shall make such disposition of Government property as the Contracting Officer may direct. The Contractor shall in no way be relieved of responsibility for Government property without the prior written approval of the Contracting Officer.

(2) Upon completion or expiration of this contract, or at such earlier date as may be fixed by the Contracting Officer, the Contractor shall render an accounting, as prescribed by the Contracting Officer, of all Government property which had come into the possession or custody of the Contractor under this contract. Such accounting shall include inventory schedules covering all items of Government property not consumed in the performance of this contract, or not theretofore delivered to the Government, or for which the Contractor has not otherwise been relieved of responsibility. The Contractor shall deliver or make such other disposition of Government property covered in such inventory schedules as the Contracting Officer may direct.

(3) The net proceeds of any disposition of Government property, in accordance with (1) and (2) above, shall be credited to the cost of the work covered by the contract or shall be paid in such manner as the Contracting Officer may direct.

(g) Restoration of premises. Unless otherwise provided herein, the Government shall not be under any duty or obligation to restore or rehabilitate, or to pay the costs of the restoration or rehabilitation of the Contractor's facility or any portion thereof which is affected by removal of any Government property.

Clause No. 13—Changes.

The Contracting Officer may at any time, by a written order, and without notice to the sureties, if any, make changes, within the general scope of this contract, in any one or more of the following: (a) Drawings, designs, or specifications; (b) method of shipment or packing; (c) place of inspection, delivery, or acceptance; and (d) the amount of Government furnished property. If any such change causes an increase or decrease in the estimated cost of, or the time required for performance of this contract, or otherwise affects any other provisions of this contract, whether changed or not by any such order, an equitable adjustment shall be made (a) in the estimated cost or delivery schedule, or both, and (b) in such other provisions of the contract as may be so affected, and the contract shall be modified in writing accordingly. Any claim by the Contractor for adjustment under this clause must be asserted within thirty (30) days from the date of receipt by the Contractor of the notification of change. Provided, however, That the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim asserted at any time prior to final payment under this contract. Where the cost of property made obsolete or excess as a result of a change is included in the Contractor's claim for adjustment, the Contracting Officer shall have the right to prescribe the manner of disposition of such property. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled, "Disputes." However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

Clause No. 14—Notice to the Government of delays.

Whenever the Contractor has knowledge that any actual or potential situation, including, but not limited to, labor disputes, is delaying or threatens to delay the timely performance of the work under this contract, the Contractor shall immediately give written notice thereof, including all relevant information with respect thereto, to the Contracting Officer.

Clause No. 15—Retraction.

(a) The Indian tribe that initially requested this contract may also request its retraction, notwithstanding the fact that

the Contractor may be a tribal organization other than the tribe which requested the contract. The Contractor shall make reports and information available to the Indian people served or represented by the contractor. Such reports will reflect how the Federal assistance funds were utilized to the benefit of the Indian people served or represented as follows: (specific reporting requirements, formats and methods of distribution to the Indian people will be prescribed in the scope of the contract.)

(d) Annual Reporting.

(1) For each fiscal year during which a tribal organization receives or expends funds pursuant to a contract under this Part, the tribe which requested the contract must submit a report to the Contracting Officer. The report shall include, but not be limited to, an accounting of the amounts and purposes for which the contract funds were expended and information on the conduct of the program or services involved. The reports shall include any other information requested by the Contracting Officer and may be submitted as follows:

(i) When the contract is with the governing body of an Indian tribe, the tribe shall submit the report to the Contracting Officer.

(ii) When the contract is with a tribal organization other than the governing body of the tribe, the tribe has the option of having the tribal organization prepare the report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(iii) When the contract benefits more than one tribe, the tribal organization shall prepare and submit the report to each of the tribes benefiting under the contract. Each tribe shall endorse the report before submitting it to the Contracting Officer.

(2) The annual report shall be submitted to the Contracting Officer within 60 days of the end of the fiscal year in which the contract was performed. However, the period for submitting the report may be extended if there is just cause for such extension.

(3) In addition to the yearly reporting requirement given in paragraphs (a) and (b) of this section, the tribal contractor shall furnish other reports when and as required by the Contracting Officer.

Clause No. 10—Subcontracting.

(a) Prior approval required. Except as provided in (c) below, the Contractor shall not enter into any subcontract or purchase order not otherwise expressly authorized elsewhere in this contract without the prior written approval of the Contracting Officer and subject to such conditions as the Contracting Officer may require.

(b) Request for approval. The Contractor's request for approval to enter into a subcontract pursuant to this clause shall include: (1) a description of the supplies or services to be called for by the subcontract; (2) identification of the proposed subcontractor and an explanation of why and how the proposed subcontractor was selected, including the degree of competition obtained; (3) the proposed subcontract price, together with the Contractor's cost or price analysis thereof; (4) identification of the type of subcontract to be used; (5) a copy or draft of the proposed subcontract, if available; and (6) any other information which the Contracting Officer may require.

(c) Certain purchases of property and services. Prior written approval shall not be required for firm fixed-price subcontracts for the purchase or rental of items of personal property having a unit acquisition cost of less than \$200 or for subcontracts in a total amount less than \$1,000 unless otherwise specified elsewhere in this contract. Provided, however, That advance notification shall be given by the Contractor of any subcontract which exceeds in dollar amount 5 percentum of the total estimated cost of this contract.

(d) Contractor's procurement system. The Contractor shall use methods, practices or procedures in subcontracting or purchasing (hereinafter referred to as the Contractor's "procurement system") acceptable to the Contracting Officer. The Contracting Officer may, at any time during the performance of this contract, require the Contractor to provide information concerning its procurement system.

(e) Effect of subcontracting. Subcontracts shall be made in the name of the Contractor and shall not bind nor purport to bind the Government. The making of subcontracts hereunder shall not relieve the Contractor of any requirement under this contract (including, but not limited to, the duty to properly supervise and coordinate the work of subcontracts, and the duty to maintain and account for property pursuant to the clause of this contract entitled "Government Property"). Approval of the provisions of any subcontract by the Contracting Officer shall not be construed to constitute a determination of the allowability of any cost under this contract, unless such approval specifically provides that it constitutes a determination of the allowability of such cost. In no event shall approval of any subcontract by the Contracting Officer be construed as effecting any increase in the estimated cost set forth in this contract. No subcontract placed under this contract shall provide for payment on a cost-plus-a-percentage-of-cost basis.

(f) Procurements from contractor-controlled sources. Procurement or transfer of equipment, materials, supplies, or services from contractor-controlled source (any division or other organizational component of the prime contractor, exclusive of the contracting component, and any subsidiary or affiliate of the Contractor under a common control) shall be considered a subcontract for the purpose of this clause.

Clause No. 11—Accounts, audit, and records.

(a) The Contractor shall maintain books, records, documents, and other evidence, accounting procedures, and practices, sufficient to reflect properly all direct and indirect costs of whatever nature claimed to have been incurred and anticipated to be incurred for the performance of this contract. The foregoing constitutes "records" for the purposes of this clause.

(b) The Contractor's facility(ies), or such part thereof as may be engaged in the performance of this contract, and his records shall be subject at all reasonable times to inspection and audit by the Contracting Officer or his authorized representative.

(c) The Contractor shall preserve and make available his records (1) until the expiration of 3 years from the date of final payment under this contract, or the time periods for the particular records specified in 41 CFR Part 1-20, whichever expires earlier and (2) for such longer period, if any, as is required by applicable statute, or by other clause of this contract, or by (i) or (ii) below.

(1) If this contract is completely or partially terminated, the records relating to the work terminated shall be preserved and made available for a period of 3 years from the date of any resulting final settlement.

(ii) Records which relate to (A) appeals under the "Disputes" clause of this contract,

(B) litigation or the settlement of claims arising out of the performance of this contract, or (C) costs and expenses of this contract to which exception has been taken by the Contracting Officer or any of his duly authorized representatives, shall be retained until such appeals, litigation, claims, or exceptions have been disposed of.

(d) The Contractor shall insert the substance of this clause, including this paragraph (d), in each subcontract hereunder that is not firm fixed-price or fixed-price with escalation. When so inserted, changes shall be made to designate the higher-tier subcontractor at this level involved in place of the Contractor; to add "of the Government prime contract" in place of "this contract" in (B) of subparagraph (c) (ii) above.

Clause No. 12—Government property.

(a) Government furnished property. (1) The Government reserves the right to furnish any property or services required for the performance of the work under this contract.

(2) The Government shall deliver to the Contractor, for use in connection with and under the terms of this contract, the property described elsewhere in this contract, together with such related data and information as the Contractor may request and as may reasonably be required for the intended use of such property (such property to be referred to as "Government furnished property").

In the event that Government furnished property is not delivered to the contractor by such time or times as stated, or if not stated, in sufficient time to enable the contractor to meet such delivery or performance dates under this contract, the Contracting Officer shall, upon timely written request made by the Contractor, make a determination of the delay occasioned the Contractor and make appropriate equitable adjustments to any contractual provisions affected by any such delay in accordance with the provisions of the clause of this contract entitled "Changes."

In the event that Government furnished property is received by the Contractor in a condition not suitable for the intended use, the contractor shall, immediately upon receipt thereof, notify the Contracting Officer of such fact, and, as directed by the Contracting Officer either (1) return or otherwise dispose of such property, or (ii) effect repairs or modification thereto. Upon completion of (i) or (ii) above, the Contracting Officer, upon timely written request of the Contractor, shall make appropriate equitable adjustments to any contractual provisions affected thereby in accordance with the provisions of the clause of this contract entitled "Changes." The foregoing provisions for adjustment are exclusive and the Government shall not be liable to suit for breach of contract by reason of any delay in delivery of Government furnished property or delivery of such property in a condition not suitable for its intended use.

(b) Title. (1) Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor, the cost of which the Contractor is entitled to be reimbursed as a direct item of cost under this contract, shall pass to and vest in the Government upon delivery of such property by the vendor. Title to other property, the cost of which is reimbursable to the Contractor under this contract, shall pass and vest in the Government upon (1) issuance for use of such property in the performance of this contract, or (ii) commencement of processing or use of such property in the performance of this contract, or (iii) reimbursement of the cost thereof by the Government in whole or in part, whichever first occurs. All Government furnished property, together with all property acquired by the Contractor, title to which vests in the Government under this

contract, are subject to the provisions of this clause and are hereinafter collectively referred to as "Government property."

(2) Title to the Government property shall not be affected by the incorporation or attachment thereof to any property now owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity or personality by reason of affixation to any realty.

(c) Use of Government property. Government property shall, unless otherwise provided herein or approved by the Contracting Officer, be used only for the performance of this contract.

(d) Property management and control. The Contractor shall maintain and administer in accordance with sound business practice a program for the maintenance, repair, protection, and preservation, control of and accountability for Government property, so as to assure its full availability and usefulness for the performance of this contract.

</

the Contractor may be a tribal organization other than the tribe.

(b) Should the tribe request retrocession of the contract and the Contractor is other than the Tribe, the Contracting Officer will notify the Contractor of the request and in consultation with the Tribe and the Contractor establish the effective date of the retrocession. The retrocession will become effective no later than 120 days after the Contracting Officer receives the Tribe's request unless the Tribe and the Contracting Officer mutually agree on a later date.

(c) Immediately after receipt of the request for retrocession and where applicable notifying the Contractor, the Contracting Officer will meet with the Contractor and mutually agree to:

(1) A plan for the orderly transfer of responsibilities;

(2) A plan for inventorying materials and supplies on hand;

(3) An accounting for funds, including but not limited to current and anticipated obligations;

(4) The cost of operation until retrocession; and,

(5) The identification of all records relating to the contract and the contracted function.

Clause No. 16—Assumption, Reassumption of Contract Programs.

(a) When the contracting officer with the concurrence of the Area Director determines that the performance of a contractor under these regulations involves (1) the violation of the rights or endangerment of the health, safety, or welfare of any person, or (2) gross negligence or the mismanagement in the handling or use of funds under the contract, including any material failure to comply with the terms and conditions of the contract, the contracting officer will, in writing, notify the contractor of such determination and will request that the contractor take such corrective action within such period of time as the Secretary may prescribe.

(b) When the contracting officer determines, after making a determination described in paragraph (a) of this section, that such action is necessary to protect contract funds which will otherwise be expended contrary to the best interests of the Indians to be served or is otherwise necessary to protect the health or welfare of the Indian population, he may, pending the prompt initiation and resolution of rescission proceedings and after reasonable written notice to the contractor, suspend, in whole or in part, federal assistance under the contract. No obligations incurred by the contractor during the period of suspension shall be allowable under the suspended contract (or portion of the contract), except that the contracting officer may, with the concurrence of the Area Director, allow necessary and proper costs which the contractor could not reasonably avoid during the period of suspension or which he determines may be necessary to preserve the project or best interests of the Indians to be served. Provided, that such costs would otherwise be allowable under this subpart. Appropriate adjustments to the payments under the suspended contract (or portion of the contract) will be made, either by withholding the payments or by not allowing the contractor credit for disbursements which it may make in liquidation of unauthorized obligations it incurs during the period of suspension. Suspensions shall remain in effect until the contractor has taken corrective action to the satisfaction of the contracting officer and the Area Director, or given assurances satisfactory to the contracting officer and the Area Director that corrective action will be taken, or until the contract is rescinded.

(c) When the contracting officer with the concurrence of the Area Director determines that a contractor has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after the contractor has been provided an opportunity for a hearing in accordance with paragraph (d) of this section, rescind the contract in whole or in part and, if appropriate, assume or resume control or operation of the program, activity, or service involved.

(d) (1) When the contracting officer has made a determination described in paragraph (c) of this section, he shall in writing notify the contractor of such determination and of the contractor's right to request a review of such determination and of the determination described in paragraph (a) of this section. Such notification by the contracting officer shall set forth the reasons for the determination in sufficient detail to enable the contractor to respond and shall inform the contractor of its right to a hearing before a Contract Appeals Board described in subparagraph (d) (2) of this section.

(2) Contract Appeals Board shall be composed of 3 persons appointed by the Director, Indian Health Service. Such persons may not be selected from people in the immediate office of any person participating in the determinations at issue. The Board shall meet as often and for so long as necessary to render a prompt initial decision consistent with providing the contractor with a fair hearing. The Board may operate with informal rules which must at a minimum assure the following:

(i) Sufficient notice of the issues to be considered (where such notice has not previously been afforded);

(ii) An opportunity to be represented by counsel;

(iii) An opportunity to make a record of the proceedings;

(iv) An opportunity to present witnesses on contractor's behalf; and

(v) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(3) The Contract Appeals Board shall make an initial written recommended decision which shall become final within 20 days unless the Director, Indian Health Service determines that a contrary decision is warranted. Any such decision by the Director of the Indian Health Service will be in writing and will be specific as to the reasons for his decision.

(e) Where the contracting officer, with the concurrence of the Area Director, determines that a contractor's performance under a contract awarded under this subpart poses an immediate threat to the safety of any person, he may immediately rescind the contract in whole or in part and, if appropriate the Area Director may assume or resume control or operation of the program, activity, or service involved. In such case, the Director, Indian Health Service, shall designate three officers or employees of the Department to serve as a hearing panel, one of whom shall be designated as chairman. No officer or employee from the immediate office of any of the officials who had a part in the decision to terminate the contract under this paragraph may be designated to serve on the hearing panel.

(1) The hearing shall be commenced within 10 days after the rescission of the contract and shall afford each party to the proceeding:

(i) Sufficient notice of the issues to be considered (where such notice has not previously been afforded);

(ii) An opportunity to be represented by counsel;

(iii) An opportunity to make a record of the proceedings;

(iv) An opportunity to present witnesses on contractor's behalf; and

(v) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(2) The hearing panel shall, within 20 days after the conclusion of the hearing, notify all parties in writing of its decision.

(3) Such decision shall not be subject to further hearing in accordance with 42 CFR Part 50, subpart D or with 45 CFR Part 16.

(f) In any case where the contracting officer has rescinded a contract under paragraphs (e) or (f) of this section, he may decline to enter into a new contract agreement with the contractor until such time as he is satisfied that the basis for the rescission has been corrected.

Nothing in this section shall be construed as contravening the Occupational Safety and Health Act of 1970 (84 Stat. 1590), as amended (29 U.S.C. 651).

Clause No. 17—Rights in Data.

(a) Subject data. As used in this clause, the term "Subject Data" means writings, sound recordings, pictorial reproductions, drawings, designs or other graphic representations, procedural manuals, forms, diagrams, workflow charts, equipment descriptions, data files and data processing or computer programs, and works of any similar nature (whether or not copyrighted or copyrightable) which are specified to be delivered under this contract. The term does not include financial reports, cost analyses, and similar information incidental to contract administration.

(b) Government rights. Subject only to the provision of (c) below, the Government may use, duplicate or disclose in any manner and for any purpose whatsoever, and have or permit other to do so, all subject data delivered under this contract.

(c) License to copyrighted data. In addition to the Government rights as provided in (b) above, with respect to any Subject Data which may be copyrighted the Contractor agrees to and does hereby grant to the Government a royalty-free, nonexclusive and irrevocable license throughout the world to use, duplicate or dispose of such data in any manner and for any purpose whatsoever, and to have or permit others to do so. Provided, however, That such license shall be only to the extent that the Contractor now has, or prior to completion or final settlement of this contract may acquire, the right to grant such license without becoming liable to pay compensation to others solely because of such grant.

(d) Relation to patents. Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government under any patent.

(e) Marking and identification. The Contractor shall mark all Subject Data with the number of this contract and the name and address of the contractor or subcontractor who generated the data. The Contractor shall not affix any restrictive markings upon any Subject Data, and if such markings are affixed, the Government shall have the right at any time to modify, remove, obliterate, or ignore any such markings.

(f) Subcontractor data. Whenever any Subject Data is to be obtained from a subcontractor under this contract, the Contractor shall use this same clause in the subcontract, without alteration, and no other clause shall be used to enlarge or diminish the Government's rights in that subcontractor Subject Data.

(g) Deferred ordering and delivery of data. The Government shall have the right to order, at any time during the performance of this contract, or within 2 years from either acceptance of all items (other than data) to be delivered under this contract or termination of this contract, whichever is later, any

Subject Data and any data not called for in the schedule of this contract but generated in performance of the contract, and the Contractor shall promptly prepare and deliver such data as is ordered. If the principal investigator is no longer associated with the Contractor, the Contractor shall exercise its best efforts to prepare and deliver such data as is ordered. The Government's right to use data delivered pursuant to this paragraph (g) shall be the same as the rights in Subject Data as provided in (b) above. The Contractor shall be relieved of the obligation to furnish data pertaining to an item obtained from a subcontractor upon the expiration of 2 years from the date he accepts such items. When data, other than Subject Data, is delivered pursuant to this paragraph (g), payment shall be made, by equitable adjustment or otherwise, for converting the data into the prescribed form, reproducing it or preparing it for delivery.

Clause No. 18—Reporting of royalties.

If this contract involves any royalty payments in excess of \$250 or if the amount of any royalty payment in excess of \$250 is reflected in the estimated cost, the Contractor shall report in writing to the Contracting Officer, as soon as practicable during the performance of this contract, the amount of any royalties paid or to be paid by it directly to others in connection with the performance of this contract, together with (a) The names and addresses of licensees to whom such payments are made; (b) The patent numbers or patents application serial numbers (with filing dates) involved or other identification of the basis of such royalties; and (c) Information concerning the manner of computation of such royalties.

Clause No. 19—Authorization and consent.

The Government hereby gives its authorization and consent for all use and manufacture of any invention described in and covered by a patent of the United States in the performance of this contract or any part hereof or any amendment hereto, or any subcontract hereunder (including any lower tier subcontract).

Clause No. 20—Notice and assistance regarding patent and copyright infringement.

(a) The Contractor shall report to the Contracting Officer, promptly and in reasonable written detail, each notice or claim of patent or copyright infringement based on the performance of this contract of which the Contractor has knowledge.

(b) In the event, of any claim or suit against the Government, on account of any alleged patent or copyright infringement arising out of the performance of this contract or out of the use of any supplies furnished or work or services performed hereunder, the Contractor shall furnish to the Government, when requested by the Contracting Officer, all evidence and information in possession of the Contractor pertaining to such suit or claim. Such evidence and information shall be furnished at the expense of the Government except when the Contractor has agreed to indemnify the Government.

Clause No. 21—Publications and publicity.

(a) Unless otherwise specified in this contract, the Contractor is encouraged to publish and make available through accepted channels the results of its work under this contract. A copy of each article submitted by the Contractor for publication shall be promptly sent to the Project Officer. The Contractor shall also inform the Project Officer when the article or other work is published and furnish a copy of it as finally published.

(b) The Contractor shall acknowledge the support of the Department of Health, Education, and Welfare whenever publicizing the work under this contract in any media. To effectuate the foregoing, the Contractor shall

include in any publication resulting from work performed under this contract an acknowledgment substantially as follows:

"The work upon which this publication is based was performed pursuant to Contract (insert number) with the (insert name of constituent agency), Department of Health, Education, and Welfare."

Clause No. 22—Patent rights.

(a) Definitions. As used in this clause, the term (1) "Invention" or "Invention or discovery" includes any art, machine, manufacture, design, or composition of matter, or any new and useful improvement thereof, or any variety of plant, which is or may be patentable under the Patent Laws of the United States; and (2) "Made," when used in relation to any invention or discovery, means the conception or first actual or constructive reduction to practice of such invention.

(b) Disclosure. Whenever an invention or discovery is made by the Contractor or its employees in the course of or under this contract, the Contractor shall immediately give the Contracting Officer written notice thereof and shall promptly thereafter furnish the Contracting Officer with complete information thereon, including as a minimum (1) a complete written disclosure of each such invention, and (2) information in writing, as soon as practicable, concerning the date and identity of any public use, sale, or publication of such invention made by or known to the Contractor.

(c) Determination of rights. The Secretary, or his duly authorized representative, shall have the sole and exclusive power to determine whether or not, and where a patent application shall be filed and to determine the disposition of all rights in any invention made under this contract, including title to and rights under any patent application or patent which may issue thereon. The Secretary, or his duly authorized representative, may, upon the request of the Contractor, determine to exercise his option to waive rights to any such invention in foreign countries. The determination of the Secretary, or his duly authorized representative, on all these matters shall be accepted as final and the provisions of the clause of this contract entitled, "Disputes" shall not apply. The Contractor shall use his best efforts to assure that all of its employees who may be the inventors of any such invention will execute all documents and do all things necessary or proper to effectuate the determination of the Secretary, or his duly authorized representative, to vest in the Government the rights granted to it under this clause and to enable the Government to apply for and prosecute any patent application, in any country, covering such invention where the Government has the right under this clause to file such application.

(d) Contractor employees and subcontractors. The Contractor shall:

(1) Obtain patent agreements to effectuate the provisions of this clause from all persons who perform any part of the work under this contract and may be reasonably expected to make inventions.

(2) Insert in each subcontract having experimental, developmental or research work as one of its purposes, a provision making this clause applicable to the subcontractor and its employees.

(e) Reports. The Contractor shall furnish the Contracting Officer, in addition to the information called for in paragraph (b) of this clause:

(1) Interim reports on the first anniversary of the contract, where extended or renewed, and every year thereafter listing all inventions made during the period, whether or not previously reported, or certifying that no inventions were made during the applicable period; and

(2) A final report, prior to final settlement of this contract, listing all such inventions made in the course of or under this contract, including all those previously listed in interim reports, or certifying that there are no such unreported inventions.

(f) Withholding payment for failure to comply. At any time during the performance of this contract, the Contracting Officer may direct that payment be withheld in the amount of 10 percent of the total amount obligated by the Government with respect to this contract or \$10,000 whichever is less. If the Contracting Officer determines that the Contractor has failed to furnish any of the written notices, disclosures, or reports required by paragraphs (b) and (e) above, until such time as the Contractor shall have corrected such failure. The withholding of any amount or subsequent payment thereof to the Contractor or the failure to withhold any amount shall not be construed as a waiver of any rights accruing to the Government under the contract. This paragraph shall not be construed as requiring the Contractor to withhold any amounts from a subcontractor to enforce compliance with the patent provisions of a subcontract.

(g) Acknowledgement. With respect to any patent application on any invention made in the course of or under this contract, the Contractor shall incorporate in the first paragraph of the patent specification, and prominently in any patent issued thereon, the following statement:

"The invention described herein was made in the course of or under a contract with the U.S. Department of Health, Education, and Welfare."

Clause No. 23—Key personnel.

Where "key personnel" have been identified in this contract, it has been determined that such named personnel are necessary for the successful performance of the work under this contract; and the Contractor agrees to assign such personnel to the performance of the work under this contract, and shall not reassign or remove any of them without the consent of the Contracting Officer. Whenever, for any reason, one or more of the aforementioned personnel is unavailable for assignment for work under the contract, the Contractor shall immediately notify the Contracting Officer of that effect and shall, subject to the approval of the Contracting Officer without formal modification to the contract, replace such personnel with personnel of substantially equal ability and qualifications.

Clause No. 24—Litigation and Claims.

The Contractor shall give the Contracting Officer immediate notice in writing of (a) any action, including any proceeding before an administrative agency, filed against the Contractor arising out of the performance of this contract, including, but not limited to, the performance of any subcontract hereunder; and (b) any claim against the Contractor the cost and expense of which is allowable under the clause entitled "Allowable Cost," except as otherwise directed by the Contracting Officer, the Contractor shall furnish immediately to the Contracting Officer copies of all pertinent papers received by the Contractor with respect to such action or claim. To the extent not in conflict with any applicable policy of insurance, the Contractor may, with the Contracting Officer's approval, settle any such action or claim. If required by the Contracting Officer, the Contractor shall (a) effect an assignment and subrogation in favor of the Government of all the Contractor's rights and claims (except those against the Government) arising out of any such action or claim against the Contractor; and (b) authorize representatives of the Government to settle or defend any such action or claim and to represent the Contractor in, or to take charge of any action. If the settlement or defense of an

Subject Data and any data not called for in the schedule of this contract but generated in performance of the contract, and the Contractor shall promptly prepare and deliver such data as is ordered. If the principal investigator is no longer associated with the Contractor, the Contractor shall exercise its best efforts to prepare and deliver such data as is ordered. The Government's right to use data delivered pursuant to this paragraph (g) shall be the same as the rights in Subject Data as provided in (b) above. The Contractor shall be relieved of the obligation to furnish data pertaining to an item obtained from a subcontractor upon the expiration of 2 years from the date he accepts such items. When data, other than Subject Data, is delivered pursuant to this paragraph (g), payment shall be made, by equitable adjustment or otherwise, for converting the data into the prescribed form, reproducing it or preparing it for delivery.

Clause No. 18—Reporting of royalties.

If this contract involves any royalty payments in excess of \$250 or if the amount of any royalty payment in excess of \$250 is reflected in the estimated cost, the Contractor shall report in writing to the Contracting Officer, as soon as practicable during the performance of this contract, the amount of any royalties paid or to be paid by it directly to others in connection with the performance of this contract, together with (a) The names and addresses of licensees to whom such payments are made; (b) The patent numbers or patents application serial numbers (with filing dates) involved or other identification of the basis of such royalties; and (c) Information concerning the manner of computation of such royalties.

Clause No. 19—Authorization and consent.

The Government hereby gives its authorization and consent for all use and manufacture of any invention described in and covered by a patent of the United States in the performance of this contract or any part hereof or any amendment hereto, or any subcontract hereunder (including any lower tier subcontract).

Clause No. 20—Notice and assistance regarding patent and copyright infringement.

(a) The Contractor shall report to the Contracting Officer, promptly and in reasonable written detail, each notice or claim of patent or copyright infringement based on the performance of this contract of which the Contractor has knowledge.

(b) In the event, of any claim or suit against the Government, on account of any alleged patent or copyright infringement arising out of the performance of this contract or out of the use of any supplies furnished or work or services performed hereunder, the Contractor shall furnish to the Government, when requested by the Contracting Officer, all evidence and information in possession of the Contractor pertaining to such suit or claim. Such evidence and information shall be furnished at the expense of the Government except when the Contractor has agreed to indemnify the Government.

Clause No. 21—Publications and publicity.

(a) Unless otherwise specified in this contract, the Contractor is encouraged to publish and make available through accepted channels the results of its work under this contract. A copy of each article submitted by the Contractor for publication shall be promptly sent to the Project Officer. The Contractor shall also inform the Project Officer when the article or other work is published and furnish a copy of it as finally published.

(b) The Contractor shall acknowledge the support of the Department of Health, Education, and Welfare whenever publicizing the work under this contract in any media. To effectuate the foregoing, the Contractor shall

include in any publication resulting from work performed under this contract an acknowledgment substantially as follows:

"The work upon which this publication is based was performed pursuant to Contract (insert number) with the (insert name of constituent agency), Department of Health, Education, and Welfare."

Clause No. 22—Patent rights.

(a) Definitions. As used in this clause, the term (1) "Invention" or "Invention or discovery" includes any art, machine, manufacture, design, or composition of matter, or any new and useful improvement thereof, or any variety of plant, which is or may be patentable under the Patent Laws of the United States; and (2) "Made," when used in relation to any invention or discovery, means the conception or first actual or constructive reduction to practice of such invention.

(b) Disclosure. Whenever an invention or discovery is made by the Contractor or its employees in the course of or under this contract, the Contractor shall immediately give the Contracting Officer written notice thereof and shall promptly thereafter furnish the Contracting Officer with complete information thereon, including as a minimum (1) a complete written disclosure of each such invention, and (2) information in writing, as soon as practicable, concerning the date and identity of any public use, sale, or publication of such invention made by or known to the Contractor.

(c) Determination of rights. The Secretary, or his duly authorized representative, shall have the sole and exclusive power to determine whether or not, and where a patent application shall be filed and to determine the disposition of all rights in any invention made under this contract, including title to and rights under any patent application or patent which may issue thereon. The Secretary, or his duly authorized representative, may, upon the request of the Contractor, determine to exercise his option to waive rights to any such invention in foreign countries. The determination of the Secretary, or his duly authorized representative, on all these matters shall be accepted as final and the provisions of the clause of this contract entitled, "Disputes" shall not apply. The Contractor shall use his best efforts to assure that all of its employees who may be the inventors of any such invention will execute all documents and do all things necessary or proper to effectuate the determination of the Secretary, or his duly authorized representative, to vest in the Government the rights granted to it under this clause and to enable the Government to apply for and prosecute any patent application, in any country, covering such invention where the Government has the right under this clause to file such application.

(d) Contractor employees and subcontractors. The Contractor shall:

(1) Obtain patent agreements to effectuate the provisions of this clause from all persons who perform any part of the work under this contract and may be reasonably expected to make inventions.

(2) Insert in each subcontract having experimental, developmental or research work as one of its purposes, a provision making this clause applicable to the subcontractor and its employees.

(e) Reports. The Contractor shall furnish the Contracting Officer, in addition to the information called for in paragraph (b) of this clause:

(1) Interim reports on the first anniversary of the contract, where extended or renewed, and every year thereafter listing all inventions made during the period, whether or not previously reported, or certifying that no inventions were made during the applicable period; and

(2) A final report, prior to final settlement of this contract, listing all such inventions made in the course of or under this contract, including all those previously listed in interim reports, or certifying that there are no such unreported inventions.

(f) Withholding payment for failure to comply. At any time during the performance of this contract, the Contracting Officer may direct that payment be withheld in the amount of 10 percent of the total amount obligated by the Government with respect to this contract or \$10,000 whichever is less. If the Contracting Officer determines that the Contractor has failed to furnish any of the written notices, disclosures, or reports required by paragraphs (b) and (e) above, until such time as the Contractor shall have corrected such failure. The withholding of any amount or subsequent payment thereof to the Contractor or the failure to withhold any amount shall not be construed as a waiver of any rights accruing to the Government under the contract. This paragraph shall not be construed as requiring the Contractor to withhold any amounts from a subcontractor to enforce compliance with the patent provisions of a subcontract.

(g) Acknowledgement. With respect to any patent application on any invention made in the course of or under this contract, the Contractor shall incorporate in the first paragraph of the patent specification, and prominently in any patent issued thereon, the following statement:

"The invention described herein was made in the course of or under a contract with the U.S. Department of Health, Education, and Welfare."

Clause No. 23—Key personnel.

Where "key personnel" have been identified in this contract, it has been determined that such named personnel are necessary for the successful performance of the work under this contract; and the Contractor agrees to assign such personnel to the performance of the work under this contract, and shall not reassign or remove any of them without the consent of the Contracting Officer. Whenever, for any reason, one or more of the aforementioned personnel is unavailable for assignment for work under the contract, the Contractor shall immediately notify the Contracting Officer of that effect and shall, subject to the approval of the Contracting Officer without formal modification to the contract, replace such personnel with personnel of substantially equal ability and qualifications.

Clause No. 24—Litigation and Claims.

The Contractor shall give the Contracting Officer immediate notice in writing of (a) any action, including any proceeding before an administrative agency, filed against the Contractor arising out of the performance of this contract, including, but not limited to, the performance of any subcontract hereunder; and (b) any claim against the Contractor the cost and expense of which is allowable under the clause entitled "Allowable Cost," except as otherwise directed by the Contracting Officer, the Contractor shall furnish immediately to the Contracting Officer copies of all pertinent papers received by the Contractor with respect to such action or claim. To the extent not in conflict with any applicable policy of insurance, the Contractor may, with the Contracting Officer's approval, settle any such action or claim. If required by the Contracting Officer, the Contractor shall (a) effect an assignment and subrogation in favor of the Government of all the Contractor's rights and claims (except those against the Government) arising out of any such action or claim against the Contractor; and (b) authorize representatives of the Government to settle or defend any such action or claim and to represent the Contractor in, or to take charge of any action. If the settlement or defense of an

include in any publication resulting from work performed under this contract an acknowledgment substantially as follows:

"The work upon which this publication is based was performed pursuant to Contract (insert number) with the (insert name of constituent agency), Department of Health, Education, and Welfare."

Clause No. 22—Patent rights.

(a) Definitions. As used in this clause, the term (1) "Invention" or "Invention or discovery" includes any art, machine, manufacture, design, or composition of matter, or any new and useful improvement thereof, or any variety of plant, which is or may be patentable under the Patent Laws of the United States; and (2) "Made," when used in relation to any invention or discovery, means the conception or first actual or constructive reduction to practice of such invention.

(b) Disclosure. Whenever an invention or discovery is made by the Contractor or its employees in the course of or under this contract, the Contractor shall immediately give the Contracting Officer written notice thereof and shall promptly thereafter furnish the Contracting Officer with complete information thereon, including as a minimum (1) a complete written disclosure of each such invention, and (2) information in writing, as soon as practicable, concerning the date and identity of any public use, sale, or publication of such invention made by or known to the Contractor.

(c) Determination of rights. The Secretary, or his duly authorized representative, shall have the sole and exclusive power to determine whether or not, and where a patent application shall be filed and to determine the disposition of all rights in any invention made under this contract, including title to and rights under any patent application or patent which may issue thereon. The Secretary, or his duly authorized representative, may, upon the request of the Contractor, determine to exercise his option to waive rights to any such invention in foreign countries. The determination of the Secretary, or his duly authorized representative, on all these matters shall be accepted as final and the provisions of the clause of this contract entitled, "Disputes" shall not apply. The Contractor shall use his best efforts to assure that all of its employees who may be the inventors of any such invention will execute all documents and do all things necessary or proper to effectuate the determination of the Secretary, or his duly authorized representative, to vest in the Government the rights granted to it under this clause and to enable the Government to apply for and prosecute any patent application, in any country, covering such invention where the Government has the right under this clause to file such application.

(d) Contractor employees and subcontractors. The Contractor shall:

(1) Obtain patent agreements to effectuate the provisions of this clause from all persons who perform any part of the work under this contract and may be reasonably expected to make inventions.

(2) Insert in each subcontract having experimental, developmental or research work as one of its purposes, a provision making this clause applicable to the subcontractor and its employees.

(e) Reports. The Contractor shall furnish the Contracting Officer, in addition to the information called for in paragraph (b) of this clause:

(1) Interim reports on the first anniversary of the contract, where extended or renewed, and every year thereafter listing all inventions made during the period, whether or not previously reported, or certifying that no inventions were made during the applicable period; and

(2) A final report, prior to final settlement of this contract, listing all such inventions made in the course of or under this contract, including all those previously listed in interim reports, or certifying that there are no such unreported inventions.

(f) Withholding payment for failure to comply. At any time during the performance of this contract, the Contracting Officer may direct that payment be withheld in the amount of 10 percent of the total amount obligated by the Government with respect to this contract or \$10,000 whichever is less. If the Contracting Officer determines that the Contractor has failed to furnish any of the written notices, disclosures, or reports required by paragraphs (b) and (e) above, until such time as the Contractor shall have corrected such failure. The withholding of any amount or subsequent payment thereof to the Contractor or the failure to withhold any amount shall not be construed as a waiver of any rights accruing to the Government under the contract. This paragraph shall not be construed as requiring the Contractor to withhold any amounts from a subcontractor to enforce compliance with the patent provisions of a subcontract.

(g) Acknowledgement. With respect to any patent application on any invention made in the course of or under this contract, the Contractor shall incorporate in the first paragraph of the patent specification, and prominently in any patent issued thereon, the following statement:

"The invention described herein was made in the course of or under a contract with the U.S. Department of Health, Education, and Welfare."

Clause No. 23—Key personnel.

Where "key personnel" have been identified in this contract, it has been determined that such named personnel are necessary for the successful performance of the work under this contract; and the Contractor agrees to assign such personnel to the performance of the work under this contract, and shall not reassign or remove any of them without the consent of the Contracting Officer. Whenever, for any reason, one or more of the aforementioned personnel is unavailable for assignment for work under the contract, the Contractor shall immediately notify the Contracting Officer of that effect and shall, subject to the approval of the Contracting Officer without formal modification to the contract, replace such personnel with personnel of substantially equal ability and qualifications.

Clause No. 24—Litigation and Claims.

The Contractor shall give the Contracting Officer immediate notice in writing of (a) any action, including any proceeding before an administrative agency, filed against the Contractor arising out of the performance of this contract, including, but not limited to, the performance of any subcontract hereunder; and (b) any claim against the Contractor the cost and expense of which is allowable under the clause entitled "Allowable Cost," except as otherwise directed by the Contracting Officer, the Contractor shall furnish immediately to the Contracting Officer copies of all pertinent papers received by the Contractor with respect to such action or claim. To the extent not in conflict with any applicable policy of insurance, the Contractor may, with the Contracting Officer's approval, settle any such action or claim. If required by the Contracting Officer, the Contractor shall (a) effect an assignment and subrogation in favor of the Government of all the Contractor's rights and claims (except those against the Government) arising out of any such action or claim against the Contractor; and (b) authorize representatives of the Government to settle or defend any such action or claim and to represent the Contractor in, or to take charge of any action. If the settlement or defense of an

include in any publication resulting from work performed under this contract an acknowledgment substantially as follows:

"The work upon which this publication is based was performed pursuant to Contract (insert number) with the (insert name of constituent agency), Department of Health, Education, and Welfare."

Clause No. 22—Patent rights.

(a) Definitions. As used in this clause, the term (1) "Invention" or "Invention or discovery" includes any art, machine, manufacture, design, or composition of matter, or any new and useful improvement thereof, or any variety of plant, which is or may be patentable under the Patent Laws of the United States; and (2) "Made," when used in relation to any invention or discovery, means the conception or first actual or constructive reduction to practice of such invention.

(b) Disclosure. Whenever an invention or discovery is made by the Contractor or its employees in the course of or under this contract, the Contractor shall immediately give the Contracting Officer written notice thereof and shall promptly thereafter furnish the Contracting Officer with complete information thereon, including as a minimum (1) a complete written disclosure of each such invention, and (2) information in writing, as soon as practicable, concerning the date and identity of any public use, sale, or publication of such invention made by or known to the Contractor.

(c) Determination of rights. The

## PROPOSED RULES

action or claims is undertaken by the Government, the Contractor shall furnish all reasonable assistance in effecting a settlement or asserting a defense. Where an action against the Contractor is not covered by a policy of insurance, the Contractor shall, with the approval of the Contracting Officer, proceed with the defense of the action in good faith. The Government shall not be liable for the expense of defending any action or for any costs resulting from the loss thereof, to the extent that the Contractor would have been compensated by insurance which was required by law or regulation or by written direction of the Contracting Officer, but which the Contractor failed to secure through its own fault or negligence.

In any event, unless otherwise expressly provided in this contract, the Contractor shall not be reimbursed or indemnified by the Government for any liability loss, cost or expense, which the Contractor may incur or be subject to by reason of any loss, injury, or damage, to the person or to real or personal property of any third parties as may accrue during, or arise from, the performance of this contract.

**Clause No. 25—Indemnity and insurance.**  
(a) The Contractor shall indemnify and save and keep harmless the Government against any or all loss, cost, damage, claim, expense or liability whatsoever, because of accident or injury to persons or property or others occurring in connection with any program included as a part of this contract, by providing where applicable, the insurance described below:

(b) The Contractor shall secure, pay the premium for, and keep in force until the expiration of this contract, or any renewal period thereof, insurance as provided below. Such insurance policies shall specifically include a provision stating the liability assumed by the Contractor under this contract.

(1) Workman's compensation insurance as required by laws of the state.

(2) Owner's landlord's and tenant's bodily injury liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(3) Property damage liability insurance with limits of not less than \$25,000 for each accident.

(4) Automobile bodily injury liability insurance with limits of not less than \$50,000 for each person, and \$500,000 for each accident and property damage liability insurance with a limit of not less than \$5,000 for each accident.

(5) Food products liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(6) Professional malpractice insurance where medical, dental and other health professional services are involved.

(6) Other liability insurance not specifically mentioned when required.

(c) Each policy of insurance shall contain an endorsement providing that cancellation by the insurance company shall not be effective unless a copy of the cancellation is mailed (registered) to the Contracting Officer 30 days prior to the effective date of cancellation.

(d) A certificate of each policy of insurance, and any changed therein, shall be furnished to the Contracting Officer immediately upon receipt from the insurance company.

(e) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance company is not satisfactory for reasons that will be stated, the Contractor shall provide insurance through companies that are satisfactory to the Contracting Officer.

(f) Each policy of insurance shall contain a provision that the insurance carrier waives any rights it may have to raise as a defense the tribe's sovereign immunity from suit, but

such waiver shall extend only to claims the amount and nature of which are within the coverage and limits of the policy of insurance. The policy shall contain no provision, either express or implied, that will serve to authorize or empower the insurance carrier to waive or otherwise limit the tribe's sovereign immunity outside or beyond the coverage and limits of the policy insurance.

**Clause No. 26—Overtime.**  
Except as authorized by Section 1-12.102-5 of the Federal Procurement Regulations as in effect on the effective date of this contract or otherwise provided in this contract, the Contractor shall not perform overtime work under or in connection with this contract required to be paid, without specific written contract for which premium compensation is approval from the Contracting Officer.

**Clause No. 27—Foreign travel.**  
Foreign travel shall not be performed without the prior written approval of the Contracting Officer. As used in this clause "Foreign Travel" means travel outside the United States, its Territories and Possessions, and Canada.

**Clause No. 28—Questionnaires and surveys.**  
In the event the performance of this contract involves the collection of information upon identical items from 10 or more persons, other than Federal employees, the Contractor shall obtain written approval from the Contracting Officer, prior to the use thereof, of any forms, schedules, questionnaires, survey plans or other documents, and any revisions thereto, intended to be used in such collection.

**Clause No. 29—Printing.**  
Unless otherwise specified in this contract, the Contractor shall not engage in, nor subcontract for, any printing (as that term is defined in title I of the Government Printing and Binding Regulations in effect on the effective date of this contract) in connection with the performance of work under this contract. Provided, however, That performance of a requirement under this contract involving the reproduction of less than 5,000 production units of any one page or less than 25,000 production units in the aggregate of multiple pages, will not be deemed to be printing. A production unit is defined as one sheet, size 8 by 10½ inches, one side only, one color.

**Clause No. 30—Services of consultants.**  
Except as otherwise expressly provided elsewhere in this contract, and notwithstanding the provisions of the clause of this contract entitled "Subcontracting," the prior written approval of the Contracting Officer shall be required:

(a) Whenever any employee of the Contractor is to be reimbursed as a "consultant" under this contract; and

(b) For the utilization of the services of any consultant under this contract exceeding the daily rate set forth elsewhere in this contract or, if no amount is set forth, \$100, exclusive of travel costs, or where the services of any consultant under this contract will exceed 10 days in any calendar year. Whenever Contracting Officer approval is required, the Contractor will obtain and furnish to the Contracting Officer information concerning the need for such consultant services and the reasonableness of the fees to be paid, including, but not limited to, whether fees to be paid to any consultant exceed the lowest fee charged by such consultant to others for performing consultant services of a similar nature.

**Clause No. 31—Assignment of claims.**

(a) Pursuant to the provisions of the Assignment of Claims Act of 1940, as amended (31 U.S.C. 203, 41 U.S.C. 15), if this contract provides for payments aggregating \$1,000 or more, claims for moneys due or to become due the Contractor from the Government under this contract may be assigned to a bank, trust company, or other financing in-

stitution, including any Federal lending agency, and may thereafter be further assigned and reassigned to any such institution. Any such assignment or reassignment shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment or reassignment may be made to one party as agent or trustee for two or more parties participating in such financing. Unless otherwise provided in this contract, payment to assignee of any moneys due or to become due under this contract shall not, to the extent provided in said Act, as amended, be subject to reduction or setoff.

(The preceding sentence applies only if this contract is made in time of war or national emergency as defined in said Act and is with the Department of Defense, the General Services Administration, the Atomic Energy Commission, the National Aeronautics and Space Administration, the Federal Aviation Agency, or any other department or agency of the United States designated by the President pursuant to Clause 4 of the proviso of section 1 of the Assignment of Claims Act of 1940, as amended by the Act of May 15, 1951, 65 Stat. 41.)

(b) In no event shall copies of this contract or of any plans, specifications, or other similar documents relating to work under this contract, if marked "Top Secret," "Secret," or "Confidential," be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive the same. However, a copy of any part or all of this contract so marked may be furnished, or any information contained therein may be disclosed, to such assignee upon the prior written authorization of the Contracting Officer.

**Clause No. 32—Contract Work Hours Standards Act—overtime compensation.**

This contract, to the extent that it is of a character specified in the Contract Work Hours Standards Act (40 U.S.C. 327-330), is subject to the following provisions and to all other applicable provisions and exceptions of such Act and the regulations of the Secretary of Labor thereunder.

(a) Overtime requirements. No Contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics in any workweek in which he is employed on such work to work in excess of eight hours in any calendar day or in excess of forty hours in such workweek on work subject to the provisions of the Contract Work Hours Standards Act unless such laborer or mechanic receives compensation at a rate not less than one and one-half times his basic rate of pay for all such hours worked in excess of eight hours in any calendar day or in excess of forty hours in such workweek, whichever is the greater number of overtime hours.

(b) Violation; liability for unpaid wages; liquidated damages. In the event of any violation of the provisions of paragraph (a), the Contractor and any subcontractor responsible therefor shall be liable to any affected employee for his unpaid wages. In addition, such Contractor and subcontractor shall be liable to the United States for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic employed in violation of the provisions of paragraph (a) in the sum of \$10 for each calendar day on which such employee was required or permitted to be employed on such work in excess of eight hours or in excess of the standard workweek of forty hours without payment of the overtime wages required by paragraph (a).

(c) Withholding for unpaid wages and liquidated damages. The Contracting Officer may withhold from the Government Prime

Contractor, from any moneys payable on account of work performed by the Contractor or subcontractor, such sums as may administratively be determined to be necessary to satisfy any liabilities of such Contractor or subcontractor for unpaid wages and liquidated damages as provided in the provisions of paragraph (b).

(d) Records. The Contractor shall maintain payroll records containing the information specified in 29 CFR 516.2(a). Such records shall be preserved for three years from the completion of the contract. This requirement does not apply where the tribal contractor is the governing body of the tribe and the work is being performed by the tribal contractor or the tribe with its regular employees.

**Clause No. 33—Walsh-Healey Public Contracts Act.**

If this contract is for the manufacture or furnishing of materials, supplies, articles, or equipment in an amount which exceeds or may exceed \$10,000 and is otherwise subject to the Walsh-Healey Public Contracts Act, as amended (41 U.S.C. 35-45), there are hereby incorporated by reference all representations and stipulations required by said Act and regulations issued thereunder by the Secretary of Labor, such representations and stipulations being subject to all applicable rulings and interpretations of the Secretary of Labor which are nor or may hereafter be in effect. This requirement does not apply where the tribal contractor is the governing body of the tribe and the work is being performed by the tribal contractor or the tribe with its regular employees.

**Clause No. 34—Equal opportunity.**

Subject to the Indian Preference requirements of Clause 46 during the performance of this contract, the Contractor agrees as follows:

(a) The Contractor will not discriminate against any employee or applicant for employment because of age, religion, or sex. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their age, religion, or sex. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; payoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

(b) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractors state that all qualified applicants will receive consideration for employment without regard to age, religion or sex.

(c) The Contractor will include the provisions of paragraphs (a) through (b) in every subcontract or purchase order, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action which respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for non-compliance. Provided, however, That in the event the Contractor becomes involved in, or is threatened with litigation with subcontractor or vendor as a result of such direction by the contracting agency, the Contractor may request the United States to enter into such litigation to protect the interest of the United States.

**Clause No. 35—Civil Rights Act of 1964.**

The Equal Opportunity clause of this contract applies except where it conflicts with

## PROPOSED RULES

and 703(i) of Title VII of the Civil Rights Act of 1964, 78 Stat. 253, 257, 45 U.S.C. 200e, which pertains to Indian tribes as employers and to preferential treatment in employment given to Indians residing on or near reservations.

**Clause No. 36—Certificate of nonsegregated.**  
By signing the contract the Contractor certifies that he does not maintain or provide for his employees any segregated facilities at any of his establishments, and that he does not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. He certifies further that he will not maintain or provide for his employees any segregated facilities at any of his establishments, and that he will not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. The Contractor agrees that a breach of this certification is a violation of the Equal Opportunity clause in this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. He further agrees that (except where he has obtained identical certifications from proposed subcontractors for specific time periods) he will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity clause; that he will retain such certifications in his files; and that he will forward the following notice to such proposed subcontractors (except where the proposed subcontractors have submitted identical certifications for specific time periods):

Notice to prospective subcontractors of requirement for certifications of nonsegregated facilities.

A certification of Nonsegregated Facilities must be submitted prior to the award of a subcontract exceeding \$10,000 which is not exempt from the provisions of the Equal Opportunity clause. The certification may be submitted either for each subcontract or for all subcontracts during a period (i.e., quarterly, semi-annually, or annually).

**Clause No. 37—Convict labor.**

In connection with the performance of work under this contract, the Contractor agrees not to employ any person undergoing sentence of imprisonment at hard labor.

**Clause No. 38—Officials not to benefit.**

No member of or delegate to Congress, or resident commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

**Clause No. 39—Buy American Act supply and service contracts.**

(a) In acquiring end products, the Buy American Act (41 U.S.C. 10a-d) provides that the Government give preference to domestic source end products. For the purpose of this clause:

(1) "Components" means those articles, materials, and supplies which are directly incorporated in the end products;

(2) "End products" means those articles, materials, and supplies which are to be acquired under this contract for public use; and

(3) A "domestic source end product" means (A) an unmanufactured end product

which has been mined or produced in the United States and (B) an end product manufactured in the United States if the cost of the components thereof which are mined, produced, or manufactured in the United States exceeds 50 percent of the cost of all its components. For the purposes of this (a) (iii) (B), components of foreign origin of the same type or kind as the products referred to in (b) (ii) or (iii) of this clause shall be treated as components mined, produced, or manufactured in the United States.

(b) The Contractor agrees that there will be delivered under this contract only domestic source end products, except end products:

(1) Which are for use outside the United States;

(2) Which the Government determines are not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality;

(3) As to which the Secretary determines the domestic preference to be inconsistent with the public interest; or

(4) As to which the Secretary determines the cost to the Government to be unreasonable.

(The foregoing requirements are administered in accordance with Executive Order No. 10582, dated December 17, 1954.)

**Clause No. 40—Utilization of small business concerns.**

(a) It is the policy of the Government as declared by the Congress that a fair proportion of the purchases and contracts for supplies and services for the Government be placed with small business concerns.

(b) The Contractor agrees to accomplish the maximum amount of subcontracting to small business concerns that the Contractor finds to be consistent with the efficient performance of this contract and providing that such subcontracting is accomplished in accordance with the Indian Preference requirements of the clause entitled "Utilization of Indian Business Concerns."

**Clause No. 41—Utilization of labor surplus area concerns.**

(The following clause is applicable if this contract exceeds \$5,000.)

(a) It is the policy of the Government to award contracts to labor surplus area concerns that (1) have been certified by the Secretary of Labor (hereafter referred to as certified-eligible concerns with first or second preferences) regarding the employment of a proportionate number of disadvantaged individuals and have agreed to perform substantially (1) in or near sections of concentrated unemployment or underemployment or in persistent or substantial labor surplus areas or (2) in other areas of the United States, respectively, or (2) are non-certified concerns which have agreed to perform substantially in persistent or substantial labor surplus areas, where this can be done consistent with the efficient performance of the contract and at prices no higher than are obtainable elsewhere. The Contractor agrees to use his best efforts to place his subcontracts in accordance with this policy.

(b) In complying with paragraph (a) of this clause and with paragraph (b) of the clause of this contract entitled "Utilization of Small Business Concerns" the Contractor in placing his subcontracts shall observe the following order of preference: (1) Indian-owned firms; (2) certified-eligible concerns with a first preference which are also small business concerns; (3) other certified-eligible concerns with a first preference; (4) certified-eligible concerns with a second preference which are also small business concerns; (5) other certified-eligible concerns with a second preference; (6) persistent

ent or substantial labor surplus area concerns which are also small business concerns; (7) other persistent or substantial labor surplus area concerns; and (8) small business concerns which are not labor surplus area concerns.

Clause No. 42—Utilization of minority business enterprises.

(a) It is the policy of the Government that minority business enterprises shall have the maximum practicable opportunity to participate in the performance of Government contracts.

(b) The Contractor agrees to use his best efforts to carry out this policy in the award of his subcontracts to the fullest extent consistent with efficient performance of this contract. As used in this contract, the term "minority business enterprise" means a business, at least 50 percent of which is owned by minority group members or, in case of publicly owned businesses, at least 51 percent of the stock of which is owned by minority group members. For the purposes of this definition, minority group members are Negroes, Spanish-speaking American persons, American-Indians, American-Indians, American-Alutians, American-Aleuts, Hawaiian, and American Indians. However, to be consistent with the Indian preference provisions of Pub. L. 93-638, the last three minorities identified in the preceding sentence will be given preference over any others in accordance with the clause entitled, "Utilization of Indian Business Concerns." Contractors may rely on written representations by subcontractors regarding their status as minority business enterprises in lieu of an independent investigation.

Clause No. 43—Utilization of Indian business concerns.

The contractor agrees to give preference in purchasing and subcontracting to Indian organizations and Indian owned economic enterprises to the maximum extent that is consistent with the efficient performance of this contract.

Clause No. 44—Payment of interest on contractors' claims.

(a) If an appeal is filed by the contractor from a final decision of the Contracting Officer under the Disputes clause of this contract, denying a claim arising under the contract, simple interest on the amount of the claim finally determined owed by the Government shall be payable to the Contractor. Such interest shall be at the rate determined by the Secretary of the Treasury pursuant to Pub. L. 92-41, 85 Stat. 97, from the date the Contractor furnishes to the Contracting Officer his written appeal under the Disputes clause of this contract, to the date of (1) a final judgment by a court of competent jurisdiction, or (2) mailing to the Contractor of a supplemental agreement for execution either confirming completed negotiations between the parties or carrying out a decision of a board of contract appeals.

(b) Notwithstanding (a), above, (1) interest shall be applied only from the date payment was due, if such date is later than the filing of appeal, and (2) interest shall not be paid for any period of time that the Contracting Officer determines the Contractor has unduly delayed in pursuing his remedies before a board of contract appeals or a court of competent jurisdiction.

Clause No. 45—Indian preference in training and employment.

It is the policy of the Government to give preference and opportunities for training and employment, under contracts and subcontracts awarded pursuant to the Indian Self-Determination Act, to Indians.

The Contractor agrees to give such preference and opportunity to Indians for training and employment under this contract to the

extent that such is consistent with the efficient performance of this contract.

The Contractor further agrees to comply with any rules, regulations and reporting requirements which may be imposed by the DHEW Office for Civil Rights for purposes of insuring the proper exercise of this authority.

The Contractor agrees to insert this clause in all subcontract(s) under this contract.

Clause No. 46—Fair and equal treatment of Indian people.

(a) The Contractor agrees consistent with medical needs to make no discriminatory distinctions among Indian patients or beneficiaries of this contract. For the purpose of this contract discriminatory distinctions include but are not limited to the following:

(1) denying a patient any service or benefit or availability of a facility;

(2) providing any service or benefit to a patient which is different, or is provided on a different manner or at a different time from that provided to other patients under this contract; subjecting a patient to segregation or separate treatment in any manner related to his receipt of any service; restricting a patient in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service or benefit; treating a patient differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility membership, or other requirements or condition which individuals must meet in order to be provided any service or benefit; the assignment of times or places for the provision of services on the basis of discriminatory distinctions which may be made of the patients to be served.

(b) The Government reserves the right to terminate this contract in whole or in part whenever the Contractor fails to comply with the requirements of this clause.

Clause No. 47—Price reduction for defective cost or pricing data.

The following clause applies to all contracts where cost and pricing data is required in accordance with Pub. L. 87-653.

Price Reduction for Defective Cost or Pricing Data

(a) If the Contracting Officer determines that any price negotiated in connection with this contract or any cost reimbursable under this contract was increased by any significant sums because the Contractor, or any subcontractor pursuant to the Clause of this contract entitled "Subcontractor Cost or Pricing Data" or "Subcontractor Cost or Pricing Data-Price Adjustments," or any subcontract clause therein required, furnished incomplete or inaccurate cost or pricing data or data not current as certified in his Contractor's Certificate or Current Cost or Pricing Data, then such price or cost shall be reduced accordingly and the contract shall be modified in writing to reflect such reduction.

(b) Failure to agree on a reduction shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract.

(NOTE: Since the contract is subject to reduction under this clause by reason of defective cost or pricing data submitted in connection with certain subcontracts, it is expected that the contractor may wish to include a clause in each such subcontract requiring the subcontractor to appropriately indemnify the contractor. It is also expected that any subcontractor subject to such indemnification will generally substantially similar indemnification for defective cost or pricing data required to be submitted by his lower tier subcontractors.)

Clause No. 48—Subcontractor cost and pricing data.

The following clause should be included in all contracts, when the subcontracts of the type and size described therein are contemplated.

## Subcontractor Cost and Pricing Data

(a) The Contractor shall require subcontractors hereunder to submit in writing cost or pricing data under the following circumstances:

(1) Prior to award of any cost-reimbursed type, time and material, labor-hour, incentive, or price redeterminable subcontract the price of which is expected to exceed \$100,000; and

(2) Prior to the award of any other subcontract, the price of which is expected to exceed \$100,000, or to the pricing of any subcontract change or other modification of which the price adjustment is expected to exceed \$100,000, where the price or price adjustment is not based on adequate price competition, established catalog or market prices or commercial items sold in substantial quantities to the general public, or prices set by law or regulation.

(b) The Contractor shall require subcontractors to certify, substantially the same form as that used in the certificate by the Prime Contractor to the Government, that, to the best of their knowledge and belief, the cost and pricing data submitted under

(a) above are accurate, complete, and current as of the date of the execution, which date shall be as close as possible to the date of agreement on the negotiated price of the subcontract or subcontract change or modification.

(c) The Contractor shall insert the substance of this clause including this paragraph (c) in each of his cost-reimbursable type, time and material, labor-hour, price redeterminable, or incentive subcontracts hereunder, and in any other subcontract hereunder which exceed \$100,000 unless the price thereof is based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation. In each such expected subcontract hereunder which exceed \$100,000, the Contractor shall insert the substance of the following clause:

## Subcontractor Cost and Pricing Data-Price Adjustments

(a) Paragraph (b) and (c) of this clause shall become operative only with respect to any change or other modification made pursuant to one or more provisions of this contract which involves a price adjustment in excess of \$100,000. The requirements of this clause shall be limited to such price adjustments.

(b) The Contractor shall require subcontractors hereunder to submit cost or pricing data under the following circumstances:

(1) Prior to award of any cost-reimbursable type, time and material, labor-hour, incentive, or price redeterminable subcontract, the price of which is expected to exceed \$100,000; and—

(2) Prior to award of any other subcontract, the price of which is expected to exceed \$100,000, or to the pricing of any subcontract change or other modification for which the price adjustment is expected to exceed \$100,000, where the price or price adjustment is not based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation.

(c) The Contractor shall require subcontractors to certify, in substantially the same form as that used in the Certificate by the Prime Contractor to the Government, that, to the best of their knowledge and belief, the cost and pricing data submitted under (b) above are accurate, complete, and current as of the date of the execution, which date shall be as close as possible to the date of agreement on the negotiated price of the contract modification.

(d) The Contractor shall insert the substance of this clause including this paragraph (d) in each subcontract hereunder which exceeds \$100,000.

Clause No. 49—Penalties.

(a) Any officer, director, agent, employee or such other person connected in any capacity with this contract or any subcontract thereunder that embezzles, willfully misapplies, steals or obtains by fraud any of the money, funds, assets or property provided through the contract shall be fined not more than \$10,000 or imprisoned for not more than two years, or both; Provided, That if the amount embezzled, misapplied, stolen, or obtained by fraud does not exceed \$100, such person shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

(b) The Contractor agrees to insert this clause in all subcontracts.

Clause No. 50—Effect on existing rights.

(a) Nothing in this contract shall be construed as—

(1) affecting, modifying, diminishing, or otherwise impairing the sovereign immunity for suit enjoyed by an Indian tribe; or,

(2) authorizing or requiring the termination of any existing trust responsibility of the United States with respect to the Indian people.

## PROPOSED RULES

## 42. Advance Payment.

## 43. Effect on Existing Rights.

## 44. Federal, State, and Local Taxes.

Clause No. 1—Definitions.

As used throughout this contract, the following terms shall have the meanings set forth below:

(a) The term "Secretary" means the Secretary, the Under Secretary, or any Assistant Secretary of the Department of Health, Education, and Welfare; and the term "his duly authorized representative" means any person or persons or board (other than the Contracting Officer) authorized to act for the Secretary.

(b) The term "Contracting Officer" means the person executing this contract on behalf of the Government, and any other officer or employee who is properly designated Contracting Officer; and the term includes, except as otherwise provided in this contract, the authorized representative of the Contracting Officer acting within the limits of his authority.

(c) The term "Department" means the Department of Health, Education, and Welfare.

(d) The term "constituent agency" means the agency of the Department responsible for the administration of this contract.

(e) Except as otherwise provided in this contract, the term "subcontractor" includes purchase orders under this contract.

(f) The term "Project Officer" means the person representing the Government for the purpose of technical direction of contract performance. The Project Officer is not authorized to issue any instructions or directions which effect any increase or decrease in the cost of this contract or which change the period of this contract.

## Clause No. 2—Disputes.

(a) Except as otherwise provided in this contract, any dispute concerning a question of fact arising under this contract which is not disposed of by agreement shall be decided by the Contracting Officer, who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the Contractor. The decision of the Contracting Officer shall be final and conclusive unless, within 30 days from the date of receipt of such copy, the Contractor mails or otherwise furnishes to the Contracting Officer a written appeal addressed to the Secretary. The decision of the Secretary or his duly authorized representative for the determination of such appeals shall be final and conclusive unless determined by a court of competent jurisdiction to have been fraudulent, or capricious, or arbitrary, or so grossly erroneous as necessarily to imply bad faith, or not supported by substantial evidence. In connection with any appeal proceeding under this clause, the Contractor shall be afforded an opportunity to be heard and to offer evidence in support of his appeal. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the contract and in accordance with the Contracting Officer's decision.

(b) This "DISPUTES" clause does not preclude consideration of law questions in connection with decisions provided for in paragraph (a) above: Provided, That nothing in this contract shall be construed as making final the decision of any administrative official, representative, or board on a question of law.

Clause No. 3—Contract work hours standards act-overtime compensation.

This contract, to the extent that it is of a character specified in the Contract Work Hours Standards Act (40 U.S.C. 327-330), is subject to the following provisions and exceptions of such Act and the regulations of the Secretary of Labor thereunder.

(a) Overtime requirements. No Contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any laborer or mechanic in any workweek in which he is employed on such work to work in excess of eight hours in any calendar day or in excess of forty hours in such workweek on work subject to the provisions of the Contract Work Hours Standards Act unless such laborer or mechanic receives compensation at a rate not less than one and one-half times his basic rate of pay for all such hours worked in excess of eight hours in any calendar day or in excess of forty hours in such workweek, whichever is the greater number of overtime hours.

(b) Violation; liability for unpaid wages; liquidated damages. In the event of any violation of the provisions of paragraph (a), the Contractor and any subcontractor responsible therefor shall be liable to any affected employee for his unpaid wages. In addition, such Contractor and subcontractor shall be liable to the United States for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic employed in violation of the provisions of paragraph (a) in the sum of \$10 for each calendar day on which such employee was required or permitted to be employed on such work in excess of eight hours or in excess of the standard workweek of forty hours without payment of the overtime wages required by paragraph (a).

(c) Withholding for unpaid wages and liquidated damages. The Contracting Officer may withhold from the Government Prime Contractor, from any moneys payable on account of work performed by the Contractor or subcontractor, such sums as may be administratively determined to be necessary to satisfy any liabilities or such Contractor or subcontractor for unpaid wages and liquidated damages as provided in the provisions of paragraph (b).

(d) Subcontract. The Contractor shall insert paragraphs (a) through (d) of this clause in all subcontracts, and shall require their inclusion in all subcontracts of any tier.

(e) Records. The Contractor shall maintain payroll records containing the information specified in 29 CFR 516.2(a). Such records shall be preserved for three years from the completion of the contract. This requirement does not apply where the tribal contractor is the governing body of the tribe and the work is being performed by the tribal organization or tribe with its own regular employees.

Clause No. 4—Walsh-Healey Public Contracts Act.

If this contract is for the manufacture or furnishing of materials, supplies, articles, or equipment in an amount which exceeds or may exceed \$10,000 and is otherwise subject to the Walsh-Healey Public Contracts Act, as amended (41 U.S.C. 34-45), there are hereby incorporated by reference all representations and stipulations required by the Secretary of Labor, such representations and stipulations being subject to all applicable rulings and interpretations of the Secretary of Labor which are now or may hereafter be in effect. This requirement does not apply where the tribal contractor is the governing body of the tribe and the work is being performed by the tribal organization or tribe with its own regular employees.

Clause No. 5—Convict labor.

In connection with the performance of work under this contract, the Contractor agrees not to employ any person undergoing sentence of imprisonment at hard labor.

## PROPOSED RULES

Clause No. 6—Notice to the government of delays.

Whenever the Contractor has knowledge

that the Contractor is unable to perform the contract thereunder that embezzles, willfully misapplies, steals or obtains by fraud any of the money, funds, assets or property provided through the contract shall be fined

Contractor, its employees, or any individual or concern employed or assigned by the Contractor to originate and prepare such Data under this contract, now has, or prior to

patentable under the Patent Laws of the United States of America.

quired by (c) (5), until the Contractor shall have corrected such failure(s). The withholding of any amount or subsequent payment thereof to the Contractor shall not be

The Equal Opportunity clause of this contract applies except where it conflicts with 703(1) of Title VII of the Civil Rights Act of 1964, 78 Stat. 253 257, 45 U.S.C. 2000e, which

## PROPOSED RULES

## PROPOSED RULES

Clause No. 6—Notice to the government of delays.

Whenever the Contractor has knowledge that any actual or potential situation is delaying or threatens to delay the timely performance of this contract, the Contractor shall within ten days give notice thereof, including all relevant information with respect thereto, to the Contracting Officer.

Clause No. 7—Assignment of claims.

(a) Pursuant to the provisions of the Assignment of Claims Act of 1940, as amended (31 U.S.C. 203, 41 U.S.C. 15), if this contract provides for payment aggregating \$1,000 or more, claims for moneys due or to become due the Contractor from the Government under this contract may be assigned to a bank, trust company, or other financing institution, including any Federal lending agency, and may thereafter be further assigned and reassigned to any such institution. Any such assignment or reassignment shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment or reassignment may be made to one party as agent or trustee for two or more parties participating in such financing. Unless otherwise provided in this contract, payments to assignee of any moneys due to become due under this contract shall not, to the extent provided in said Act, as amended, be subject to reduction or setoff. (The preceding sentence applies only if this contract is made in time of war or national emergency as defined in said Act and is with the Department of Defense, the General Services Administration, the Atomic Energy Commission, the National Aeronautics and Space Administration, the Federal Aviation Agency, or any other department or agency of the United States designated by the President pursuant to Clause 4 of the proviso of section 1 of the Assignment of Claims Act of 1940, as amended by the Act of May 15, 1951, 65 Stat. 41.)

(b) In no event shall copies of this contract or of any plans, specifications, or other similar documents relating to work under this contract, if marked "Top Secret," "Secret," or "Confidential," be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive the same. However, a copy of any part or all of this contract so marked may be furnished, or any information contained therein may be disclosed, to such assignee upon the prior written authorization of the Contracting Officer.

Clause No. 8—Officials not to benefit.

No member of or delegate to Congress, or resident commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

Clause No. 9—Anti-Kickback Act.

(a) Public Law 86-695, September 2, 1960 (41 U.S.C. 51-54) among other things, prohibits the payment, directly or indirectly, by or on behalf of a subcontractor in any tier under any Government negotiated contract of any fee, gift, or gratuity to the prime contractor or any higher tier subcontractor or any officer, agent, partner or employee thereof, as an inducement or acknowledgment for the award of a subcontract or order.

(b) The provisions of Public Law 86-695, are set forth in more detail in § 1-1.320 of the Federal Procurement Regulations (41 CFR 1-1) and are applicable to this contract and any subcontracts entered into under the contract.

Clause No. 10—Penalties.

(a) Any officer, director, agent, employee or such other person connected in any capacity with this contract or any subcon-

tract thereunder that embezzles, willfully misapplies, steals or obtains by fraud any of the money, funds, assets or property provided through the contract shall be fined not more than \$10,000 or imprisoned for not more than two years, or both; Provided, That if the amount embezzled, misapplied, stolen, or obtained by fraud does not exceed \$100, such person shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

(b) The contractor agrees to insert this clause in all subcontracts.

Clause No. 11—Buy American Act.

(a) In acquiring end products, the Buy American Act (41 U.S.C. 101 a-d) provides that the Government give preference to domestic source end products. For the purpose of this clause:

(i) "Components" means those articles, materials, and supplies, which are directly incorporated in the end products;

(ii) "End products" means those articles, materials, and supplies, which are to be acquired under this contract for public use; and

(iii) A "domestic source end product" means (A) an unmanufactured end product which has been mined or produced in the United States and (B) an end product manufactured in the United States if the cost of the components thereof which are mined, produced, or manufactured in the United States exceeds 50 percent of the cost of all its components. For the purposes of this (a) (iii) (B), components of foreign origin of the same type or kind as the products referred to in (b) (ii) or (iii) of this clause shall be treated as components mined, produced, or manufactured in the United States.

(b) The Contractor agrees that there will be delivered under this contract only domestic source end products, except end products:

(i) Which are for use outside the United States;

(ii) Which the Government determines are not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality;

(iii) As to which the Secretary determines the domestic preference to be inconsistent with the public interest; or

(iv) As to which the Secretary determines the cost to the Government to be unreasonable.

(The foregoing requirements are administered in accordance with Executive Order No. 10582, dated December 17, 1954).

Clause No. 12—Rights in data.

(a) The term "Subject Data" as used herein includes writings, sound recordings, pictorial reproduction, drawings or other graphical representations, and works of any similar nature (whether or not copyrighted) which are specified to be delivered under this contract. The term does not include financial reports, cost analyses and similar information incidental to contract administration.

(b) Subject to the proviso of (c) below, the Government may duplicate, use, and disclose in any manner and for any purpose whatsoever, and have others so do, all Subject Data delivered under this contract.

(c) The Contractor agrees to and does hereby grant to the Government, and to its officers, agents, and employees acting within the scope of their official duties, a royalty-free, non-exclusive and irrevocable license throughout the world, to publish, translate, reproduce, deliver, perform, dispose of, and to authorize others so to do, all Subject Data now or hereafter covered by copyright. Provided, That with respect to such Subject Data not originated in the performance of this contract but which is incorporated in the work furnished under this contract such license shall be only to the extent that the

Contractor, its employees, or any individual or concern employed or assigned by the Contractor to originate and prepare such Data under this contract, now has, or prior to completion or final settlement of this contract may acquire, the right to grant such license without becoming liable to pay compensation to others solely because of such grant.

(d) The Contractor shall exert all reasonable effort to advise the Contracting Officer, at the time of delivery of the Subject Data furnished under this contract, of all invasions of the right of privacy contained therein and of all portions of such Data copied from work not composed or produced in the performance of this contract and not licensed under this clause.

(e) The Contractor shall report to the Contracting Officer, promptly and in reasonable written detail, each notice or claim of copyright infringement received by the Contractor with respect to all Subject Data delivered under this contract.

(f) Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government under any patent.

(g) The Contractor shall not affix any restrictive markings upon any Subject Data, and if such markings are affixed, the Government shall have the right at any time to modify, remove, obliterate or ignore any such markings.

(h) The Contractor further agrees that he will not publish, have published, or otherwise disseminate any information of whatever nature resulting from the work being performed under this contract except as may be approved by the Project Officer designated in this contract.

Clause No. 13—Reporting of royalties.

(a) The Contractor shall report in writing to the Contracting Officer as soon as practicable after execution of this contract whether or not any royalties in excess of \$250 have been paid or are to be paid by the Contractor directly to any person or firm in connection with the performance of this contract. If royalties in excess of \$250 have been paid or are to be paid to any person or firm, the report shall include the following items of information with respect to such royalties (including the initial \$250):

(i) The name and address of each licensor to whom total royalties in excess of \$250 have been paid or are to be paid;

(ii) The patent numbers, patent application serial numbers (with filing dates) or other identification for the basis of such royalties.

(iii) The manner of computing the royalties consisting of (a) a brief identification of each royalty-bearing unit or process, (b) the total amount of royalties, and (c) the percentage rate or dollars and cents amount of royalties on each such unit or process; provided that if royalties cannot be computed in terms of units or dollars and cents value, then other data showing the manner in which the licensor computes the royalties.

Clause No. 14—Authorization and consent.

The Government hereby gives its authorization and consent for all use and manufacture of any invention described in and covered by a patent of the United States in the performance of this contract or any part hereof or any amendment hereto or any subcontract hereunder (including any lower-tier subcontract).

Clause No. 15—Patent rights.

(a) As used in this clause, the term:

(i) "Invention" or "Invention of discovery" includes any art, machines, manufacture, design, or composition of matter, or any new and useful improvement thereof, or any variety of plant, which is or may be

patentable under the Patent Laws of the United States of America.

(2) "Made" when used in relation to any invention or discovery means the conception or first actual or constructive reduction to practice of such invention in the course of or under the contract.

(b) Determination of Rights to Inventions made by the Contractor shall be made by:

(1) The Assistant Secretary (Health and Scientific Affairs) who shall have the sole and exclusive power to determine whether or not and where a patent application shall be filed, and to determine the disposition of all rights in such invention, including title to and rights under any patent application or patent which may issue thereon. The determination of the Assistant Secretary (Health and Scientific Affairs) on all these matters shall be accepted as final and the provisions of the clause of this contract entitled "DISPUTES" shall not apply;

(2) The Assistant Secretary (Health and Scientific Affairs) who may, upon the request of the Contractor, determine to exercise his option to waive rights to the invention in foreign countries.

(c) The following disclosures and reports on inventions made under the contract shall be furnished by the Contractor, to the Contracting Officer:

(1) A complete written disclosure of each such invention promptly after conception or first actual or constructive reduction to practice, whichever occurs first under this contract.

(2) Information in writing, as soon as practicable, concerning the date and identity of any public use, sale or publication of such invention made by or known to the Contractor, or of any contemplated publication by the Contractor.

(3) Upon request, such duly executed instruments (prepared by the Government) and such other papers as are deemed necessary to vest in the Government the rights granted it under this clause and to enable the Government to apply for and prosecute any patent application in any country, covering each invention where the Government has the right under this clause to file such application.

(4) Interim reports on the first anniversary of the contract where extended or renewed and every year thereafter listing all inventions made during the period whether or not previously reported or certifying that no inventions were made during the applicable period.

(5) Prior to final settlement of this contract, a final report listing all such inventions including all those previously listed in interim reports, or certifying that there are no such unreported inventions.

(d) Patent Agreements shall be obtained by:

(1) The Contractor to effectuate the provisions of this clause from all persons who perform any part of the work under this contract, except such clerical and manual labor personnel as will have no access to technical data, and except as otherwise authorized in writing by the Contracting Officer.

(2) The Contractor who will insert in each subcontract or agreement having experimental, developmental, or research work as one of its purposes, a provision making this clause applicable to the subcontractor and its employees, except as otherwise authorized in writing by the Contracting Officer.

(e) Payment may be withheld under the contract either in the amount of ten percent (10%) of the amount of this contract or ten thousand dollars (\$10,000), whichever is less, if the Contractor fails to furnish the written disclosures for all inventions as required by (c) (1), or fails to deliver to the Contracting Officer the interim reports as re-

## PROPOSED RULES

quired by (c) (5), until the Contractor shall have corrected such failure(s). The withholding of any amount or subsequent payment thereof to the Contractor shall not be construed as a waiver of any rights accruing to the Government under the contract. This paragraph shall not be construed as requiring the Contractor to withhold any amounts from a subcontractor to enforce compliance with the patent provisions of a subcontract.

(f) In the event the Contractor files a patent application on any invention made in the course of or under this contract, it shall include the following statement in the first paragraph of the specification and in any patent issued thereon:

(The invention described herein was made in the course of, or under, a contract with the Department of Health, Education, and Welfare.)

Clause No. 16—Notice and assistance regarding patent and copyright infringement. The provisions of this clause shall be applicable only if the amount of this contract exceeds \$10,000.

(a) The Contractor shall report to the Contracting Officer, promptly and in reasonable written detail, each notice or claim of patent or copyright infringement based on the performance of this contract of which the Contractor has knowledge.

(b) In the event of any claim or suit against the Government on account of any alleged patent or copyright infringement arising out of the performance of this contract or out of the use of any supplies furnished or work or services performed hereunder, the Contractor shall furnish to the Government, when requested by the Contracting Officer, all evidence and information in possession of the Contractor pertaining to such suit or claim. Such evidence and information shall be furnished at the expense of the Government except where the Contractor has agreed.

Clause No. 17—Equal opportunity.

Subject to the Indian Preference requirements of Clause 26 during the performance of this contract, the Contractor agrees as follows:

(a) The Contractor will not discriminate against any employee or applicant for employment because of age, religion, or sex. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their age, religion, or sex. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; payoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

(b) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor state that all qualified applicants will receive consideration for employment without regard to age, religion or sex.

(c) The Contractor will include the provisions of paragraphs (a) through (b) in every subcontract or purchase order, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for noncompliance. Provided, however, That in the event the Contractor becomes involved in, or is threatened with litigation with subcontractor or vendor as a result of such direction by the contracting agency, the Contractor may request the United States to enter into such litigation to protect the interest of the United States.

Clause No. 18—Civil Rights Act of 1964.

The Equal Opportunity clause of this contract applies except where it conflicts with 703(i) of Title VII of the Civil Rights Act of 1964, 78 Stat. 253 267, 45 U.S.C. 2000e, which pertains to Indian tribes as employers and to preferential treatment in employment given to Indians residing on or near reservations.

Clause No. 19—Certificate of nonsegregated facilities.

By signing the contract the Contractor certifies that he does not maintain or provide for his employees any segregated facilities at any of his establishments, and that he does not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained.

He certifies further that he will not maintain or provide for his employees any segregated facilities at any of his establishments, and that he will not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained.

The term "segregated facilities" means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. He further agrees that (except where he has obtained identical certifications from proposed subcontractors for specific time periods) he will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the Equal Opportunity clause; that he will retain such certifications in his files; and that he will forward the following notice to such proposed subcontractors (except where the proposed subcontractors have submitted identical certifications for specific time periods):

Notice to prospective subcontractors of requirement for certifications of nonsegregated facilities.

A certification of Nonsegregated Facilities must be submitted prior to the award of a subcontract exceeding \$10,000 which is not exempt from the provisions of the Equal Opportunity clause. The certification may be submitted either for each subcontract or for all subcontracts during a period (i.e., quarterly, semi-annually, or annually).

Clause No. 20—Subcontracting.

The Contractor shall not enter into subcontracts for any of the work contemplated under this contract without obtaining the prior written approval of the Contracting Officer and subject to such conditions and provisions as he may deem necessary, in his discretion, to protect the interests of the Government. Provided, however, That notwithstanding the foregoing, unless otherwise provided herein, such prior written approval shall not be required for the purchase by the Contractor of articles, supplies, equipment and services which are both necessary for and merely incidental to the performance of the required under this contract. Provided, further, however, That the aforesaid right of Contractor to engage such services shall in no event be construed to permit the Contractor to subcontract with a third-party for the performance of any major function contemplated under this contract to be performed by the Contractor; and Provided, further, however, That no provision of this clause and no such approval by the Contracting Officer of any subcontract shall be deemed

## PROPOSED RULES

in any event or in any manner to provide for the incurrence of any obligation of the Government in addition to the total contract

their status as minority business enterprises in lieu of an independent investigation.

Clause No. 25—Utilization of Indian Busi-

retrocession, notwithstanding the fact that the Contractor may be a tribal organization other than the tribe.

## PROPOSED RULES

(c) When the contracting officer with the concurrence of the Area Director determines that a contractor has not taken corrective

(iv) An opportunity to present witnesses on contractor's behalf; and

property at the Government's expense or otherwise dispose of such property, or (2) effect repairs or modifications. Upon com-

## PROPOSED RULES

in any event or in any manner to provide for the incurrence of any obligation of the Government in addition to the total contract price.

Clause No. 21—Competition in subcontracting.

The Contractor agrees to select subcontractors on a competitive basis to the maximum practical extent consistent with the objectives and requirements of this contract.

Clause No. 22—Utilization of small business concerns.

(a) It is the policy of the Government as declared by the Congress that a fair proportion of the purchases and contracts for supplies and services for the Government be placed with small business concerns.

(b) The Contractor agrees to accomplish the maximum amount of subcontracting to small business concerns that the Contractor finds to be consistent with the efficient performance of this contract and providing that such subcontracting is accomplished in accordance with the Indian Preference requirements of the clause entitled "Utilization of Indian Business Concerns."

Clause No. 23—Utilization of concerns in labor surplus areas.

(The following clause shall be applicable if this contract exceeds \$5,000.)

It is the policy of the Government to place contracts with concerns which will perform such contracts substantially in or near concentrated unemployment or under-employment sections of States or in areas of persistent or substantial labor surplus, where this can be done consistent with the efficient performance of the contract and at prices no higher than are obtainable elsewhere. The Contractor agrees to use his best efforts to place his subcontracts in accordance with this policy. In complying with the foregoing and with paragraph (b) of this clause of this contract entitled "Utilization of Small Business Concerns," the Contractor in placing his subcontracts shall observe the following order of preference: (1) Indian owned firms; (2) certified-eligible concerns which are also small business concerns; (3) other certified-eligible concerns; (4) persistent labor surplus area concerns; (5) other persistent labor surplus area concerns; (6) substantial labor surplus area concerns which are also small business concerns; (7) other substantial labor surplus area concerns; and (8) small business concerns which are not labor surplus area concerns.

Clause No. 24—Utilization of minority business enterprises.

(a) It is the policy of the Government that minority business enterprises shall have the maximum practicable opportunity to participate in the performance of Government contracts.

(b) The Contractor agrees to use his best efforts to carry out this policy in the award of his subcontracts to the fullest extent consistent with the efficient performance of this contract. As used in this contract, the term "minority business enterprise" means a business, at least 50 percent of which is owned by minority group members or, in case of publicly owned businesses, at least 51 percent of the stock of which is owned by minority group members. For the purposes of this definition, minority group members are Negroes, Spanish-speaking American persons, American-Orientals, American-Indians, American-Eskimos, and American Aleuts. However, to be consistent with the Indian preference provisions of Pub. L. 93-633, the last three minorities identified in the preceding sentence will be given preference over any others in accordance with the clause entitled, "Utilization of Indian Business Concerns." Contractors may rely on written representations by subcontractors regarding

their status as minority business enterprises in lieu of an independent investigation.

Clause No. 25—Utilization of Indian Business Concerns.

The Contractor agrees to give preference in purchasing and subcontracting to Indian organizations and Indian owned economic enterprises to the maximum extent that is consistent with the efficient performance of this contract.

Clause No. 26—Indian in Training and Employment Preference.

It is the policy of the Government to give preference and opportunities for training and employment, under contracts and subcontracts awarded pursuant to the Indian Self-Determination Act, to Indians.

The Contractor agrees to give such preference and opportunity to Indians for training and employment under this contract to the extent that such is consistent with the efficient performance of this contract.

The Contractor further agrees to comply with any rules, regulations and reporting requirements which may be imposed by the DHEW Office for Civil Rights for purposes of insuring the proper exercise of this authority.

The Contractor agrees to insert this clause in all subcontract(s) under this contract.

Clause No. 27—Inspection.

The Government, through any authorized representatives, has the right, at all reasonable times, to inspect, or otherwise evaluate the work performed or being performed hereunder and the premises in which it is being performed. If any inspection, or evaluation is made by the Government on the premises of the Contractor or a subcontractor, the Contractor shall provide and shall require his subcontractors to provide all reasonable facilities and assistance for the safety and convenience of the Government representatives in the performance of their duties. All inspections and evaluations shall be performed in such a manner as will not unduly delay the work.

Clause No. 28—Changes.

The Contracting Officer may at any time, by a written order, and without notice to the sureties, if any, make changes, within the general scope of this contract, in any one or more of the following: (1) drawings, designs, or specifications; (2) place of inspection, delivery, or acceptance; and (3) the amount of Government-furnished property. If any such change causes an increase or decrease in the cost of, or the time required for performance of, this contract, or otherwise affects any other provisions of this contract, whether changed or not changed by any such order, an equitable adjustment shall be made (1) in the contract price or time of performance, or both, and (2) in such provisions of the contract as may be so affected, and the contract shall be modified in writing accordingly. Any claim by the Contractor for adjustment under this clause must be asserted within thirty (30) days from the date of receipt by the Contractor of the notification of change. Provided, however, That the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim asserted at any time prior to final payment under this contract. Where the cost of property made obsolete or excess as a result of a change is included in the Contractor's claim for adjustment, the Contracting Officer shall have the right to prescribe the manner of disposition of such property. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes". However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

Clause No. 29—Retrosession.

(a) The Indian tribe that initially requested this contract may also request its

retrosession, notwithstanding the fact that the Contractor may be a tribal organization other than the tribe.

(b) Should the tribe request retrosession of the contract and the Contractor is other than the Tribe, the Contracting Officer will notify the Contractor of the request and in consultation with the Tribe and the Contractor establish the effective date of the retrosession. The retrosession will become effective no later than 120 days after the Contracting Officer receives the Tribe's request unless the Tribe and the Contracting Officer mutually agree on a later date.

(c) Immediately after receipt of the request for retrosession and where applicable notifying the Contractor, the Contracting Officer will meet with the Contractor and mutually agree to—

(1) A plan for the orderly transfer of responsibilities;

(2) A plan for inventorying materials and supplies on hand;

(3) An accounting for funds, including but not limited to current and anticipated obligations;

(4) The cost of operation until retrosession; and,

(5) The identification of all records relating to the contract and the contracted function.

Clause No. 30—Assumption, Reassumption of Contract Programs.

(a) When the contracting officer with the concurrence of the Area Director determines that the performance of a contractor under these regulations involves (1) the violation of the rights or endangerment of the health, safety, or welfare of any person, or (2) gross negligence or the mismanagement in the handling or use of funds under the contract, including any material failure to comply with the terms and conditions of the contract, the contracting officer will, in writing, notify the contractor of such determination and will request that the contractor take such corrective action within such period of time as the Secretary may prescribe.

(b) When the contracting officer determines, after making a determination described in paragraph (a) of this section, that such action is necessary to protect contract funds which will otherwise be expended contrary to the best interests of the Indians to be served or is otherwise necessary to protect the health or welfare of the Indian population, he may, pending the prompt initiation and resolution of rescission proceedings and after reasonable written notice to the contractor, suspend, in whole or in part, federal assistance under the contract. No obligations incurred by the contractor during the period of suspension shall be allowable under the suspended contract (or portion of the contract), except that the contracting officer may, with the concurrence of the Area Director, allow necessary and proper costs which the contractor could not reasonably avoid during the period of suspension or which he determines may be necessary to preserve the project or best interests of the Indians to be served. Provided, that such costs would otherwise be allowable under this subpart. Appropriate adjustments to the payments under the suspended contract (or portion of the contract) will be made, either by withholding the payments or by not allowing the contractor credit for disbursements which it may make in liquidation of unauthorized obligations it incurs during the period of suspension. Suspensions shall remain in effect until the contractor has taken corrective action to the satisfaction of the contracting officer and the Area Director, or given assurances satisfactory to the contracting officer and the Area Director that corrective action will be taken, or until the contract is rescinded.

(c) When the contracting officer with the concurrence of the Area Director determines that a contractor has not taken corrective action (as prescribed by him under paragraph (a) of this section) to his satisfaction, he may, after the contractor has been provided an opportunity for a hearing in accordance with paragraph (d) of this section, rescind the contract in whole or in part and, if appropriate, assume or resume control or operation of the program, activity, or service involved.

(d) (1) When the contracting officer has made a determination described in paragraph (c) of this section, he shall in writing notify the contractor of such determination and of the contractor's right to request a review of such determination and of the determination described in paragraph (a) of this section. Such notification by the contracting officer shall set forth the reasons for the determination in sufficient detail to enable the contractor to respond and shall inform the contractor of its right to a hearing before a Contract Appeals Board described in subparagraph (d) (2) of this section.

(2) Contract Appeals Board shall be composed of 3 persons appointed by the Director, Indian Health Service. Such persons may not be selected from people in the immediate office of any person participating in the determinations at issue. The Board shall meet as often and for so long as necessary to render a prompt initial decision consistent with providing the contractor with a fair hearing. The Board may operate with informal rules which must at a minimum assure the following:

(1) Sufficient notice of the issues to be considered (where such notice has not previously been afforded);

(2) An opportunity to be represented by counsel;

(3) An opportunity to make a record of the proceedings;

(4) An opportunity to present witnesses on contractor's behalf; and

(5) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

The Contract Appeals Board shall make an initial written recommended decision which shall become final within 20 days unless the Director, Indian Health Service determines that a contrary decision is warranted. Any such decision by the Director of the Indian Health Service will be in writing and will be specific as to the reasons for his decision.

(e) Where the contracting officer, with the concurrence of the Area Director, determines that a contractor's performance under a contract awarded under this subpart poses an immediate threat to the safety of any person, he may immediately rescind the contract in whole or in part and, if appropriate the Area Director may assume or resume control or operation of the program, activity, or service involved. In such case, the Director, Indian Health Service, shall designate three officers or employees of the Department to serve as a hearing panel, one of whom shall be designated as chairman. No officer or employee from the immediate office of any of the officials who had a part in the decision to terminate the contract under this paragraph may be designated to serve on the hearing panel.

(1) The hearing shall be commenced within 10 days after the rescission of the contract and shall afford each party to the proceedings:

(i) Sufficient notice of the issues to be considered (where such notice has not previously been afforded);

(ii) An opportunity to be represented by counsel;

(iii) An opportunity to make a record of the proceedings;

(iv) An opportunity to present witnesses on contractor's behalf; and

(v) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(f) An opportunity to present witnesses on contractor's behalf; and

(g) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(h) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(i) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(j) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(k) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(l) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(m) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(n) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(o) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(p) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(q) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(r) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(s) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(t) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(u) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(v) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(w) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(x) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(y) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(z) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(aa) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(ab) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(ac) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(ad) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(ae) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(af) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(ag) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(ah) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(ai) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(aj) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(ak) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

## PROPOSED RULES

(iv) An opportunity to present witnesses on contractor's behalf; and

(v) An opportunity to cross-examine other witnesses either orally or through written interrogatories.

(2) The hearing panel shall, within 25 days after the conclusion of the hearing, notify all parties in writing of its decision.

(3) Such decision shall not be subject to further hearing in accordance with 42 CFR Part 50, subpart D or with 45 CFR Part 16.

(f) In any case where the contracting officer has rescinded a contract under paragraphs (c) or (e) of this section, he may decline to enter into a new contract agreement with the contractor until such time as he is satisfied that the basis for the rescission has been corrected.

Nothing in this section shall be construed as contravening the Occupational Safety and Health Act of 1970 (84 Stat. 1590), as amended (29 U.S.C. 651).

Clause No. 31—Payment of interest on contractors' claims.

(a) If an appeal is filed by the contractor from a final decision of the Contracting Officer under the Disputes clause of this contract, denying a claim arising under the contract, simple interest on the amount of the claim finally determined owned by the Government shall be payable to the Contractor. Such interest shall be at the rate determined by the Secretary of the Treasury pursuant to Public Law 92-41, 85 Stat. 97, from the date the Contractor furnished to the Contracting Officer his written appeal under the Disputes clause of this contract, to the date of (1) a final judgment by a court of competent jurisdiction, or (2) mailing to the Contractor of a supplemental agreement for execution either confirming completed negotiations between the parties or carrying out a decision of a board of contract appeals.

(b) Notwithstanding (a), above, (1) interest shall be applied only from the date payment was due, if such date is later than the filing of appeal, and (2) interest shall not be paid for any period of time that the Contracting Officer determines the Contractor has unduly delayed in pursuing his remedies before a board of contract appeals or a court of competent jurisdiction.

Clause No. 32—Government-furnished property.

(a) The Government shall deliver to the Contractor, for use in connection with and under the terms of this contract, the property described elsewhere in this contract, together with such related data and information as the Contractor may request and as may reasonably be required for the intended use of such property (hereinafter referred to as "Government-Furnished Property"). The delivery or performance dates for the supplies or services to be furnished by the Contractor under this contract are based upon the expectation that Government-Furnished Property suitable for use will be delivered to the Contractor at the times stated elsewhere in this contract or, if not so stated, in sufficient time to enable the Contractor by such time or times, the performance dates. In the event that Government-Furnished Property is not delivered to the Contractor to meet such delivery or performance dates, the Contractor shall, upon receipt thereof, notify the Contracting Officer of such fact and, as directed by the Contracting Officer, either (1) return such

property at the Government's expense or otherwise dispose of such property, or (2) effect repairs or modifications. Upon completion of (1) or (2) above, the Contracting Officer upon timely written request of the Contractor shall equitably adjust the delivery or performance dates or the contract price, or both, and any other contractual provision effected by the return, disposition, repair or modification. The foregoing provisions for adjustment are exclusive and the Government shall not be liable to suit for breach of contract by reason of any delay in delivery of Government-Furnished Property or delivery of such property in a condition not suitable for its intended use.

(b) By notice in writing the Contracting Officer may decrease the property furnished or to be furnished by the Government under this contract. In any such case, the Contracting Officer upon timely written request of the Contractor shall equitably adjust the delivery or performance date or the contract price, or both, and any other contractual provisions affected by the decrease.

(c) Title to the Government-Furnished Property shall remain in the Government. Title to Government-Furnished Property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government-Furnished Property, or any part thereof, be or become a fixture or lose its identity as personality by reason of affixation to any realty.

(d) The Government-Furnished Property, unless otherwise specifically provided herein, and except as otherwise approved or directed by the Contracting Officer in writing, shall be used exclusively for the performance of this contract.

(e) The Contractor shall maintain and administer, in accordance with sound business practice, a program for the maintenance, repair, protection and preservation of Government-Furnished Property, until disposed of by the Contractor in accordance with this clause. In the event that any damage occurs to Government-Furnished Property the risk of which has been assumed by the Government under this contract, the Government shall replace such items or the Contractor shall make such repair of the property, as the Government directs; Provided, however, That if the Contractor cannot effect such repair within the time required, the Contractor may reject such property. The contract price includes no compensation to the Contractor for the performance of any repair or replacement for which the Government is responsible; and an equitable adjustment will be made in the contract price for any such repair or replacement of Government-Furnished Property made at the direction of the Government. Any repair or replacement for which the Contractor is responsible under the provisions of this contract shall be accomplished by the Contractor at its own expense.

(f) The Contractor also agrees to maintain and administer, in accordance with sound business practice, a property control system which will provide the following: Contract number; nomenclature of item; quantity received; issued; and balance on hand; posting reference to include date received, issued unit price and location; marking or identification of item; adequate maintenance, storage, and security of Government-Furnished Property, until disposed of by the Contractor in accordance with this clause. The Contractor further agrees to receipt promptly for all Government property in a form and manner as prescribed by the Contracting Officer.

(g) The Contractor agrees to make available to authorized representatives of the Contracting Officer at all reasonable times at the office of the Contractor all of its property records under this contract, and access

to any premises where any of the Government-Furnished Property is located.

Cost or pricing data required to be submitted by his lower tier subcontractors.)

Clause No. 41—Subcontractor cost and

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(e) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(f) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(g) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(h) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(i) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(j) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(k) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(l) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(m) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(n) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(o) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance com-

pany is not satisfactory to the Contracting Officer, the Contractor shall be required to

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

## PROPOSED RULES

to any premises where any of the Government-Furnished Property is located.

(h) (i) The Contractor shall not be liable for any loss of or damage to the Government-Furnished Property, or for expenses incidental to such loss or damage except that the Contractor shall be liable for any such loss or damage (including expenses incidental thereto):

(A) Which results from willful misconduct or lack of good faith on the part of any of the Contractor's directors or officers, or on the part of any of its managers, superintendents, or other equivalent representatives who have supervision or direction of all or substantially all of the Contractor's business, or all or substantially all of the Contractor's operations at any one plant, laboratory, or separate location in which this contract is being performed; or

(B) Which results from a failure on the part of the Contractor, due to the willful misconduct or lack of good faith on the part of any of its directors, officers, or other representatives mentioned in subparagraph (A) above, to maintain and administer, in accordance with sound business practice, the program for maintenance, repair, protection and preservation of Government-Furnished Property as required by subparagraph (e) above; or

(C) For which the Contractor is otherwise responsible under the express terms of the clause or clauses designated in this contract; or

(D) Which results from a risk expressly required to be insured under some other provision of this contract, or of the schedules or task orders thereunder, but only to the extent of the insurance so required to be procured and maintained or to the extent of insurance actually procured and maintained, whichever is greater; or

(E) Which results from a risk which is in fact covered by insurance or for which the Contractor is otherwise reimbursed, but only to the extent of such insurance or reimbursement; Provided, That, if more than one of the above exceptions shall be applicable in any case, the Contractor's liability under any one exception shall not be limited by any other exception.

(i) The Contractor represents that it is not including in the price hereunder, and agrees that it will not hereafter include in any price to the Government, any charge or reserve for insurance (including self-insurance funds or reserves) covering loss or destruction of or damage to the Government-Furnished Property, except to the extent that the risk of loss is imposed on the Contractor under (i) (C) above, or insurance has been required under (i) (D) above.

(iii) Upon the happening of loss or destruction of or damage to any Government-Furnished Property, the Contractor shall notify the Contracting Officer thereof and shall take all reasonable steps to protect the Government-Furnished Property from further damage, separate the damaged and undamaged Government-Furnished Property in the best possible order, and furnish to the Contracting Officer a statement of:

(A) The lost, destroyed and damaged Government-Furnished Property;

(B) The time and origin of the loss, destruction or damage;

(C) All known interest in commingled property of which the Government-Furnished Property is a part; and

(D) The insurance, if any, covering any part of or interest in such commingled property.

The Contractor shall be reimbursed for the expenditures made by it in performing its obligations under the subparagraph (iii), to the extent approved by the Contracting Officer and set forth in a supplemental agreement or amendment to this contract.

(iv) With the prior written approval of the Contracting Officer after loss or destruction of or damage to Government-Furnished Property, and subject to such conditions and limitations as may be imposed by the Contracting Officer, the Contractor may, in order to minimize the loss to the Government or in order to permit resumption of business or the like, sell for the account of the Government any item of Government-Furnished Property which has been damaged beyond practicable repair, or which is so commingled or combined with property of other, including the Contractor, that separation is impracticable.

(v) Except to the extent of any loss or destruction of or damage to Government-Furnished Property for which the Contractor is relieved of liability under the foregoing provisions of this clause, and except for reasonable wear and tear or depreciation, or the utilization of the Government-Furnished Property in accordance with the provisions of this contract, the Government-Furnished Property (other than property permitted to be sold) shall be returned to the Government in as good condition as when received by the Contractor in connection with this contract, or as repaired under paragraph (e) above.

(vi) In the event the Contractor is reimbursed or compensated for any loss or destruction of or damage to the Government-Furnished Property, it shall equitably reimburse the Government. The Contractor shall do nothing to prejudice the Government's rights to recover against third parties for any such loss, destruction or damage and, upon the request of the Contracting Officer, shall at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including assistance in the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining recovery.

(i) Upon completion or expiration of this contract, any Government property which has not been consumed in the performance of this contract or which has not been previously disposed of in accordance with the provisions of this clause, or for which the Contractor has not otherwise been relieved of responsibility, shall be disposed of in the same manner, and subject to the same procedures, as is provided in paragraph (g) of the clause of this contract entitled "TERMINATION FOR THE CONVENIENCE OF THE GOVERNMENT" with respect to termination inventory. The proceeds of any such disposition shall be applied in reduction of any payments to be made by the Government to the Contractor under this contract, or shall otherwise be credited to the price or cost of the work covered by this contract, or shall be paid in such other manner as the Contracting Officer may direct. Pending final disposition of such property, the Contractor agrees to take such action as may be necessary, or as the Contracting Officer may direct, for the protection and preservation thereof.

(j) If the Contracting Officer determines that the interests of the Government require removal of any Government-Furnished Property, or if the Contractor determines any Government-Furnished Property to be in excess of its need under this contract, such Government-Furnished Property shall be disposed of in the same manner as covered by paragraph (i) above. In the event that the Contracting Officer requires the removal of any Government-Furnished Property under this paragraph (j) or paragraph (i) above, upon timely written request of the Contractor, an equitable adjustment shall be made in the contract price to cover the direct cost to the Contractor of such removal

and of any property damage occasioned thereby.

Clause No. 33—Examination of records by the Comptroller General.

(a) The Contractor agrees that the Comptroller General of the United States or any of his duly authorized representatives shall, until expiration of 3 years after final payment under this contract, or of the time periods for the particular records specified in Part 1-20 of the Federal Procurement Regulations (41 CFR Part 1-20), whichever expires earlier, have access to and the right to examine any directly pertinent books, documents, papers, and records of the Contractor involving transactions related to this contract.

(b) The Contractor further agrees to include in all his subcontracts hereunder a provision to the effect that the subcontractor agrees that the Comptroller General of the United States or any of his duly authorized representatives shall, until expiration of 3 years final payment under the subcontract, or of the time periods for the particular records specified in Part 1-20 of the Federal Procurement Regulations (41 CFR Part 1-20), whichever expires earlier, have access to and the right to examine any directly pertinent books, documents, papers, and records of such subcontractor, involving transactions related to the subcontract. The term "subcontract" as used in this clause excludes (1) purchase orders not exceeding \$2,500 and (2) subcontracts or purchase orders for public utility services at rates established for uniform applicability to the general public.

Clause No. 34—Indemnity and insurance.

(a) The Contractor shall indemnify and save and keep harmless the Government against any or all loss, cost, damage, claim, expense or liability whatsoever, because of accident or injury to persons or property or others occurring in connection with any program included as a part of this contract, by providing where applicable, the insurance described below:

(b) The Contractor shall secure, pay the premium for, and keep in force until the expiration of this of this contract, or any renewal period thereof, insurance as provided below. Such insurance policies shall specifically include a provision stating the liability assumed by the Contractor under this contract.

(1) Workman's compensation insurance as required by laws of the state.

(2) Owner's landlord's and tenant's bodily injury liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(3) Property damage liability insurance with limits of not less than \$25,000 for each accident.

(4) Automobile bodily injury liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident and property damage liability insurance with a limit of not less than \$5,000 for each accident.

(5) Food products liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(6) Professional malpractice insurance where medical, dental or other health professional services are involved.

(7) Other liability insurance not specifically mentioned when required.

(c) Each policy of insurance shall contain an endorsement providing that cancellation by the insurance company shall not be effective unless a copy of the cancellation is mailed (registered) to the Contracting Officer 30 days prior to the effective date of cancellation.

(d) A certificate of each policy of insurance, and any changed therein, shall be furnished to the Contracting Officer immediately upon receipt from the insurance company.

and of any property damage occasioned thereby.

Clause No. 33—Examination of records by the Comptroller General.

(a) The Contractor agrees that the Comptroller General of the United States or any of his duly authorized representatives shall, until expiration of 3 years after final payment under this contract, or of the time periods for the particular records specified in Part 1-20 of the Federal Procurement Regulations (41 CFR Part 1-20), whichever expires earlier, have access to and the right to examine any directly pertinent books, documents, papers, and records of the Contractor involving transactions related to this contract.

(b) The Contractor further agrees to include in all his subcontracts hereunder a provision to the effect that the subcontractor agrees that the Comptroller General of the United States or any of his duly authorized representatives shall, until expiration of 3 years final payment under the subcontract, or of the time periods for the particular records specified in Part 1-20 of the Federal Procurement Regulations (41 CFR Part 1-20), whichever expires earlier, have access to and the right to examine any directly pertinent books, documents, papers, and records of such subcontractor, involving transactions related to the subcontract. The term "subcontract" as used in this clause excludes (1) purchase orders not exceeding \$2,500 and (2) subcontracts or purchase orders for public utility services at rates established for uniform applicability to the general public.

Clause No. 34—Indemnity and insurance.

(a) The Contractor shall indemnify and save and keep harmless the Government against any or all loss, cost, damage, claim, expense or liability whatsoever, because of accident or injury to persons or property or others occurring in connection with any program included as a part of this contract, by providing where applicable, the insurance described below:

(b) The Contractor shall secure, pay the premium for, and keep in force until the expiration of this of this contract, or any renewal period thereof, insurance as provided below. Such insurance policies shall specifically include a provision stating the liability assumed by the Contractor under this contract.

(1) Workman's compensation insurance as required by laws of the state.

(2) Owner's landlord's and tenant's bodily injury liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(3) Property damage liability insurance with limits of not less than \$25,000 for each accident.

(4) Automobile bodily injury liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident and property damage liability insurance with a limit of not less than \$5,000 for each accident.

(5) Food products liability insurance with limits of not less than \$50,000 for each person and \$500,000 for each accident.

(6) Professional malpractice insurance where medical, dental or other health professional services are involved.

(7) Other liability insurance not specifically mentioned when required.

(c) Each policy of insurance shall contain an endorsement providing that cancellation by the insurance company shall not be effective unless a copy of the cancellation is mailed (registered) to the Contracting Officer 30 days prior to the effective date of cancellation.

(d) A certificate of each policy of insurance, and any changed therein, shall be furnished to the Contracting Officer immediately upon receipt from the insurance company.

## PROPOSED RULES

(e) Insurance companies of the Contractor shall be satisfactory to the Contracting Officer. When in his opinion an insurance company is not satisfactory for reasons that will be stated, the Contractor shall provide insurance through companies that are satisfactory to the Contracting Officer.

(f) Each policy of insurance shall contain a provision that the insurance carrier waives any rights it may have to raise as a defense the tribe's sovereign immunity from suit, but such waiver shall extend only to claims the amount and nature of which are within the coverage and limits of the policy of insurance. The policy shall contain no provision, either express or implied, that will serve to authorize or empower the insurance carrier to waive or otherwise limit the tribe's sovereign immunity outside or beyond the coverage and limits of the policy of insurance.

Clause No. 35—Fair and equal treatment of Indian people.

(a) The Contractor agrees to make no discriminatory distinctions among Indian patients or beneficiaries of this contract. For the purpose of this contract discriminatory distinctions include but are not limited to the following:

(i) Denying a patient any service or benefit or availability of a facility;

(ii) Providing any service or benefit to a patient which is different, or is provided on a different manner or at a different time from that provided to other patients under this contract; subjecting a patient to segregation or separate treatment in any manner related to his receipt of any service; restricting a patient in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service or benefit; treating a patient differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility membership, or other requirements or condition which individuals must meet in order to be provided any service or benefit; the assignment of times or places for the provision of services on the basis of discriminatory distinctions which may be made of the patients to be served.

(b) The Government reserves the right to terminate this contract in whole or in part whenever the Contractor fails to comply with the requirements of this clause.

Clause No. 36—Reports to the Indian people.

(a) The Contractor, as a recipient of Federal financial assistance, shall make reports and information available to the Indian people serviced or represented by the contractor. Such reports will reflect how the Federal assistance funds were utilized to the benefit of the Indian people served or represented as follows: (specific reporting requirements, format and methods of distribution to the Indian people will be prescribed in the scope of the contract.)

Clause No. 37—Annual reporting.

(1) For each fiscal year during which a tribal organization receives or expends funds pursuant to a contract under this Part, the tribe which requested the contract must submit a report to the Contracting Officer. The report shall include, but not be limited to, an accounting of the amounts and purposes for which the contract funds were expended and information on the conduct of the program or services involved. The report shall include any other information requested by the Contracting Officer and may be submitted as follows:

(i) When the contract is with the governing body of an Indian tribe, the tribe shall submit the report to the Contracting Officer.

(ii) When the contract is with a tribal organization other than the governing body of the tribe, the tribe has the option of having the tribal organization prepare the

report and submit it to the tribe for review and approval before the tribe submits it to the Contracting Officer.

(iii) When the contract benefits more than one tribe, the tribal organization shall prepare and submit the report to each of the tribes benefiting under the contract. Each tribe shall endorse the report before submitting it to the Contracting Officer.

(2) The annual report shall be submitted to the Contracting Officer within 60 days of the end of the fiscal year in which the contract was performed. However, the period for submitting the report may be extended if there is just cause for such extension.

(3) In addition to the yearly reporting requirement given in paragraphs (a) and (b) of this section, the tribal contractor shall furnish other report when and as required by the Contracting Officer.

Clause No. 38—Questionnaires and surveys.

In the event the performance of this contract involves the collection of information upon identical items from 10 or more persons, other than Federal employees, the Contractor shall obtain written approval from the Contracting Officer, prior to the use thereof, of any forms, schedules, questionnaires, survey plans or other documents, and any revisions thereto, intended to be used in such collection.

Clause No. 39—Printing.

Unless otherwise specified in this contract, the Contractor shall not engage in, nor subcontract for, any printing (as that term is defined in Title I of the Government Printing and Binding Regulations in effect on the effective date of this contract) in connection with the performance of work under this contract: Provided, however, That performance of a requirement under this contract involving the reproduction of less than 5,000 production units of any one page, or less than 25,000 production units in the aggregate of multiple pages, will not be deemed to be a production unit. A production unit is defined as one sheet, size 8 by 10½ inches, one side only, one color.

Clause No. 40—Price reduction for defective cost or pricing.

The following clause applies to all contracts where cost and pricing data is required in accordance with Pub. L. 87-653.

#### Price Reduction for Defective Cost or Pricing Data

(a) If the Contracting Officer determines that any price negotiated in connection with this contract or any cost reimbursable under this contract was increased by any significant sums because the Contractor, or any subcontractor pursuant to the clause of this contract entitled "Subcontractor Cost or Pricing Data" or "Subcontractor Cost or Pricing Data—Price Adjustments," or any subcontract clause therein required, furnished incomplete or inaccurate cost or pricing data or data not current as certified in his Contractor's Certificate or Current Cost or Pricing Data, then such price or cost shall be reduced accordingly and the contract shall be modified in writing to reflect such reduction.

(b) Failure to agree on a reduction shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract.

(NOTE: Since the contract is subject to reduction under this clause by reason of defective cost or pricing data submitted in connection with certain subcontracts, it is expected that the contractor may wish to include a clause in each such subcontract requiring the subcontractor to appropriately indemnify the contractor. It is also expected that any subcontractor subject to such indemnification will generally require substantially similar indemnification for defective

cost or pricing data required to be submitted by his lower tier subcontractors.)

Clause No. 41—Subcontractor cost and pricing data.

The following clause should be included in all contracts, when the subcontracts of the type and size described therein are contemplated.

#### Subcontractor Cost and Pricing Data

(a) The Contractor shall require subcontractors hereunder to submit in writing cost or pricing data under the following circumstances:

(1) Prior to award of any cost-reimbursed type, time and material labor-hour, incentive, or price redeterminable subcontract the price of which is expected to exceed \$100,000; and

(2) Prior to the award of any other subcontract, the price of which is expected to exceed \$100,000, or to the pricing of any subcontract change or other modification or which the price adjustment is expected to exceed \$100,000, where the price or price adjustment is not based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation.

(b) The Contractor shall require subcontractors to certify, substantially the same form as that used in the certificate by the Prime Contractor to the Government, that, to the best of their knowledge and belief, the cost and pricing data submitted under (a) above are accurate, complete, and current as of the date of the execution, which date shall be as close as possible to the date of agreement on the negotiated price of the subcontract or subcontract change or modification.

(c) The Contractor shall insert the substance of this clause including this paragraph (c) in each of his cost-reimbursable type, time and material, labor-hour, price redeterminable, or incentive subcontracts hereunder, and in any other subcontract hereunder which exceed \$100,000 unless the price thereof is based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation. In each such expected subcontract hereunder which exceed \$100,000, the Contractor shall insert the substance of the following clause:

#### Subcontractor Cost and Pricing Data—Price Adjustment

(a) Paragraph (b) and (c) of this clause shall become operative only with respect to any change or other modification made pursuant to one or more provisions of this contract which involves a price adjustment in excess of \$100,000. The requirements of this clause shall be limited to such price adjustments.

(b) The Contractor shall require subcontractors hereunder to submit cost or pricing data under the following circumstances:

(1) Prior to award of any cost-reimbursable type, time and material, labor-hour, incentive, or price redeterminable subcontract, the price of which is expected to exceed \$100,000; and—

(2) Prior to award of any other subcontract, the price of which is expected to exceed \$100,000, or to the pricing of any subcontract change or other modification for which the price adjustment is expected to exceed \$100,000, where the price or price adjustment is not based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation.

(c) The Contractor shall require subcontractors to certify, in substantially the same

## PROPOSED RULES

form as that used in the Certificate by the Prime Contractor to the Government, that, to the best of their knowledge and belief,

contract, other than advance payments, plus the unliquidated amount of advance payments are equal to the total estimated cost

whole or in part and the Contractor is authorized to sell or retain termination inventory acquired for or allocated to this con-

Clause No. 44—Federal, State, and local taxes.

(a) Except as may be otherwise provided in this contract, the contract price includes

## PROPOSED RULES

(2) Results in the Contractor not being required to pay or bear the burden of, or in his obtaining a refund or drawback of, any such Federal excise tax or duty which would

modification to this contract, the term "contract date" means the date of such modification.

(e) Unless there does not exist any reason-

form as that used in the Certificate by the Prime Contractor to the Government, that, to the best of their knowledge and belief, the cost and pricing data submitted under (b) above are accurate, complete, and current as of the date of the execution, which date shall be as close as possible to the date of agreement on the negotiated price of the contract modification.

(d) The Contractor shall insert the substance of this clause including this paragraph (d) in each subcontract hereunder which exceeds \$100,000.

#### Clause No. 42—Advance payment.

(a) *Amount of Advance.* At the request of the contractor, and subject to the conditions hereinafter set forth, the Government shall make an advance payment, or advance payments from time to time, to the Contractor. No advance payment shall be made (1) without the approval of the officer administering advance payments (hereinafter called the "Administering Office" and designated in paragraph (k)(4) hereof) as with all advance payments heretofore made, shall exceed the amount stated in paragraph (k)(1) hereof; and (3) without a properly certified invoice or invoices.

(b) *Special Bank Account.* Until all advance payments made hereunder are liquidated and the Administering Office approves in writing the release of any funds due and payable to the Contractor, all advance payments and all other payments under the contract shall be made by check payable to the Contractor, and be marked for deposit only in a Special Bank Account with the bank designated in paragraph (k)(2) hereof. No part of the funds in the Special Bank Account shall be mingled with other funds of the Contractor prior to withdrawal thereof from the Special Bank Account as hereinafter provided. Except as hereinafter provided, each withdrawal shall be made only by check of the Contractor countersigned on behalf of the Government by the Contracting Officer or such other person or persons as he may designate in writing (hereinafter called the "Countersigning Agent"). Until otherwise determined by the Administering Office, countersignature on behalf of the Government will not be required.

(c) *Use of Funds.* The funds in the Special Bank Account may be withdrawn by the Contractor solely for the purposes of making payments for items of allowable cost or to reimburse the Contractor for such items of allowable cost, and for such other purposes as the Administering Office may approve in writing. Any interpretation required as to the proper use of funds shall be made in writing by the Administering Office.

(d) *Return of Funds.* The Contractor may at any time repay all or any part of the funds advanced hereunder. Whenever so requested in writing by the Administering Office, the Contractor shall repay to the Government such part of the unliquidated balance of advance payments as shall in the opinion of the Administering Office be in excess of current requirements, or (when added to total advance previously made and liquidated) in excess of the amount specified in paragraph (k)(1) hereof. In the event the Contractor fails to repay such part of the unliquidated balance of advance payments when so requested by the Administering Office, all or any part thereof may be withdrawn from the Special Bank Account by checks payable to the Treasurer of the United States signed solely by the Countersigning Agent and applied in reduction of advance payments then outstanding hereunder.

(e) *Liquidation.* If not otherwise liquidated, the advance payments made hereunder shall be liquidated as herein provided. When the sum of all payments under this

contract, other than advance payments, plus the unliquidated amount of advance payments are equal to the total estimated cost for the work under this contract or such lesser amount to which the total estimated cost under this contract may have been reduced, plus increases, if any, in this total estimated cost not exceeding, in the aggregate, (including, without limitation, reimbursable costs incident to termination for cause and retrocession as estimated by the Contracting Officer), the Government shall thereafter withhold further payments to the Contractor and apply the amounts withheld against the Contractor's obligation to repay such advance payments until such advance payments shall have been fully liquidated. If upon completion, termination, or retrocession of the contract all advance payments have not been fully liquidated, the balances therefore shall be deducted from any sums otherwise due or which may become due to the Contractor from the Government, and any deficiency shall be paid by the Contractor to the Government upon demand.

(f) *Bank Agreement.* Before an advance payment is made hereunder, the Contractor shall transmit to the Administering Office, in the form prescribed by such office, an Agreement in triplicate from the bank in which the Special Bank Account is established, clearly setting forth the special character of the account and the responsibilities of the bank thereunder. Whenever possible, such bank shall be a member bank of the Federal Reserve System, or an "insured" bank within the meaning of the Act creating the Federal Deposit Insurance Corporation Act of August 23, 1935, 49 Stat. 635, as amended (12 U.S.C. 264).

(g) *Lien on Special Bank Account.* The Government shall have a lien upon any balance in the Special Bank Account paramount to all other liens, which lien shall secure the repayment of any advance payments made hereunder.

(h) *Lien on Property under Contract.* Any and all advance payments made under this contract shall be secured, when made, by a lien in favor of the Government, paramount to all other liens, upon the supplies or other things covered by this contract and on all material and other property acquired for or allocated to the performance of this contract, except to the extent that the Government by virtue of any other provision of this contract, or otherwise, shall have valid title to such supplies, materials, or other property as against other creditors of the Contractor. The Contractor shall identify, by marking or segregation, all property which is subject to a lien in favor of the Government by virtue of any provision of this contract in such a way as to indicate that it is subject to such lien and that it has been acquired for or allocated to the performance of this contract. If for any reason such supplies, materials, or other property are not identified by marking or segregation, the Government shall be deemed to have a lien to the extent of the Government's interest under this contract on any mass of property with which such supplies, materials, or other property are commingled. The Contractor shall maintain adequate accounting control over such property on his books and records. If at time during the progress of the work on the contract it becomes necessary to deliver any item or items and materials upon which the Government has a lien as aforesaid to a third person, the Contractor shall notify such third person of the lien herein provided and shall obtain from such third person a receipt, in duplicate, acknowledging, inter alia, the existence of such lien. A copy of each receipt shall be delivered by the Contractor to the Contracting Officer. If this contract is terminated in

whole or in part and the Contractor is authorized to sell or retain termination inventory acquired for or allocated to this contract, such sale or retention shall be made only if approved by the Contracting Officer, which approval shall constitute a release of the Government's lien hereunder to the extent that such termination inventory is sold or retained, and to the extent that the proceeds of the sale, or the credit allowed for such retention on the Contractor's termination claim, is applied in reduction of advance payments then outstanding hereunder.

(i) *Insurance.* The Contractor represents and warrants that he is now maintaining with responsible insurance carriers, (1) insurance upon his own plant and equipment against fire and other hazards to the extent that like properties are usually insured by others operating plants and properties of similar character in the same general locality; (2) adequate insurance against liability on account of damage to persons or property; and (3) adequate insurance under all applicable workers' compensation laws. The Contractor agrees that, until work under this contract has been completed, and all advance payments made hereunder have been liquidated, he will (i) maintain such insurance; (ii) maintain adequate insurance upon any materials, parts, assemblies, subassemblies, supplies, equipment and other property acquired for or allocable to this contract and subject to the Government lien hereunder; and (iii) furnish such certificates with respect to his insurance as the Administering Office may from time to time require.

(j) *Prohibition against Assignment.* Notwithstanding any other provision of this contract, the Contractor shall not transfer, pledge, or otherwise assign this contract, or any interest therein, or any claim arising thereunder, to any party or parties, bank, trust company, or other financing institution.

(k) *Designations and Determinations.* (1) *Amount.* The amount of advance payments at any time outstanding hereunder shall not exceed \$—.

(2) *Depository.* The bank designated for the deposit of payments made hereunder shall be:

(3) *Interest Charge.* No interest shall be charged for advance payments made hereunder. The Contractor shall charge interest at the rate of 6 percent per annum on subadvances or down payments to subcontractors, and such interest will be credited to the account of the Government. However, interest need not be charged on subadvances on nonprofit subcontracts with nonprofit educational or research institutions for experimental, research or development work.

(4) *Administering Office.* The office administering advance payments shall be the office designated as having responsibility for awarding the contract.

(e) *Other Security.* The terms of this contract shall be considered adequate security for advance payments hereunder, except that if at any time the administering office deems the security furnished by the Contractor to be inadequate, the Contractor shall furnish such additional security as may be satisfactory to the administering office, to the extent that such additional security is available.

#### Clause No. 43—Effect on existing rights.

(a) Nothing in this contract shall be construed as—

(1) Affecting, modifying, diminishing, or otherwise impairing the sovereign immunity for suit enjoyed by an Indian tribe; or,

(2) Authorizing or requiring the termination of any existing trust responsibility of the United States with respect to the Indian people.

Clause No. 44—Federal, State, and local taxes.

(a) Except as may be otherwise provided in this contract, the contract price includes all applicable Federal, State, and local taxes and duties.

(b) Nevertheless, with respect to any Federal excise tax or duty on the transactions or property covered by this contract, if a statute, court decision, written ruling, or regulation takes effect after the contract date, and—

(1) Results in the Contractor being required to pay or bear the burden of any such Federal excise tax or duty or increase in the rate thereof which would not otherwise have been payable on such transactions or property, the contract price shall be increased by the amount of such tax or duty or rate increase: Provided, That the Contractor if requested by the Contracting Officer, warrants in writing that no amount for such newly imposed Federal excise tax or duty or rate increase was included in the contract price as a contingency reserve or otherwise; or

(2) Results in the Contractor not being required to pay or bear the burden of, or in his obtaining a refund or drawback of, any such Federal excise tax or duty which would otherwise have been payable on such transactions or property or which was the basis of an increase in the contract price, the contract price shall be decreased by the amount of the relief, refund, or drawback, or the amount shall be paid to Government, as directed by the Contracting Officer. The contract price shall be similarly decreased if the Contractor, through his fault or negligence or his failure to follow instructions of the Contracting Officer, is required to pay or bear the burden of, or does not obtain, a refund or drawback of, any such Federal excise tax or duty.

(c) No adjustment pursuant to paragraph (b) above will be made under this contract unless the aggregate amount thereof is or may reasonably be expected to be over \$100.

(d) As used in paragraph (b) above, the term "contract date" means the date set for the bid opening, or if this is a negotiated contract, the date of this contract. As to additional supplies or services procured by

modification to this contract, the term "contract date" means the date of such modification.

(e) Unless there does not exist any reasonable basis to sustain an exemption, the Government, upon request of the Contractor, without further liability, agrees, except as otherwise provided in this contract, to furnish evidence appropriate to establish exemption from any tax which the Contractor warrants in writing was excluded from the contract price. In addition, the Contracting Officer may furnish evidence to establish exemption from any tax that may, pursuant to this clause, give rise to either an increase or decrease in the contract price. Except as otherwise provided in this contract, evidence appropriate to establish exemption from duties will be furnished only at the direction of the Contracting Officer.

(f) The Contractor shall promptly notify the Contracting Officer of matters which will result in either an increase or decrease in the contract price, and shall take action with respect thereto as directed by the Contracting Officer.

SUMMARY OF SPECIAL MESSAGES FOR FY 1976

OFFICE OF MANAGEMENT AND  
BUDGET

FISCAL 1976

## Proposed Rescissions and Deferrals

To the Congress of the United States:

In accordance with the Impoundment  
Control Act of 1974, I herewith report

three new deferrals totalling \$50.3 million in 1976 budget authority. In addition, I am transmitting two supplementary reports revising information provided in earlier deferrals. Only one of these supplementary reports reflects an increase—\$19.2 million—to the amount of outlays previously deferred. The five reports involve the Departments of Agriculture, Treasury, and Health, Education, and Welfare.

All of the items contained in this message are routine in nature and do not significantly affect program levels. The details of each deferral are contained in the attached reports.

## SUPPLEMENTARY REPORT

Report Pursuant to Section 1014 (c) of P.L. 93-344

This supplementary report modifies Deferral No. D76-28 transmitted in the special message of July 25, 1975, and printed in Senate Document No. 94-93.

Two changes are made in this report. A typographical error contained in the earlier report is corrected: outlay savings are estimated to be \$20.0 million in 1977 rather than \$0 previously shown. The paragraph explaining the period of deferral has been revised to more clearly state the expected time of availability of continuing resolution funds.

Deferral No: D76-28A

DEFERRAL OF BUDGET AUTHORITY  
Report Pursuant to Section 1013 of P.L. 93-344

Agency U.S. Department of Agriculture	New budget authority (P.L. 94-41) \$ 31,666,666
Bureau Agricultural Stabilization and Conservation Service	Other budgetary resources --
Appropriation title & symbol Agricultural Conservation Program - 1976 126/83315	Total budgetary resources 31,666,666
	Amount to be deferred: Part of year \$ 31,666,666
	Entire year

Grant program <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<input type="checkbox"/> Other
Type of account or fund: <input type="checkbox"/> Annual <input checked="" type="checkbox"/> Multiple-year 12/31/76 (expiration date) <input type="checkbox"/> No-year	Type of budget authority: <input type="checkbox"/> Appropriation <input checked="" type="checkbox"/> Contract authority <input type="checkbox"/> Other

## Justification

This action would defer \$31,666,666 of contract authority for the first quarter for the 1976 Agricultural Conservation Program (ACP), authorized in the Joint Resolution continuing appropriations for fiscal year 1976.

Funds were not requested for this program in the fiscal year 1976 Budget but were included in P.L. 94-41, which provides for continuing the operations of the Federal Government until such time as 1976 appropriations are enacted or sine die adjournment of the first session of the 94th Congress.

The obligation of any of these funds is being deferred until such time as both Houses of the Congress have reviewed the merits of the President's proposal to terminate the program and made a final decision on this proposal in the form of the 1976 appropriations act. When the act is approved, the President will then review the action of the Congress in light of the situation existing at that time and determine whether or not to carry out the program if funded or to request a rescission or deferral of the amounts provided.

\*These funds are expected to be replaced by regular appropriations sometime during the first quarter. Thus, deferral of these continuing resolution funds is not expected to extend beyond the first quarter.

Estimated Effects

Deferral No: D 76-51

## DEFERRAL OF BUDGET AUTHORITY

Estimated Effects

Since the Agricultural Conservation Program (ACP) is generally not announced until October, the temporary deferral of the \$31.7 million authorized for the first quarter would have no significant effect on the operation of the 1976 ACP. If a decision is made to implement the program after enactment of the appropriation bill, the outlay savings projected for FY 1977 would not be realized.

Outlay Effect (Estimated in Tenths of Millions of Dollars)

Deferral No: D 76-51

DEFERRAL OF BUDGET AUTHORITY  
 Report Pursuant to Section 1013 of P.L. 93-344

Agency Department of HEW	New budget authority (P.L. 93-554) \$1,900,000,000
Bureau Office of Education	Other budgetary resources ---
Appropriation title & symbol Elementary and Secondary Education (7560279)	Total budgetary resources 1,900,000,000
	Amount to be deferred: Part of year \$ 8,000,000
	Entire year ---
CMD identification code: 09-40-0279-0-1-501	Legal authority (in addition to sec. 1013): <input type="checkbox"/> Antideficiency Act
Grant program <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Other ---
Type of account or fund: <input checked="" type="checkbox"/> Annual Expires Sept. 30, 1976*	Type of budget authority: <input checked="" type="checkbox"/> Appropriation
<input type="checkbox"/> Multiple-year (expiration date)	<input type="checkbox"/> Contract authority
<input type="checkbox"/> No-year	<input type="checkbox"/> Other ---

Justification

When funds were appropriated to cover the Title I, ESEA\*\* FY 1976 program in the 1975 appropriation, (P.L. 93-554), no monies were provided to support a Survey planning and implementation study, which was authorized by Section 822 of the 1974 Education Amendments. In the 1976 appropriation request, a proviso was inserted authorizing the use for this study of fiscal year 1976 funds appropriated in Title I of P.L. 93-554. The House and Senate have passed the 1976 appropriation bill with the proviso as proposed. While the 1976 appropriation bill has been vetoed by the President, the Congress and the President do not disagree on the desirabilities of this study. Accordingly, the amount, \$8,000,000, for the study is proposed to be withheld from the allotment of Title I appropriations, currently being made, in order to finance this study when the 1976 appropriation bill is enacted.

Estimated Effects

By setting aside money for the section 822 study, funds are being deferred that could be allotted to the States and local educational agencies. Deferring of these funds deprives the States of an amount equal to about one-half of one percent of their allotment under the appropriation. When the appropriation bill for Fiscal Year 1976 is enacted, these funds either will be used for the study or will be distributed to the States and LEA's \*\*\*, depending upon congressional action on this deferral.

\*The President's FY 1976 Budget requests an extension of the availability of these funds through September 30, 1976.

\*\*Elementary and Secondary Education Act.

\*\*\*Local education agencies.

<input type="checkbox"/> Multiple-year (expiration date)	<input type="checkbox"/> Contract authority
<input type="checkbox"/> No-year	<input type="checkbox"/> Other

Justification

The Education Amendments of 1974, P.L. 93-380, omitted Puerto Rico and the District of Columbia from the formula distribution of funds under Title IV of the Elementary and Secondary Education Act. H.R. 3801, currently before the Congress, is a bill containing several technical amendments that would, among other items, correct this omission. HEW is now allotting the advance funded Title IV funds, provided in the 1975 appropriation, (P.L. 93-554) for Fiscal Year 1976. A reserve of \$2,968,002 for Puerto Rico and the District of Columbia is proposed in anticipation of their inclusion by technical amendment.

Estimated Effects

The withholding of \$2,968,002 to meet the contingency for Puerto Rico and the District of Columbia deprives the other States of approximately 1% of the total funds to be distributed. When a technical amendment, as contained in H.R. 3801, is enacted authorizing funds for Puerto Rico and the District of Columbia these funds will be distributed. If no authorization is provided for these jurisdictions, the funds will be distributed among the other States and territories.

\* The FY 1976 President's Budget has requested that the availability of these funds be extended through September 30, 1976.

## SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of P.L. 93-344

This supplementary report modifies Deferral No. D76-25 transmitted in the special message of July 1, 1975, and printed in House Document No. 94-206 and Senate Document No. 94-70.

This report reflects an increase of \$19.2 million in the amount reserved over the previously reported withholding (\$38.4 million) This increase represents deferral of a regularly scheduled first quarter 1976 payment to the city of Chicago. This action is in compliance with a court order. Outlay savings estimates have also been revised accordingly.

Justification \*

The State and Local Government Fiscal Assistance Trust Fund is a multi-year appropriation. In FY 1975 and FY 1976, three regularly scheduled payments to the city of Chicago were deferred by the U. S. District Court, D. C. in Civil Action No. 74-248 for noncompliance with nondiscrimination requirements.

Estimated Effect \*

The city of Chicago will not receive payments totaling \$57.6 million until further action by the court. When the appropriate court order is issued, these funds will be released.

Outlay Effect (estimated in millions of dollars)

<input checked="" type="checkbox"/> No-year	<input type="checkbox"/> Other _____

**Coverage:** The District of Columbia Appropriations Act of 1975 (P.L. 93-405) and acts of prior years provided appropriations for interest-bearing loans from the U.S. Treasury for financing the District of Columbia Government's public works program. The funds deferred have been provided in the appropriation, "Loans to the District of Columbia for Capital Outlay" and allocated to the general and special funds of the District for Columbia Government. The current budgetary resources and deferrals in each fund are:

District of Columbia Government Fund	Symbol	Total Budgetary Resources	Amount Deferred
General Fund	20X0140	63,090,500	-0-
Highway Fund	20X0139	1,400,000	-0-
Water Fund	20X0138	6,710,000	1,160,000
Metropolitan Area Sanitary Sewage Works Fund	20X0142	7,325,000	7,325,000
Sanitary Sewage	20X0141	31,585,000	30,885,000

Justification:

The loan authority appropriated to finance construction of District of Columbia Government capital facilities remains available until expended. The deferral action has been taken to insure the most effective and economical use of the funds under provisions of the Antideficiency Act (31 U.S.C. 665). The amount deferred will be made available upon completion of designs, plans and specifications for the construction projects for which the loan authority has been provided.

Estimated Effects:

There are no estimated effects because the loan funds are not expected to be drawn upon at this time.

Outlay Effects: (estimated in tenths of millions of dollars)

CUMULATIVE REPORT ON RESCISSIONS AND DEFERRALS  
September 1975

This report includes all rescissions and deferrals contained in the first two special messages transmitted to the Congress for fiscal year 1976. These messages were transmitted to the Congress on July 1, 1975, and July 25, 1975.

RESCISSIONS (ATTACHMENT A)  
Attachment A to this report shows that as of September 1, 1975, \$213.9 million in 1976 budget authority had been proposed for rescission by the President. None of the eight proposals which comprise the total had been acted on by the Congress.

DEFERRALS (ATTACHMENT B)  
As of September 1, 1975, \$3,209.4 million in 1976 budget authority was being deferred. The remainder of the deferrals are found in 10 other agencies.

Information from Special Messages  
The two special messages containing information on each of the rescissions and deferrals covered by the cumulative report are contained in the Federal Registers of:  
Wednesday, July 9, 1975 (Vol. 40, No. 132, Part V).  
Wednesday, July 30, 1975 (Vol. 40, No. 147, Part II).

JAMES T. LYNN,  
Director.

# RESOLUTION CHART

100 MILLIMETERS

**INSTRUCTIONS** The resolution chart is used to determine the resolving power of a particular photographic system. The chart consists of a series of line groups, each containing a number of lines per millimeter. The number of lines per millimeter is indicated by the number next to the line group.

When using the chart, it is necessary to determine the reduction ratio. This is done by measuring the length of the chart (which is 100 millimeters) and dividing it by the length of the film image of the chart. For example, if the film image of the chart is 20 millimeters long, the reduction ratio is 5 (100/20 = 5).

Next, the line groups in the film image are examined. The number of lines per millimeter in each group is noted. The group with the highest number of lines per millimeter that is clearly recorded is the resolving power of the system. For example, if the 7.9 group of lines is clearly recorded while the 10.0 group is not, the resolving power is 7.9 lines per millimeter. The reduction ratio is 5, and 7.9 x 5 = 39.5 lines per millimeter recorded satisfactorily. The maximum resolution is between 39.5 and 50 lines per millimeter.

The resolution of a film, as measured on the film, is a test of the entire photographic system, including lens, exposure, and other factors. These rarely utilize maximum resolution of the film. Vibrations during exposure, lack of critical focus, and exposures yielding very dense negatives are to be avoided.
